

### **pincince\_203**

True story....After years of casually checking out DR Mercola, I came to a decision today. I'm just simply going to stop spending so much time on the computer reading about the endless many ways of looking at all things possibly healthy helpful for a 75 yr old person (like me) and just save time by reading more deeply his info. whew. I have begun to simply trust his research and not spend the years I have left plodding through the entire internet only to decide to agree with him. I have come up with believing his healthy less is more info in the end. Well organized and well thought out and geared to thoughtful caring of the problems many folks face. I have come to believe and trust that in fact he does care. aaaah this should give the time to go for the walks he suggests for getting back into shape. Well gotta go put on my sneakers that haven't been even touched yet and march my chubby cakes around the block. Well, at least it's a start!

### **slmbluebird**

Yes, I trust Dr. Mercola. You know, I think you can sometimes just tell from looking and listening to a person and tell if they are scum. Like when I first watched a Dr. Mercola video, I thought "This guy is sincere and really believes what he's talking about and cares about people and knows what he's talking about". Unlike my first glimpse of Anthony Fauci, where my first instantaneous thought was "This guy is evil and he is lying to us".

## Aaltrude

You need haemoglobin to take up and transport the oxygen. This is an interesting report of study out of Italy which suggests the primary target of the virus is adult haemoglobin and the respiratory symptoms are the result of the subsequent reduced oxygen carrying capacity. It also explains why children are not affected to the same degree as adults and why men are more likely to have worse symptoms than women. [internetprotocol.co/hype-news/2020/04/30/covid19-explanation-hcq-works..](https://internetprotocol.co/hype-news/2020/04/30/covid19-explanation-hcq-works..)

## Guillermou

Very interesting, Aaltrude. It can be step forward. Also other comments have exposed the thesis of other researchers who have gone in that line of lack of hypoxia. In this post: COVID-19: Attacks the 1-Beta Chain of Hemoglobin and Captures the Porphyrin to Inhibit Human Heme Metabolism COVID-19 Research: Findings from a new study published by Chinese researchers, Dr. Wenzhong Liu from Sichuan University and Dr. Hualan Li from Yibin University have revealed that the Sars-CoV-2 coronavirus attacks hemoglobin in red blood cells through a series of cellular actions, which ultimately render the red blood cells unable to transport oxygen. [chemrxiv.org/articles/COVID-19\\_Disease\\_ORF8\\_and\\_Surface\\_Glycoprotein\\_I..](https://chemrxiv.org/articles/COVID-19_Disease_ORF8_and_Surface_Glycoprotein_I..) (april 2020) [www.thailandmedical.news/news/must-read-research-reveals-that-covid-19..](https://www.thailandmedical.news/news/must-read-research-reveals-that-covid-19..) (april 2020)

This link also explains Chiusolo's thesis. It also says: "The lung cells become the site of the cytokine cascade, an enormous immune response, which is responsible for the acute lung inflammation that characterizes COVID-19 pneumonia," she said. "The value of hemoglobin in the blood can be an important parameter to assess the SARS-CoV-2 infection: In men the normal value of hemoglobin (Hb) is higher than in women.

This would explain the higher incidence of COVID-19 pneumonia in men compared to women, and the lower incidence and better prognosis in children and pregnant women, where Hb values are lower due to an increased need of iron, which makes less available this' nutrition 'for the virus. " In Italy, the best scientists are beginning to comment on Chiusolo's thesis. ## Guillermou

The link published by “stoneharbor” also analyzes hypoxia and hemoglobin factor. COVID-19, ARDS & Cell-Free Hemoglobin – The ASCORBIC ACID Connection: [www.townsendletter.com/article/online-covid-19-ards-cell-free-hemoglob..](http://www.townsendletter.com/article/online-covid-19-ards-cell-free-hemoglob..) The role of cell-free heme, such as acute lung injury and acute respiratory distress syndrome, has been extensively documented. Free heme can remove nitric oxide (NO) up to 1,000 times faster than heme attached to red blood cells. The rapid loss of endothelial bioavailability of NO leads to hypertension, coagulation, and development of systemic inflammation. the essential driver of lung barrier permeability, inflammation, and epithelial injury in experimental human and animal models of ARDS. Oxygenation therapies can be promising. It is related to hypoxia and the oxidative stress described in this link, which was initially reported by datadragon:

The key to heme stability is the maintenance of iron ions in the ferrous redox state ( $Fe^{2+}$ ). In the ferric form, hemoglobin has been shown to lose heme to form free heme at substantially higher rates than ferrous forms. Unstable free heme that can be transferred to a wide range of heme acceptor membrane-based proteins and lipids, such as lipoproteins and albumin, initiate a cascade of free radical chain reactions, such as lipid peroxidation in the case of binding to lipoproteins. Oxidized lipoproteins are cytotoxic and are one of the main causes of free heme cytotoxicity and inflammatory effects. Cell-free hemoglobin in the vasculature leads to vasoconstriction and injury through removal of nitric oxide and / or oxidative reactions of these free heme.

## Cabochon

Nothing new here but thanks for your post. When an incompletely tested vaccine against COVID-19 may be foisted upon us very soon and lockdown has probably been successful in limiting the spread of infection but comes at great economic cost as well as the risk of a second wave of infection once self isolation and quarantining of the population come to an end or are eased, it seems regrettable, perhaps even medically negligent, that prophylactic drugs such as hydroxy-chloroquine or azithromycin together with adequate levels of zinc have not been used as an early treatment at least in hospital settings. Chloroquine has been in use for at least three decades.

Information about these drugs and also that the mechanism of COVID-19 causing haemoglobin to lose its oxygen transport capability has been studied and the information has been in the public domain at least since early March/April but simply ignored. How to administer oxygen therapy seems to be the key question. Both ozone therapy and hyperbaric oxygen therapy could replace ventilators which statistically are high risk. The main take home message from this appears to be - take your supplements especially vitamin C powder as a bare minimum and avoid hospitals at all costs but be aware of the possibility in sick people of sepsis and its symptoms.

[chemrxiv.org/articles/COVID19\\_Disease\\_ORF8\\_and\\_Surface\\_Glycoprotein\\_In..](https://chemrxiv.org/articles/COVID19_Disease_ORF8_and_Surface_Glycoprotein_In..)

## NewlandsWanderer

A really helpful article from Dr. Mercola. One of the issues with ventilators was that hospitals would get more money if a patient was on a ventilator. Some of the decisions where health and money come into conflict show that human health is not always the priority. So I wonder how can we be prepared and protected in the future battle against the vaccine agenda? First point: – how does any vaccinator know the state of a person's immune system?. It is well known that those with a compromised immune system should NOT be vaccinated. If they are forced could this be seen legally as abuse, violent assault and possibly Murder. How can there be NO LIABILITY for this??! Any lawyers on site?

Could someone like Robert F Kennedy Jnr make a short video which would challenge in clear medical lawyer terms the illegality and dangers of forced vaccinations and put the onus and liability on the court or police or government. He has already shown that the main vaccine makers are convicted felons!! How can the WHO, GAVI, and the top human health organisations have been allowed to be commandeered by private individuals masquerading as benefactors to pursue their own Eugenics agenda? How can this ever be legal? A private company with personal ambition taking over a World Human Health Organization. This is malevolence dressed up as benevolence. Can this be challenged in court??.

According to RFK Jnr, Gates and his stooges have already knowingly put mercury in children's vaccines in Africa when this is banned in US & Europe, as well as knowingly made a million women sterile in another country. The vaccinators must be stripped of their NO LIABILITY protection. This no liability breaks all laws. Could a court do this? These moneyed control freaks need to be attacked at their weakest points. But where is their weakest point?? Thank heavens for sites like this where people's health is always the first priority.

## Guillermou

YES, NW, Propaganda, by the way, is how the ruling classes impose a compulsory vaccine and how the billionaire CEOs of multinational Big Pharma, Big Medicine corporations (and Bill Gates, CDC, WHO, etc., etc.) ) has parents voluntarily vaccinate their immunocompromised vulnerable babies with vaccines that have never undergone FDA-approved double-blind clinical trials to establish safety or efficacy. Evidence of knowledge of vaccine harm is recognized. One more:

“U.S. military documents show that, in 1992, the CDC’s current Director Robert Redfield and his then-assistant, Deborah Birx—both Army medical officers—knowingly falsified scientific data published in the New England Journal of Medicine fraudulently claiming that an HIV vaccine they helped develop was effective. They knew the vaccine was worthless. Redfield now runs the agency charged with mandating COVID vaccines. Birx, a life-long protégé to both Redfield and Anthony Fauci, served on the board of Bill Gates’ Global Fund. Redfield, Birx and Fauci lead the White House coronavirus task force”. [childrenshealthdefense.org/news/redfield-and-birx-can-they-be-trusted-..](https://childrenshealthdefense.org/news/redfield-and-birx-can-they-be-trusted-..) (may 05, 2020)

## birdhumblingsong

Hi Newlands, Trump has created a new branch of hhs called Conscience and Religious Freedom Division in the Health and Human Services (HHS) Office for Civil Rights. You can read more about it at [bolenreport.com/president-trump-drops-nuclear-bomb-vaccine-mandates/](https://bolenreport.com/president-trump-drops-nuclear-bomb-vaccine-mandates/) Here is something extremely concerning about the new vaccine. This was co written by Barbara Loe Fischer. 5g can also do this. [thevaccinereaction.org/2020/04/inovio-covid-19-vaccine-uses-electricit..](https://thevaccinereaction.org/2020/04/inovio-covid-19-vaccine-uses-electricit..) Believe it or not Bill Gates has patented the enzyme to do this and called it Luciferase. This will manipulate our dna. So after a millenia of allowing themselves to be treated like livestock, the ignorant masses will now be tattooed like livestock. What people do not realize is any law in opposition to our Constitution is null, void, and without effect.

The people do not understand jurisdiction and lawful authority. Legal is evil and of deceit. Lawful is in alignment with our God given rights, guaranteed by our founding documents. I did my best to help the people of California remove Sen Pan from office using the template our founders sacrificed their lives for, but they listened to the lawyers instead, who did nothing for them. These vaccine mandates even violate the Nuremberg codes. The WHO and UN have no lawful jurisdiction over American citizens. To understand the way the Supreme Law of the Land works, Cal of Inpower, who has been helping people successfully fight smart meters for several years now, explains very succinctly what has been purposely hidden. You can watch this at [www.youtube.com/watch](https://www.youtube.com/watch) It is way past time for people to fully educate themselves, and then exercise their God given rights and restore our Republic.

## Lakhana13

Back in 1993 - 94 I worked as a medical assistant to a doctor using ozone therapy in all manner of health conditions. I was the one doing the O3 pushes, O3 intravenous drips and what is called "Auto-heme therapy" - it was similar to the intravenous therapy with the added benefit of the patient's blood was drawn into a crystal syringe and rotated in an ultraviolet device cleansing the blood of any pathogenic organisms. I watched patient's health dramatically improve and more had actual "cures" from the therapies employed.

When the Ebola outbreak occurred in Sierra Leone, Dr Robert Rowan shipped medical grade ozone devices to administer ozone therapy to the doctors, staff and patients. They had to go through France at the time. Turns out the US gov blocked the shipment from France and confiscated the devices. So much for freedom.

## Guillermou

A very well structured summary, RANDALL. Elderly people, metabolic diseases such as diabetes and cardiovascular diseases increase the risk of anemia, which aggravates hypoxia in COVID-19 patients. Hypoxia causes glucose intolerance. One of the factors that mediate this effect could be a high release of epinephrine. [www.atsjournals.org/.../rccm.200308-12000C](http://www.atsjournals.org/.../rccm.200308-12000C) (2003) Hypoxia also stimulates the inflammatory response of macrophages and inhibits adipocyte differentiation from preadipocytes. Hypoxia has a generalized effect on the metabolism of adipocytes and on the general function of adipose tissue, which underpins the inflammatory response in tissue in obesity and the subsequent development of diseases associated with obesity, particularly type 2 diabetes. and metabolic syndrome. [www.cambridge.org/core/journals/british-journal-of-nutrition/article/h..](http://www.cambridge.org/core/journals/british-journal-of-nutrition/article/h..) (2009) Type 2 diabetes at least doubles the risk of anemia. Anemia in patients with diabetes, both type 1 and type 2, is a frequent clinical finding.

The mechanisms of anaemia are multifactorial and often not very well understood. Iatrogenic causes, including oral antidiabetic drugs, ACE inhibitors and ARBs, and renal insufficiency are the major causes of anaemia in patients with type 2 diabetes. In patients with type 1, the cause is often an associated autoimmune disease, and screening for autoimmune gastritis, pernicious anaemia, Hashimoto's thyroiditis, coeliac disease and Addison's disease is recommended. Furthermore, anemia was associated with a higher rate of development of type 2 diabetes. [www.sciencedirect.com/science/article/abs/pii/S1056872716311035](http://www.sciencedirect.com/science/article/abs/pii/S1056872716311035) (2017) [papers.ssrn.com/.../papers.cfm](http://papers.ssrn.com/.../papers.cfm) (2019)

Posted On 05/06/2020

## araunapalm

I heard yesterday (not corroborated) that hospitals get \$13,000 of Medicare per Covid patient but \$39,000 when they were on a ventilator. Its abuse to put old people on a ventilator to get more money from government..... but those who put these policies or protocols in place are more to blame.

Posted On 05/06/2020

---

## Maritt

thats correct

Posted On 05/06/2020

---

## educatedmind

Yes, I have heard that also from a reliable source. This is more or less the same game plan used with H1N1. The real pandemic is the health conditions fostered by big chemical and big Agra then treated by big pharma. People can fix that, but they have to change to do so.

Posted On 05/06/2020

---

## mky32022

Medicare will reimbursement the hospital an extra \$13,000 for every Medicare patient diagnosed with Covid 19, that the hospital treats. Medicare will reimbursement an extra \$39,000 for every diagnosed Covid 19 patient that is put on a vent & or dies at that hospital. This money is in addition to the normal billing that the hospital receives from Medicare.

Posted On 05/06/2020

---

## Maritt

You can't make this up. Prof Ferguson, using mathematical modelling predicted that millions would die in the UK and 2m in the US. His advice lead to the UK Government's decision to implement the draconian lockdown and with no plan on how to exit this lockdown. Last night Prof Ferguson made the front page of UK newspapers and even the New York times as he broke the lockdown rules by getting his mistress to meet him at least twice during the lockdown period. If you are a normal citizen the police will take action, however the police has just stated that "while his is behaviour is plainly disappointing, officers do not intend to take any further action because he has accepted that he made an error of judgement and has taken responsibility." [lockdownsceptics.org/.../latest-news-22](https://lockdownsceptics.org/.../latest-news-22)

Posted On 05/06/2020

---

## slmbluebird

Maybe the UK still believes in aristocracy...Oh, that's right, they DO! That explains why some have rights that others don't. I totally agree with your disgust. If you want an example of more draconian lockdowns, take a look at Communist China where they put patients in an apartment building and then weld the doors SHUT. They must have studied Hitler and the SS, bc that's one of the things they did with Jews and others who wouldn't go along with their "final solution". Sick, evil minds,,,,the Communist leaders need a vaccine for their sadistic sickness and I think it might involve a well-placed bomb.

Posted On 05/06/2020

---

## Luvvvy

Good one Maritt. From your link: 'in his statement to the Telegraph, Professor Ferguson said: "I acted in the belief that I was immune, having tested positive for coronavirus, and completely isolated myself for almost two weeks after developing symptoms." ... So not only does Professor Lockdown think you do develop immunity after recovering from COVID-19, but you don't even need to take an antibody test to prove it. -- If only all of us who think we've had it were free to act in the same way.' AND 'If you are suffering from "coronaphobia", this is a must read Twitter thread by Dr Muge Cevik, an infectious diseases researcher at St Andrew's University. She cites numerous research studies suggesting that a close and prolonged exposure to someone infected with the virus is necessary for transmission, making a nonsense of social-distancing rules.

Posted On 05/06/2020

---

## farmercist

So how many were pure Covid 19 deaths and how many were killed by withholding the hydroxychloroquine/zinc cure and/or putting people on ventilators? Also how many were called death by Covid 19 that died from some other reason? The number would be extremely small.

Posted On 05/06/2020

---

## Ambereyes

These are important questions. We have learned about how to stimulate our immunologic system with zinc, quercetin, B3, C, D3, NAC... It would be interesting to know more about the efficiency of this prophylactic protocol, as it can prevent us from getting this virus and other diseases in the future.

## Krofter

Here we have a situation where insurance companies are dictating who lives and who dies. If an insurance company does not cover alternative treatments like HBOT or ECMO but does cover being put on a ventilator, and the doctor abides by the dictates of the insurance company and puts the patient on a ventilator and the patient dies because of it, then the insurance company should be held liable. Of course, this raises the obvious question; how did we get to the point where insurance companies are dictating medical practice? That gets into a whole 'nuther tangled web, which goes directly to how messed up the medical/industrial/insurance complex is in the US.

Posted On 05/06/2020

---

## rrealrose

Hey Krofter, Thanks, similar to what I have been thinking ever since I saw the top video a few weeks back. We no longer have healthcare, instead high level actuarials at insurance companies are ruling on medical decisions...its been this way for years now, ever since the first HMOs were formed in the 1980's, ostensibly to save companies medical costs for their employees. Its been reported promised cost savings only worked for the first 3 or 4 years. Health plan costs have been rising ever since! (As an aside, this economic shut down also shows, hopefully, a fatal weakness in company-sponsored health plans, as people get laid off from work are also losing insurance coverage.)

With a shadowy, opaque system, with actuarials and other hospital administrators determining our fate, then by all means Big Insurance should be held liable, and also explain why big insurance companies and private hospitals can justify providing such high remuneration to their CEO's in the double digit millions per year. Combine this with huge administrative red tape, inefficiencies and waste, Big Insurance appears firmly planted, standing between standard doctors (or the hospitals they work for) and their patients.

## **ReginaGN**

2nd part: The medical doctor who developed this therapy (Dr. Giuseppe De Donno - [www.facebook.com/docgiuseppedonno](https://www.facebook.com/docgiuseppedonno) ) was called on the phone already by the UN and from 18 countries, including also by the US Undersecretary for Health, which I hope will make available this cure also in the USA. Unfortunately in Italy this treatment is opposed, because the government is waiting for Bill Gates' sacred vaccine and they do not want to let the public know that there are already valid treatments. In Italy, hospitals have been almost completely emptied. The numbers they still say in the mainstream media every day are fabricated numbers for fear mongering. Best regards and good health for all :-)

Posted On 05/06/2020

---

## ReginaGN

Hi everyone, I'm writing from Italy. I am not a doctor but I follow medical news and the discoveries of doctors in Italy a lot. In March the doctors here discovered (at the Bergamo hospital) that the cause of death for Covid patients is NOT ARDS, but "disseminated intravascular coagulation" (DIC), generalized thromboembolism, especially pulmonary thromboembolism. The problem is not the lungs, but the blood circulation, because the blood does not reach the lungs due to the clotting caused by the coronavirus. [crtalive.it/2020/04/nocera-inferiore-eparina-la-gestione-domiciliare-de..](https://crtalive.it/2020/04/nocera-inferiore-eparina-la-gestione-domiciliare-de..)

Here in Italy they apply two treatments (but not everywhere): c1) drug therapy: hydroxychloroquine, azithromycin, and low molecular weight heparin, these drugs usually block the progression of the disease, these drugs are given as soon as the first symptoms occur, even at home. c2) hyperimmune plasma therapy: Prof. Giulio Tarro (is an old professor, a pupil of Sabin) proposed to use it, a therapy already used also in the SARS and Ebola epidemics, the purified plasma of the healed patients is used (300ml or 2x300ml), it also works in the last phase of the disease, when the patient is already in desperate conditions, just before the exitus. If a patient is given plasma therapy, he heals in 24-48 hours.

They have experienced it in the hospitals of Mantua and Cremona, in those hospitals no one has died since using this therapy. They also used it on a woman pregnant at the 6th month who could not be given other drugs and had been transferred to the Mantua hospital already in desperate conditions, and with plasma therapy she recovered in a few days. This cure is completely without side effects (and follows the evolution of the virus, not as the future prepackaged vaccine that would not follow the mutations of an RNA virus). cThe medical doctor who developed this therapy (Dr. Giuseppe De Donno - [www.facebook.com/docgiuseppedonno](https://www.facebook.com/docgiuseppedonno)) - 2nd part to follow...

## docww

My wife went to medical school with John Ioannidis in Greece. John was number 1 in their class and my wife was number 2. John and I occasionally exchange emails and he is truly brilliant.

## TrishMc

Dr. Richard Levitan from NH volunteered at Bellevue Hospital in NY and reported the same thing as Dr. Kyle-Sidell in an interview 2 weeks ago, [www.cbsnews.com/news/coronavirus-pulse-oximeter-device-oxygen-levels/](http://www.cbsnews.com/news/coronavirus-pulse-oximeter-device-oxygen-levels/) . He urged all people to obtain an oximeter, which measures oxygen levels in the blood and is relatively inexpensive (CVS etc.), and use it as an early indicator of low oxygen levels. He observed that people were coming in with oxygen levels at 50%( normally 94% to 100%) which is equivalent to the levels in high altitudes of places like Mount Everest, and was astounded that they were even able to speak. His opinion was that their oxygen levels were dropping slowly and the brain was compensating until they were at a point of hypoxia and the lungs became stiff and inoperable. He also noted that the ventilator were not effective for these reasons and they used a different approach (oxygen etc).

## mar6915

Good advice. I carry one with me all the time for the heart rate. 50% is awfly low. You think someone would be telling all.

## eurochic2019

It is important to remember that Sars COVID-2 has expressed itself differently in each person. Treatment depends on several factors that include location of patient, hospital resources, critical care expertise, supplies available, patient co-morbidities, census of critical patients in the admitting hospital and how far along in the COVID-19 disease the patient is. I know several critical care providers that have treated COVID-19 patients all over the United States. All of the factors above and I am sure much more, determined patient's outcomes. In fact, what I know more than anything is that patients in fact recovered from COVID-19 after receiving an early diagnosis, treatment with known drugs and then if needed advanced medical care that included ventilation and sepsis treatment. I think it is important to remember that those treating on the frontlines in Northern Italy, Madrid and NYC dealt with over-whelming numbers of patients needing advanced medical care and management, not just a ventilator. In these areas the medical systems were overwhelmed with the need of this advanced care that is very specialized. Let's not forget that the supplies needed to protect and treat at this high of demand was also not available. If there were enough supplies, enough advanced medical personnel to treat, enough funds and enough education this whole pandemic would have turned out differently. Dr. Mercola , I have read your articles for years and I have learned so much from you. Please be wise about what you post because to the general public and to those who do not know critical care this type of information can be dangerous.

## educatedmind

what you don't know is that everyone is an individual. There is no one size fits all. Much of the equipment you refer to was not needed except protective clothing and masks for the staff. The ventilators are a classic example. Not identifying the organism at all is a major factor. Now tests are used that were not designed to test anything but DNA and some of those tests being contaminated with the "virus" being looked for cloud the picture. How do you diagnose something that has never been identified?

## **miraculae**

When we drive we are expected to aggressively survey our surroundings. Our lives depend upon doing so. Somewhere along the line we stopped aggressively examining those who regulate our lives. It is a huge matter of life and death. We have a lot to correct. If someone does not have the background to juggle all the moving parts of an article, comments, and more articles can fix that. Lack of information is always the problem. Any one person on this site seeking to understand may well be in a position to save another's life down the road. I believe in educating and clarifying everything. Bless Trump's heart for slipping in zinc and hydroxyquinone over Fauci's head

## **billstri**

Here is a simple experiment. We have thousands of airplanes doing nothing right now. We could take a wide body jet and remove all of the passenger seats and add beds or use a cargo jet. Those with COVID-19 that become in need of hospitalization could be put in the jet along with the health care providers and seal it off and pressurize it to 1.5 atmospheres pressure, or a pressure the jets are designed to take and leave it pressurized for 12-hour shifts. Then twice per day, lower the pressure so that people and supplies can be moved in and out. It is routine for jets to fly up to 35,000 feet with their cabins being precisely maintained to a pressure equivalent to 6,000 feet. Compared to Scuba, 1.5 atmospheres is probably the pressure at around 15 feet of water below the surface of a swimming pool which is no big deal. If these doctors are credible, this seems like a worthwhile experiment. If it prevents the need for ventilators, it could save tens of thousands of lives and lower the risk of COVID-19 to the level of a very mild case of the flu.

## **Govindha**

Considered oxygen can, under certain biologic circumstances, promote intensive free radical cascade. I have observed that some patients under oxygen treatment do better taken off the oxygen therapies.

## Bigfletch

All the details of how better solutions are being ignored are linked to 9 11.!!! Many of the decision makers are not evil per se, but are acting out of fear of consequences. The three towers were brought down with technology outside of realm of normal weaponry ( see Dr Judy Wood's video " Where did the towers go"). She wisely doesnt talk of the political aspects. It is the threat of the use of this tech. which has the decision makers following orders. The impending meeting of the International Monetary Fund in Davos 26th Jan 01 chaired by Al Gore and Prince Charles is the next step in the re setting of the world economic system, which could only be implemented under the circumstances so ingeniously created.

## healthfreedomfighter

Physician and Minnesota state senator, Scott Jensen, told me that hospitals, who are suffering very deep financial losses, are incentivized by Medicare to label as many patients as possible "COVID-19," and to put them on ventilators. Jensen stated that a patient on Medicare, diagnosed with straight pneumonia, would bring a \$4600 payment to the hospital. The same patient, labeled "COVID-19 pneumonia," would bring \$13,000. And if that patient is put on a ventilator: \$39,000. from Jon Rappoport's blog

## Almond

"President Trump declared he is in charge of "Operation Warp Speed", a program to quickly develop a COVID-19 vaccine, and he virtually endorsed a blank check to produce 300-million vaccines by next January, That number is adequate for the entire US population, so the plan is clear. His team also is brainstorming advertising strategies to inspire even skeptics to want a vaccine." - -G. Edward Griffin

## Agelbert

EXCELLENT article and videos posted by Dr. Mercola. 👍 I agree that Putting a person with COVID-19 on a ventilator is a very big mistake because, though COVID-19 patients have ARDS symptoms, they DO NOT actually have ARDS! WHY? 🚫 Because there is no ACE2 Blocked Receptor CAUSED REDUCTION IN ALVEOLI SURFACTANT IN NORMAL ARDS! Let me explain. Whether it is from the SARS-CoV-2 virus, and/or some retrovirus latent in us that works with it to cause the lethal cytokine storm (i.e. excessive inflammatory immune response that causes your own immune system to attack healthy cells and kills you if it is not stopped), most people are not aware of an important detail about that lung damaging process that relates to the alveoli.

Yes, the ACE2 receptor on certain lung cells (NOT the alveoli) is attacked to gain entry into said cell and enable the virus to replicate. BUT, something else happens at the same time. Those ACE2 receptors normally dock with ACE (Angiotensin Converting Enzyme) to lower the blood pressure. With the receptor blocked by the virus, blood pressure does go up, but that ain't all. When all those ACE proteins routinely dock on the cell ACE2 receptors normally, the lung cell produces surfactant. That is a fancy name for a soaplike substance. NO, it isn't soap. However, the analogy is good because it allows us to think of soap bubbles, which don't burst right away when you blow the bubbles because of surface tension surfactant.

You can blow water with not enough soap all day long through the ring and not get soap bubbles. Any child knows that. Well, when our lung cells are not putting out enough surfactant to adequately coat their alveoli neighbors, the alveoli cannot interchange oxygen well. WHY? Because a lot of them collapse like those soap bubbles without enough soap. Then it gets even uglier. ## Maritt

Exciting developments with Simon Dolan's lawsuit against the UK Government's lockdown. Philip Havers QC has joined the team. Havers, a barrister and Deputy High Court Judge who specialises in public law, human rights and public inquiries, will be helping Dolan mount a challenge against the lawfulness of the Government's restriction of civil liberties. ## **NewlandsWanderer**

That's great news Marrit. The lock-down could be slowly killing more people than the virus, crushing people's dreams, draining their finances, breaking people's hearts and blasting their immune systems with fear and depression.. This lock-down is based on computer modelling by Neil Ferguson of Imperial College - a man whose previous attempts at computer modelling have been shown to be very suspect to say the least. Big donor to Imperial College - Bill Gates - who wants the lock-down to continue so he can peddle his vaccines

## **11sweetie11**

vents are not working d/t the virus is attacking the heme cells that deliver O2. remember there is also heme in cytochrome C oxidase in your mitochondria that is also being attacked. If you add HBOT Tx with poor functioning mito you will increase ROS and inflammation which may add to the over reaction of the immune system

## jdarnall64

Sadly these truths mentioned here may go unheeded by mainstream medicine. Many need to be treated by more as mentioned about vitamin C and Melatonin. We also must recognize the fact that this whole mess has been scripted by the those like Dr Fauci and others. This shutdown goes against the normal way to deal with any virus and that is to keep the government out of our health issues. The collapse of our nation will be more deadly than the corona virus. Pray!

## athlete

I fear for the future of my children and grandchildren. The main reason is the normalization of shamelessness. Shame is supposed to be one of the feelings that can help in preventing that individuals (and organizations) exhibit immoral behavior. Today, there seems to be no shame anymore and lying has become the rule rather than the exception, starting with presidents in several parts of the globe. What should happen to ensure that governments will give us honest health information in the future and will act in our (the people's) interest?
