Censorship plays a very important civic function: it is necessary to enable the American public to remain clueless enough to continue to elect (and re-elect) domestic terrorists. I watched with interest a few years ago to see if the Sacramento area would re-elect Dr. Richard Pan to the State Senate, "a pediatrician-turned-politician who has spearheaded California's descent into medical tyranny, since 2015, when he wrote bill SB277 to remove all religious exemptions to childhood vaccines in the State of California, despite widespread public opposition by parents, doctors, lawyers, and educators."

He won handily. Domestic terrorism is a very real phenomenon and I'm all for rooting it out. But let's not let the real terrorists define who or what that is. Dr. Pan is well spoken, well dressed, "educated," presumably well-compensated... I'm sure his parents are very proud of him and that he is esteemed by colleagues and community members. Central casting might not choose him for the part, but Richard Pan is a real-life domestic terrorist. hnewsire.com/california-senator-dr-richard-pan-anointed-by-big-pharma.. off-guardian.org/2021/03/08/called-it-wapo-calls-anti-vaxxers-domestic..

Hi David, Here's an additional article you wanna study in detail, dates back to Sacramento Bee, 2015: www.sacbee.com/news/politics-government/capitol-alert/article24913978... be sure to scroll down to the lobbying dollars vs direct support to each representative.

To me this appears as always, like GREED incarnate: where those healthy young people who do not need to be vaccd against this virus are being shamed or incentivized to do so. Meanwhile, way more dangerously, those who have already recovered are being told to vaccinate, WRONG - the most dangerous thing to be doing is to shoot up those who already have developed immunity to the virus.

Appears we are living in a Pharma-driven marketing campaign of enormous proportion, scientific debate has been thrown out the window with the bathwater. Decisions being made at the state and govt levels from so-called experts are based on scarfing even more money for pharma or for political re-election, human health is not part of any political equation right now.

- "turn[ing] to censorship - suggests they are in fact lying & have no intention of stopping. Since they refuse to tell the truth, the only option they have is to silence counter-narratives in the hope that, over time, objections will die out for lack of support." It may also show just how hesitant people are about vaccine's as they pull every trick in the book to herd a surge of arms for a jab. From Legacy Media this morning asking an official pooh bah what's going on? With a slight raise in cases, (Not All Cases are sick enough to notice let alone need treatment.) along with fewer hospitalizations and a dropping of those dying 'from Covid?' Answer well we hit those most vulnerable, the sick, elderly, & the stronger are bringing the overall death's down. Their best case scenario, we like free liability massive profits & if vaccines worked as advertised & applied as such the market is not where we would like it to be.

- "Basically, they're saying you're too stupid to think for yourself. You'll buy whatever you're sold, no questions asked, -- Their only option is to sneak it in under the guise of something else." Actually this is their standard MO.

rrrealrose - in general people aren't getting how dangerous this genetic disruptor is& no doubt you are right, if someone has already been through the natural process the worse thing for their health/immune system would be the jab.

It's all one big 1% \$\$\$ Power & Control Party, Trump, Biden, Dem's GOP, We the People lose no matter who "win's." Also in Legacy Media in the last few days - Moderate GOP have no where else to go but the Democratic Party & the Democratic Party has no choice but to move to Moderate GOP positions. Meaning the 1% \$\$\$\$Power & Control if they get away with it, keep their phony 'Center." This censorship is as much keeping the Real Center, seen here in this forum, full of Righty, Lefty, Indy's, rural, urban, suburban, middle class, minority's and so much more from finding our real voice & center.

David; I believe that all who are involved in this Medical-Technical Tyranny, are terrorists! The only constants in this 'game', are the Fraud, Lies/deception and the Fear Mongering. Without those elements, they would just be wasting their time! Humanity's belief systems really need to change, if we are to have any hope of getting through this and retain what few rights and freedoms we have left. Searching through Duck Duck Go, I'm still getting articles claiming anti-vaccine conspiracy theorists! It's just a matter of time!

"The Centers for Disease Control and Prevention has released guidance for fully vaccinated people, outlining what they can safely do – including indoor, mask-free visits with other vaccinated people. CDC Director Rochelle Walensky announced the highly anticipated guidance during a White House COVID-19 briefing Monday." Here are a few words from our illustrious CDC. I've stated from the beginning of this idiocy that nothing about this makes any sense at all! "Fully vaccinated people, according to the CDC, can do the following: Visit with other fully vaccinated people indoors without masks or physical distancing; Visit with unvaccinated people from a single household who are at low risk for severe COVID-19 disease indoors without wearing masks or physical distancing; and

Skip quarantine and testing guidelines following a known exposure, if they're asymptomatic. The CDC still says those who are vaccinated should wear a face covering in public, and it still discourages non-essential travel. It also says that, for now, vaccinated people should continue to avoid medium- and large-sized gatherings, and they should use prevention measures like masks and distancing when around unvaccinated people from multiple households. The CDC also still recommends getting tested if COVID-19 symptoms present themselves." Could the evil and criminality be any more obvious? BTW: The "fully vaccinated" people will have to show PROOF of vaccination!

Pan probably truly believes he is doing good. I don't think he's an evil person, but the deadliest sort of "useful idiot", the True Believer. One who simply cannot process facts that contradict his indoctrination. The perfect tool for the truly evil who KNOW the deadly work they've set to him. As for elections being stolen, the absentee ballot results coming in last November looked very, very fishy. I've heard Trump won most of the court cases, but do not have sources. How would we know if millions of secret ballots that arrived through the mail could not have been swapped? What reason have we to trust elections? The assurances of our government officials? LMAO!

Using security measures similar to online banking, we COULD have a system in which everyone has a hard copy ballot with an ID they choose and password, such as the results of ALL ballots can be displayed in public with an identifier such that only the voter knows it's their ballot, but all votes can be seen and audited by anybody, and the totals cross-referenced with the number of voters. Absolutely verifiable elections. So why don't we? That fact alone is sufficient evidence not to trust elections, as far as I'm concerned.

I'm re-reading 1984 by Orwell. It might as well be the playbook being used today to control the people. Banning books, censorship, use of language to manipulate (not sure about the vaccine? you are unpatriotic and a domestic terrorist) , the Thought Police, etc...I think we should encourage some friends and family to read it. The sleep and stupor people are under has to be awakened but thoughtfully or it won't work. This book won't change the world but it might change some minds which might one day change the world.

I agree whole-heartedly with your thoughts, and suggest we go back even further to examine how the mindset of our forefathers has not deviated from its initial plan to lay claim to the whole of America by extermination of the indigenous people, as well as their food sources, justified by their claim of "manifest destiny." Biological warfare was used even then with the use of smallpox infected items presented to Indians as a gesture of goodwill. Anyone wanting to understand our true American history might want to read "Black Elk Speaks," as well as "Bury My heart at Wounded Knee." Both are currently available as free audio books. These are the links: bayaudiobooks.com/bury-my-heart-at-wounded-knee-audiobook and www.youtube.com/watch?v=_1PPgD0xieQ&list=PLCoL2q7ZNnglG24w8kjlqCIS.. Orwell hung out for awhile with the Fabian Society, but didn't care for their philosophy--basically presented themselves as socialists, but actually embraced communism. The Fabians believed in "evolutionary" socialism as opposed to "revolutionary." Instead of violent overthrow they advocated for gradual infiltration--the long and slow "march through the institutions," (in which they have been quite successful to date). I believe he wrote 1984, Animal Farm, and The Road to Wigan Pier as warnings or exposures of the Fabian vision.

Is it only me again? History: Supreme Court Judge Clarence Thomas (a former Monsanto Corporate attorney) voted FOR the Citizen's United Act back in 2011; allowing corporations rights of individual citizenship (which by structure, these entities are not) to donate as much as they want to political candidates of their choice. This basically removed donation limits that had been imposed on all US Corporations. This turned US elections, in general, into corporate elections: not candidates of the people, we get to vote for candidates heavily promoted by US corporations and the 1% of the 1%.

Now, 10 years later, Justice Thomas does an about face re corporate censorship. Do you suppose this overt censorship is an unintended consequence of allowing US Corporations way too much political power, in the overall scheme of governance? Does he finally see the consequences? If you read his statement, at the bottom he is ONLY referring to open political discussion being censored. That's his only concern. Reading any more into his statement than can be taken at face value is most likely a mistake.

Hi Rose... nope, not only you. The most important wall we need to build is between these corporations and the government they think they own. (Well, they actually DO own it at this point... bought and paid for.) If capitalism is supposed to be free and fair markets on a level playing field, and our "democratic republic" is supposed to be a representational government, with protected rights for the minority, then how could that possibly work with, for example, pharma being the largest lobbying force in D.C.? The other part of that imbalance is—again, pharma provides the best example—corporate monopolistic sponsorship of "journalism." As you note, we've seen the same sleazy tactics with Monsanto. Illegitimate control of government and information is precisely what we've been up against during the insane implementations of "pandemic" policies. The problems are, at this point, much more systemic than touched upon here....

MAKE NO MISTAKE:humanity is now at a critical point in its growth;either it can fall down into the pits of a slavery imposed by very cunning ,greedy insane elitist minds who merely want more money,power and prestige, OR it can,through trusting its inner intelligence, rise higher into a more loving ,aware and conscious humanity.However the collective mind cannot do this:each individual has to grow into his/her own intelligent awareness within on his own two feet alone and make a fearless stand now.What am I doing ?Here I am sharing meditation in schools and ALSO telling the young people and their teachers and parents my perception about what is happening.

Yes I am quite aware that i may be attacked ,killed and silenced any moment.However the response so far has been very positive.Existence ,the greater comic whole ,does not run on fear and control,it flows like a river into greater and greater oceans of light.On the way,the human mind reacts and resists because its deepest beliefs are being threatened.We do not need a new religion of technocracy and their pseudo-scientific priests trying to control the populace through fear mongering. What is needed is an intelligent organizing process which is being guided by loving consciousness.Then indeed it is within the realms of the possible for a paradise on earth to happen which is scientifically consciously in attunement with nature and not constantly trying to conquer and control it.

Otherwise this conscious alive planet will take steps to protect itself from the the masses who are perceived as dangerous,parasitic entities on its surface.And if that is the only way,then so be it. Perhaps best if everything is washed away and we start again afresh with pockets of high consciousness survivors as happened with the last great civilization Atlantis which made the same mistakes as humanity is currently making.Do we ever learn?Unique friend Joe Mercola is doing his best in his own honest and courageous way to wake people up.Good!

Ok, ok, just listened again to Dr. Prof. Reiner Fullmich's interview of Dr Mike Yeadon, from March 20. Unfortunately the sound is horrible, they should have redialed and started over...near the end, Mike discusses the top-up vaccines, already in development, to handle the variants. However, he added that the top-ups are so similar to the initial vacns, these top-up vacns will not require ANY CLINICAL TRIALS. Doesn't this tidbit make the hair on the back of your neck stand straight up?

Mike goes on to state the variants deviate less than 1.5% (I think that's what he said) from the original virus, and in all likelihood, he sees no need for these. Again, follow the money with the narrative. Separating additional vacn profits from unnecessary jobs becomes fruitless as you are only looking at one aspect of current marketing decisions being made or bought. Realize the risk:benefit ratios are not being made, or publicized. Deaths are now occurring, like Hank Aaron and Prince Philip, up to 3 weeks after vacn these may or may not even be attributed properly. Death is in the process of being normalized, battle lines are drawn with each additional death from vacn. Again, listen closely as this may be a death knell for all mass vaccinations, childhood and adult, worldwide.

rose, Scoglia states that the variant is merely a further juggling of the modelled computer sequencing that is thrown into implausible contrast by the fact that the virus has never been fixed and isolated - therefore sequencing can be varied on the basis that the "virus" itself has no foundational certitude - to declare a sequence from fragments and call it Covid and then to declare variations of this hypothetical sequence is NOT science but most probably BALONEY

Hi Stanley, Most likely not quite on target. James Lyons-Weiler said, in the interview link I posted 2 days ago, that the virus had been isolated, just not purified, and that occurred sometime last spring. He traced it back to 2005, in a UNC (univ. of North Carolina) virus database, and theorized where it may have come from. To him, not a novel virus. Let me know if you want another link, can probably find it as his discussion was in Canada.

Posted On 04/14/2021

rose, I read that - Weiler {who impresses me} states that this is the bat virus that was sequenced in 2005 - but this still has the problem of the fact that the Covid "virus" has not been confirmed as this specific sequence but an assumption from fragmentary specimens - there is certainly a speculative air about the science which is why Weiler talks of Popper and consensus in approach

Hi mnppearl, your observation that the "vaccines" are already useless is absolutely correct. Though not useless from the aspect of the damage it can do as a gene therapy. I see that the new virus threat being a double mutation is a throwback to branding, which any good psych op uses. Teenage Mutant Ninja Turtles were part of this now targeted younger generation's culture, so obviously the "masters" are just trying to give them the collywobbles so that they fold and "vaccinate." This generation is also familiar with nunchuks, so watch out! Storyline (I/T source): Through contact with a mysterious ooze, four turtles in the sewers of New York mutate into intelligent pizza-loving humanoids, and are mentored in the art of ninja combat by the wise rat Splinter. When the evil Shredder attempts to take over the world, the turtles set out to stop him. SNAKE SHREDDER-GATES?!!!

They are harmful and useless anyway. Now when the vaccinated begin to get sick from their "vaccines", that will be said is due to deadly mutations. of the virus. So the call will be for more vaccination, then "new mutations" and so on.

All you have to do is look at Florida. Compare Florida to California and New York. Their Covid-19 infectious rates are about the same. Then compare all 3 of those states to Texas. Not much difference in infectious rates of all 4 states. CA and NY have had never-ending lockdowns and shutdowns while FL has been open since April 2020. Texas, in the beginning of the pandemic, was following CA and NY with lockdowns. Since TX opened their state and removed all restrictions 2 months ago their numbers have gone down. Florida not only has been open for a year now they even have schools open that don't require MASKS!!! In the state of FL they let the school districts decide on how they manage this pandemic. Some schools require mask and social distancing. Some schools don't have any restrictions concerning Covid-19. Low and behold, there's no difference in infectious rates between these school districts. Why won't someone of scientific credibility point this out with real data so we can move on from this scamdemic?

Of course his "adverse reaction" will NOT be published nor even counted because doctors administering to him will NOT report it as COVID related. I told her, she could have her uncle use concentrated, plant-based proteolytic enzymes because they are proven to prevent AND break down blood clots. I mentioned Nattokinase, serrapeptase, and streptokinase doing the same work. I also mentioned the apolactoferrin as a way to address any chance of "covid". I spoke to her and her family of the so-called "variants" being fraud, as is the entire Plandemic. Summary - Dr. Derek Knauss re-tested 1500 positive "C-19" tests in his lab using the gold standard Koch's Postulates protocols and a scanning electron microscope for the tests. These same positive tests were sent to Stanford & Cornell Universities, plus other University of California qualified labs/universities, for a total of 7 universities re-testing the same samples. They did not use any of the Covid-19 RT-PCR Tests. Dr. Knauss & his team found NO COVID. All of the tests were positive for either Influenza A or Influenza B. All of the labs found the same results. My BS meter went off when the CDC started sounding the alarm over the J&J blood clots, identifying six cases which is less than one in a million doses given. I suspect that the prevalence is greater (as evidenced by your patient's uncle), and they know it. OR... they discovered that some of the doses adulterated with Astra Zeneca ingredients actually got into distribution. OR ... they're trying to fool the public into believing that they're truly concerned about safety; the media is going on about how everyone should be reassured by this "abundance of caution" pause in the J&J rollout...so maybe it's just an effort to sway the vaccine hesitant. It's just odd that they would call attention to one-in-a-million events, while overlooking the cases of vaccine injury and death (including blood clots!) that are occurring at a much greater rate with mRNA vaxes. Something is definitely off. I hope your patient's uncle isn't being treated with heparin, as it's contraindicated for the J&J clots.

@lovetosing, you might want to research how Canadians are being treated overall before packing your bags. twitter.com/.../1381335392541151233

edit: If you do go to Canada stop by the restaurant in Barrie for mask free inside dining. You may get to see the mask police being kicked out of the restaurant by the owners and patrons. Good stuff.

Stanleybecker attacking any commenters who are just asking questions is not helping. I have been on this site for a long time—and used to interact with you in a positive way—and have seen these comments morph from a group sharing information to a “them vs us” mob mentality. I read this article to try and gain a more balanced approach and then ventured into the comments. Now I’m wary of both points of view. There is no longer any discussion from either side in any forum, it seems, just attacks on those who don’t have the same viewpoint. The first rule of persuasion is not to alienate your audience, a point everyone in the world seems to be missing.

Lisal - dogmatism is not a form of discourse that is debatable - if you cannot see the wood for the trees then no debate is possible - I suggest you read the article {like I do} and then consider my comments as focussed in the context of the article - this might help you understand the implications of my standpoints

While this is not about the post, this is about a poster here that I've noticed sharing the same sentiment in all of their posts/comments recently. They have been a member since 2016, but have only recently been posting/commenting since 4/8/21 on the recent pandemic articles. They've made a total of 20 posts. All of which you can see by clicking on their name, and following the links to what they wrote. I took notice to them, because much of their messaging seems to want to object/question what's in the articles, and what people are posting/commenting. That's fine, question away. Although it's almost to the point where it's to seemingly shame or cunningly discredit this website or a poster by baiting an argument with an opposing view.

I'm all for open discussion, and people being able to share multiple viewpoints on a topic, so we can come to greater understandings about this wonderful planet we live on. We so need that right now, because there's way too much divisiveness running rampant, pitting people against each other and making enemies when none are needed. What I'm not a fan of, is when the discussion becomes/feels disingenuous, lacks integrity, seeks to bait people and make them feel wronged or stupid for their perspective. If someone doesn't agree with a viewpoint, then someone doesn't agree.

It's all good. If someone doesn't feel it's their cup of tea, then by all means, they can travel onward until they find where they best fit in and can flourish. And there are usually signs in communication that one can tell when someone is genuinely open to discussion and truly wanting to understand where another person is coming from. The tone, the wording, the timing, etc., we all innately feel it. This website is far more valuable than just the articles that have been published in the last year about covid. It has years upon years of great advice for our health and wellbeing. Much of which has come from the members of this place. Let's be in harmony - joh13617

Even the boldest of douche-bag media morons will never cross the line of vaccination and the "scientific authority." Weak protests over masks and lockdowns yes, yet they tout their virtue by getting shots and never fail to mention their ignorant and unstudied belief in all vaxxes. Clips of college students and black preachers promoting "science" they know nothing about are added for curb appeal along with victim families sobbing in grief. Safety and efficacy disappear in a smokescreen of emotional religious fervor. Injecting a substance known to stimulate a strong inflammatory response in someone infected or soon to be infected has resulted in deadly side effects and is purely negligent.

Effectiveness is lost in phony stats where immunity may have already been achieved and re-exposure can prove life threatening. Add all this to the illogical and inane initiatives of an oppressive usurious state. Decades of obedience training and emotional extortion have paved the way to this inquisition where the lamest pontifications can not be criticized and endure through repetitive snaps of the mainstream leash. They still use disinformation to try and convince the "hesitant" with the most childish arguments like conspiracy theory and the influence of anti-vaxx propaganda. Meanwhile mass confusion allows other state agendas to proceed unchallenged.

Jackaroni, Yes, and how soon we forget the autism and autoimmune sufferers and weary caregivers...or the findings of such docs as Suzanne Humphries where all vaxx going back to Salk have been harmful to some extent and promoted as effective when viruses peter out in time as levels of natural immunity adapt. Various thought processes lead to objection of this corona conspiracy, but solid evidence of Vit C, D, B1 reversals point to poor herd health/nutrition/emotional equanimity and the prevalence of scurvy, beri-beri, metabolic dystrophy and autonomic sympathetic dominance through fear and peer pressure.

The "virus" is diagnosed with an erratic and manipulative test and three "symptoms." The symptoms are real, caused by 1. 5G radiation 2. the muzzle 3. disinfectants 4. chemtrails 5. the injections Viral transmission theory is in question. Viruses are more logically end products of the body's detoxification process. "Variants" are simply different kinds, probably infinitely varied.

The pandemic narrative will never go away until the fundamentals are addressed. Namely germ theory (remember its a theory - and one contradicted by a considerable amount of evidence) and the isolation and therefore provable existence of viruses. Unfortunately, Dr Mercola still fails to address these fundamentals, thus rendering his book on the so-called truth of COVID 19 a necessarily incomplete work. Until the fundamental myths are exploded we can expect pandemics to remain a recurring theme in the new normal of political tyranny based on false premises. How could it be otherwise?

They live in a subjective & egocentric state of permanent childhood. These people can't be reached by facts, They only respond to Greed or Fear. Which ever basic idea is uppermost in their minds is what will motivate them. objective reasoning is beyond their grasp

Ivermectin works on the variants, unlike the vaccines. Zimbabwe got hit with the South African variant and was at 70 deaths a day until they deployed Ivermectin. Close to zero after that. Bulgaria just went OTC for it. But still no Emergency Use Authorisation for Ivermectin in North America? 24+ RCT's, 2 dozen intervention studies and the population study of Uttar Pradesh all with spectacular results. Go to flccc.net for a look. If they had implemented this in August 2020 we'd have been done by the end of September. If they had done this in December after the senate testimony by Dr Kory it would be OVER BY NOW. Professor Thomas Borody in August 2020 said: "It's easier than treating the flu now". "You can actually eradicate it". "We know it's curable" covexit.com/we-know-its-curable-its-easier-than-treating-the-flu-profe.. and the senate testimony by Dr. Pierre Kory (FLCCC Alliance, covid19criticalcare.com) in early December. <https://vimeo.com/490351508> This is MEDICAL MASS MURDER.

Yes, agreed, using vaccines gene therapy and unproven vaccines without testing for genetic variations FIRST, then rely on them as a universal antidote is nuts. There's word afoot that some of the original vaccines are failing, just look at all the booster shots on the childhood schedule, you can see the fail. Why does the paradigm still survive? So Bill Gates can get a 20:1 return on investment, the primary reason!

S. Korea still has one of the lowest infection and death rates from Covid-19. They continue to prescribe Hydroxychloriquine to everyone testing positive and/or showing symptoms. Everyone testing positive or showing symptoms gets a minimum of 3 days of hospitalization for monitoring. If symptoms decrease or if they never show symptoms they are allowed to go home and finish their 14 day quarantine. Then they have an app you download to your phone for Covid-19 alerts. If you test positive, everyone you came within 6 feet of will be alerted and they will have to get tested. S. Korea has not shut anything down, including the public schools. You have to be smarter than the virus. Our CDC, NIH, and FDA are being ran by village idiots. Dr. Mercola: "The problem we now face is that logical thinking is being vilified." Right. So how does one logically look at this issue? - One starts the very beginning. One needs only to look at this irrefutable fact: www.youtube.com/watch "They didn't isolate the virus - That's the issue." Logical critical thinking people who want to understand some controversial issue start at the beginning. And what is the starting point on this issue? - It is this irrefutable fact: SARS-CoV-2 is alleged to be a complete, singular, visible, tangible, isolable, identifiable, characterizable, literal autonomous physical entity that has been scientifically authenticated via electron microscopy and genomic sequencing.

And what is the next step in understanding this issue? Having the intelligence, integrity, courage and character to accept and admit that "SARS-CoV-2" has never been proven to exist. And the third step is to understand what Dr. Mercola himself has accepted and admitted: "SARS-CoV-2 has not even been proven to be the cause of COVID-19." (articles.mercola.com/sites/articles/archive/2021/03/16/mrna-vaccine-ge..) Any discussion of this scamdemic that doesn't focus on these 3 facts is a red herring.

Logic applies only to logical problems, which are extremely rare in everyday life. Most human problems are rooted in perception, emotions, intuition, or existential dilemmas. Most of the responses are conditioned in early childhood, before the age of five. The most common conscious problem-solving method is the use of analogy. To add insult to injury, medicine is based on myths and the fact that only 7% of humanity is capable of logical thinking.

"do as I say, not as I do" - this is a common complaint of the child who experiences the hypocrisy of their parental contradiction in words and action - children are told to ignore the reality of their parents activities and be OBEDIENT - if obedience is not observed punishment follows - the parents exhibit control and fear of reprisal - this is how the government of the people and for the people are administering power -

various political philosophers like Rousseau and Spinoza have called for enlightened power structures that would allow the progressive evolution of the human corpus so that a teleological movement could raise the understanding and raise the standards of life on our planet - setbacks do seem to have historical periods where the Rise of Civilization is temporarily held back by the fall and decay of moribund societies - this is what seems to be taking place in our era - the forces of reaction are pushing back and denying the fruits of the struggles that brought us to the point of universal literacy - the myopic Midases want to destroy liberty as a means of ensuring their fiefdom's stability - it will not work - it has never worked in the past and will not work now - human freedom is a part of the God that is inherent in Life itself - those that oppose Freedom are pissing in the wind - like all before them they will become dust - this is inevitable

Just got off the phone with a friend from the UK. He had his jab a week ago. Thankfully only 2 days of feeling like crap but ok now. His ex partner who is 54 had her jab at the same time. 3 days later had a heart attack. She'll recover but has been advised not to have the 2nd shot. Both had the Astra dose. He tells me they are now stating in the UK, because of the South African variant that is apparently running amuck in South London, the jabs will now have to be a yearly thing. He lives just south of South London. 10 miles away. He asked me if I've had mine yet. I told him no. "Why not"? I told him the truth.

The last jab I had in 2005 which was the flu shot nearly killed me, 2 days away from death. At the time my doctor told me, never have another jab. I'm listening. I told him, if he has to have a yearly jab to be able to go about his business and be able to travel which he wants to do, to wait for the Canadian trials to be finished with the TB vaccine. I'm very relieved that he is going to do that. This article is spot on the money. The fear mongering is already in full swing. We have to stay strong, informed and calm so we can help our friends and families through the mind field of misinformation and disinformation as best we can.

AstraZ uses chimpanzee DNA virus vector. ...Don't know if chimp DNA source is real-sourced or "sequenced via computer". We've been here before: The polio Salk vax was contaminated with monkey kidney virus and fertile chicken egg proteins. Nothing was known about the dangers of that at the time of vax development. Both are believed by scientists to cause cancers/ allergies now or in future in humans. Now virologists (including Fauci) are saying 'we don't need the actual virus to make a vax...we've got the gene signature". So now we can all wait for what develops in future in the health of millions who've been vaxed.

My husband and I live in Oklahoma and I will tell you that Dr. Bratzler has his nose in everything. Besides the story in The Oklahoman, he was featured in the Norman Transcript going on and on about how the relatively large demographic in Oklahoma refusing to take the vaccine will prevent herd immunity and possibly prolong the pandemic and the false information on the internet. I am honestly so tired of Dr. Bratzler pushing fear and propaganda that I posted the following reply in the Norman Transcript:

Dr. Bratzler says “. . . I think continued education about the safety and the effectiveness of the vaccine is [key].” Let’s take a hard look at some statistics: the CDC (Criminals for Death Control) just announced that there have now been 3,005 deaths from the COVID-19 shots reported to VAERS. In case Dr. Bratzler is unfamiliar with VAERS, it stands for Vaccine Adverse Event Reporting System. You might think that this is an insignificant number, but let me put it into perspective: these 3,005 deaths now exceed the total number of deaths following ALL vaccinations from August of 2007, through the end of November 2020, just before the experimental COVID shots started. Yes, you read that correctly. More people have died from the COVID-19 shots in a few short months than all other vaccinations combined in the past 13 years. May I also remind you Dr. Bratzler that the COVID-19 shots are ALL made available under Emergency Use Authorization. That means the injections are experimental and investigational. Anyone who receives the shot is participating in the Phase 3 and Phase 4 trials for the pharmaceutical companies. To put it bluntly, they are human guinea pigs. Also, how many people know that the pharmaceutical companies have 100% COMPLETE IMMUNITY!! This means if a person is injured or dies, the individual or family cannot sue the manufacturer.

Anyone avoiding the shot is actually doing their due diligence and researching these facts and making the best decision for their own health. Dr. Bratzler, you should be ashamed of yourself.

Oh sure....of course....more fearmongering using fraudulent science. Let's see....starts with an alleged new "novel virus" announced by a brutal fascist/communist regime (absolutely trustworthy, right!)....unbelievable that a "novel virus" can be so quickly identified using only 37 base pairs from an unpurified non-isolated virus.....oh, we only need a couple of weeks of global lockdown measures to give the wave the chance to move through the population & prevent overwhelming hospitals.....we must do massive testing (using a fake test not testing for a virus) of healthy people....oh, gee, we have to extend lockdown measures because its worse that we thought (according to the WHO)...

everyone wear face diapers & social distance to protect others....oh gosh, death numbers are spiking (after re-categorizing cause of death as C-19, as instructed by WHO)....people are starting to catch on that the reported C-19 death rates are false, therefore, we must switch the narrative to "cases" (by fraudulently including asymptomatic subjects, for which, are NOT to be included)...mad rush is on to establish mass testing facilities....we really hate to do this, but, we just have shut small businesses down, put people out of work, give out free cash to help out.....keep the narrative going, keep people in lockdown.... the only solution is "vaccines" & they are coming very soon...people are getting suspicious...."vaccines" are here!

We are saved!...people dying from the jab...censor, discredit that news....oh my, can't believe it, variants are showing up that are worse than the previous one....we really don't want to do this, but, have to lockdown even harder (previous lockdowns didn't obviously work, so, let's do them again, but, more heavy handed) until everyone is vaccinated.....big push to vaccinate if people want their life back.....next to come - virus mutating so quickly & deadlier each time, death/cases spiking...more "vaccines" & tougher lockdowns....rinse, tweak, repeat...

I know this is off topic today but there has been talk the last few days about the J&J's vaccine and brain blood clots. Many causes of blood clots may be avoided if you have proper Vitamin D/magnesium/B12/zinc levels. I do not know if your levels of these are in the optimum level if that would reduce someone's chance of avoiding getting blood clots from the so called vaccine but if should it should give you a better chance of not getting adverse reactions. When you hear the so called "experts" on tv they have no idea what is causing these reactions other than saying it is a small percentage of total shots given. I think they know but will never make it public that an individual with a healthy immune system will have very little chance or none at all of getting Covid. Nothing said about vital nutrients on mainstream media. Total suppression of alternatives! But what would that do to the vaccine industrial complex www.ncbi.nlm.nih.gov/.../PMC4069050

When will people just stop, look around and realize that absolutely nothing is going on? I have yet to see bodies dropping in the streets. The only people I know who're calling in sick are those who've just had a vaccine or those struggling with sinus infections and sore throat's from masks. One poor young gal pulled up her mask to show me her terribly broken out face from her mask. I work as a clerk in a grocery store in the Oregon Coast. We're packed here with people from all over the country. No ones sick. Hospital empty.....or just normal in a town packed with normally unhealthy seniors. The only time I see a "pandemic" is when I turn on the TV....which is almost never. And I'm hearing our Tyrannical Governor Brown is going to make our county High Risk again. Why can't people see through this? I mean it's so freakin obvious. I've had friends die this year, but it was cancer, cancer, cancer. Or rather the insanely horrific treatments for cancer.

I know!! I'm in a trying debate with my Norwegian friends right now on FB. Isa is 80 and rides a Harley, snow skis, and dances all night! I am trying to stop her, but others on her post are laughing at me. They say the people in the US think that the shots are going to turn us into robots or some crazy stuff. That's what their news tells them! 6 million people in the whole country. My very healthy younger ex Norwegian husband is due in June to get it. He says more people die from virus than shot!

Ugh, welcome to the one party system. Idk! For me, the smoking guns began with censorship and fear mongering. Anyone who watches the news 24/7 will see the same tag lines over and over until the brainwashing is complete. It's been coming ever since my daughter had the HORRIFIC vaccine reaction that caused this mama to take a completely different road in life (eyes opened) *I'm grateful for the help I had detoxifying her, for the seizures to finally stop, for the neurological damage to ease (and encephalitis), etc - i would not have been able to take this road if it weren't for the heavies - like Mary Toco, Dr. Tenpenny, Dr. Mercola, Dr. Wakefield, Dr. Bradstreet — you know, all those doctors who the medical industry wants to take down or HAS taken down or murdered.

Not a big Trump fan, but when he said NO to the WHO, I took great pause. Someone was finally looking out for us. When my girlfriend arrived at the old Coho Hall in Detroit and revealed what she had seen, who they called, all of that.... more pause. The voting stopped and restarted - more pause. 400,000 here - 400,000 there (leaked problems) ... then my friend showed me a video on BitChute about the capitol shooting - in slow motion, that guy TORE IT APART! ... Then talking with a Republican women's group about the Judges and what was being held over them to 'sway' them...

Trump double downed that the truth would come out, but McConnell being as crooked as they come UGH! The whole story behind having Trump run in the first place - they knew Hillary could beat him ... the UPS truck with a million Hillary ballots found (ya, that was hidden as fast as it was found) ... We are in for a roller coaster ride. I will never trust the system again. I will never trust voting again. And why ANYONE would want to be experimented on (trials end in 2023, right?) We are living in a controlled nightmare. Why are people going there willingly? They win if they steal our joy. I cut social media- this is it

Very pleased to see the chart posted in Dr. Merola's article. An international human rights activist was helping an American torture victim who was trying to recover physically and emotionally. This victim was brutally tortured in another country subsidizing torture by the US Government. She told this victim: Rule #1 1) You are dealing with powerful people. 2) They are trying to break you. 3) They are trying to break your support system. 4) They are covering up for someone. Tandem to Dr. Mercola's chart.

If Dinosaurs had been this out-of-touch with reality they wouldn't have lasted for 200,000,000 years. A "vaccine" confers immunity to a disease. You can't get it, you can't have it, you can't give it. This "vaccination" does none of those things. This vax isn't even advertised to do any of those things. What it may do and the best you can hope for is that it will lessen your symptoms when you get the disease if it doesn't kill you itself. fear now is that this new variant may be more resistant to vaccine antibodies. " How can it be "resistant to vaccine antibodies" when there is no vaccine, never has been, and the weird chemical they are putting into sheeple is a gene-therapy and not a vaccine

I think it is best to understand what viruses really are to release fear. Here is a great article on it, with a small excerpt: johnscottconsciousness.com/germ-theory What do we now know about a virus? A virus lacks the ability to replicate on its own; It requires the assistance of a host cells' duplicating equipment, in order to borrow enzymes and other molecules to concoct more viruses; A virus is "not a living organism, it is simply a well-organised molecular messenger." (Fabio Romero, Institute of Human Virology); The human body has trillions of viruses and micro-organisms present, that live in our skin, intestines, mucous membranes... The presence of a virus does not mean it is the cause of an illness;

The only way to get a virus outside of natural means is via direct injection (vaccine) or blood transfusions of a patient who has a virus. However, in such cases, the body only analyzes it as foreign tissue that must be eliminated. Since the virus did not originate within the bodily host, that body does not know the time and place that the virus will be active nor does it have the key to decode it (RNA or DNA encoded by the cell) and cannot find the time of its activity. As such, it is analyzed as a foreign substance that must be eliminated. Protein solvents (viruses) are manufactured of varying strengths to discard this waste if living microbes cannot eliminate it.

the solution to all this is for folks to learn to muscle test. Then you can not only discern your own health and what is good and bad for you; you can also discern the heart and motives of others. You can do it at a distance and you can totally know the intentions of those in any position from mate, to preacher to President and everyone in between. God created an electrical and frequency system to make this work so you would know what is going on in life. Those who can muscle test see some serious problems in those who have had both shots. These longer term effects could happen as early as July and August. I pray those who muscle test and do naet are wrong but they record is very solid and much better than standard medical thinking and discernment.

Darzoum. We left CA recently mostly bc of Pan's draconian measures. We have had medical exemptions in our family do to immuno-suppression such as lupus in the family hx. I and many others were fighting mightily for the 1% of families whose kids need medical exemptions, including my grand children. The legislation 'heard' thousands of people lined up to give their one minute speech as to why they can't take a vax and need an exemption. Within 20 minutes of a closed door decision, our fate was sealed. Why Pan went after a mere 1% of the population when there was at least 95% vaxxed immunity is beyond me. I am counting on our red state to protect our medical freedom. But not feeling over confident about ti.

In Maine, there's a supposed "fourth wave" of Covid despite the fact that roughly 70% have received one vaccine and 33% have had both. My logical conclusion is that the vaccine either doesn't work or they are lying about the surge to sell more vaccines - current and/or booster shot.

Posted On 04/14/2021

It's probably ADE (Antibody-Dependent Enhancement). That's where the antibodies you produce don't neutralize the virus. This new "double-mutant" strain could very possibly be getting into people's cells easier via ADE. When ADE occurs the antibodies still attach to the virus in an attempt to neutralize it, but fails to neutralize the virus. This enables the virus to enter the cells easier because the cells no longer recognize the virus. They see the virus as your own antibodies! So you get sicker than you would have without a vaccine! That's why Anthony Fauci is so animate about vaccinated people STAYING HOME! He says "Don't go out to eat, travel, fly, or doing anything where large groups of people are after getting vaccinated"! ADE is why he is saying that! He is scared \$h!tless that we may see more people dying in 2021 than died in 2020 and the blood will be on his hands!

And how do they explain how a "vaccine" that is actually a gene therapy designed only to reduce the severity of symptoms, is going to provide herd immunity? I just hope that humanity is so sick and tired of all this crap that they just say "H*ll No!" this time around! On a personal note, due to a garage fire, my home suffered extensive smoke damage and is being gutted. In answer to someone's question about why "They" chose to go the destructive-vaks route vs NOT going the destructive-weather-control route, I can only surmise that the mass destructive-vaks-campaign gives "Them" (in "Their" eyes) a guaranteed profit-base, whereas the destructive-weather-route imposes on "Them" (in "Their" eyes) primarily guaranteed expenses -- although each route seems to guarantee (in "Their" eyes) a destructed human population.

Richard Pan should not be called a doctor. To indiscriminately promote an experimental medical procedure which hasn't completed Phase 3 clinical trials, non- FDA approved, without careful individual risk/benefit consideration is malpractice in my book. I'm not against vaccination per se, I am against doctors who do harm. I've noticed some of these younger medical graduates really seem to have been indoctrinated and don't really think like doctors.
