

# Vaccine Victims Share Adverse Reactions, Loss of Loved Ones

Analysis by [Dr. Joseph Mercola](#)

✓ Fact Checked

## STORY AT-A-GLANCE

- › For 15 years, I rigidly followed all vaccine guidelines, until one of my patients patiently shared a personal testimony about her vaccine-injured son, Jack
- › She opened my eyes to a reality that I was previously unaware of: that informed consent was practically nonexistent and there were serious medical risks of vaccines being covered up by pharmaceutical companies and the federal government
- › Serious adverse reactions to COVID-19 shots are occurring, but victims are being silenced and discredited
- › Vaccine mandates have led to injuries, devastation and deaths – while the brainwashing “get your vaccine now” campaign is being used to divide and conquer
- › If you want your voice to be heard, I will help you share your testimony; please share your story with us, and encourage others you know who have a story to share theirs

I want to share a very personal story and confession with you. When I was in medical school in the late '70s, I was on the front cover for the national medical student handbook. I'm sharing this photo with you that shows me administering a vaccine. At that time and for the next 15 years, I rigidly followed all vaccine guidelines.

Even when I started seeing patients at my own clinic, I never once questioned the safety of any vaccine and I rejected information from people voicing their concerns. In the late

'80s, one particularly kind patient of mine, a mother, patiently shared a personal testimony about her vaccine-injured son, Jack.

She opened my eyes to a reality that I was previously unaware of and did not want to accept. She confronted me with clinical data that I could no longer ignore. In the years that followed, I saw more and more parents who had serious fears about certain vaccines; I slowly came to the realization that informed consent was practically nonexistent and there were serious medical risks being covered up by pharmaceutical companies and the federal government.

We are now in the midst of vaccine mandates that have affected nearly every person on the planet. If you don't know someone personally who has suffered a reaction to these vaccines, you are likely in the minority.

## **Victims of Adverse Vaccine Reactions Need To Be Heard**

Sheryl Ruettgers, who is the wife of former Green Bay Packers offensive lineman Ken Ruettgers, is among those who have suffered severe adverse effects from a COVID-19 injection.

Four days after receiving the first dose of the Moderna COVID-19 shot in January 2021, Sheryl experienced a severe neurological reaction. She is still experiencing muscle pain, numbness, weakness and paresthesia that inhibit her daily activities.<sup>1</sup> When she connected on social media with others who had been injured by the injections, the private pages were shut down.

After connecting with doctors, nurses and other individuals who had experienced firsthand accounts of adverse reactions, the group wrote a letter to Dr. Janet Woodcock, acting commissioner of the U.S. Food and Drug Administration, and Dr. Rochelle Walensky, director of the U.S. Centers for Disease Control and Prevention. It stated:<sup>2</sup>

*"We deserve and strongly request transparency and acknowledgment of these vaccine reactions so that there can be a beginning to the discoveries and*

*developments in the care that we desperately need. Until acknowledgement of these adverse reactions exists, it will be impossible for people to receive care.*

*We are pleading that you make the medical community aware of these reactions so we can get the medical care that we need and hopefully recover and return to our previously healthy lives.”*

The group received no response from federal officials, which led Ken to start the website C19 Vax Reactions,<sup>3</sup> for people to share their stories. There you can read over 500 real testimonies of adverse reactions to the shots and view dozens of videos detailing individuals’ reactions.

In one example, 17-year-old Everest Romney received his first dose of the Pfizer shot, and experienced extreme swelling in his arm and neck that night.<sup>4</sup> Two days later, the previously healthy athlete was unable to lift his head due to the pain and swelling. A pediatrician dismissed the concerns, blaming them on a sports injury.

His mother insisted on a CT scan, which revealed a blood clot inside his jugular vein on the same side he got the shot. Rare blood clots in his brain were also later revealed. He ended up in the ICU, where doctors still refused to acknowledge that the clots could be linked to the shot.

## **Adverse Reactions Are Being Ignored**

Medical observations from doctors, nurses, first responders, general practitioners and other medical professionals regarding negative vaccine reactions are also included at C19 Vax Reactions. For example, Karen W. stated:<sup>5</sup>

*“I work in andrology in a fertility clinic. The rumors about the increase in miscarriages is not a rumor. It’s real. We are seeing it, and it started when the shots rolled out to the general public, in March/April.”*

Another medical professional, Dr. Katherine R., said:<sup>6</sup>

*"I have seen pulmonary emboli, DVTs, psoriasis exacerbations/ diffuse rashes, peripheral neuropathy, and CVAs from the shots. I purposefully look to see when the patient has received their shots. None of my colleagues care to look or ask. It is a nonissue for them. A potential reaction after vaccine is likely to be a coincidence, I'm told."*

Y.D., another doctor, similarly stated:<sup>7</sup>

*"I've seen 2 instances of previously localized cancers turn metastatic within a month of the second dose. I've seen 1 instance of polyarticular arthritis in an otherwise healthy mid 30's male. 1 instance of disseminated mucosal vasculitis in a 20 something female. 1 death from a rhinovirus infection after vaccination."*

This is the type of data that need to be collected, analyzed and studied in the midst of this unprecedented injection campaign, but instead those who speak out are silenced or discredited. Kyle Warner, a 29-year-old professional mountain bike racer, developed pericarditis, postural orthostatic tachycardia syndrome (POTS) and reactive arthritis following his second dose of Pfizer's COVID-19 shot.<sup>8</sup>

An ER doctor refused to believe it was an adverse reaction to the jab and instead blamed it on a "psychotic episode." At the Real, Not Rare rally held in Washington, D.C., Warner spoke before politicians to make a difference in the support level for vaccine-injured people – which is nonexistent in the U.S. – and voice opposition to vaccine mandates.

Their mission is to gain acknowledgement from elected officials and federal health agencies of vaccine adverse reactions and raise awareness within the medical community about these reactions. The Real, Not Rare website has also collected dozens of stories from people who have been injured by COVID-19 shots.<sup>9</sup> They also want to stop the denial of certain vaccine exemptions and stop vaccine mandates:<sup>10</sup>

*"Real lives are being affected by 'not so rare' consequences. Many vaccine injured individuals are seeking acknowledgment by the media and government so they can receive better healthcare and treatment. Vaccine injured individuals did their part by getting this vaccine, and now they need your help."*

## **Without Acknowledgment, 'We Don't Exist'**

In a second letter to the CDC and FDA, dated September 4, 2021, the “ever-growing group of Americans who have suffered severe and ongoing neurological adverse reactions” to the COVID-19 shots, asked for acknowledgement that these reactions exist. “Until you acknowledge us, we simply do not exist,” they wrote, adding:<sup>11</sup>

*“Doctors tell us repeatedly that if neurological reactions were occurring, the medical community would be promptly notified by the CDC and FDA ... The experts at the NIH have stated that they believe these reactions are treatable and that early intervention is key to reducing the severity and duration of these disabling reactions.*

*Given that these adverse reactions are being denied recognition, it is impossible for those who are injured to receive any early intervention and, therefore people remain hopelessly injured.”*

## **Four Categories of Adverse Events Described**

While health officials remain silent about COVID-19 injection reactions, the growing number of reports cannot be silenced forever. Board-certified internist and cardiologist Dr. Peter McCullough<sup>12</sup> detailed the nonfatal syndromes that are occurring after COVID-19 shots, which cause symptoms similar to that of long COVID in many cases. The shot-induced syndromes fall into four areas, the first being cardiac.

In addition to myocarditis, a recognized adverse reaction to the shots, atrial fibrillation in young people and pericarditis can also occur post-COVID-19 shot. The second category of shot-induced syndromes is neurologic, which causes neurological symptoms similar to those among COVID-19 long haulers, as well as additional, more serious, effects. This includes Guillain-Barré syndrome, which can be fatal, bell's palsy, seizures, persistent headaches and blood clots in the brain.

The third category is immunologic, which includes suppression of lymphocyte count and reactivation of other viral syndromes, including Epstein-Barr virus and shingles. The fourth category – hematologic – occurs about two weeks after the shot and describes vaccine-induced thrombocytopenic purpura.

Signs include bruising all over the body, bleeding from the gums and nose and dark urine. If you notice these signs in the weeks after receiving a COVID-19 injection, get to a hospital immediately.

For those suffering from these shot-induced syndromes, the Front Line COVID-19 Critical Care Working Group's I-RECOVER<sup>13</sup> protocol for long-haul COVID syndrome has been used to treat shot-induced symptoms with similar success. The protocol can be downloaded in full,<sup>14</sup> giving you step-by-step instructions on how to treat reactions from COVID-19 injections.

## **Let Your Voice Be Heard**

I am dedicated now more than ever to individuals and families who have been injured by these vaccines. They were not informed of the risks. They believed what they were told – that the vaccines were safe and effective. These people's lives have been changed forever. They have been isolated, unsupported and shamed; wading through grief in the wake of vaccine mandates established "for the greater good."

The more devoted I became in supporting the ethical principal of informed consent to medical risk taking – which includes the legal right to make voluntary decisions about getting an experimental injection – the more the attacks from the media, the government and pharmaceutical companies were compounded.

People recognize truth when they see and hear it. We are united in our philosophical opposition to government health officials intimidating, threatening and coercing citizens to violate their conscientiously-held beliefs. Censorship is pervasive; big tech has colluded with dictators and pharmaceutical companies to bury the harms occurring through these experimental vaccines, including death.

If you want your voice to be heard, I will help you share your testimony. Vaccine mandates have led to injuries, devastation and deaths – while the brainwashing “get your vaccine now” campaign is being used to divide and conquer.

One parent’s personal grief shared with me nearly 30 years ago changed my life and opened my eyes. One spark is all that is required to start a fire. There is a revolution building – a revolution for freedom to live your life without medical mandates or dictators calling the shots.

Please share your story with us, and encourage others you know who have a story to share theirs. It’s never been more important than now, for you and your family, to take control of your health.
