

Guillermou

Personally, I was assisted by a homeopathic doctor, with knowledge in Natural Medicine for an immunological problem, with good results. My knowledge in Natural Medicine also contributed to the results. I had found my personal simillimum (remedy whose typology, symptoms and ailments, and general characteristics match a specific patient), with the scientific basis of the protocols of famous homeopathic doctors

Homeopathy hold that higher rates of cancer, heart disease, and various chronic diseases may be a consequence of the suppression of symptoms and disease processes by conventional medicine. Conventional physicians and large pharmaceutical companies have a long and dark history of working together to attack homeopathy. The American Institute of Homeopathy became the first national medical organization in 1844, a rival organization appeared that developed proposals to stop the growth of homeopathy: the American Medical Association. Due to the economic, philosophical and scientific threat that the paradigm and practice of homeopathy represents, the myths about homeopathy were born: 1. Repetitively denying its efficacy. 2. claim that it is an element of the corruption of science. 3. sell the lie to the vulnerable population, such as medical students. 4. Homeopathic medicines are only water and other attacks and only produce a placebo effect.

Dr. Karol Sikora is a respected oncologist and Dean of the Faculty of Medicine at the University of Buckingham, has expressed his deep concern about the "Stalinist repression" that certain skeptics practice against homeopathic and alternative medicines. Dana Ullman, MPH, is one of the great defenders and defenders of homeopathy in the United States. Author of 10 books of homeopathy and main founder of the homeopathic educational services and resources of America, who have published 35 books on homeopathy in the North Atlantic publishing house.

Dr. Prasanta Banerji and his son Dr. Pratip Banerji, the renowned homeopathic doctors of India, famous for the results obtained with homeopathy for tumors, mainly brain tumors, have another great contribution to the world of health: Protocol Banerji which aims to help establish homeopathy as a form of effective and scientific medical treatment in all possible ways with the prescription and administration of specific drugs for specific diseases, a deviation and novelty with respect to classical homeopathy:

From the reality of the current treatment of cancer and the possibilities of homeopathy to treat it, the experience in the clinic of Drs. Banerji, whose protocol for the treatment of brain tumors with a specific combination of homeopathic remedies is to obtain very good results. The reliability of these results deserved publication in the International Journal of Oncology.

www.sciencedirect.com/.../S1888852608700067

Although "ABC Homeopathy" is of great importance for the physical and mental characteristics of each person, it is recognized that certain homeopathic medicines, in addition correspond to a typology, symptoms and general characteristics, have been shown to be effective for certain ailments or diseases very serious.

The Banerji Protocol establishes a medication for each type of disease or symptom, without seeking the simillimum of the person to be treated, and it is this approach that implies a novelty, and a certain controversy, in the world of classical or unicist homeopathy, since a priori, it seems a contradiction with homeopathic premises. However, according to the "ABC of homeopathy"

Posted On 12/02/2018

Guillermou

1 - Starting from the basis that for every disease or symptom there are multiple suitable medications, when a person takes a remedy that is suitable for his symptom, it is not his simillimum, it is usual to obtain a cure or improvement, slowly and normally, not definitely, but definitely an improvement

2 - However, when the medicine administered is simillimum, the cure is abnormally fast and usually definitive.

3 - The goal of Banerji doctors, given his career, is to help and facilitate the rapid prescription of drugs against different diseases in order to universalize homeopathy, putting it within reach, especially of the millions of people who lack the economic resources of our planet.

4 - This protocol is undoubtedly one more tool that homeopathic doctors can have at their disposal, as a complement to other alternative therapies, without substituting the work of the homeopath, to find the simillimum of a person with the aim of maintaining a balanced state of good mental, physical and emotional health, beyond the improvement or timely cure of a symptom.

5 - The Banerji Protocol is considered a gift that these Indian homeopaths, inheritors of a long family homeopathic tradition, have made to humanity and a huge contribution to making homeopathy increasingly known and accepted.

You can find more information about the Banerji Protocol in the following links: Dr. Banerji Prasanta Homeopathic Research Foundation <http://www.pbhrfindia.org/>

swonicky

Of course the truth has to be suppressed, heaven forbid that us common folks would tell those self anointed to go pound salt. You know the type, you have to do what we tell you for the greater good, listen to us we no more than you do, we're the experts you're not, blah, blah. How corrupt is big agra, big pharma, and big medicine? Very corrupt. Here's a book for everyone, Dirty Medicine written in 1993 by Martin J. Walker an investigative journalist. Dirty tricks abound keeping people in the dark, good luck to the patient who's physician doesn't question or who isn't curious to find the truth behind anything he has been told or taught. Nicky

Thank you "swonicky" for your comment and reference. A fragment of the book: "A powerful and extensive underworld spawned by big business. It will be some time before we are able to understand fully and record in detail the present period of crisis and the shifts in paradigm which have thrown up the surveillance, sabotage, harassment and fraud which are increasingly becoming an everyday part of commercial competition.

"On May 6th 1992 in the United States, the surgery and the laboratory of a well-respected nutritionist and doctor, Jonathan Wright, was raided by officers of the Federal Food and Drug Administration (FDA) aided by armed police officers. The clinic was surrounded and then stormed by officers wielding guns. Clinic employees were made to raise their hands and stand against the wall, while officers covered them. Fourteen hours after the raid began, the FDA and accompanying police officers had stripped Dr Wright's laboratory and surgery of all its patient records, equipment, vitamin and mineral supplement preparations".

"Coincidentally, at around the same time, I received a call from a doctor and research scientist in Europe. Much of his work has concentrated upon chemical food additives and their effect upon the immune system. From 1986, he has been the victim of threats from an unknown source".

Terrible, the persecution of doctors who are against the practices of allopathic medicine and defend health medicine has developed throughout history, with terrible attacks on their medical position and danger to their lives, but the brave people continue to fight for the health of people and defense of true medicine. www.whale.to/.../persecuted_doc_h.html

Dating back more than 100 years, numerous doctors like Coley, Hoffer, Burzynski, Gerson, Burton, Hamer, etc., researchers like Warburg, Rife, Koch, Naessens, Budwig, etc., have found answers to cancer, however, the Mafia Médica has repressed all this knowledge about non-pharmacological cancer. The reason millions of dollars obtained by the big pharmaceutical corporations. In exchange, it promotes the widespread use of cancer agents: junk foods, chemicals, drugs, pesticides, vaccines, fluoridation, etc., toxic allopathic medicine such as radiation and chemotherapy. While Nutritional Medicine, Herbs, Homeopathy, Hydrotherapy, Hyperthermia, Cannabis, Diet Therapy, Naturopathy, Oxygen Therapy, etc., are marginalized by corrupt power. www.whale.to/.../cancer_c.html

HealthiestChoices

Hi, Guillerrou ~ Your posts are all SO on target and many of us have no alternative choices in our areas if we have necessary health issues. I haven't seen a doctor for quite awhile, but would like to know there's a trusted choice when I do. I began my journey into good health back in the 70s and recall how even then, some senators were trying to take away our supplements saying they needed to be "controlled" as 'who knows what's in them? ((Ahem.....who knows what's in them thar drugs?)

And I vividly remember Dr. Jonathan Wright's wonderful articles in Prevention magazine, which, at that time, had trusted information from those who cared about helping the public and teaching about supplements, etc. When I read what was happening to Dr. Wright, I was horrified, learning how they destroyed not only all his personal property and supplements, etc. but his patient files as well. They charged that he was selling illegal substances...aka- supplements. After a long time, he was declared innocent, and they went on with THEIR lives, leaving Dr. Wright to put his life and practice back together again.

During the 90s, (before internet was in every home) I was receiving a paid subscription from another alternative doctor who told of Dr. Stanislaw Burzynski's amazing success with healing certain cancers and how he was also being arrested for 'questionable' healing practices and we were all asked to make contributions if possible to help. A lot of his patients who had been healed, as well as some still in treatment, came to his defense, as proof of how he was helping them. :::Cont:::

HealthiestChoices

That man also went through the proverbial wringer due to the dictatorial, high-handed people who are afraid of losing their precious dollars. They care nothing about the health or healing of the sick and dying. Dr. Burzynski has also had a long, difficult, and expensive hardship in trying to recover from his trials.

It was a sad day, indeed, when our once caring country decided to take control of our health & well-being all in the name of the Almighty Dollar. Several yrs. ago there was a Naturopathic Dr. in our area, but left due to the brutal treatment from the established doctors who had the 'scientific knowledge' on how to heal illness. Unfortunately, so many people trust them for their every ailment, and unfortunately, most of them are all on some, or many drugs, everyone with many, many side effects.

Guillermou

HealthiestChoices, comment is of great interest, reflects with a good dose of passion, a very realistic perspective of the differences between Natural Medicine and the corrupt framework of allopathic medicine of drugs that promote chronic and degenerative diseases. As you express the "Almighty Dollar". Yes, I knew the persecution of Dr. Burzynski in the "The truth about cancer: a global search", who is curing cancer people every day with their anti-neoplaston therapies. This link comments on Burzynski's trial. thetruthaboutcancer.com/dr-burzynski-trial-update .///

Thank you for accrediting the contribution of Jonathan Wright, MD, to Natural Medicine and its persecution by official organisms. It is a pleasure to deepen knowledge. Yes, Jonathan Wright, is one of the world's leading experts in natural medicine, nutritional supplements, and bioidentical hormone replacement therapy. He is the medical director of the Tahoma Clinic in Renton, Washington. In this link an interview.. tahomacclinic.com/.../the-frontiers-of-natural-medicine .///

Dr. Wright admired Linus Pauling's research on vitamin C. He comments that what has been shown is that species tend to produce more of their own vitamin C when they are under any type of stress. For example, when carcinogenic dogs are given their livers produce anywhere from ten to twenty times. One can demonstrate by chemical analysis that when humans face such tensions their livers try to make more vitamin C, but can not due to genetic disease. These links may be of interest.

In this report Dr. Mercola mentions the protocol of Jonathan Wright to treat hypothyroidism and hyperthyroidism. articles.mercola.com/sites/articles/archive/2014/06/15/hypothyroid-hyp.. .///

datadragon

What Doctor Wright said was the following "So vitamin C is right at the basis, because it's actually there to correct a genetic disease problem that all human beings suffer from. We just need to take more of it to stay healthy. So I would ask people to start with that particular supplement. "

tahomaclinic.com/.../the-frontiers-of-natural-medicine He said this because many animals can produce their own vitamin C and so do not need to get it from food, but humans require it as part of our nutrition from food since humans lack the ability to synthesize vitamin C and as stressors occur other species make more of it indicating to him to take more.

www.hammernutrition.com/knowledge/humans-lack-the-ability-to-make-vita..

Based on other research, Vitamin C assists with iron absorption so its better when iron storage is low but not good to take alot if iron is high as you will increase your iron even further, and also raises potassium. It can chelate metals as well. Vitamin C however also lowers copper and zinc and zinc also is needed daily as the body doesnt store it in any organ. It might be good to reduce copper toxicity but those with low copper showing to take very low vitamin c. There is always balance in the body and why taking high doses of any single vitamin without understanding these things as you can see can throw someone off, there are times when something may be beneficial, and other times where it can obviously be negative. I share these things as mainstream medicine doesnt teach about the relationship of minerals and vitamins, and even worse doesnt sometimes consider them in treatments.

HC - healthimpactnews.com/2018/dr-mark-geier-wins-lawsuit-against-maryland-.. It seems there is both sanity and insanity, with doctatorships and removing informed consent from vaccines despite valid concerns over safety as more and more real science is showing. Take control over your own health with research

Posted On 12/02/2018

SadieKay

Hi Gui, Thanks for sharing your success story with respect to Homeopathic medicine. I figure it's always helpful to share those stories because it helps folks get "un-brainwashed" after all those years of "Ask your doctor if this medication is right for you" commercials. When rich folks like the Rockefellers spread enough cash around, people of influence can be bought and common folk "drink the koolaid" so-to-speak. Even so, many folks are waking up to the pHARMA lies and deception. Unfortunately, pHARMA has left much death in their wake.

Also, I'm going to read that book which contributor swonicky suggested, called "Dirty Medicine" (1993) by Martin J. Walker. I couldn't comment on the comment directly. It seems I'm only allowed to respond to certain people on this forum. Nevertheless, I looked up the author's name and found a most wonderful review of Walker's book at www.slingshotpublications.com/reviews/reviews-dirty-medicine-the-handb.. and I'm asking hubby for the book as a Christmas gift. Cheers!

HealthiestChoices

Hi, Gui ~ Yes, The Truth About Cancer series is one of the best and gives understanding to many who are in doubt. I saw it about 3 yrs. ago and wished it could be shown on TV for better exposure. The pharmaceutical industry, even with all their power, certainly does seem to be shaking in their boots about losing out to alternative medicine. Even though most people aren't interested in giving up the tried and true methods of the allopathic medicine, with the tried and true scans, chemo treatments, etc. Big Pharma and all the other ABC companies can't stand hearing success stories from those who can heal through harmless methods. The only way to prevent people from hearing about them is to suppress these stories in any way possible, and no matter who gets hurt in the process.

Hi, datadragon~ Thanks for that link; that Dr. Geier, with his outstanding credentials, lost his job and credibility over "questioning" vaccines, is truly disturbing. I was so glad to see the Maryland Court ruled in the doctor's favor, although others (in the article) didn't get the same treatment or benefit. There needs to be more like Dr. Geier, expressing the huge concern about vaccines, along with other useless & expensive treatments. More and more often these days our freedoms are being challenged - not only in health issues (vaccines and other) but many other areas as well - it's like we are no longer allowed to 'voice' our own opinion = our way of thinking. This is more than a little worrisome.

“There is not a single disease ever identified caused by a lack of a drug, but there are diseases caused by a lack of vitamins, minerals and nutrients. Why, then, do we consider the former – chemical medicine – the standard of care and food-as-medicine as quackery? - Sayer Ji. No matter how healthy you may eat, we all still will have nutrient imbalances and deficiencies due to the depletion of nutrients in the soil, rising carbon dioxide, and the exposure to toxins, chemicals, and heavy metals in the environment and the air, water, food. There is even recycling of our toxic human waste full of these right back into the food supply being sold as eco friendly fertilizer (in USA). "Mineral deficiencies are responsible for a host of health problems, which are incorrectly treated by drugs" -Dr Robert Thompson, M.D.

Homeopathy cell salts works on a different, more subtle cellular level in the body and certainly can be used as complimentary part of your health plan that includes additional health modalities and health and holistic therapies. Kali Mur for example is a small level of potassium chloride, but doesnt replace the 4,700mg daily we need, it seems to help with acute things like excess mucous and allergies, sore throats, coughs etc. Behind the rather grand name of Natrum muriaticum, hides sodium chloride or common salt. Cell Salts means minerals for cell health. Homeopathic Cell Salts can be used for better health because minerals are the foundational nutrition for the body's enzyme activities and energy cycles. Chloride transports potassium and sodium into the cell, perhaps because it bypasses the gut issues like low hydrochloric acid and in a form and small enough size that can enter the cell is additionally why it works, but focus should also be on restoring low body stores and imbalances of minerals as well for good health.

Posted On 12/02/2018

Guillermou

Yes DATA. The disease arises from intoxication or nutrient deficit, both can be related. A common path in this industrialized society is: blood and organ poisoning, oxidative stress, immune reaction, inflammation, acute illness, drugs, chronic disease, more drugs, degenerative diseases. The depurative diets, to eliminate toxic or xenobiotic substances, including heavy metals, pesticides, bacteria, and various antigens that cause autoimmune reactions. In certain functional alterations, there is an internal imbalance created both by the aggression that our organism undergoes by xenobiotics, as well as by the organic compensation reaction itself (immune reactions.) Our organism progressively accumulates potentially toxic substances that produce a functional alteration, mainly in the own internal cleansing organs, such as the skin, the renal excretory system and the digestive system. The purification of blood, tissues and organs is essential for health. The mineral balance is vital for cellular health. The disease does not occur if the cell metabolism is normal

Dr. Wilhelm Heinrich Schüssler studied Hahnemann's homeopathy, and it was in this science that he inspired his research. Schüssler began by measuring the salts that predominate in each of our tissues, in order to administer the beneficial salt to feed the cells that make up that tissue. Thus he discovered 12 salts that are the main ones in our body: Schüssler studied the permeability of the cell membrane to be able to establish the dose capable of crossing the permeability of the cell membrane, and these doses are infinitesimal doses and in aqueous solution. Therefore diluted its twelve salts D6 powers, which are related to the permeability of the cell membrane.

Posted On 12/02/2018

Guillermou

The Schüssler Salts do not have the mission to supply the tissues with the salts that they lack, that has to be done in a necessary way by the feeding. The function of Schüssler's salts is to help the body compensate for alterations in the distribution and absorption of minerals. Although the dosage and preparation of Schüssler's salts satisfy the homeopathic criteria, therapeutic is based on its "Biochemical Healing Method", that is, in physiological-chemical processes that take place within the organism.

What Schüssler called "molecular distribution disorder," meaning that the ions of a body salt are not available when they are needed, that is, "the relevant salt is not in the right place at the right time". Schüssler's salts help to solve the disorder of the distribution of ions, so that the particles of a salt in question are able to reach the cells that need them. Similar to the operation of the principle of similarity in homeopathy, Schüssler's salt stimulates the body to redistribute that same substance, activating it, making it effective. In these links the properties of the 12 Schüssler salts.

The 12 Tissue Salts or Cell Salt Remedies. Fundamental homeopathic remedie.

"So, whenever you hear people say there's no evidence that homeopathy works, they are either misinforming you or directly lying " (sic) But 100% of Hallopathic doctors are lying 😬... about everything that is not in accordance with their church's holy book, that is to say, written by BigPharma cronies. Right now in France, they are declaring an open war to homoeopathy, everyone having the French Social Security can have a % of the prescribed medicines reimburse, they fight to stop reimburse any homoeopathic product. By the way the French health minister now is a doctor also fighting like a mad to vaccinate like never before the babies, 8 more vaccines mandatory in 2018 I said height more, yes. It is IMPOSSIBLE nowadays to stay in good health with the homoeopathic medicine, they poisoned every single person when they did not simply kill them slowly. Speaking like that is difficult socially speaking without being taken for a member of some kind of a dangerous sect. The only thing that destabilises my interlocutors if I hold this speech (rarely) is my personal health and my look to such an extent that when I say I've just had 74 years many believe I'm joking, still a lot of hair, not a single white of course not overweight. Not one person when I say my age does not tell me it's amazing:-)

Guillermou

Yes, unfortunately, some European countries are reviewing the use of alternative medicines due to the loss of income in commercial drugs. According to figures from the European Commission, every year 197,000 people die in the EU due to adverse reactions to conventional medicines.

A request for defense of homeopathy in Spain is being carried out, endorsed by signatures on the network, addressed to the President, Mrs. Minister of Health and Mr. Minister of Science, with more than 10,000 doctors who exercise it due to a campaign of loss of prestige and defamation, as a result of which the citizens' right to accurate information and access to beneficial therapy for their health is being curtailed. At present it is estimated that per capita spending in Europe on homeopathic remedies is 4 euros per year and represents 1% of the pharmaceutical market and 7% of medical purchases without a prescription.

"Many Europeans are taking responsibility for their treatment, because they are not satisfied with the results of traditional medicine or do not want to resign themselves to the doctor's recommendation that they have to learn to live with pain and disease," he told the BBC Mundo Nand De Herdt, President of the European Coalition in Products of Homeopathic and Anthroposophic Medicine (ECHAMP). "There are also those who want to avoid the side effects of pharmaceutical treatments," he added.

The European Commission finances the investigation of these remedies with extraordinary budgets, the pressure of the large pharmaceutical corporations is evident. Analysts believe that beyond promoting complementary remedies, the basic strategy of the Community Executive is to regulate complementary medicines. However, in some countries some alternative therapies are forbidden in hospitals.

Posted On 12/02/2018

Guillermou

The centers of acupuncture, yoga, meditation and hypnosis, as well as homeopathic products, herbal medicine and supplements, are increasingly becoming an option for Europeans who believe that their diseases can not be cured by traditional treatments. There are more than 300,000 active professionals in Europe of alternative medicine, which includes natural therapies such as aromatherapy, acupuncture, kinesiology, osteopathy, shiatsu, reflexology and others, require Europe's legal recognition. The main objective of the European Association of Traditional Chinese Medicine (ETCMA) in the EU is to promote the recognition and wider acceptance of TCM therapies by European governments and the public.

According to the European Commission, in the 27 countries of the European Union, it is estimated that complementary and alternative medicine attends 100 million clients annually, although the trend is increasing, with France, Germany, Italy as the main clients, The Netherlands, Spain, Belgium, the United Kingdom and Poland, which collectively account for 90% of the market.

In total, there are more than 4,000 higher education institutions in Europe that offer a wide range of courses at the undergraduate, master's and doctoral levels. With more and more of these organizations offering English as the language of education for at least some of their study programs, European universities are now of higher quality than ever before. Universities in Europe offer a warm welcome to foreign students and to give a course of knowledge that meets the needs of their profession.

Posted On 12/02/2018

Mercury63

Socialized medicine is not a path to good health. Obamacare, for example, was not about health care at all. It was a socialist government taking over one fifth of the US economy on the way to full government control of private medical care. That said, the turth behind vaccines is not encouraging either. What doesn't hurt you does nothing for you in many instances.

Posted On 12/02/2018

Elleanee

As a student of a homeopathic college, I learned that symptoms represent the body's way of healing an imbalance or disease. The body is always aiming toward homeostasis and when a disease process occurs, it creates symptoms that encourage all the body systems to return to homeostasis. Symptoms suppressed by pharmaceuticals are suppressing the body's ability to heal itself. It's the antithesis of returning to health. Those meds may make the disease seem to disappear but what really has happened is they have caused the disease to go deeper into the body and will emerge later as a "different" disease seemingly unrelated. And continues on and on with each change of or additional med. Conventional medical care will never heal the patient.

Posted On 12/02/2018

Guillermou

Yes, Elleanee, when the symptoms are suppressed with drugs, we are suppressing the disease, poisoning the body's tissues and organs. The disease is repressed, but the immune system damaged and sooner or later another more chronic disease will manifest itself again. The consultation with the homeopathic doctor, and in general of the Alternative Medicines, is always gratifying. The doctor has not only asked about his symptoms, but also looks for the origin of the disease. The homeopath is interested in the things that concern him, for his work, his family and for those circumstances that make him feel better or worse. The homeopath with an interview and specific questions, looks for the personal simillimum, to prescribe a homeopathic remedy whose typology, symptoms and ailments, and the general characteristics coincide with a specific patient,

The doctor listens to him, reassures his concerns and prescribes a homeopathic medicine whose active principle is based. Homeopathy requires information, prospection in the patient's suffering and psychological characteristics, without inducing answers, letting the interested person talk about what really ails and worries him. Many of the detractors of homeopathy refer to the greater time that we dedicate to our patients, as an important part of the healing process (placebo effect). If this is evident for all professionals of allopathic medicine, for their poor attention. In the attention of allopathic medicine the harmful effect is more frequent. The homeopathic doctor seeks to reconcile the patient with what life offers him, take back the reins of health, be "proactive", and also prescribe other healing therapies based on food, exercise, herbs, supplements, etc., that can help to achieve health, to return to the homeostasis of all systems and body fluids.

The trouble with self treatment is working out the correct remedy. As already stated, Hahnemann wrote masses of information - but it was all in German. Since then, several people have tried to create an index from Hahnemann's work. Until recently they all were either inexpert in medicine, or inexpert in German translation. Finally, the Bonninghausen Repertory was published with a true translation by a bilingual doctor. Get more information from the Hahneman Institute Sydney. You still need a fantastic memory or do you? Each symptom has many possible remedies, and I don't have a good enough memory to choose the right one.

However, using this repertory, you can give a number of 1 to 4 to each remedy that includes the symptom. Then you choose the remedy that has least variability - not the one that appears with the perfect 4 most often. I'm not a statistician, but at least I know that standard deviation figures measure variability, and it's easy to create a column in a spreadsheet to work out the standard deviation for the row containing a remedy.

Now, I go through the repertory for each symptom that affects me - it takes about four hours, but a doctor would take less time - and put the number from 1 to 4 into the column representing that symptom. Each time a symptom fails to appear for a remedy I cancel that row by coloring it red. As the number of symptoms increases, the cancellations also increase. I end up with about six remedies with standard deviations varying from less than one to somewhere about 3. If there are two or three remedies with very low deviations, I then check the repertory to see if the remedies can be used together. That's all there is to it and it has worked for me. Firstly I checked on the prescription of a homeopathic doctor that succeeded. My calculations said that his prescription was almost as good as the calculation, but the two worked together, so that's what I took.

Sooo--homeopathy does not work because it has no active ingredients? What make this any different to those vaccines that are pushed and say they have no live cultures? The difference is that the vaccines contain other crap that we know is not good for us. The only other thing that the homeopathic remedy contains is water? DUH! Which one do I choose? DUH!

Homeopathy has been used for eons of time to treat bodily dysfunction. pHARMa tried to erase it's benefits from history by going as far as destroying the ancient cultures most prominent in their use of natural healing techniques. We need to keep exposing pHARMa for their HARMs. They currently behave like some kind of death cult. I look forward for the time that Homeopathy is restored to it's rightful place as a beneficial health modality for humanity. Homeopathy is true medicine.

Well exposed Sandie. Stress, lack of exercise, diabetes with neurological involvement, hypothyroidism, low levels of potassium or sodium in the blood, as well as increased calcium can also cause constipation. Homeopathy can offer concrete solutions to the problem of constipation.

- Alumina: there is a rectal atonia, with total absence of desire, and this causes large masses of stool to accumulate, which are expelled only by great efforts. It would be very indicated in the elderly.
- Amonium muriaticum: hard, dry and shredded stools.
- Bryonia alba: as in Alumina, there is great dryness, but it would be more indicated when the dryness manifests itself in all the mucous membranes (mouth, tongue, etc.), with intense thirst.
- Collinsonia: bulky stools, difficult to expel, which are accompanied by hemorrhoids
- Magnesia muriatica: hard, dry stools in goat pellets. It is an especially effective remedy in babies.
- Plumbum metallicum: there is a very painful contraction of the anal sphincter. The emission is difficult and painful. It is usually accompanied by violent cramps.
- Raphanus niger: constipation is accompanied by abdominal distension due to the accumulation of gas. The patient has pains that improve by the evacuation of the gases.
- Causticum: the desire to defecate is frequent, but ineffective despite painful efforts.

When discussing the persecution of alternative medicine we really have to mention one of the greatest unsung and erased medical scientists ever. This is a long read but well worth the effort. The story of Royal Rife. A guy who cured cancer and suffered the wrath of the AMA. [rense.com/.../rife.htm](https://www.rense.com/.../rife.htm)

If the article above and/or the video interview that Dr. Mercola conducted with me intrigues you, you will definitely want to see the newly posted videos that are from a major homeopathic research conference that took place on July 14, 2018, at the famed Royal Society of Medicine. Two Nobel Prize-winning scientists spoke at this conference, including Luc Montagnier, MD (he discovered the AIDS virus) and Brian Josephson, PhD (a professor of physics at Cambridge University)...plus several other world renowned scientists.

Title of the conference: New Horizons in Water Science - Evidence for Homeopathy : Video Presentations are now Live at: www.youtube.com/.../UCKyjPaSH0deBdoICS3_YMwA Because the presentations explore explanations for how homeopathic medicines may work, several of them are quite technical.

My first experience with homeopathy was baffling. I was doubtful little white pills could be helpful when a doctor gave me a remedy. When I asked what how it worked, she said, "There is a lot we do not know." A good start to making a person skeptical. After taking the remedy, I called to tell he I was violently ill and vomiting from the nasty remedy she gave me. I was surprised to hear her say, "That is wonderful news!" (It worked.) Admittedly, this was one of the more violent and unusual reactions. However, I began feeling better immediately. many times since, I have used homeopathic remedies with excellent results, curing TMJ, a cyst, H1N1 flu, etc.

In the concept of hormesis, a small amount of something is protective whereas a larger amount is harmful. The same is true os sunlight for instance and believe it or not, even radiation.

Can homoeopathy be used to reduce blood pressure to normal levels? I have yet to see anything written about this subject.

Posted On 12/01/2018

stanleybecker

hi there - did a quick search on the use of homeopathy for high blood pressure - you could too - use Google search [or any search engine] - I came up with this instantly - " NATRUM MUR 200-Natrum mur is one of the most indicated remedies in cases of high blood pressure which occur due to a prolonged intake of high levels of salty things. ... LACHESIS 200- -Lachesis is the best Homoeopathic medicine for high blood pressure during menopause. "

Also. Increasing potassium intake, moderating iodine in the diet, and exercising regularly can generate significant benefits in maintaining normal blood pressure. In this link a monograph of Dr. Mercola on blood pressure, causes, symptoms, diet, herbs and supplements advised articles.mercola.com/high-blood-pressure.aspx

This article of homeopathy is very complete. On this website Dr. Sarah Brewer, a registered nutritional therapist and the award-winning author of more than 60 popular self-help books, advises homeopathic remedies for blood pressure depending on the associated symptoms. In homeopathy, the constitutional type is also important and homeopathic doctors perform a pre-test to better adapt the homeopathic remedy.

Treatment for high blood pressure often begins with a power of 6c or 12c. The homeopathic remedy is taken two or three times a day, either in the form of a pill or in the form of drops. Sometimes, the symptoms initially get worse before they get better. If a partial improvement occurs, the homeopath may recommend a 30c potency remedy that, while significantly more diluted, has a more potent effect. mylowerbloodpressure.com/homeopathic-remedies-for-high-blood-pressure?..

On this website of the British Homeopathic Association, homeopathic remedies are advised against the stress associated with high blood pressure as said stress manifests. "Perhaps the most interesting medicine in the treatment of blood pressure is Crataegus. This is hawthorn. In times past it was common to see older men "chewing hawthorn". Crataegus "cleans up" the arteries removing the crustaceous matter stuck to their lining ". I have used homeopathy for many years. I`ve used it for colds, flu prevention, allergies, pain, stress, and sleep. Yes, it works! There are no side effects, either. I am very healthy because I stay away from prescription drugs.

Fantastic article! The American Indians still prefer homeopathic remedies over modern medicines, but that's been their tradition medicine for millennia.

Posted On 12/02/2018

DanaUllman

Actually, American Indians use various HERBAL medicines. There is no evidence that they are known to use HOMEOPATHIC medicines...However, people in INDIA are very interested in homeopathy where there are over 125 five-year homeopathic medical schools...

Would any of you be able to help me? I have to avoid any sugars or carbs which make my blood-sugar level rise. I have to take Vitamin C, ascorbic acid for my vision. The available Vitamin C contains corn. Alternative to corn is tapioca. Both are bad. Are you familiar with a good Vitamin C which is made with any other substances? I also take Ascorbyl Palmitate which is Vitamin C Ester (contains palm oil to penetrate the cell membrane). I don't know if that is made from corn or tapioca. Would really like some very specific help. If you know of the company and the brand name of alternatives to what I've described, I thank you in advance. May God bless you. I a

You can't overdose on vitamin C because your body gets rid of the excess. But you can overdose on the ascorbic acid form of vitamin C - it gives you diarrhea (I can't spell it) if you take more than 1 gram (1000 mg) per day. However, if you react ascorbic acid with calcium you get calcium ascorbate which gives you calcium as well as vitamin C without any side effects. I take about 15 grams per day without any side effects.

Hi Stan. I have taken a teaspoon of organic sea salt daily for a year now, which seems to have cleaned up my kidneys from what I think was damaged by malaria, and do not suffer BP problems. BP has causes of which a lack of NO and or LDL seems the worst. Apparently sea salt, possibly Himalayan salt as well has 80 " components" we need. One commentator wrote here once that he takes 3 x teaspoons daily and does not have any side effects. Sea salt now apparently does have damaging plastic articles in it. My calves swelling has reduced substantially, dew to the salt.

Posted On 12/02/2018

WaspLord

Hey acs4457. I'm glad sea salt helped your symptoms. But you may want to look into pink Himalayan salt in stead. I've read a lot about sea salt being contaminated with microplastics. But i'm sure it differs from product to product. Who knows maybe your source is clean.
