

## Guillermou

**MORE POISONS, DISEASES AND DEATHS, IN HEXAVALENT VACCINES.** The great danger of combined, single-injection vaccines, with formulations that group multiple antigens for multiple diseases, has been evidenced throughout the years of vaccination. Hexavalent vaccines include Infanrix Hexa, Hexyoni, Vaxelis and Hexavac. These vaccines have been used in childhood vaccination programs in most European countries in the last two decades.

EudraVigilance is the European database of suspicious reports of adverse drug reactions. As of February 29, 2020, the database listed 24,543 adverse events for the long-term Infanrix Hexa vaccine, many of them classified as serious (including more than 5,000 nervous system disorders), with the vast majority occurring in the 2 month period

The combined vaccines that are currently given to American children include the Merck four-component ProQuad vaccine against measles, mumps, rubella and chickenpox and the five-in-one Sanofi Pentacel vaccine against diphtheria, tetanus, pertussis , poliomyelitis and Haemophilus influenza type b. By 2020 it seems to apply in the US, Vaxelis intended for babies. which combines the five components, together with the genetically modified Recombivax Merck vaccine against hepatitis B. The inclusion of Recombivax warns of serious damage, as it uses aluminum as an adjuvant related to serious autoimmune conditions. The Vaxelis package leaflet indicates serious damage and deaths in the trials. EudraVigilance shows 2,748 adverse events for Hexyon; 734 adverse events for Vaxelis; and 1,622 adverse events for the Hexavac. Many more data in this excellent report of March 05, 2020, the website of childrens health defense. [childrenshealthdefense.org/news/a-six-in-one-vaccine-associated-with-s..](https://childrenshealthdefense.org/news/a-six-in-one-vaccine-associated-with-s..) (march 05, 2020)

Hey Gui, from the article; {"What do researchers do when they discover vaccination opponents are justified in being concerned? No vaccines have been studied for their non-specific effects on overall health, & before we have examined these, we cannot actually determine vaccines are safe. - In addition, our research shows some vaccines actually increase overall mortality, especially among girls, & this is very worrying,' - So, where are the headlines declaring the scientific conclusion vaccination opponents are justified in their concern?"} Told you so rings hollow. Where are the headlines? Why is it Legacy Media mostly just runs & rehashes the old Dr, Wakefield articles as those are incomplete in information as they claimed he attacked vaccines when what his concern was, when we look at these facts it implies we need more research. Instead the Legacy Media ran the sky is falling, there was a justified reaction from parents leading to the campaign to besmirch & ruin Dr. Wakefield. I told you so rings so hollow.

How can Government or the media function when it is owned & run by the birds who need policing? How can we have so called market place solutions when the biggest worst behaving bully's can run a shell game scam to stay in a ca\$h cow business model? Where is the competition to supposedly reign in bad actors when the worst are too big to fail, jail or nail, yet the small or medium size competitors are thrown in the ditch for the those same big wolves to feed on them? But think of the positives, with a double mortality rate for girls, it leaves a large pool of sexually frustrated rage machine boys who can make excellent cannon fodder.

## datadragon

Good morning Stan, Steve and Gui, I had put together and released a thorough research article last year on the topic of the dangers of multiple vaccines at once, combination vaccines, sudden infant death, hpv etc <https://tgl.ink/pVkAyF> Among infants 86.2% had received more than 1 vaccine on the same day who had died within a few days after vaccination. For child reports, the most common vaccines they had been given prior to death were combination vaccines given simultaneously with other vaccines.

A review of data from the Vaccine Adverse Event Reporting System (VAERS) further shows a dose-dependent association between the number of vaccine doses administered simultaneously and the increased likelihood of hospitalization or death for an adverse reaction. The 6 in 1 Hexavac and 6 in 1 Infanrix hexa as well as the 5 in 1 pentavalent vaccine used in India are all linked to babies dying. The mortality rate among the vaccinated babies in the first 48 hours after a vaccination with 6 in 1 Hexavac was 2.5 times higher than the average mortality in this age group. The 6-in-1 vaccination Hexavac was first licensed for use in Europe in October 2000 but suspended Hexavac five years later after a detailed analysis suggested that children who received the vaccine in their second year of life had an elevated risk of sudden death.

Hepatitis B given alone is linked to deaths and an exception to multiple vaccines given at once which may be due to the AAHS adjuvant in Mercks version as death rates fell approximately 75% recently when they switched to GSKs non AAHS version. AAHS is the same adjuvant used in the problematic Gardasil... The 2019 study that found the cervical cancer rates in Alabama are highest in counties with the highest HPV vaccination rate was later edited to attempt to downplay the findings, I covered that here in comments on age of autism. [www.ageofautism.com/2019/06/school-nurse-assaults-bronx-new-york-boy-w..](http://www.ageofautism.com/2019/06/school-nurse-assaults-bronx-new-york-boy-w..)

## Guillermou

Well exposed JUST. We are in a world globalized by deception, where security in vaccines, agriculture and food, is in the hands of institutions governed by large monopolies, which establish servitude alliances, safeguarding their interests. Big Pharma is influencing WHO, FDA and CDC to accelerate safety studies and make more profits. Big Pharma has no financial risk for vaccine damage, because the government prevents victims from suing large pharmaceutical companies, causing them not to worry about vaccine safety. We are facing an authoritarian regime, where institutions, and BigPharma defend their plot of power, and profit from the misfortune of the diseases that cause the vaccinated, while stealing money from citizens' taxes.

The lords of organized crime of the 21st century, the pharmaceutical industry, have risen to an unprecedented dominance over humanity. These outlaws are too big to fail, they have dominated and expanded the industry's corruption strategies, to levels far greater than the tobacco industry. Big Pharma has taken our most fundamental democratic institutions necessary to keep the industry under control: regulatory institutions, legislatures, politicians, the press / free media, academia and objective science. Big Pharma nowadays not only influences the legislation on medicines, but also guarantees its own service to vaccine producers. Public money is used to strengthen the monopoly of the destroyers of people's lives and rights. All these corporations instead of being tried and proven for crimes against humanity, continue to use the same poisons they kill, but under the pretext of being saviors of humanity

## Randyfast

The following stats/numbers article is only a very small sampling of the number of people who have been injured (many seriously) by vaccines. It's totally related to the conversation.

[tapnewswire.com/2015/06/thousands-of-uk-girls-injured-by-hpv-vaccine/](http://tapnewswire.com/2015/06/thousands-of-uk-girls-injured-by-hpv-vaccine/)

Posted On 03/10/2020

---

## Guillermou

Perfect RANDY, it's more evil than it seems. At the other extreme, examine, on the link, the overall income of vaccines from major vaccine industries in 2017 and 2024 is expected. I wouldn't be surprised if it increases with covid-19. GlaxoSmithKline was the world leader based on revenue generated through vaccine products in 2017 and is expected to maintain this position until 2024. The London-based pharmaceutical manufacturer generates about one fifth of its total revenue through the segment of vaccines GlaxoSmithKline vaccines, among others, are aimed at meningitis, influenza, shingles and hepatitis. Other important players in the global vaccine business are Merck & Co., Sanofi and Pfizer. [statinvestor.com/data/12728/top-vaccine-companies-global-market-share-..](http://statinvestor.com/data/12728/top-vaccine-companies-global-market-share-..) (2019) [www.statista.com/statistics/314562/leading-global-pharmaceutical-compa..](http://www.statista.com/statistics/314562/leading-global-pharmaceutical-compa..) (2019)

Posted On 03/10/2020

---

A perfect example is how the drug industry is showing that even in a crisis, it uses its influence in Washington to fight off efforts to cut into its profits. Industry lobbyists successfully blocked attempts this week to include language in the \$8.3 billion emergency coronavirus spending bill that would have threatened intellectual property rights for any vaccines and treatments the government decides are priced unfairly. [www.politico.com/news/2020/03/05/coronavirus-drug-industry-prices-1224..](http://www.politico.com/news/2020/03/05/coronavirus-drug-industry-prices-1224..)

Liability must be restored. Reading Dr. Salk's message from the May 1984 hearing it becomes abundantly clear that it was understood at the time that liability is an absolutely necessary force to incentivize vaccine manufacturers to compete on a platform of safety instead of profitability. The 1986 National Childhood Vaccine Injury Act was a colossal mistake, and it must be repealed. In his testimony, he argued that the live polio vaccine should be excluded from the NVICP to allow the market – choice by patients and physicians – and lawsuits on liability to allow the success or failure of the live polio vaccine, because given the lack of protection, the lawsuits against the manufacturers would incentivize them to stop producing the vaccine altogether or to make their own alternative, safe vaccine. Dr. Salk's position was with regards to a single vaccine, although he also discussed the DPT vaccine was likely doomed due to a worse safety profile compared to acellular options that were being developed at the time. [jameslyonsweiler.com/2020/03/01/dr-jonas-salk-wanted-liability-not-nvi..](http://jameslyonsweiler.com/2020/03/01/dr-jonas-salk-wanted-liability-not-nvi..)

Pfizer, the sole manufacturer, had revenues of nearly \$4 billion from its Prevnar vaccine line last year, about double what it made from high-profile drugs like Lipitor and Viagra, which now face generic competitors. [www.nytimes.com/2014/07/03/health/Vaccine-Costs-Soaring-Paying-Till-It..](http://www.nytimes.com/2014/07/03/health/Vaccine-Costs-Soaring-Paying-Till-It..)

Posted On 03/10/2020

## balhawk

Well stated, Gui. And yet vaccine injuries are notoriously under-reported. The Harvard Pilgrim automated reporting system, the report from which is linked below, found medical history consistent with adverse events following more than 1 in 40 vaccine doses, which is over 200 times the frequency reported to VAERS, and in about 1 in 11 subjects. US kids get almost twice as many doses (about 70) prior to adulthood. [digital.ahrq.gov/sites/default/files/docs/publication/r18hs017045-laza..](https://www.digital.ahrq.gov/sites/default/files/docs/publication/r18hs017045-laza..) So, IF measles vaccine deaths are under-reported at the same frequency, we COULD be having over twice the death rate due to the measles vaccine that we had due to measles just prior to the vaccine, which was declining. Keep fighting, everyone, and great work, datadragon!

Posted On 03/10/2020

## Guillermou

Yes, Balhawk, studies on more frequent vaccine lesions should be performed by independent means. Some statistics say that since 1988, more than 21,636 petitions have been filed with the VICP. During that 30-year period, 18,586 requests have been awarded, with 7,131 of which were determined to be compensable. The total compensation paid during the life of the program is approximately \$ 4.2 billion. In the most severe cases, injuries attributed to childhood vaccines have included brain damage, paralysis and death. Over the years, 1,286 petitions have claimed that adverse reactions caused death, [www.nvic.org/cmstemplates/nvic/pdf/vicp/vicp-monthly-report-01-2019.pd..](http://www.nvic.org/cmstemplates/nvic/pdf/vicp/vicp-monthly-report-01-2019.pd..) (2019)

The following is a table of vaccines, injuries, disabilities, diseases, conditions and deaths resulting from the administration of such vaccines, and the period of time in which the first symptom or manifestation of onset or significant aggravation of such injuries, disabilities , diseases, conditions and deaths will occur after the administration of the vaccine for purposes of receiving compensation under the Program [www.hrsa.gov/sites/default/files/vaccinecompensation/vaccineinjurytabl..](http://www.hrsa.gov/sites/default/files/vaccinecompensation/vaccineinjurytabl..) .-- This video presents information about the 1986 National Childhood Vaccine Injury Act (NCVIA) and the National Vaccine Injury Compensation Program in an easy to understand format.

## **danceswithwords**

Whenever open dialogue and inquiry on any issue regarding public welfare is censored, banned, or demonized you have an issue that NEEDS to be scrutinized as publicly as possible. If vaccines are so safe, why does the medical and media establishment systematically hunt down and attack any medical professional who questions them? I remember reading over a decade ago a testimonial from a retired medical professional involved in the vaccines in Africa recounting how security was needed to force the vaccines on the people because mothers would run with children when they saw the vaccine crew coming. The mothers felt the children got sick after and were terrified. Not only was there no informed consent, but no respect for personal autonomy. This article confirms what the mothers saw. This is criminal. All of this is criminal. People need to wake up!: Props to Mercola for using his voice and credibility to cover difficult subjects like this. Thank you! THANK YOU!

## Guillermou

Hi DANCE. What must be sent to Africa is humanitarian aid to feed the unprotected populations. Agriculture in Africa has been violated by the greed of large agri-food industries, where Bill Gages has been the driving force. Peasant agriculture is being enslaved by transgenic seeds and pesticides, in the great lie of being able to feed the population.

Polioviruses derived from circulating vaccines (cVDPV) have arisen in environments with low population immunity and have caused paralysis. After the synchronized change from the trivalent vaccine against oral poliovirus (tOPV, types 1, 2 and 3) to the bivalent vaccine Against oral poliovirus (only bOPV, types 1 and 3) in 2016, the transmission of cVDPV type 2 was detected in 12 countries in Africa and also in China. Type 1 cVDPVs were identified in Indonesia, Myanmar and Papua New Guinea, and type 3 cVDPVs were identified in Somalia.

Since 2000, more than 1000 cases of paralysis caused by cVDPV have been reported. Paralytic polio associated with the vaccine can occur in children who receive the vaccine, usually after the first dose, or in their susceptible close contacts. This is another of the realities of vaccines. The objective should be to feed the population with peasant agriculture, boosting natural immunity, enhance the hygiene measures with self-supply resources and not make the population sick with vaccines.

## rrealrose

Hi Gui, If not mistaken, several sources reported last year that India suffered as many as 50,000 (50k) Indian kids getting polio flaccid paralysis over the past five years or so, attributed to the recent push (from the Gates Foundation et al) to eradicate polio in India, alluding to an error in judgement to be injecting vaccines into under- or mal-nourished young bodies. Is this about right?

Posted On 03/10/2020

---

**balhawk**

History has clearly demonstrated the the purpose of censorship is NOT to protect people from lies, but to protect the powers that be from the TRUTH. Yes, rrealrose, tens of thousands are stricken by acute flaccid paralysis in India each year. As best I understand, it is non-infectious condition, which had been diagnosed as poliomyelitis prior to 1958. They still use toxic agricultural pesticides that have always been the ACTUAL cause of poliomyelitis. [harvoa.org/.../overview.htm](http://harvoa.org/.../overview.htm) Yes, it IS criminal. And it is getting exposed. The emperor has no clothes.

## Almond

This is what happens when govt gets involved in medical care. The pot of money in the govt cookie jar is so lucrative and tempting that it's sweet scent attracts all kinds of self-serving rodents. The solution is to get govt out of the healthcare business, let people keep their own money to buy their own medical care, or, at least let people use their dollars to buy the insurance they want. As it is now, govt extorts money from individuals and makes decisions about what kinds of health care they can purchase that is covered with your own tax dollars. That is, if you are paying into the system. Otherwise, it is free. It would be much better, too, if professional organizations set standards for medical schools and their graduates rather than govt.

This also includes naturopaths accrediting their own medical schools and hospitals. At this time, many nonstandard practitioners are sidelined by bureaucrats and not allowed the same opportunities as MDs. Interestingly, during WWII, when Holland was blockaded, there were no imports of food or medicine. People were forced to survive on foods locally available. This included a lot of oatmeal for breakfast, lunch and supper. Statistics showed that the health of the general population improved during the war years when foods like sugar were in short supply and people lost access to many drugs.

Of course, many people also had to do more physical labor and because of that, probably also got more sunshine. Having access to health care has never been the same as being healthy. With the exception of trauma treatment, all health comes from nature. Natural medicine is the only traditional medicine there is. It has survived because it is cost-effective and works. By comparison, "Carnegie" medicine and synthetic drugs are a recent trendy phenomenon. Of what value is a test of several hundreds or thousands of individuals in a controlled study lasting a few months or years when compared to use by entire populations over millenia?

Posted On 03/10/2020

---

**balhawk**

Well, at least then only uninformed suckers would succumb to the massive indoctrination and censorship media campaigns big pharma would continue to buy, but people who are hip to the scam would have a CHOICE. Better yet to get profiteering out of health care altogether, as well. For those who can't afford to purchase health insurance, one idea is for people to set up non-profit health care co-ops run by the members, and accountable to the members; rather than beholden to predatory corporations who use "public" health care as a Trojan horse to subsidize toxic sickness care that only makes disadvantaged people all the sicker..

## Darzoum

In a scientific age, the charge of being “unscientific” can weigh like the edict of heresy in former times. But much that hides behind the imprimatur of “science” is actually functioning more like a belief system, “scientism.” The presence and actions of scientism are exposed when entrenched interests feel threatened by a deeper, unbiased look into a subject, irrespective of established conventions; in other words, scientism is often threatened by the scientific method.

Besides “unscientific,” another “name-calling” disparagement is to refer to something as “magical” thinking. Those leveling the charge often miss the fact that they are engaged in the very practices they accuse others of, including the casting of word spells. A phrase such as “safe and effective,” said of vaccines like a mantra, is a spell meant to invoke unquestioning obedience to the inviolable god, “science,” even without the actual scientific studies that that appeal to authority implies.

The root meaning of the word “pharmaceutical” refers to witchcraft. In the ongoing evolution of humanity’s conscious awareness, beyond the twilight consciousness of witchcraft, we have striven to firm our grasp on the central questions of life purpose traditionally handled by religion, to which we add the tools of philosophy and conscience. One-by-one, “big pharma”—through its politically positioned skills—has attempted to close the doors on philosophical, conscientious and religious exemptions to vaccination, foundational rights enshrined in the Constitution of the United States and the Nuremberg Code. As vitally important as vaccine safety, body autonomy and informed consent are, the assault on conscience, spirit and wisdom are more so... without them, there is no civilization per se, only materialistic, technocratic scientism. In this cult, unlike voodoo, the needle is stuck directly into the person rather than their effigy; we are told to believe this is progress.

Posted On 03/10/2020

---

## Guillermou

Very well expressed DARZOOM. Witchcraft and deceptions. The Greek word pharmakeia only appears three times in the New Testament. Its main meaning is "the use and administration of drugs" but in Galatians 5:20 it is translated as "witchcraft", and in Revelation 9:21 and Revelation 18:23, it is translated as "sorcery." When written in the male genre (pharmakeus) it refers to a person who prepares or uses magic remedies. Both words are derived from pharmakon, which means "a drug, or a potion that binds with enchantment." When used metaphorically, it refers to the deceptions and seductions of idolatry.

Yes, the science of deception and witchcraft, the science that obeys Money, the science of biased and manipulated publications. The study of Dr. Hooker. In the scientific journal Translational Neurodegeneration, it shows that African-American children who receive their first MMR vaccine before 36 months are 3.4 times more likely to develop autism compared to after 36 months.

After data were collected on 2,583 children living in Atlanta, Georgia, CDC researchers excluded children who did not have a valid birth certificate from the State of Georgia, which reduced the sample size under study in a 41%, eliminating the statistical power of the findings and denying the strong MMR-autism link in African-American children.

The documents of the CDC of the Congress and the discussions that Hooker had with the complainant reveal a generalized manipulation of scientific data and a top-down pressure on the scientists of the CDC to support the fraudulent application of government policies on vaccine safety . Dr. Hooker stated: "The CDC knew about the relationship between the age of the first MMR vaccine and the incidence of autism in African-American children as early as 2003, but they decided to hide it." [www.globalresearch.ca/vaccines-u-s-centers-for-disease-control-manipul..](http://www.globalresearch.ca/vaccines-u-s-centers-for-disease-control-manipul..)

---

## **balhawk**

A very profound comment, Darzoum. Just like many self-described "skeptics" are in fact the truest believers in current consensus beliefs.

Posted On 03/10/2020

---

## **Darzoum**

Balhawk, yes, good point. And if your skepticism is really all about getting on the opponent's chessboard--playing their game, by their rules--on another level, that acknowledges and supports their authority--another aspect of propping-up a consensus belief.

Posted On 03/10/2020

---

## **luccim**

Since 1986, vaccine companies and Doctors that inject them have been shielded from any liability. This needs to change if Americans want safe vaccines.

Posted On 03/10/2020

---

## Guillermou

Yes, LUCIM, in 1986 Congress passed the National Childhood Vaccine Injury Law (NCVIA), creating a compensation program, to stabilize a vaccine market negatively affected by an increase in vaccine-related demands. With this law, Big Pharma has no financial risk for vaccine damage because the government prevents victims from suing large pharmacies, which makes large pharmaceutical companies not worry about vaccine safety. We are facing an authoritarian regime where institutions and BigPharma defend their plot of power, and profit from the misfortune of diseases that cause vaccinates, while stealing money from citizens' taxes.

Dr. Theresa Deisher, a doctor in Molecular and Cellular Physiology at Stanford University, the first person to discover stem cells derived from the adult heart, determined that residual fragments of human fetal DNA in vaccines may be one of the causes of autism in children through vaccination. The dramatic increase in autism and serious illnesses and deaths, such as those contemplated by Dr. Mercola, NCVIA, although approved more than 30 years ago, continues to protect vaccine manufacturers from liability, protecting BigPharma's profits and destroying The health of people since childhood.

## stanleybecker

there are no "safe" vaccines as the whole conception of using adjuvants that cause antibody white corpuscle activity is flawed - making people healthier in order to withstand and avoid disease is considered non profitable by Pharma shareholders like Bill Gates who refuses to consider feeding the poor as counter productive to "population reduction" - does this make sense?? - Gates claims that vaccinations "save lives" while his ideological intention is to prevent life - how can these two contradictions be reconciled??

Posted On 03/10/2020

---

## **Darzoum**

Luccim, yes. I would just add that Americans--or at least, this American--want informed consent and freedom of choice. This is as much or more a civil rights issue as a health issue. I, for one, am not the property of the state, available at its whim for a forced injection of ANY kind! Sovereignty begins with the free individual.

Posted On 03/10/2020

## datadragon

Hi Darzoum, As opposition to Big Pharma-themed mandatory vaccine bills explodes in state capitols across America, the thin margin of narrow Big Pharma talking points parroted by their proponents and propagandists is evaporating rapidly. THIS MOMENT MARKS THE TIME WHEN NO ONE CAN EVER SAY AGAIN THAT VACCINES DO NOT CAUSE AUTISM. The American people now know, thanks to the CDC's legally-forced admissions, that such a statement is simply unscientific and unsupported by the data.

Moving forward, the motives of those who continue to report or recite the 'vaccines don't cause autism' mantra will now be viewed as medically and scientifically ignorant—at best, or agenda-driven and willfully dishonest in favor of Big Pharma's legendary 'profits over people' modus operandi. The People have risen. It's evidenced by capacity protests throughout America in response to ill-directed vaccination legislation. History will look upon those unwilling to incorporate these newly uncovered facts about vaccines and autism unfavorably, as the pendulum swings towards justice and truth.

## Guillermou

Great link RANDY, These deaths and diseases, are the consequence of the Gates Foundation empire, and the institutions subordinated to the power of large pharmaceutical corporations. Bil Gates, established in 2000 with an initial endowment of \$ 42.9 billion and expanded by an additional \$ 30 billion from Warren Buffet in 2006, has become the world's leading health actor, as well as the largest non-state funder of the World Health Organization (WHO). As a result of the "tremendous agenda setting power" of the Gates Foundation, the world health community designated 2010–2020 as the Vaccine Decade; developed a Global Plan of Action on Vaccines; and created the Public-Private Global Alliance for Vaccines and Immunization (GAVI Alliance), which receives almost a quarter of its funds from the Gates Foundation.

Examine, on the link, the overall income of vaccines from major vaccine industries in 2017 and 2024 is expected. I wouldn't be surprised if it increases with covid-19 GlaxoSmithKline was the world leader based on revenue generated through vaccine products in 2017 and is expected to maintain this position until 2024. The London-based pharmaceutical manufacturer generates about one fifth of its total revenue through the segment of vaccines GlaxoSmithKline vaccines, among others, are aimed at meningitis, influenza, shingles and hepatitis. Other important players in the global vaccine business are Merck & Co., Sanofi and Pfizer. ## datadragon

The five non-live vaccines the researchers studied were: DTP vaccine, pentavalent vaccine, inactivated polio vaccine, H1N1 influenza vaccine and hepatitis B vaccine. These all increase the overall mortality rate, especially among girls, even if they protect against the target diseases. We have found that various vaccines have either negative or positive effects. We examined the vaccines for common features and found that the live attenuated vaccines have the beneficial non-specific effects, whereas the non-live vaccines produce the adverse effects, especially among girls. We observed beneficial Non Specific Events after single Measles Vaccine was introduced in low-income countries in the 1970s. Subsequent observational studies and randomized trials confirmed beneficial NSEs of live smallpox vaccine, BCG and OPV. However, no non-live vaccine has yet been documented to produce beneficial NSEs.

There is now substantial evidence that mortality is lower when live BCG vaccine is co-administered with DTP than when DTP is administered after BCG. When studies with survival bias or coadministration of BCG and DTP were excluded, DTP-vaccinated children had higher mortality than DTP-unvaccinated children. A non-live vaccine administered after a live vaccine will reduce the beneficial NSEs of the live vaccine. For example, when BCG was co-administered with DTP it reduced the negative effect of DTP; when DTP was administered after HTMV this had a strong negative effect for female survival. So far all studies have shown that non-live vaccines are associated with higher female than male mortality. The Hep B vaccine contains aluminum adjuvant and the BCG vaccine does not contain aluminum adjuvant (BCG vaccine contains no adjuvant). The BCG and hep B vaccines had OPPOSITE effects on the brain (BCG being beneficial, and hep B being detrimental), and a combination of both vaccines resulted in cancellation of the effects. <https://tgl.ink/pVkAyF>

## Guillermou

Very interesting DATA. Also. Individual susceptibility to vaccine adverse effects may be associated with population risk factors of various sorts. The following sections represents topics chosen by the Forum members, based on their knowledge of potentially promising research. These studies include those that examine the potential link between the following: arthritis and rubella vaccine; anaphylaxis and measles, mumps, and rubella vaccine; convulsions and DPT; high-titer measles vaccines and mortality; multiple sclerosis or Guillain-Barré syndrome and vaccination; multiple-antigen vaccinations and adverse events; and premature infants and adverse events following vaccination.

The researchers evaluated whether people who received the rubella vaccine develop autoantibodies against the two autoantigens necessary for viral replication and if such autoantibody production is associated with the development of long-term non-rheumatoid arthritis. A Japanese study found, for example, that the blood of 10 of 11 patients who had an anaphylactic reaction after vaccination against measles, mumps and rubella reacted to the jelly used in the vaccine. A recent study by the Centers for Disease Control and Prevention (CDC) found that infants with a history of seizures were approximately 10 times more likely to experience seizures or other neurological adverse events after vaccination with DPT than infants without a history seizure personnel In the link, more research on the identification of populations at risk of adverse events: [www.ncbi.nlm.nih.gov/.../NBK232981](http://www.ncbi.nlm.nih.gov/.../NBK232981)

**balhawk**

How the hell are these poisons still in use? A supplement or herb that is associated with 1/1,000,000,000,000 the problems would be pulled before the news even gets out.

Posted On 03/10/2020

---

## **Guillermou**

Yes, Balhawk, elites dream of being like gods, digital economy and biotechnology with the religion of data, they feel capable of replacing the healing forces of each person, they don't admit that herbs and supplements, that don't cause harm, Like vaccines, they can help, together with healthy eating and exercise, to boost the immune system. In Spain, the Science and Technology Foundation conducted a survey. The conclusion: 52% of Spaniards believe that homeopathy works. This is how mankind is creating antibodies, and not with vaccines and drugs that eventually produce more potent bacteria and viruses. All this culminates with more deaths from chronic and degenerative diseases, including cancer, to the point of predicting that by 2050 more people will die from yaviral bacterial diseases, than from cancer.

In Spain, vaccines are not mandatory, nor in other countries of the European Union, although under certain conditions the obligation to be vaccinated could be imposed. In Sweden there was a campaign to make vaccines mandatory. The Arkelsten motion was not only rejected by parliament: it showed that vaccines may not work; For example, the MMR vaccine is repetitive, receiving side effects twice. The list of additives was shown, studies show that vaccinating can be a bad idea. The role of infections for the development of the immune system is beginning to be understood. Robert F. Kennedy Jr. explains in the video how the powerful Big Pharma has legal immunity when it comes to vaccines. <https://youtu.be/KzlgqQPrqpc>

## **krisjb1**

Without parental agreement to vaccines a child is not allowed to enter public school. Without agreement to vaccines a young person cannot go to college. The threat by federal agencies to cut off opportunities is with us and if anyone thinks it can be stopped is wrong. The gate has been left open, the monster has escaped, and it is fully capable of taking lives with no apology or remorse.

Posted On 03/10/2020

---

## stanleybecker

kris - the monster is the "gate that has been opened" - his name is Bill Gates

Posted On 03/10/2020

---

## Guillermou

Yes, KRISJB, As Dr. Mercola reports, vaccine risks are limitless. For example, almost 40 percent of cases reported in the US measles outbreak. UU. of 2015 occurred in newly vaccinated individuals who developed vaccine reactions that seemed indistinguishable from measles. Outbreaks of whooping cough in highly vaccinated childhood populations have been traced to decreased immunity. and the evolution of the B. pertussis microbe. The effectiveness of the flu vaccine was less than 50 percent in 11 of the last 15 flu seasons. All this is said by the CDC, with which the results will be much worse. [jcm.asm.org/.../735](http://jcm.asm.org/.../735) [www.cdc.gov/.../pertuss-surv-report-2017.pdf](http://www.cdc.gov/.../pertuss-surv-report-2017.pdf) [www.cdc.gov/.../past-seasons-estimates.html](http://www.cdc.gov/.../past-seasons-estimates.html)

With this panorama, one can go against the right of parents to take care of their children against disorders of the immune system, which throughout their life will materialize in diseases in chronic and degenerative diseases. The science is not perfect, the lack of vaccine safety is evident, and medical interventions carry risks, so parents have the power to exercise informed consent, to assume medical risks on behalf of their minor children, and say on the intervention of vaccines.

## farmercist

Things like wheat and sugar are the real cause of disease, not lack of vaccines.

Posted On 03/10/2020

---

## GreekPrincess77

I am in the middle on your comment. Wheat and sugar are detrimental to the health, however so are vaccines. One is putting foreign substances into the body that sit there and wreak havoc and cause a cascade of chronic inflammation in the body, and place a heavy burden on the body's organs to detoxify it. And especially if one is consistent with getting vaccination. One size doesn't fit all and that is the approach. There have been zero studies on the safety of vaccines and how they affect the overall health of individuals overtime. Unless that is addressed and looked at extensively what they say holds no merit, when there only stats contradict what they are trying to sell there BULLSHIT. They tell you the sun causes cancer and the use of a microwave is safe and doesn't destroy the nutrients in your food. That's why they are never held accountable for the damage there vaccines cause because it's cumulative and it weakens the body overtime. Some see the reactions immediate others not until sometime. IA with part of your post but vaccines are equally toxic to the body as sugar and wheat are.

Posted On 03/10/2020

---

Enlightening article DR.M. Does any of this come as a surprise to anyone. One size fits all is the motto. Doesn't work, then they bombard the system with all these foreign substances that the body doesn't recognize. Pharma companies admit they can't guarantee immunity and they don't know how long it lasts. So when there is an outbreak they quickly point the finger at the unvaccinated. In reality most of those people have been vaccinated where they should have acquired as they put it herd immunity. There comeback is oh get another vaccine to ensure immunity against this virus. Bunch of bull \*\*\*.

Naturally acquired immunity is the best and most often provides lifelong immunity. That is scary about this malaria vaccine and what is at stake for these poor children. Mortality rate being the highest with the girls. It doesn't surprise me that parents are unaware of what is at stake and just believe this is the next best thing that will eradicate malaria. So they put there children in the hands of the pharma companies without having the proper informed information to make the right call. I do recall a book I read years ago from a pedestrian that said many children back then didn't have such adverse reactions to vaccines because many were birthed vaginally, as opposed to c-section which doesn't not equate to having a strong start to life as a baby that does pass the vaginal canal.

Many children were also breast fed when many are bottle fed now. The Hep B vaccine I recall was mandated to babies after initially prostitutes were suppose to be the subjects of this vaccine. But they refused and I believe that's how that came to be for day old babies. Absolutely absurd. Test the mother before you give a baby this vaccine, no point otherwise. Baby boys that receive this one are at greater risk of SIDS as well. If they have had a c-section recipe for disaster and probably health conditions that arise later but don't relate to the vaccine. Denial is there game.

## **pisces**

In Maine, where I reside, the "Vote Yes on 1" referendum question was an attempt to overturn the state's recently enacted law that forced any child going to public school to receive the vaccination series because religious exemptions would no longer be allowed. The political signage, at least in the county where I live was literally about 100:1 to overturn the invasive and offending prior legislation. Everyone I knew, except for a small handful of old-school nurses who still believed in Big Government, BigPharma, and the Tooth Fairy was in support of the bill to OVERTURN the vaccine supporting legislation. Instead, when the votes were counted, the referendum lost, roughly 30:70.

Posted On 03/10/2020

---

## **Guillermou**

Yes, PISCIS, all this, after the Maine Street Solutions lobbying firm, with the financial backing of vaccine manufacturers, has spent about \$ 500,000, to avoid parents' decision to vaccinate their children for religious reasons or other reasons, with television ads with doctors and children who support vaccines, the result is not surprising, the pharmaceutical mafia and its allies are great strategists, when it comes to Don money. Big Pharma was clearly determined to add Maine to its list of mandates, forcing compliance in its calendar of constantly expanding vaccines to increase its already exorbitant profits.

Posted On 03/10/2020

## reesestone

What's at stake is bodily autonomy and thus humankind itself. The push to end religious and personal belief exemptions is an attempt to reduce our great humanity further. Divisive needles flung between those whom desire and those abstaining only propels the madness. Plenty of virus fodder in the forecast today Did word spread to you about Germany mandating a measles jab FOR ALL? Unfortunately, the citizen's available shot is not just 'measles' antigens, it's MMR/MMR-V Data currently available shows that increasing vaccination rates or limiting exemptions will not eliminate measles outbreaks. For example, in 2007, the Centers for Disease Control and Prevention (CDC) conducted a study on waning immunity after two doses of measles, mumps and rubella (MMR) vaccine.<sup>1</sup>

The results, published in Archives of Pediatrics and Adolescent Medicine, showed that: 1. About 35% of vaccinated 7-year-olds are susceptible to subclinical measles. 2. About 60% of vaccinated 15-year-olds are susceptible to subclinical measles. 3. By age 24-26, a projected 33% of vaccinated adults are susceptible to clinical measles. According to this, half of the population could not be vaccine-protected

And why is this jab a requirement?? LeBaron CW, Beeler J, Sullivan BJ, Forghani B, Bi D, Beck

udet S, Gargiullo P. Persistence of measles antibodies after 2 doses of measles vaccine in a postelimination environment. Arch Pediatr Adolesc Med. 2007

## Flamingolady

My husband had a stroke late in July, 2019. He had gone to rehab, and had begun to get stronger, walking with a walker, and taking physical therapy in assisted living. Right before Thanksgiving, 2019, he was required to take the "Senior dose" flu vaccine. This was on a Friday. The next week, the staff had me take my husband to the Emergency Room, to be tested for another stroke. He did not show any signs of another stroke. He declined rapidly and died 12-28-2019. Every health care person, including the doctor at the emergency room, all agreed that his symptoms and decline was triggered by the flu shot.

Posted On 03/10/2020

---

## **GreekPrincess77**

@Famingolady, So sorry for the loss of your husband how awful. Health care workers agreed that he died as a result of the reaction from the flu vaccine. Not uncommon. Poor man as he was on his way to recovery and in one instance all that was gone. I believe it happens more times than not. Medical ignorance is the biggest reason behind the death of patients. My father had COPD and was told to get the flu shot to protect him during flu season.

Well each and every time he had an adverse reaction and ended up in hospital only for me to go and make green juices, supplements and rubbed a combination of peppermint oil, wintergreen oil, cajeput oil and eucalyptus oil and that is when his lungs started to improve in conjunction with other things I did. Our medical system is extremely flawed. They never go for the root cause and address things as a whole. How is ones mental and physical state. Rather let's put a bandage on it and keep them as life long customers. This makes me sad that you lost your husband in such an manner like this. Apparently now not they have an extra strength flu vaccine for seniors my 72 cousin took it and said he had no reaction he was fine.

I thought for now, but overtime that vaccine just weakens you and can be a breeding ground for a whole hoist of things. Oddly enough he constantly has a runny nose, doctors say it is seasonal allergies. But he was in a clinical trial for Hep B, so ensure it stays dormant I said your immune system keeps it dormant. So he does take an antihistamine. But the weakening of the immune system can bring on allergies, doctors can't pinpoint why or how. Here is your prescription and off you go. He says as he gets older it's better gives him more peace of mind, but the numbers tell a different story as the flu vaccine is not effective especially for the elder.

Posted On 03/10/2020

---

## **balhawk**

Damn. So sad to hear of your loss. I hope the staff have learned from this and educating people to prevent other such tragedies.

## rrealrose

Vaccines have been developed for positive reasons, yes? Yet these shots appear now being developed as corporate cash cows and therefore have hardly been studied, certainly not in-depth. There's no reason to do so as manufacturer indemnification by the US govt. continues. If not for our corporate media (owned by these same manufacturers) Numerous caveats and red flags should be flying high. Certain countries in the world (China and India in particular), are already out of balance and projected to be even more so, with far too many males per females in the next decades. Talk about a set-up for massive political unrest...

Posted On 03/10/2020

---

## Guillermou

Yes, ROSE, there is corruption and conflicts of interest in the CDC, the FDA, the WHO and the NIH, and large pharmaceutical companies influence the interpretation of vaccine safety. Science shows that vaccines are not safe. Government officials, with conflicts of interest, documented with the vaccine industry, hide the risks, while exaggerating their benefits. Billions have been paid for thousands of injuries and deaths caused by vaccines, and most of the damage is hidden. Big Pharma is influencing WHO, FDA and CDC to accelerate safety studies and make more profits. Big Pharma has no financial risk for vaccine damage, because the government prevents victims from suing large pharmaceutical companies, causing them not to worry about vaccine safety.

We are facing an authoritarian regime, where institutions, and BigPharma defend their plot of power, and profit from the misfortune of the diseases that cause the vaccinated, while stealing money from citizens' taxes. The regulatory adjustment in China on vaccines is intense due to safety scandals. In July 2018, it was discovered that a company called Changchun Changsheng Life Sciences Ltd. had sold hundreds of thousands of defective vaccines, leaving young children with permanent disabilities and causing a wave of public anger. In response, the government passed its new Vaccine Administration Act, which went into effect on December 1, 2019. Under the new law, any organization that administers vaccines without authorization would be closed, fined up to 1 million yuan (\$ 145,000), and punish their leaders, although the law does not specify whether they would face criminal charges. [www.sixthtone.com/news/1005035/how-a-new-law-turned-chinas-vaccine-ind..](http://www.sixthtone.com/news/1005035/how-a-new-law-turned-chinas-vaccine-ind..) (2020)

## Guillermou

Yes, STAN,..... and degenerates the human race. It has created "perfect storm" for DNA breaks, mutations and autism grows in children. Vaccines contaminated with human fetal DNA fragments and retroviruses have been injected for 50 years, and autism began to increase. Later fetal DNA contaminants aborted to the chickenpox vaccine, and autism really increased. All this is transmitted from generation to generation, with children born to parents who have sperm with DNA damage, resulting in more de novo mutations in children Colorado University researcher Cynthia Nevison wrote about a 1000-fold increase in the prevalence of autism since the 1930s and a 25-fold increase since the 1970s. [link.springer.com/article/10.1007%2Fs10803-018-3670-2#enumeration](https://link.springer.com/article/10.1007%2Fs10803-018-3670-2#enumeration) Nevison and Rutgers researcher Walter Zahorodny, who regularly provides data from New Jersey to the semi-annual CDC reports, has published a new study that criticizes the hypothesis, which discredits the complacent narrative of CDC officials, highlighting the rising Autism trends [www.ncbi.nlm.nih.gov/.../31435818](https://www.ncbi.nlm.nih.gov/.../31435818) (2019)

Posted On 03/10/2020

---

## GreekPrincess77

Well said Stan exactly this. Money, follow the money trail and we are willing to get our hands dirty, lie, cheat, kill innocent children. In the same breath hop in his private jet feeds a couple of starving kids then flies back home on that private jet. If that's what makes him sleep better at night. Vaccinations do kill, if he truly believes that vaccines are the greatest thing to hit the market and have saved countless lives why was he so reluctant to vaccinate his own children and said they would be fine. Is it that he believes he is above everyone else with those deep pockets, and he plays by different rules. Vaccines are just another useless tool in the big plan to reduce the population and keep young women infertile because their bodies are pumped with unnecessary and dangerous vaccines. Mother Nature is our friend anything affiliated with corporate criminals aren't our friend and should be kept at bay.

## GreekPrincess77

I feel for that man losing his young son. Painful thing to have to go through and his Facebook account is taken down because of what he is saying and his way of channeling through his grief. There is a lot of pressure a parent faces to vaccinate and they are made to feel guilty and negligent as parents if they don't or god forbid ask questions to encourage them to make the right call for there children. Takes a lot to stand up and say no. No wonder there is a rise in so many autoimmune diseases, cancer, thyroid diseases because of all the \*\*\* we bombard our bodies with. The young are the most vulnerable.

I don't believe as many children had cancer back in the day then they do today, makes you wonder. ADHD, autism. My nephew got diagnosed before the age of 3 and each time had an adverse reaction. It was cumulative and he wasn't breast fed or had a vaginal birth. His start to life wasn't strong. To see a seemingly healthy boy full of life laughter, eye contact just slowly dwindle was hard. Then started throwing tantrums and was given a cell phone or iPad to calm him down. It just created a vicious cycle. I succumbed to the flu vaccine pressure once when I worked in healthcare never again. I found many workers didn't vaccinate either because of a bad reaction, they wanted to observe the reaction of others who got the flu vaccine.

Over time the infection department at the hospital did track the staff that vaccinated and the ones that didn't. The little ones don't have the capacity to detox those substances out of there bodies either so there long term effects are nasty and don't show up immediately. So this is there scapegoat saying oh it can't be the vaccine. Science has proven safety, where by listing adverse reactions as medical history I don't think so. Also in regards to cervical cancer check your hormones, progesterone is protection against cervical, ovarian cancer. Often times it's a hormonal imbalance that needs correcting threw diet or bio identical hormones.

I recall I had gone to the doctor for a check up and he was trying talk me into the HPV, well I had a pap which is a better and far more useful and safe tool to screen for cervical cancer. I said no because it had only been out for 4 years at the time and I got diagnosed with Herpes. At that time I started to move away from conventional medicine to a more holistic approach. I started to eat cleaner whole foods, exercise, got better sleep and noticed a vast improvement in my overall health. HPV is the most useless, dangerous vaccine invented. We don't need it a PAP is more that sufficient.

Many girls died with the needle still in there arms, and infertility has a risen quite a bit. Was that the goal another way to reduce the population as Bill Gates has repeatedly stated. A relative got the shingles vaccine as his GP told him if you have had the chicken pox it increases your chance of getting shingles, the opposite it true. Yet he is 72, gotten 2 flu shots and the pneumonia shots and thinks it makes his immune system strong, wrong weakens you overtime, and I've noticed that his nose runs quite a bit in colder weather. Doctor says it's seasonal allergies but is it because the vaccines have weakened his immune system I suspect yes. He says it's because he got rid of his humidifier.

I do recall reading about an oncology dietitian saying that the HPV vaccine has a low up take in the US, but the effectiveness was high. The conclusion of one study was based on 740 girls out of that 358 were sexually active, and 111 had gotten one shot of the HPV vaccine. Most of the girls in that study we're unvaccinated, and more than half weren't at risk for HPV to begin with since they weren't having sex. If they were trying to determine the effectiveness why did they include the girls who didn't receive a single shot of HPV or did not have sex. Statistically manipulation. All about making the numbers look good.

I get it. I've read the research you all are posting. It's sickening that this is happening. I look back on my own Children's vaccine records and it repulses me at how many vaccines they were given because I didn't know - this information was just coming to fruition by the time my kids were "done" getting vaccines.

What I want to know - now that this information is out what is everyone doing to prevent your kid's from getting more vaccines? My kids are about to enter college and vaccines are required - I can't just join a Scientology church so i won't have to vaccinate them — any ideas how we can get out of being forced to vaccinate???

What state is their school (college) in? Check what vaccine exemptions (medical, religious, philosophical) are available in that state. When my youngest was getting ready to leave for (out of state) college 2 years ago, I had to provide her medical history. I was already familiar w/the rules in our home state as I stopped her vaccinations when she started school but had to familiarize myself with the statutes of her college state. I found the legal immunization exemption form for her college state and submitted it as well (all the info and forms are easily accessible via an internet search). The school accepted it/did not question it. The only feedback I received is that if there were to be an outbreak of any disease/illness on campus for which she was not vaccinated (they focused particularly on meningitis), she would have to leave campus until the outbreak was under control.

College is a bit different than primary school as most primary school districts push for a high vaccination rate because their state funding is tied to it (if the district's overall vaccination rate falls below a certain percentage, the state cuts off their funding ... THAT is the school's incentive (\$\$\$), not public health which is what they will tell you ... I found that little tidbit in our home state's bylaws).

College is not necessarily "paid" or "funded" exactly the same way so it is typically easier to submit an exemption. Do your research and do not let them bully you. Good luck.

"So, where are the headlines declaring the scientific conclusion that vaccination opponents are justified in their concern?" The words, "scientific conclusion" should have been further highlighted, italics at the least, bold italics even better. Again, I note the introduction of the legal phrase, aiding and abetting. At some point in the future, all organisations aiding and abetting will be brought to face the full force of the law; including the individuals involved.
