

The Great Reset: And the War for the World

A Special Interview With Alex Jones

By Dr. Joseph Mercola

Dr. Joseph Mercola:

Welcome everyone. This is Dr. Mercola, helping you take control of your health. And today, we have a special guest. This would be Alex Jones, and we're going to talk about his new book. But before we start into that conversation, we're going to review some of his history. And many of you, almost everyone knows who Alex Jones is, but I think he's most, at least in this current challenge we're going through, most noted for really, the first target of the censorship. And in August, literally four years ago, almost this week, that we're talking, he was uniformly removed from virtually all the platforms. There was collusion between Apple, Facebook, Google, Twitter. They all got him off, literally within days of each other. And it was a real threat to the first amendment and the freedom of speech. And then shortly, within a year, literally the following summer, I and hundreds of other sites, were similarly removed.

He was the first, though, and he had lots of reach. I think, we used to determine reach by this website called Alexa, which is a subset of Amazon, but they took Alexa offline. But I think Alex was in the top 1000 sites visited in the world, not just in the US, in the world. But obviously, being removed from all the platform's a challenge. So I want to thank you for joining us, and for all you're doing. And we'll talk about your book in a moment. But maybe you were in the process when we first connected of giving me an update of what's going on. I suspect, is this related to the January 6th episode, or the Sandy Hook trial that you're involved with, which occurred about 10 years ago?

Alex Jones:

They are trying to basically, indict myself and many others for January 6th, even though on record, we were there trying to stop what happened that day. And with Sandy Hook, I hardly ever even talked about it, it was less than one 10th of 1% of what we covered back then.

Dr. Joseph Mercola:

Yeah, 10 years ago.

Alex Jones:

10 years ago. And then once Trump won, they filed four lawsuits on me, directed by the Democratic party, in Austin, Texas, and in New Haven, Connecticut. And then they had judges default me, saying I didn't give over discovery, which wasn't even true. And so now, they're having show trials starting here in Austin, just last week, and then, two weeks from now in Connecticut. A total of four of them. It's been going on for about four months, saying that I am guilty. The judge actually looked at the jury five times while I was in the courtroom last week and said, "This man is guilty. Remember that." And she even put an order out, saying that I was not allowed to say I'm innocent when I testify. We literally have the order. So this is next level censorship, this is lawfare 2.0. And they've bragged all over the news just today, the Democratic

party and MSM, mainstream media, that they're going to use this as the model to then go after everybody else. So I have been the canary in the coal mine, the Guinea pig, the test subject.

Dr. Joseph Mercola:

Yeah, absolutely. Yeah. So this is a warning. Because we have an example, four years ago, they took you out first, and then hundreds of others like myself, were similarly removed. So this is something to be noted of.

So when they removed you, I'm wondering, do you recall what their justification was? Was it your comments on Sandy Hook, or was it your position on some other issues?

Alex Jones:

That's exactly what it was. They looked at my whole 24 year record at the time, and that was an area where we had speculated, along with others, because of anomalies that it may have been staged, or may have been a false flag. And so, then Hillary ran against Trump the last two months of the campaign in 2016, with almost a 30 million ad buy, with clips of me edited, saying Sandy Hook didn't happen, to try to demonize Trump. And then when Trump won, they went even crazier and attacked me more. And so, that's why they did the de-platforming. And then, they began to file all these lawsuits. They filed over 50 lawsuits against me, but four for Sandy Hook in two different jurisdictions, so they can have trial, after trial, after trial. It's simply historic what's happening.

Dr. Joseph Mercola:

Yeah. It's probably cost you millions of dollars to defend yourself, I would suspect.

Alex Jones:

Absolutely. Infowars is bankrupt, and it's their plan to shut us down. So bankruptcy protection is only one of the ways we have to actually show the court we don't have all this extra money they say we have. And that, even if they get these giant judgments... Because again, we have a judge instructing the jury, this man is guilty. It's Kafkaesque. It's 1984. And so, I don't really feel sorry for myself. I'm very thankful to our viewers and listeners for all their support over the years. I realize this whole country and this world is in deep, deep trouble.

Dr. Joseph Mercola:

Yeah. No. The one minor silver line to this though, is that most of these hearing, or the courtroom appearances are occurring in Austin, that's in your backyard. So you don't have to travel to a different state.

Alex Jones:

No, I don't. So there's two Sandy Hook trials here, and there's two in Connecticut that are coming up, and it's just simply amazing. And again, in both jurisdictions, there's two judges, they're coordinating. They've both found me guilty by default, and we're not supposed to even say to the jury, in the judge's orders that, "Hey, by the way, I've been found guilty by a judge and not a jury." She just tells them. "This man is guilty. You're just deciding now, how he's punished."

Dr. Joseph Mercola:

Well, sorry to hear about that. But it all works out in the end, typically.

Alex Jones:

It always works out in the end. It's-

Dr. Joseph Mercola:

Yeah.

Alex Jones:

... backfiring them. Look, at least I'm on a six month old baby, being given one of these mRNA shots, at least.

Dr. Joseph Mercola:

Right. Right.

Alex Jones:

I'm not one of these old folks that got locked up in the nursing home to die. So I'm not a victim. I'm being targeted because we've been very, very effective exposing the globalist journey.

Dr. Joseph Mercola:

Yeah. And your effort to continue that expose you wrote a book, *The Great Reset: And the War for the World*, that comes out on August 20th. So I'm curious about the title, because it's eerily similar to the *War of the Worlds*, which was the epic, and probably, first major propaganda brainwashing campaign in trial run, in 1938. And I'm sure, many remember or know of this. Maybe not remember, because most of us weren't alive at that time. But they recall how Orson Wells did a fake radio broadcast of the *War of the World*, which is similar to your title of your book, claiming that the Martians were invading. And this really was one of the first prominent efforts at brainwashing. So I'm wondering, did you take that off of the *War of the Worlds*, or was it just a coincidence?

Alex Jones:

It's a coincidence, but you're right. HG Wells, one of the top globalist theorist, he wrote the book that then Orson Wells did his false flag hysteria piece that had people convinced that Martians had actually invaded the earth. I went with this title, because the globalists are in a war for the world, a planetary government, a total takeover.

Dr. Joseph Mercola:

Yeah. It was really a good book, and I appreciate your writing it. I'm surprised how good it was, actually. So maybe you can share with us the motivation for compiling, because you typically don't write books.

Alex Jones:

I wrote one book 20 years ago, that was self-published. And I'd been approached by different publishers wanting to publish books. But I knew Tony Lyons from Skyhorse. We'd worked with him a lot, having his authors on, and selling his books, as a lot of folks do, over the years, they have so many great bold titles. And he said, "Listen, all you got to do is compile a bunch of notes, a bunch of documents, and recordings of your view of how this all works, and then we'll help you put it together." And so, a lot of the credit goes to the folks over at Skyhorse, but this is my words, this is my research. This is my understanding of the Great Reset, and what the globalists are doing. And this really is the whole future of the world and humanity at a crossroads right now, deciding if we're going to have a pro-human future, or this transhumanist technocracy, this biomedical tyranny, that's trying to take over our bodies, our bank accounts, everything.

So it covers every aspect of the Great Reset. And it's full of quotes, and statements, and documents, by the very people. In fact, every statement in the book is backed up by their admissions. That's what's incredible is, this takeover of the planet by mega corporations, and this attempt to capture the human species and turn us into like factory farmed humans that they control and program, this Brave New World 2.0 happening for real is out in the open. And so, that's why the book is so important. I liken it to the plans to the Death Star.

Dr. Joseph Mercola:

Yeah.

Alex Jones:

This is their plan. This is their blueprint. This is their playbook. And if you have this well, and you understand this, then you've got a major leg up against this takeover.

Dr. Joseph Mercola:

And I love the quote, you put it right at the very beginning of the book, from George Carlin, a great, great comedian, one of the best. "Forget the politicians. The politicians are put there to give you the idea that you have freedom of choice. You don't, you have no choice. You have owners, they own you. They own everything. They own all the important land. They own and control the corporations." Great quote.

Alex Jones:

I play that clip all the time on my show, because it's 100% true. And now, they physically want control of our bodies with this whole biomedical tyranny. And so, that's what's so incredible about Klaus Schwab, and Harari, and all these other people that we quote in here, they are admitting their plan to have a scientific revolution. And that by the year 2047, humans will be obsolete. And they predict a future without humans by the turn of the next century. I mean, these are fantastical death cold statements, but they're in control of the finance. They're in control of the medical systems. They're in control of most of the governments. And if humanity doesn't awaken to this, and organize against it, we have no hope. But the plan is so diabolical and so public, that we just admit it's happening, and start mobilizing and organizing, we can, and we will, take this down.

Dr. Joseph Mercola:

Yeah. And I want to congratulate you for being so far ahead of the curve of everyone else, for alarm alerting and setting out the alarms that this was in process. It seemed like really crazy talk and overt conspiracy theory, but you've been proven right in so many different areas. Now you're not 100% right, but pretty damn close. And because no one's ever 100% accurate, there's going to be some deviations. But you want to highlight some of the things that you were spot on about, that we're people, the public, mistakenly disapproved of those statements?

Alex Jones:

The reason I knew about this was growing up, my dad and mom were voracious readers, political science, and science journals, and information. And so, I wasn't really a bookworm, but I did read a lot. And so, I got way more intrigued by books about World War II, and World War I, and Cecil Rhodes, and Rhodesia, and the diamond monopoly, and just the Roman empire, and all the things that happened in history. And so by the time I was out of high school, I'd probably read 500 history books, or more. So I had an understanding of real history, and the fact that the world did have elites in it, and did have ruling controlling oligarchies. And of course, I'd read Brave New World, and I'd read Brave New World Revisited, that was nonfiction, where Huxley explains, "My book from 1932 is really what I believe will have sometime after the year 2000, this is actually our goal."

So you read that dystopic scientific dictatorship book from '32, and then he explains, "This is really what the technocrats plan. This is what we've been developing and preparing." So I've been on air 28 years, since I was 21 years old. And a lot of it came off as crazy, because back then, a lot of this was more academic. That they were going to set up world government. They were going to have carbon taxes, and they were going to do all these things. So I was on air, simply reading from what they were planning to do. Now, we're just here 20 plus years later, and they're actually starting to implement it. We're going from beta to operational now. And so, it sounds like I'm a prophet or something, but really, I'm not. It's just that, most people weren't reading the stuff when it was, in MIT journals, when it was more academic.

And so, now that it's rolling out into operational phase, people are really starting to pay attention to what I said 10, 20, 25 years ago. And now, there's new viral videos that people are finding somewhere every day, that are getting hundreds of thousands, in some cases, millions of views, where I exactly say what's coming in the next 10, 20 years, but again, I'm reading from their own statements. So they're the ones that planned all this. They're the ones. I mean, we've got Joe Biden 15 years ago in the Senate, saying, "Soon you'll have a microchip under your skin to buy and sell." Well, he was going and meeting at the Bilderberg group, and the Davos group, and that was their plan. And so, he knew it was coming. He wasn't a prophet either, he was in on it.

Dr. Joseph Mercola:

Right. So you had mentioned the technocracy, and of course, one of the leaders, and I think he's been on your show a few times, is Patrick Wood and really documenting this. He initially collaborated with Antony Sutton, who is really the founder, not the founder, but the lead guy in this, and he passed away a while ago. So that goes back about 100 ago or so, about. Like into the 30s at Columbia Universities and where they started, and kind of spun up again in the Trilateral Commission in the 70s. So you are an astute student of history. And I'm wondering, from your review of the documents you have in your lifetime, how far back do you think this goes? Clearly, it's got to go back more than 100 years. I mean, at least to the Rothschilds.

And interestingly, I'm in the process of writing a chapter on Rockefeller medicine, which is, I think, instrumental what's happening to the healthcare system. And in my efforts to collaborate on, or consolidate that information, I've learned, if the Rothschilds, and you probably know this, they don't have a hundred billion dollars, they have a hundred trillion dollars. So this story that Gates, or certainly not Gates anymore, but Bezos, or Musk is the wealthiest person in the world. It's just ludicrous. I mean, the Rothschilds, they have 1000 times more wealth. I mean, there's many others that are between him and Bezos, and Musk. So I'm wondering, how far back do you think it goes?

Alex Jones:

Well, that's a really, really, really great question. My film, Endgame: Blueprint for Global Enslavement, that's been out since 2007, can still be found for free online. Everybody should go watch it. And we explain, it goes back to Plato and his Republic 2,300 plus years ago, where he said, "We need to kill off the poor. We need to breed to have only elite characteristics." He's really, the founder of what became eugenics. Then if you fast forward to 300 years ago, we have Malthus, who was in the British government, and he said, "We should herd the poor people into tiny apartments. We should let disease spread amongst them. We should exterminate and reduce the population, because the caring capacity of the earth has been reached." And then through his views, we see it continuing into Sir Francis Galton, and Galton in the 1850s, develops the theory of modern eugenics, and then postulates computers, the science of biometrics, the discovery of the building blocks of our cells, so that they can take control the reproductive processes of humans in an orderly directed fashion.

And then, he was heavily funded by the British Royal family, and by the Rothschilds that you mentioned, who also financed the Rockefellers. And so, they developed really, much of the modern sciences, as an attempt to try to take control of the Renaissance. That was the explosion in grassroots science and the age of discovery. It was an attempt by the elites to clamp down on technology, and use it as a tool of control, not of empowerment. And then out of Galton, we get the people like HG Wells and others. And so, you had two different competing Fabian socialists, that were the British Empire, and Cecil Rhodes, and the CFR, Royal Round Table group management systems of the British empire, competing with what they called the German problem. And so, that's why the orchestrated World War I. And then Hitler was in competition with them, and basically adopted the eugenics program, but decided to only project it onto certain targeted minority groups. And so, Hitler was a bad son, or a offshoot of the Fabian socialist. And the eugenics movement was started in England.

And of course, by the time Hitler came to power, eugenics was accepted in most countries of the world, as the set science. The US was doing hundreds of thousands of poor sterilizations, of not just poor minorities, but also whites who got bad report card scores. And so, Hitler and his henchman's defense, of course he was dead, but his henchman's defense at Nuremberg, was the Cold Springs Harbor Rockefeller funded eugenics laboratory in New York state. But that got glossed over during that tribunal. And so, the basis of the scientific system that we live under is this Rothschild, Galton, Rockefeller, eugenics based system.

And as you said, Bill Gates is just a operative of that. Going back, three generations, his grandfather and father were actually, leading board members of the different eugenical and depopulation boards. And the original name of Bill and Melinda Gates' foundation, started in the

mid 90s, was the World Population Control Bureau. Then they changed the name in 1999, to the Bill and Melinda Gates Philanthropic Organization.

Dr. Joseph Mercola:

Yeah.

Alex Jones:

And so, this is really the cult and you can argue there's too many people in some areas you can argue, we're getting lazy and dumb. We can argue that modern society makes us weak, but who sets up these ultra rich control freaks to plague God and decide who lives and who dies. And so now they're moving forward with the forced injections, the GMO, the 5G, and all of it to render us basically sterile, sick and dying creatures. They're involved in a mass culling-

Dr. Joseph Mercola:

Sure.

Alex Jones:

... mop up operation.

Dr. Joseph Mercola:

Yeah. But you're really diving into the tactics, and I really want to get into the strategy. Because I'm curious, and I'm sure many people watching this are, and it seems, as I said earlier, that, I mean, you mentioned Plato going back two, 3000 years, but it certainly goes back more than 100 years. And I'm wondering if you've reviewed any material that suggests that there are actually bloodlines? Maybe 13 families in the world that consists of the primary global cabal, that are behind all this. Who's the core? Who's the foundation? It certainly isn't Gates. No question. He's just a player. But there's many people who believe there's these families who've gone back for thousands of years, literally. And the control center of the world used to be Egypt, and it transferred to Rome, and now it appears to be in London. So I'm wondering if you've uncovered any information on that thesis.

Alex Jones:

Well, that is absolutely what's happening. We can't prove that it goes all the way back to Plato. We just know that his ideas are the admitted genesis point, and where all these other systems of eugenics and human enslavement basically propagate from, he's the progenitor. But absolutely, if you trace back Egypt, and then Greece, and then Rome, and the fall of the Roman empire, the fall of the Byzantine empire, all of that power then was transferred to France, to England, and to Scotland, and those systems of control, and ancient knowledge of science, and maps of the world, and things we know that they had, that were much more accurate than what we had previously known. They then used those sciences of control, that had basically been handed down through these bloodlines and other systems, into our modern world. And that is exactly what's happening.

And I would say, that London is the main, the City of London within London, is the main power base. And that the New World Order global government, Davos group, build back better, Great Reset, is a modern expression of the British Empire.

Dr. Joseph Mercola:

Yeah. So why don't you expand on that? Because I'm sure, virtually everyone watching this, wouldn't be able to differentiate between London and the City of London. Two different things. Two different, completely different entities. So why don't you expand on that?

Alex Jones:

I forget how many square miles it is, but I visited it several-

Dr. Joseph Mercola:

It's small. I think it's only one, or a few. It's really tiny.

Alex Jones:

Absolutely. And it's even got a moat around it. When you go to London in the heart of the city, the old city, there is a very small walled off corporate fortress complex, or complexes. And that is the City of London within London, and its own corporate sovereign governing system is there. And offshoots of that is the British East India company, and the Bank of England, and all these organizations that are private, but have governmental power. And if you talk about the most ancient bloodlines that we know are still operating, we know that the House of Dracula, and I'm not joking folks, that's why Bram Stoker called it Dracula, and talked about Count Dracula, because it's in the mainline history books, that he wasn't a vampire, but he was blood thirsty and put people on spikes, and the rest of it. But Europe might not exist if he hadn't stopped some of those major Muslim invasions.

And people can look this up. Prince Charles directly traces his lineage, and he's written books about, that the progenitor of his bloodline and of the Saxe-Coburg-Gotha, who again, are not British, they're not English, they're not Scottish, they're not Irish, they are really a Transylvanian noble bloodline, that later grew into what became the Austrian Hungarian empire. And then with George the first, George the second, George the third, George the first and George the second, couldn't even really speak English. And of course, King George the third, so who we had our war with in 1776. And so, it's a German Transylvanian ancient bloodline, that is at least 1000 years old, and it runs the New World Order. And so, when you see Prince Phillip, who also says before he died, that he wants world government, and to come back as a virus to kill 80% of the world population, where his son, Prince Charles, pushing this, you are literally seeing the House of the Dragon, that's what Dracula means, Dracul, the House of the Dragon, that is ruling our planet.

Dr. Joseph Mercola:

Yeah. I understand that all the banks, the central banks of the world, have offices within the City of London.

Alex Jones:

They do. And they don't hide that. And our Federal Reserve is private. It was set up in 1913, the shareholders are secret. But at the founding of the Federal Reserve, they admitted that, upwards of 80% of the stockholders of the Federal Reserve were not American banks, but were British and European banks.

Dr. Joseph Mercola:

Yeah. I think the majority shareholder of the central banks is the Rothschilds, I'm pretty sure.

Alex Jones:

It is.

Dr. Joseph Mercola:

Yeah. So that's, how else could you get a hundred trillion dollars in net worth? 100 trillion. Have you ever been able to discern whether that the validity of that assessment or projection?

Alex Jones:

I have had on everybody from John Perkins, Confessions of an Economic Hit Man.

Dr. Joseph Mercola:

Yeah.

Alex Jones:

I've had on a lot of other economists over the years. We've had on obviously, G. Edward Griffin, one of the preeminent experts. And I think that 100 trillion dollar number is about a decade old-

Dr. Joseph Mercola:

Oh, geez.

Alex Jones:

... if you look at other leveraged assets. And the inflation too. See, they've used inflation-

Dr. Joseph Mercola:

It might be quadrillion. Quadrillion.

Alex Jones:

Absolutely. So it's not quadrillions, but you're right. It was 100 trillion 10 years ago, and now, it's in the quadrillions. And what they're doing is, weaponizing this monetization, where they get the money up front, it has value. They buy up real assets, they loan it out at interest. And so, we get the debt, we get the inflation, we get our savings destroyed, they take over the world. And so, that's how the Rothschilds, as you know, first made their money in Germany. They had little pawn shops that had red shields on them. That was their logo. That was their trademark. So Rothschild means red shield. People didn't want to hold their gold or silver. And I know you know this, Doctor, but for those that may not know, people didn't want to hold their gold or

silver at their house. They didn't have banks back then, only royalty, and people had treasuries that were guarded by guards, inside fortresses.

And so, pawn shops, or where you'd go to get jewelry, or fix your jewelry, or get up some blacksmithing done. You had blacksmiths, silversmiths, goldsmiths, and the Rothschilds were goldsmiths. And so, they started writing script to people, going back to Germany about 550 years. And with that script, people'd bring their silver and gold, and the Rothschilds would give you script. Well, they learned, they could give people more script than actual gold and silver they were holding. And they developed the rule, never give out, or loan out, more than 10 to one script. So that's where paper money comes from. And you could come back to one of their pawn shops, where they had armed guards and a vault, and you could get it exchanged for gold or silver. And so the-

Dr. Joseph Mercola:

Fractional reserve banking. Fractional reserve banking, it's what it is. Right?

Alex Jones:

Fractional reserve banking.

Dr. Joseph Mercola:

Yeah. They're-

Alex Jones:

And so, now they've gone way past fractional reserve banking, where they don't have 100 to one, or 1000 to one, there's no connection to reality now. That's why they want carbon taxes. They're going to tie all matter on earth, being tracked in real time by AI surveillance, and they're going to put a carbon cost on everything, and then, tie their new global currency to the carbon.

Dr. Joseph Mercola:

Okay. Well thank you for expanding on that. Because I think it's important to understand the genesis, or the nexus, of this whole effort. We talked about the New World Order and the global cabal, but it's not the people in power now. They're just the front, they're the front part. So there's clearly entities behind it. And it's important to understand their motivation and their purpose. And part of it is, I mean clearly, it's acquiring assets and wealth. But at a quadrillion, or multiple quadrillions of wealth, it's not about the number of the dollars or gold bars that you own, it's about power. Power's the crux of it, and the ability to control assets. And essentially, it appears, as you say in your book is, this movement is to push us towards global slavery. That we're all slaves, and totally controlled by the global cabal.

Alex Jones:

10 years ago, we began airing a group of television cartoons produced by the Bill and Melinda Gates Foundation, and the Rothschilds funny enough. The Economist was involved, Economist magazine, they own. And it's cartoons showing children how you'll live in the future. You won't own a car. You won't own a house. You won't own your clothes. You won't own your smartphone. It will all be owned by a global corporation, owned by the UN, working with the

UN, that will then allot, where you go and what you do. Well now that's all being announced. You'll own nothing. You'll have nothing. They're trying to ban privately owned cars. And this is what they're introducing to young people right now. And what they want is a transhumanist post-human world, in their own words, where they control the evolution of humanity. They use all of us as Guinea pigs, to test out all these new sciences, and that they believe that they're going to merge with machines and transcend their bodies.

That is their insane cult. And if it sounds insane, I have read hundreds of articles that they've written, where they openly brag about this. That's why Elon Musk said, "Beware those that worship AI gods." And he talks about how the elite, that they're going to live forever. They want a post-human world. They want this new Sapien, that's 2.0. Harari, who's one of the high priests of globalism at the Davos group, says that the post-human world again, will be here by 2047, or so. And that he looks forward to the end of humanity. And that they just see us as like cockroaches, or something. So this is a self-appointed, control freak, mad scientist cult, that is literally, taking control of the entire human biological system, just as Monsanto and others have done with the crops.

Dr. Joseph Mercola:

So that's sort of the long term agenda that you've outlined. And no one knows for sure. But it certainly seems to be within the realm of possibility. But I'm wondering if you, and you just tell somewhat of this in the book, but if you could dive deeper into the near, very near future, like what's going to happen in the next few years? I think it seems, from my understanding and review, from now to 2025, literally the next three years, is going to be a pretty significant transition time. And I'm wondering, what you think is likely to happen?

I was born and raised in the inner city of Chicago, and far away from any forms of nature. We didn't have access to parks. So one of the best things I ever did in my youth, was to join the Boy Scouts. And you probably know, one of the mottoes of the Boy Scouts is to be prepared. So the reason why it's important to have a number of peoples, give their impression. And you're certainly well qualified, considering all the research and work you put into this, as to what you think's going to happen the next three years, and we can be better be prepared. And have a strategic agenda to counteract their plan. So what do you think's going to happen?

Alex Jones:

Well, you're right. They have theoretically projected out in the future, these globalist map makers in the mind, these futurists, and we're not going to beat that project of post-human cyborg hell, unless we fight the current phases they're in.

And so, when they're cutting off the fossil fuels, while blocking all the real alternatives, while they're collapsing the borders, while they're devaluing the currency, they all admit, whether it's Klaus Schwab, or whether it's Barack Obama, or whether it is the leaders of other nations, that this is a transition we are in, and that they're cutting off the old infrastructure to force us onto a new infrastructure, but that new infrastructure is not there. So they're destroying the industrial carrying capacity of the planet, to launch mass famine, societal degeneration and collapse, and war. Then they will pose as saviors, saying that they're going to stabilize the world with a global marshal plan of quadrillions of dollars, to now bring in their New Green Deal. But first, they have to dynamite and blow up the old system. That's why Prince Charles, four months ago, gave that speech where he said, "We need a total military style mobilization, with more capital than is

even existing currently on the world, to force the end of the old system, and the move to the new system."

And the new system is, doubling, tripling starvation every year. Forced medical tyranny. A world ID tied to a social credit score. Carbon tax. And then once they've annihilated the grassroots economy, once they've bought up all the farms, once they've centralized things further, they will then bring in the universal basic income. And with that, they'll be able to dictate how you live, where you can go, and that will be directly tied to your behavior. So the entire world will be turned into a giant open air, high tech reeducation camp, here in the near future.

When I was in New York last year, doing some podcast, I went to the UN building. And outside, they had huge mural poster boards up, that look incredibly dystopian. And if you think Klaus Schwab is saying, "You'll own nothing, you'll have nothing. You'll like it. You will eat the bugs." is bad, there were huge poster boards showing what looked like bunkers from World War II, little gray bunkers, saying "You'll no longer live in cities, you'll live in communes. And the end of the system is here, and we have the science to take over your body now." And it was meant to be as dystopian as possible, with some type of weird reverse psychology, to just push people into a type of mass Stockholm syndrome.

And then, we went to the Pfizer building, and it had a bunch of just really scary stuff up on the side of it, about taking control of the body, and nanotech, and mRNA, and how this revolution's here, and how you won't be able to stop it. So they've gone from beta to operational, to collapse the world economy, and then build back better on its ashes, this technocracy that is enveloping the planet right now.

So people need to understand, this is very serious. And thank God for Bolsonaro in Brazil. Thank God for Orban in Hungary. Thank God for some of the other leaders we have around the world that are popping up, and calling out the Great Reset, calling out the New World Order, and explaining to people, that this is a global corporate hostile takeover of the planet's biospheres.

Dr. Joseph Mercola:

To support your observations, on your most recent trip to New York, that's sort of highlighted by the recent public service announcements that they've had. That we're instructing people what to do in case of a nuclear attack. Which they haven't done for 60 years, I guess. 60 years was the last time they heard those types of messages. So they're telling people go inside, and wait for the media to tell you what to do. Like the media's going to really be around when you have a electromagnetic pulse, that probably devastates all electronic equipment. So it's just shocking what they're trying to get away with.

But with respect to some of the other items you mentioned, what do you think the timing is? You've got the universal basic income, which is probably tied in with CBDC, central bank digital currencies. Do you think that's prior to 2025?

Alex Jones:

They would like to have it in now. And they per-

Dr. Joseph Mercola:

Yeah. But it's not going to happen now. They got, they there's logistical challenges.

Alex Jones:

No, no, I totally agree with you. So the faster they can collapse the world economy, while posing as the saviors, they will get it in. But I agree with you. Sri Lanka now has it. Australia's rolling it out. Italy's rolling it out. A lot of other countries are rolling it out, but they still have to get it all synced up and force people onto it. So I would say 2026 or so, maybe 2025. If there's another pandemic, if there's a big war, if there's an EMP attack, if hackers take out the power grid in certain areas, they need, again, a controlled demolition of the old system, to force us onto this new system. And then, the real evil, and the real controls kick in. But China has its social credit score in place. They have their digital currency now rolling out. And so, we're right now, segueing into that system. And it's really up to us whether they ever actually get it into place, but they're certainly trying. So I would say-

Dr. Joseph Mercola:

Yeah, we'll talk. We'll go into some of the things you recommend for that, because I think that's really the crux of what we need to do. But I'm wondering, with respect to specifics, because you're really the expert in identifying false flags. It seems to me, one of the likely ones is cyber warfare attack. So easy to pull off, actually. Exponentially easier to pull off than 911, is to take out the grid. All they have to do is little software changes, and the whole grid's down. They can blame it on terrorists easily, and no one would be able to prove otherwise. So what's the likelihood of that happening, do you think, the next two years? Grids going down, no electricity.

Alex Jones:

Well, Dr. Mercola, I mean, you show how well researched you are. That is the number one card that they want to play. And the reason we know it is, as you said, it's very easy to do it and not get caught. In the future, everything is about the technocracy, and controlling us through energy, and through surveillance, and through digital gate keeping, via digital currencies and social credit scores. And so, we saw the pre-programming for a decade, by the Club of Rome, and by the Davos group, and by the UN, and by the Rockefeller Foundation, with documents like Operation Lockstep from 2011, that chronicles exactly what they did with the COVID release. And then, the rollout of the mRNA gene therapies, and all the rest of it.

They pre-programmed heavily in a crescendo up to 2020, telling us disease X is imminent. It's going to come out of the rain for us. Or it's going to come out of China. It's going to come out. It's your fault it's going to happen. And when it happens, you'll have to wear a mask. And when it happens, there'll be forced inoculations. And when it happens, there'll be lockdowns. So they did drill after drill, dress rehearsal after dress rehearsal, before they did it. And now, they are hyping cyber attack, from Russia or terrorist, it's imminent. It could take down part of the grid, or all the grid. And oh, somebody hacked the Colonial pipeline and turned it off. They're holding it ransom.

So they're introducing this idea, and getting it ready, so that they can have major power grid outages, that they blame on their enemies. And then, bring in more surveillance, and internet IDs to be able to get online, in the name of protecting us from the cyber terrorist. But of course, the cyber terrorists are above the government. It'll be coming out of this global corporate combine. And we know that, because they've been war gaming it, and again, preparing us with a major propaganda rollout, that this is imminent.

Dr. Joseph Mercola:

So clearly then, I'm glad you agree, because it seems like that's really powerful way to take out large portion of population. Because essentially, the society will collapse if there's no electricity. It will just utterly collapse. It's clearly going to kill a lot of people.

So in anticipation and preparation for that, I think clearly, one of the best strategies is to have some backup power strategy, or implement plan. That would be one of the others. But I'm wondering what are some of the other, well, any other plans? And we can go into the mindset, and what we need to do to prevent all this craziness of these nefarious plans from bringing implemented.

Alex Jones:

I think everybody instinctively knows what you're saying is the real threat. You can see the evidence empirically. You can see it scientifically. You can see it culturally. You can really feel it. That's why all over the world, particularly in the west, there is a mass exodus out of the cities. These things are death traps. And I know that my family, not even myself, but my parents, and we have some trailers out in the middle of nowhere, with well water, and with solar, and with big propane tanks, that'll go for a year. And we keep diesel and gasoline, and have a small working farm, and cattle that we've been having for over 170 years here in Texas. But the point is, we've fired all that up, got all that ready, and prepared. Because all the old farm houses that, great grandparents and folks had, have all collapsed, but we've gone back to that land. And literally, our setup in case there is long term collapse.

But I believe first, they're going to do some beta attacks, where they take out one of the three big grids in the US, for say, a couple weeks. And then, use that as a power grab and to get more control. And then, just slowly continue to turn off the fuel by the gas prices being so high, and slowly watch society unravel. But then, once they've beta tested this a few times, I would say, around the year 2030 or so, is when they're going to, is when they would claim that terrorists detonated an EMP or something, and turn off the whole grid, and then have organized collapse and barbarism. But first, they've got to get their full police state in place. They've got to get their armored globalist reservations prepared, to be able to safely direct all of this from their redoubts.

But they've got to get that in place first. So I think they are about eight years away, seven years away, from the real mass extermination. Or they may just roll the dice, and release some super bio weapon, that's so deadly, it kills large portions of society. And then, that itself would cause the effect of collapsing things. But they don't feel safe right now, in their armored bunkers, in areas of rural Canada. They don't feel safe in Tasmania, or Kauai, Hawaii. They don't feel safe in some of these fortresses they've built.

I know some of the security people that have worked in them, and seen them, and who've worked with some of the richest people in the world. And let me tell you, it's even in the news, there is a race by these billionaires to build underground fortresses and to do this.

And I was even at dinner a few months ago, with a Bilderberg group attendee and a major billionaire, I'm not going to say names. And he was asking me where he thought a good place in the southern hemisphere to go, and what chances I thought there'd be a nuclear war with Russia. And of course, I know that individual famously does have some quite large bunkers. I'm not going to say where, people will know who I'm talking about, but they're all got it. They've all got big giant self-sufficient yachts, so they can escape to sea.

That's why James Cameron has those big research vessels. He doesn't just live in New Zealand. He was led in on these plans. And I never talked to him, but I talked to one of his co-producers when I was out in Hollywood, like 16 years ago. And he said, "Yeah, James Cameron's not going to really make movies anymore. He's moving to New Zealand because he says, there's going to be a designed controlled collapse. And you know, those ships he's got for finding the Titanic and all that? That's just his tax write off. He's got a fleet of ships, in case he has to go to the ocean only. And so, that's why some of these billionaires are also building these floating cities. Because they are trying to position themselves for this collapse. They're not going to go to space like Ian Fleming's Moonraker, to release the bio weapon. They're going to go to the ocean while the rest of us die.

Dr. Joseph Mercola:

Yeah. But I want to differentiate. There's a number of billionaires, not many, probably thousands, or maybe tens of thousands. I don't know. But certainly the majority of them, but almost all of them are not part of the global cabal. They just happen to be wealthy enough to be aware. Some of them might be involved in the different layers of organization, but they're not high ups. They're not really controlling the plan. They're just responding for self survival.

Alex Jones:

I totally agree that they're opportunists. They go along to get along. They get the word down from the big corporations of, this is the agenda, and they get in line with it. So they keep getting their financing, and don't get targeted, and don't get shut down.

Dr. Joseph Mercola:

Yeah.

Alex Jones:

And so, it's a very small group that are actually at the Bilderberg group, that are actually at the Davos group, that are actually in those private breakout areas, where the real consensus from the real owners comes out. And the particular individuals that I've met with, they've been to these groups, and they don't even agree with the way it's going. So there are people inside these organizations, that agree it's gotten out of hand and is too dangerous, and they don't want to be part of what's coming. There's a real satanic death cult, whatever you want to call it, aliens. I mean, Doc, I don't know what it is at the top. But whatever it is, it's anti-human, and it's really smart. And it's got a long term plan to slowly kill us. And what it's building is so dangerous. It will destroy almost all of its minions, even if they've got 100 billion dollars in the bank, they're not safe. This thing is going to kill everybody, in my view.

Dr. Joseph Mercola:

Yeah. Now that may sound pretty outrageous, but I got to tell you, I'm with you. I really think that's something similar to that is accurate, that I really think you're spot on. Because I just think it is. I just don't think it's all human. I really don't. So we don't have evidence to support that, but it's just logic and rationality, but I'm wondering-

Alex Jones:

It's total logic when you look at the generational systems working together, and then you actually meet globalists and they're not that smart, there is an evil organized force behind this. I get chills talking about it.

Dr. Joseph Mercola:

Yeah, yeah. It really is. And I think this might be a number of people watching this, their first exposure to that sort of outrageous discernment. But it's something to consider, and there's a lot of material that is written to support that. And that it's pretty extensively, that goes way back.

So with respect to the taking of the grid, that is an interesting perspective. And I haven't heard that before, but it makes perfect sense. Is that just your guess, or have you actually reviewed that in some of the documents you've read that they produce? Because I mean, as you mentioned earlier, they're not shy about sharing what they're going to do.

Alex Jones:

Well, they will thinly veil their plans, but they'll say, at the Davos group, "We're doing beautiful things. We're saving the earth. We've got to get rid of the people." And then they go, "Oh, take this shot. We want you to live longer. We want more people." So the very same people that say they want to kill you or want you dead, now want to save you with a shot.

And so, it's the same thing with the grid. There's a total obsession, and war gaming, and pre-programming, that it's imminent that the grid's going to go down, while they cut off the coal, and other systems that keep the grid up, and then don't allow new systems to come in, to actually generate the electricity. So you have the slow strangling of it. And then the hyping, it's imminent, terrorists are going to hack the grid. The grid's going to go down, it's imminent. Or North Korea's going to fire an EMP, it's imminent. But it fits into their agenda of collapsing the old system. And to bring in a new, more predatory system, that they would launch that. And so, just by how much they hype up the grid going down from hackers, that I see that as the logical next move, or certainly, they're warming it up, they're getting it ready.

Because again, before they do something, they hype it up right before they do it. I mean, four months before 911, suddenly bin Laden is on every channel. Bin Laden's going to get you. He's the new boogiemán, he's coming for you. It's all over. America, you're in total danger. And then, Osama bin Laden attacks us.

So, I mean, I've just seen the patterns where it's like, if Ford's coming out with a new car, they run ads for it. Or if Coca-Cola is coming out with a new drink, they run ads for it. They run ads in fear and product placement, what I call propaganda placement, and pre-programming, before they roll something out. So I think, more viruses, more hysteria on that front, collapsing borders, devaluing currencies, degenerating cities, flooding everything with fentanyl, GMO, 5G, and then-

Dr. Joseph Mercola:

Fake food.

Alex Jones:

Again, limited power outages.

Dr. Joseph Mercola:

Yeah. So this is all part of what's called, Klaus Schwab's Great Reset. But I'm much more fond of Catherine Austin Fitts' revision of that, which is the great reject. So it in a seek to honor and implement the great reject, how do we reject the Great Reset? What do we need to do? What do we need to focus on? You mentioned the resiliency and preparation phase that you're doing on your farm in Texas, where I think is outrageously good. Most people won't be able to do that, but that seems to be close to the ideal, where you're completely self-sufficient. But what are the other things that we need to do?

Alex Jones:

And I'm saying this myself, because I work too much. I'm overweight. I got a sore throat right now, laryngitis. I apologize for that. We need to get healthy. We need to eat healthy. We need to meditate. We need to pray. We need to love our families, love our neighbors. And just realize that it's going to turn out okay in the end. There's evil in the universe. There's also forces of good. And we see that. And so, God works through us, and we've just got to trust in God, and not let them get us down with all this evil. And just keep moving forward, and keep persevering. And reach out to the hopeless, and speak to people, and just get outside and get sunshine, and just spend time thinking about how beautiful the universe is, and realize the evil forces on this planet are not all powerful. And that's why they want control, because they want to be all powerful. And that we will transcend this together.

And then inform others. Get the book at infowarstore.com. That'll help keep us on air. We need the funding. Plus it's an amazing book. Steve Bannon said it's one of the most important books he's ever read. I'm really proud that we were able to get this book done and produced. Get it at amazon.com, because I want to send it to number one. It's already number one on 20 plus charts. It's in the top 40 books right now. We'd like to send it to number one. The Great Reset: And the War for the World.

Spread the word about Dr. Mercola's show. I know millions do. Share this interview, go to infowars.com, go to banned.video, where you can find all the forbidden information that they don't want out. Support independent media, support independent businesses, support small businesses, support farms, support thrift shops.

I mean more and more, we need to disengage from the big corporate system, that ran the lockdowns, that declared small businesses non-essential, and realize, they're trying to make us all non-essential, and make us unproductive, so that we are useless, not just to them, but to ourselves. We have to make ourselves useful, make ourselves productive. Go take a carpentry class. Go take a class on how to fix engines. These are real knowledge we need, not the stuff that they're teaching in most of these colleges. And that's all been done by design. And so, we need to all become generalists, that all know a lot of information, and a lot of basic things. And that will be fulfilling.

Plant a garden, is the number one thing people can do. I don't care if it's a window box that you're growing some bell peppers and things in. Just that human action reignites our epigenetics.

Dr. Joseph Mercola:

Most people in the country are overweight, and they have enough calories stored as fat to last them for months, literally months. So it's nice to have food, but a bell pepper's not to keep you

alive for very long, anyway. So I think, the more important thing is the water. You've got to have a source of water, because that's the thing that'll take you out much sooner than lack of food.

Alex Jones:

You're right. You'll die in three days, four days without water. And let me just be clear, Dr. Mercola. You're absolutely right. I was talking about the process of just getting dirt and growing things.

Dr. Joseph Mercola:

Okay.

Alex Jones:

Just as a ritual, in a Carl Jung type way. The ritual of going and planting a garden, or walking in the woods, forest bathing. I'm just telling people as a human ritual, to reignite who we are, there's something profound about agriculture.

Dr. Joseph Mercola:

I would agree. So the other point that you didn't mention, but I think it's vitally important, I'm sure you would agree with, is developing a community. Because you don't want to be the lone ranger out there. You don't want to do this alone. You can't do it alone. You will not survive if you do it alone. You need a group of people who are like minded, and share your value. So that's going to be the key, and it's not going to be in a big city, ideally, because that's... Even the most well-intentioned individuals, or network of individuals, is going to be challenged and probably taken out. The cities are not going to survive, they really aren't. I completely believe that. It's just, when push comes to shove, and they implement their strategies, it's going to be massive catastrophes in cities.

Alex Jones:

Well look what they're already doing in Europe and other areas. If you want to go to the grocery store, you've got to have your vaccine pass. Or if you want a job, or if you want to go to the hospital, or if you haven't had the shots, they won't give you medical care. They're herding people into cities, with 5G, GMO, and making them take these injections. We can see how this movie ends. These cities, and these new smart cities they're building, are literally prisons. Prisons of dehumanization. Prisons of slow death and extermination. And that's what this whole thing is, is a huge people killing machine.

Dr. Joseph Mercola:

Yeah. Because depopulation is clearly one of their primary agendas. It's very clear. They even state it many times. It's no secret. So you just have to believe them, because they really mean what they say.

Alex Jones:

You're right. The number one thing, just for basic survival, is what you said. There are a lot of great gravity fed filters, that you can get water out of a pond, a stream, anything. And not just not

having water will kill you, if you drink water out of a spring or something, or in the mountains, that's probably fine. But if you drink out of some sewage filled water during a collapse in a city, you're going to die of cholera. You're going to die of other diseases. And so, water is absolutely numero uno. And self defense, and knowing how to protect yourself. Not offensively, but defensively, everybody needs to know how to defend themselves, however they choose to do that.

Dr. Joseph Mercola:

Yeah. Well, Second Amendment is pretty good, important. And being from Texas, that's one of the big gun toting states in the gun rights. I would agree, it's important to have self-defense. But again, I think it's going to be a lot easier to defend your family and your community, in a non-city scenario. It is literally, you almost can't have enough weapons and barricades to survive in the city, I just don't think. Maybe initially, but it's just going to fail.

Alex Jones:

Fire is going to consume the cities.

Dr. Joseph Mercola:

Yeah.

Alex Jones:

And so, you can be in an armored fortress as the collapse accelerates, gangs, war lords are going to take control, and they're going to come to your fortress. They're going to dig you out.

Dr. Joseph Mercola:

Yeah.

Alex Jones:

All you can do long term, is get to rural areas, and get all your neighbors self-sufficient and have a plan. And a lot of them won't listen now, but they're going to listen later. And so, when they see the road warrior scenario coming down the street, they'll know what to do. But we're going to end up having small towns come together. We're going to end up becoming self-sufficient. And it's going to be, there's going to be a new Renaissance that comes out of this as well.

Dr. Joseph Mercola:

Yeah.

Alex Jones:

The globalists are evil. Sorry, go ahead.

Dr. Joseph Mercola:

You envision something like a Mad Max scenario?

Alex Jones:

We already have Mad Max scenarios in many areas of Europe. No go zones, Mad Max scenarios all over Africa. We already have Mad Max scenarios in many skid rows, all over the blue cities of our country. We already have Mad Max scenario on the Texas board with Mexico. I mean, it is literally Mad Max down there. 50 cal, tracers at night, explosions, thousands of people anywhere you go, coming across dead bodies, beheaded people, dead children, people hanging from trees. And 50 dead in a trailer. 20 dead in a trailer. 10 dead in a trailer. Massive MS 13 shootouts. I mean, it is absolute lawlessness on the Texas border. And that's going to continue to spread as the Great Reset collapses the third world, over two years of lockdowns, under IMF World Bank directives, in areas of Africa, Latin America, and Asia, then that creates the Sri Lankan like collapses we just saw. Look at Sri Lanka, Mad Max.

Dr. Joseph Mercola:

Yeah.

Alex Jones:

So yes, Sri Lanka and all of that is coming here, if we continue on the path of the Great Reset, which is a controlled demolition of civilization.

Dr. Joseph Mercola:

Yeah. I think, that's probably accurate. So any projections as to how you're going to fare in your legal battles, upcoming legal battles?

Alex Jones:

When I say this, I want to be 100% clear that I'm not exaggerating. Okay?

Dr. Joseph Mercola:

Mm-hmm.

Alex Jones:

People would think Alex Jones has seen it all. I've not seen it all. My mouth is hanging open. The whole preface of what happened with my coverage of Sandy Hook is a lie. Barely ever covered it, looked at all the angles. Hillary edited some tapes of me. Ran against Trump in 2016, the last few months, saying Alex Jones was Trump's brain, which wasn't true. I wish it was. And now, for four years they got discovery, and harassed me and did all this. And then, defaulted me, saying we gave them nothing. And so, they have four trials coming up, two in Texas, here in Austin, and then two in Connecticut. And people ask, "Well, why do you live in Austin if it's so communist?" My family's from here, my mom's from here. I've been here since high school. It's where I built my operation. I should leave Austin. In fact, I'm planning to, I have to. Okay? It's just, we've got deep roots here, and the whole operation's here.

Dr. Joseph Mercola:

Well, you've got that farm. You've got the farm in Texas, don't you?

Alex Jones:

Well, yeah. Yeah. And that's in a very conservative area. Yes, my family does. So that's where we're at. Literally, the judge defaulted us, but is still having a show trial on damages. The second week started today, of the first trial. And she lets all their witnesses on, them lie about me, say all the stuff that's not true. And then, we can't have any witnesses, unless they're a witness that they have called, because we're defaulted. And she points to the jury and says, "He is guilty. Do you understand?" So I'm guilty until proven guilty. And they're asking for \$150 million. I personally don't have \$2 million. The company has about two million in it. And for any operation this big, we got to buy product into the future. We got to pay for all sorts of stuff. So that's why I declared limited bankruptcy four months ago. They kicked those companies out. Even though it was a company that owned infowars.com, it was a supplement company. These were real companies. They kicked those out of the suit.

I declared bankruptcy Friday on Free Speech Systems, the main company that actually runs all this, and owns the company. And today in Connecticut, the judge said, "I'm going to overrule the federal court.", which they can't do. "I'm going to kick this out, and we're going to go ahead with the next trial in Connecticut, because Alex Jones didn't declare bankruptcy." So they think they'll just double back around later, and sue Free Speech Systems and Infowars, and try to take that. I'm not even worried about that. We are so down a rabbit hole.

Dr. Joseph Mercola:

What did they throw out? Your decision to bankrupt the company? They invalidated that?

Alex Jones:

The state court is saying, they're going to ignore it, but here's the bottom line.

Dr. Joseph Mercola:

What does that mean though? What does that mean?

Alex Jones:

It isn't even in the law. This morning in Connecticut, it'll be in the news in the next few hours, this morning in Connecticut, at like 8:30 in the morning, she had like a 10 minute hearing, Judge Barbara Bellis, and said, "I don't care. I'm going ahead with this trial. I don't care what the federal court says, or if there's a stay on this for the bankruptcy." And last Friday, when we declared bankruptcy at 4:30, my lawyer got up in the trial and said, "Your Honor, Free Speech Systems has declared bankruptcy, but we're going to lift the stay Monday so this trial can go forward. She goes, "I don't care. I was going to go forward with the trial anyways." It doesn't work like that in a civil trial, that's the law, but they don't care.

And so, in closing on the subject, I'm not worried about myself. I want to keep Infowars on the air as long as possible, but we've been vindicated. The New World Order's here. Global government's here. The depopulation agenda, the force inoculation hell, the open borders, the devaluation of currency, all of it's already here. And so, I'm just a symptom of the disease, and the fact that they want to shut everybody down.

So I appreciate folks rallying around Infowars. I appreciate folks praying for us. I appreciate you having me on, Dr. Mercola. I admire you, and you've taught me so much, and you're an amazing mind. And I just want to ask everybody to please spread the word about Infowars and our live

shows. And to please support us financially. Because in the bankruptcy, we have a plan when they get these giant judgments to say, "Okay, you got a billion dollar judgment, a \$50 million judgment. We don't have any money." And then, the federal court will allow us to pay what we have, and we will survive, and continue on. Because that's what the bankruptcy court's for. So people can't just destroy you.

And in the newspapers today, and for the last two weeks, the lawyers for these people, who are Democrat party operatives on record, same folks that sued Remington into oblivion, they say, "It is our mission to silence him, and shut him down with the biggest judgements we can get. We want him off air." So just a few years ago, that would be heresy to say, we want to silence someone, that's the point of this suit. Now, they openly say it is to destroy us. And they have said on CNN, and MSNBC, "Next is Tucker Carlson. Next is Joe Rogan. Next is everybody else."

Dr. Joseph Mercola:

Yeah, I agree.

Alex Jones:

So people better circle the wagons here.

Dr. Joseph Mercola:

I got to be on their list. No question. So you know, it's-

Alex Jones:

You know you're at the top of the list.

Dr. Joseph Mercola:

Yeah, I know. So it's interesting, because you currently have the legal protection of bankruptcy. It exists today. But that protection was evaporated. It was just destroyed by Obama for student loans, which is over a trillion dollars in loans. So that if you have a student debt, you could have it for 60, 70, 80 years, and die with that debt, and you just can't ever have bankruptcy absolve that.

So hopefully, they will never remove that protection that bankruptcy law provides, because it is really a powerful strategic strategy, a intervention to allow companies and individuals to recover from that. Whereas, with student-

Alex Jones:

And it lets us, Doc, put our cards on the table. When they're up there at these hearings, at these kangaroo courts going, "He's got 70 million himself. He's got 200 million." And they look at like five years of gross sales of water filters, and books, and films, and supplements. And everybody knows, you're only making 30, 40% on those. And after the bandwidth-

Dr. Joseph Mercola:

If that. If that.

Alex Jones:

... and the legal, and the crew and all of it, you spend that money, so we don't have... And look, there's nothing wrong with making a lot of money. There's nothing wrong with being self-sufficient. So I'm not ashamed that we've raised a lot of money. But I'm also kind of proud, that we've spent it all in the fight. And so, if they wanted money, they're not going to get it. But look, they admit, they know, they have our financials, and the court orders to be turned over. They know we don't have all this money. So again, think how sick that is, and how aggressive, and how that's, as you said at the start of the show, the next level of censorship.

Dr. Joseph Mercola:

Yeah. We've seen it four years ago, and this could be the beginning of the next generation of intervention, that they're seeking to destroy the resistance, I guess, would probably be the best and most accurate way to frame it. So I couldn't encourage anyone more than to get a copy of the book, just to support Alex. It's really good. I think you'd enjoy it. I was surprised at how well written it was. So now I know the secret sauce was Tony Lyon's Skyhorse publishing company that helped you with it, but it was really very well written. It's a good read. It's a good summary. And I'd encourage you to pick it up, and help Alex in his efforts to make this more popular. Certainly, he deserves our support for his bravery, and his courage in being out there, and exposing these frauds, and these efforts towards global tyranny, and his ability to stand up to it. So I thank you for all your efforts and in helping inform and educate the public of this really important topic.

Alex Jones:

Doctor, thank you so much. I really appreciate you and your amazing organization. I apologize for the laryngitis and I know you're busy-

Dr. Joseph Mercola:

You don't have to. You don't sound any different, Alex.

Alex Jones:

It's even deeper than normal. But I would please, I know you're a busy man, but please, come on my show soon as well. Thank you so much.

Dr. Joseph Mercola:

All right.
