

# **Debunking the Monkeypox Scare**

## **A Special Interview With Francis A. Boyle, Ph.D.**

### **By Dr. Joseph Mercola**

#### **Dr. Joseph Mercola:**

Welcome everyone. Dr. Mercola helping you take control of your health. We are joined by a repeat guest. I believe this is his third visit. Dr. Francis Boyle is a full professor of law at the University of Illinois, my alma mater. He was, in the past, to really, I believe, in February 2020, right as the epidemic was progressing. He was helping us understand early on that this was a lab leak.

We didn't know, and still on to this day if it was an intentional lab leak for the SARS-CoV-2, but it was a lab leak. Anyone who spread that message was vilified, discredited and many, many were de-platformed. Their YouTube channels were taken away, as were Twitter and Facebook accounts. Now, of course, we know that information was true and is accepted widely by even the mainstream narrative, the mainstream media and legacy media. To best of my knowledge, we're not de-platforming people.

We've invited Dr. Boyle to join us again today to discuss another attempt at implementing fear into the population, which is the monkeypox. It appears to me that it hasn't been very effective, people have become conditioned to understand that the lies being spread are indeed lies. Nevertheless, I'd like to explore the possibilities that this monkeypox is indeed yet another engineered bioweapon. Welcome and thank you for joining us today, Dr. Boyle.

#### **Francis A. Boyle:**

Well, thank you very much, doctor, for having me on my best to year listening audience. Before we get to the monkeypox, which was the agreed subject of our conversation today. I just wanted to discuss this brand new-

#### **Dr. Joseph Mercola:**

Perfect.

#### **Francis A. Boyle:**

-biotechnology executive order [[crosstalk 00:02:13](#)]-

#### **Dr. Joseph Mercola:**

Oh, yes. That Biden just launched.

#### **Francis A. Boyle:**

-by the Biden administration.

**Dr. Joseph Mercola:**

Good point.

**Francis A. Boyle:**

I won't go through it all here except it's a very lengthy executive order. At the very end, the Bidenites give it all away, where they say, and I did send the text to you, which you are free to repost on your home website. Paragraph VII, "the purpose of this is to develop and work and promote and implement dual-use research of concern and research involving potentially pandemic and other high-consequence pathogens."

Now, let me work that out for you. "Dual-use research of concern" means offensive and then defensive biological warfare weapons. The Bidenites admit here that their agenda is to promote and implement more offensive biological warfare weapons. That's what dual use research of concern means. And then to try to perfect these weapons with some type of bogus vaccine involving reverse engineering or something like that. Notice, they admit they are going to develop these offensive biological warfare weapons, "Involving potentially pandemic and other high-consequence pathogens." They are going to research, develop more biological warfare weapons like COVID-19 pandemic that the United States government was involved in.

They admit this right here. Now, as I know you and your viewers do, you listen to the mainstream news media and everyone is saying, "Yes, the next pandemic is coming." This is where it is coming from doctor right here – dual-use research of concern involving potentially pandemic and other high-consequence pathogens. I'm going to get into the monkeypox in a minute.

**Dr. Joseph Mercola:**

Let me just ask this quick question-

**Francis A. Boyle:**

I'm going to let you respond at this point. Yes, doctor.

**Dr. Joseph Mercola:**

Thank you for pointing that out. It seems, ostensibly, that this is in direct violation of the treaty that you helped write in the '80s that prohibits this very action.

**Francis A. Boyle:**

That is correct, doctor. I called for and drafted the United States domestic implementing legislation for the Biological Weapons Convention known as the Biological Weapons Anti-Terrorism Act of 1989, that was passed unanimously by both houses of the United States government, signed it a law by President George Bush, Sr., and with the approval of the United States Department of Justice. Yes, this clearly violates it, but the problem, doctor, as I see it now and confronts us now, this is existentially dangerous.

Right now, they're moving to another world-girdling pandemic along the lines of COVID-19, which as I was the first to blow the whistle on, was clearly an offensive biological warfare

weapon with gain-of-function properties that had leaked out of that Wuhan BSL-4 that was China's Fort Detrick. The Bidenites have made it clear, they're going full speed ahead. They have crossed the Rubicon. They do not intend to turn back. They're doubling down, they're tripling down here, doctor. In my opinion, sir, this is what confronts us now today.

**Dr. Joseph Mercola:**

As a law professor, there's not many more qualified than you, especially in this specific area. It appears that an executive order either legislatively or constitutionally overrides a treaty that the United States signed. Is that correct? What's the legal stance on that?

**Francis A. Boyle:**

No, an executive order cannot override my Biological Weapons Anti-Terrorism Act and it cannot override the Biological Weapons Convention. This is just an inrun around both of them. An attempted inrun, despite the fact that violation of my Biological Weapons Anti-Terrorism Act is a felony punishable by life imprisonment. The Department of Justice did want me repeatedly to put the death penalty in there, but I'm in lifelong abolitionist and I did not want any statute of mind to have the death penalty in there.

**Dr. Joseph Mercola:**

How do you reconcile this conflict? Because an executive order, which appears to override or overrule your treaty – what takes precedence? Do you have to have Attorney generals sue the president? How does it become reconciled?

**Francis A. Boyle:**

They can't be reconciled again, whoever drafted this knew full well that they were violating the Biological Weapons Convention and my Biological Weapons Anti-Terrorism Act. An executive order cannot supersede either a treaty or a statute. Only a subsequent statute by Congress could do that.

**Dr. Joseph Mercola:**

Interesting. I'd like to tangent to an artifact of this whole pandemic, which is essentially removal so many of our personal freedoms and liberties through the Emergency Powers Act. I don't fully understand the legal implications of that, but it appears you can turn a democratically elected Congress into essentially a tyranny where they can rule without any restraints. How is that different from what they're doing now to the Emergency Powers Acts that they have enacted as a result of the pandemic?

**Francis A. Boyle:**

Right. Well, Doctor, I just published my new book on that, “Resisting Medical Tyranny.”

**Dr. Joseph Mercola:**

I didn't know you had book.

**Francis A. Boyle:**

There it is. I go through all of it in here. In addition, the conclusion comes up with the legal strategies, how to fight against this. I regret to report that despite my best efforts to blow the whistle on all this with this new executive order, they're doubling down, they're tripling down as they see it. It's going to be full speed ahead no matter what. I'm not trying to make money here, but my book, "Resisting Medical Tyranny," has all the legal strategies I developed for the American people to fight back as of January 24th, 2022 when it went into press. I'm doing a follow-up volume now with my further thoughts on the matter.

**Dr. Joseph Mercola:**

Well, thank you for writing that book. I'm sure we'll put a link to it if people would like more details is certainly going to access it. So, is it a complex strategy that you're recommending or are there some simple things that people can do? We're going to get to the monkeypox.

**Francis A. Boyle:**

Right.

**Dr. Joseph Mercola:**

This is really an important topic because it really cuts to the core of their strategy to essentially enslave the entire world in a global tyranny and just gradually and progressively chipping away at all our personal freedoms through-

**Francis A. Boyle:**

That is correct. This gets us to the monkeypox, doctor, that in my opinion this monkeypox epidemic we saw clearly this was an offense, a biological warfare weapon with gain-of-function properties that came out of someone's lab and was released in multiple locations, as you said at the beginning, to scaremonger people. Why? I don't think it was a coincidence at all that the World Health Organization (WHO), their meeting at the World Health Assembly (WHA), was considering regulations that would have done once again an inrun over and around the sovereignty of the United States of America and our state and local governments to control our health care. Under the Tenth Amendment of the United States Constitution, health care, public health, falls within the control of state and local governments, not the federal government. That is why down there in Florida or in Texas, you can have your governor's adopting different policies from the dictates issued by the CDC (Centers for Disease Control and Prevention) in Washington, D.C.

What happened was that the Bidenites and the CDC saw this – you have several governors now rebelling against these totalitarian, dictatorial ukases coming out of Washington, D.C. In order to try to stop that, they came up with these regulations that they tried to get through the World Health Assembly earlier this summer, and that failed.

The monkeypox in my opinion, was then released in order to scaremonger the governments of the world to accept these WHA regulations, that failed but what they now are doing, which is going on this week in Washington, D.C., the WHO is meeting to negotiate and conclude a

treating that will fold into it the same WHA regulations that I did read at the time and give interviews at that time. The purpose of this WHO treaty, once again, is to do an inrun around American sovereignty to make decisions at a state and local basis as to how to treat matters of public health in the next pandemic, which they know is coming because they're already preparing for it in accordance with the Biden administration biotech executive order that I just quoted to you. They know it's coming. They're preparing it. They're getting it ready. The next time by means this WHO Treaty, they will attempt them to argue that the treaty is the supreme law of the land under the-

**Dr. Joseph Mercola:**

World.

**Francis A. Boyle:**

Let me finish and then I'll take your question – is the supreme law of the land under Article VI of the U.S. Constitution and therefore trumps and displaces the ability of state and local governments like Florida, like Texas, like Governor Noem to determine our public health under the Tenth Amendment of the United States Constitution. Indeed, there is a Supreme Court case to that effect that they know all about, Missouri versus Holland, that if a treaty is concluded, it does override the Tenth Amendment to the United States Constitution.

We have to understand these people know exactly what they are doing and we have to stop them. This treaty is now being negotiated in Washington, D.C., this week as the World Health Organization meets. What we have to do there is get as many members of the United States Senate as possible to sign a letter saying that we will vote against any WHO treaty coming down the line at this point and then send copies of that letter to the World Health Assembly, the World Health Organization, and any government in the world, if we can get one-third plus one members of the United States Senate to sign that treaty.

I think that will kill this proposed treaty coming down the line now. Again, we have to understand the Biden administration, they have top international lawyers there running their policies. You have Ron Klain who was behind me at Harvard Law School. He was Obama's Ebola czar that was in charge of covering up the outbreak of the Ebola pandemic on the West Coast of Africa that came out of that U.S. government's Kenema BSL-4. We have [Antony] Blinken, graduate of Columbia Law School. We have [Jake] Sullivan, graduate of Yale Law Schools.

We've got three of the top law schools in the country right there running these policies. They know exactly what they're doing. My guess is Biden gave all this to Klain to handle because Obama, Biden gave the Ebola pandemic to Klain to handle.

**Dr. Joseph Mercola:**

You referenced earlier the World Health Organization treaty that would circumvent or override essentially public health responses in the United States. My understanding is that it's a global treaty. It's not just the United States and essentially would dictate this the World Health [Organization] recommendations or dictates across the globe.

**Francis A. Boyle:**

That is correct doctor. Thanks for letting me elaborate. Obviously, here anon, I'm just speaking to an American audience.

**Dr. Joseph Mercola:**

Right. Primarily, no, we have an international audience, actually.

**Francis A. Boyle:**

We do have the protections of our constitution here and our Bill of Rights and the Tenth Amendment is part of our Bill of Rights, allowing public health to fall under the control of state local governments and not the federal government. I'm not expressing opinion about any other constitution around the world, but you are correct. If the treaty gets passed, then they will use the treaty to enforce WHO dictates all over the world on the handling of the next pandemic and that will get us all killed.

As you know, the WHO is the rotten, corrupt criminal organization and the proof of it is the WHO is a sponsoring institution of the Wuhan BSL-4, which is China's Fort Detrick. Imagine if the WHO were a sponsoring organization of our Fort Dietrich, we would know that the cat is out of the bag. That's exactly what's going on here with the WHO.

Its dictates will be controlled by the CDC, Bill Gates and the Chinese communist government and Big Pharma that pays for the WHO and will enforce everyone to continue to take more vaccines. I call them "Frankenshots" and more boosters forever for the next pandemic coming along the lines as well as COVID-19. There'll be no end to this, doctor.

**Dr. Joseph Mercola:**

Earlier this summer, this treaty was attempted to pass, but it was thwarted and it was stopped. It was a short-term victory because it is my understanding they were going to continue to reintroduce it and continue and continue until it eventually passes. So what is your-

**Francis A. Boyle:**

Let me give you a technical-

**Dr. Joseph Mercola:**

Let me just finish the question. Let me finish the question, okay.

**Francis A. Boyle:**

Earlier this summer they tried to ram this through the World Health Assembly as nothing more than regulations, WHA regulations. That failed, so now they are coming back with the same inrun by means of a treaty, which has more power constitutionally here in the United States. WHO regulations, we could have attacked as lawyers. Treaty, it will be very difficult if not impossible to do so. Continue your question, doc.

**Dr. Joseph Mercola:**

All right. I'm curious as to your projections as to the likelihood of this passing either... I'm not sure of the timing. I know it's this fall, it might even be next week that you referenced. I don't know. Even then, if it's thwarted or failed, they're going to continue to retry and retry. It sounds like your strategy is to coordinate an effort to get more than one-third of the U.S. senators to reject this. If that's in place, it puts up a firewall that protects this from ever being passed.

**Francis A. Boyle:**

I think that's correct, Doctor. I think you understand my strategy. Yes, the World Health Organization assembly will be meeting, I believe towards the end of this week in Washington, D.C. I'm sure the text of the treaty has already been prepared. It will probably pass the WHO assembly. The U.S. government representative could sign it and then they would send it to the Senate [Committee on] Foreign Relations for ratification by the Senate. We need to head this off as soon as we can with this letter one-third plus one of the Senate just saying we're going to reject it. We have to start lobbying now against the treaty. We'll have limited time once it goes to the Senate [Committee on] Foreign Relations. Remember, the Democrats control the Senate. They control the Senate [Committee on] Foreign Relations.

They could get it through very quickly to present to the full Senate. We have to go all out to stop this treaty. Yes, in my opinion. You're down there in Florida, I would certainly hope you could alert Governor DeSantis to the dangers here. His powers will be terminated under the terms of this treaty to regulate all public health down there in Florida. He'll be obligated to obey-

**Dr. Joseph Mercola:**

Yeah.

**Francis A. Boyle:**

-whatever the WHO tells him to obey. If he does not, then the federal government can go into the United States federal district court and get an injunction under the treaty mandating that he comply and if he does not, he could be fined if not jailed for contempt. Yes. It's a very dangerous situation.

**Dr. Joseph Mercola:**

Yeah. I have dinner this week with the Surgeon General of Florida. I'll certainly discuss it with him. It seems intuitively obvious that this is a bad news bears for the world. I think most people don't fully appreciate the implications of this treaty being passed. They're profound. Can you expand on the disasters that will be implemented once this treaty passes, if we fail to prevent it from being passed?

**Francis A. Boyle:**

Sure. Obviously, I teach an entire course on the constitutional law, U.S. foreign affairs, to right now about 30 law students. I'm not going to get in here to legal technicalities. I have already pointed out in the Bidenite executive order, they are going full-steam ahead to develop research, develop offensive biological warfare weapons using DNA, genetic engineering, synthetic biology, gain-of-function properties, et cetera, including for pandemics. That's the next COVID-

19 pandemic right there. They've admitted it in writing. You just have to read it and it's right there.

Knowing full well the next pandemic is coming because they're developing, it's coming out of their laboratories, it's coming out of their BSL-3s and BSL-4s that we have to shut down. They are now planning and preparing by means of this treaty to demand that all public health authorities here in the United States of America must obey anything the CDC tells them to do in the next pandemic and in the COVID-19 pandemic.

If they do not, they can be sued before a federal judge, United States district court, get an injunction, get fines, get them found guilty of contempt. That's what's at stake here. Yes, it will do a total inrun around the governors of Florida and Texas, North Dakota, et cetera, and eliminate all of their power. The CDC and the WHO literally will be Stalinist dictators telling us what we have to do. It's that simple. When it comes to the next pandemic that they are already planning right now in accordance with the Biden biotechnology order.

**Dr. Joseph Mercola:**

Thank you for expanding on that because it makes it really clear this is a really, really important effort. Have you developed any process or system to help people understand how to contact their senators? I know these types of apps exist, with the suggestion of the information that can be shared with them to get them on board. Has anyone started this letter? Is there someone mounting an effort to put a campaign together to secure these signatures from the one-third plus of the U.S. Senators?

**Francis A. Boyle:**

Well, doctor, that's why I'm appearing on your program.

**Dr. Joseph Mercola:**

There we go.

**Francis A. Boyle:**

To get the ball rolling, to get the process underway, right? I figured you're down there in Florida with Governor DeSantis. This is a great place to start, sure.

**Dr. Joseph Mercola:**

Yeah. Well, he's a governor. He's not certainly likely to be a candidate for president, too. We need right now to stop this disaster because his candidacy won't occur for another two years. We've got to get the current U.S. Senators to sign on this thing because it's going to pass before the next regular election, not the midterm election.

**Francis A. Boyle:**

I suspect it will. Sure. They'll try to ram this through as quickly and as quietly as they can, just like they try to ram through these World Health Assembly regulations. Fortunately, there were some health organizations such as the one you run who are keeping tabs on this and sent these regulations along to me and asked me to look at them and then give an interview on it, right.

Without people keeping tabs on it, we wouldn't have known anything. Sure. It'll be done in the dead of night, doctor, through the United States Senate, which the Democrats currently control. They could lose, but who knows what's going to happen in November. If the Democrats still control, they'll try to ram this through the Senate. Sure.

**Dr. Joseph Mercola:**

Clearly an effort is needed, and logistically, I'm wondering if you've structured anything to facilitate this from being accomplished. Is there any collection system or mechanism that allows people to easily connect with their U.S. senator to encourage them to sign on this letter?

**Francis A. Boyle:**

I haven't developed one, but I know there's one out there. Sure.

**Dr. Joseph Mercola:**

Okay. Well, we'll have to do some research on it.

**Francis A. Boyle:**

Maybe you could have your people there look into this and then just put something on your webpage. Sure. I think that would be very important, which again is why I'm taking this time this morning to talk with you about the danger-

**Dr. Joseph Mercola:**

Yeah.

**Francis A. Boyle:**

-that confronts us both with the biotechnology executive order and this WHO treaty. They are connected with each other and also the monkeypox, I think that was designed to scaremonger everyone into going along with the WHA regulations and now with the WHO treaty, they needed something new, so the monkeypox was released.

**Dr. Joseph Mercola:**

I neglected to mention in my introduction for you, obviously that you're graduate of, I think, either in your class grad of Harvard Law School and then you shifted over to the University of Illinois. You also, because of your interests, I suspect in these bioweapons, which goes back to the '80s in developing the treaty that you're seriously networked into that community.

As a result, you were able to be, maybe the first person to sound the alarm bell that this SARS-CoV-2 viral pandemic that emerged at the beginning of 2020 was a lab-leaked bioweapon. Can you expand on how you were able to be one of the first people to understand what was going on and how did you get this awareness because you certainly didn't get it from the mainstream media?

**Francis A. Boyle:**

No, I didn't, doctor. Again, I don't wish to toot my own horn here. Yes, I have a JD (Juris Doctor) magna cum laude from Harvard Law School where, in fact, I studied biological weapons with Professor Matt Meselson from the Harvard Biology Department who lectured us in my course on the laws of war. Then I also have an AM and Ph.D. in political science from the Harvard Graduate School of Arts and Sciences, specializing in international relations where Harvard trains future professors. I graduated deliberately from the exact same Ph.D. program at Harvard that produced Henry Kissinger-

**Dr. Joseph Mercola:**

Oh gosh.

**Francis A. Boyle:**

-before me. Indeed, they gave me Kissinger's old office when I was an associate at Harvard's Center for International Affairs. In any event, because of my Harvard connections, I guess in 1983, the Council for Responsible Genetics was established there in Cambridge Mass. They had a lot of MIT (Massachusetts Institute of Technology), Harvard people involved there. Some of whom were friends of mine in the Harvard Biology Department.

I guess they recommended me to the Council for Responsible Genetics to handle their anti-biological warfare work. I got involved in this sometime after 1983. Yes. I've been working full time since against biological weapons, biological warfare, et cetera, and monitoring it. That's literally how I was able to determine that COVID-19 came out of the Wuhan BSL-4. In addition, I was the first person to blow the whistle on the fact that Amerithrax of October 2001 came out of the anthrax attacks of October 2001, came out of a US Biological Warfare weapons laboratory and program. I did that on November 1, 2001. The Council for Responsible Genetics was having a convention at Harvard Divinity School and they had asked me to run a workshop against biological weapons of warfare. On the way in to Harvard Divinity School on the front steps, there was a camera crew from Fox News asked me my opinion. I told them, obviously this came out of a US biological warfare weapons laboratory program. It was super weapons-grade anthrax.

Then I said the exact same thing at my workshop, Dr. Jonathan King, who is a founder of Council for Responsible Genetics and professor of biology at MIT agreed with me. Then I came back here to my office Monday or so, gave an interview to Pacifica Radio Network saying the exact same thing. Then later that week I gave an interview to the BBC saying that Amerithrax had come out of a U.S. biological warfare weapons program and laboratory and then an order was given. I was never interviewed again by any Western mainstream news media source on biological warfare weapons. That's it. Since that order is still maintains today.

**Dr. Joseph Mercola:**

Sure. You'd mentioned that you are a product of the same program that produced, at Harvard, Henry Kissinger and Klaus Schwab, obviously the leader of the World Economic Forum has attributed his main mentor as being Henry Kissinger. How do you reconcile that you're both products of the same training institution that could produce one of the main leaders in the global

tyranny, the global cabal to control and enslave the world. How is that possible? You seem to be on the other side, but your training was nearly identical. How did you escape?

**Francis A. Boyle:**

Yes. I spent seven years at Harvard. I have three degrees from Harvard. I spent two years teaching Harvard undergraduate, Harvard Center for International Affairs, one year on their executive committee where they gave me Kissinger's old office there.

**Dr. Joseph Mercola:**

You had Kissinger's old office?

**Francis A. Boyle:**

Yes. At the Center for International Affairs. His 5 or 10 [inaudible 00:37:30] were in there.

**Dr. Joseph Mercola:**

You've got to help us understand how did you escape that brainwashing and that propaganda?

**Francis A. Boyle:**

Well, let me go back to Klaus Schwab because I think your point is pressing here under the current circumstances is [The] Great Reset. Schwab studied at Harvard, but not my program. The program I was in, the GSAS (Graduate School of Arts and Sciences) Ph.D. program, is where Harvard trains future professors of political science like Kissinger, like [Zbigniew] Brzezinski, like me, like Sam Huntington.

**Dr. Joseph Mercola:**

Yeah, Brzezinski is the guy that started the Trilateral Commission.

**Francis A. Boyle:**

Yes. I'll get to that in a minute. Sure.

**Dr. Joseph Mercola:**

Okay.

**Francis A. Boyle:**

Schwab went to the Kennedy School at Harvard. The Kennedy School is a misnomer because there Harvard trains future U.S. imperial governmental operatives and spear carriers. No, it's true. They're all warmongers and spooks there. I was there when it were set up and their fellow travelers and fifth columnists in foreign countries that get incorporated into the U.S. imperial elite. That is a Klaus Schwab when he studied there and he said that he found Kissinger to be the most competent person at Harvard.

Well, Kissinger, I went through the exact same program. He is a diehard Machiavellian. There's no question about it. He does not have a principle bone in his body. Yes, Schwab studied with Kissinger and has admired Kissinger, I guess probably bootlicked Kissinger. Kissinger was the

one who got Schwab the job heading the Davos forum.

We have to understand that behind Kissinger, as behind Brzezinski, is the Rockefeller family paying the bills, pulling the strings. Kissinger, Brzezinski had been on the Rockefeller family payroll for quite some time. Brzezinski was head of the Trilateral Commission set up by David Rockefeller. I went through the exact same program at Harvard that produced Brzezinski as well.

We know the Rockefeller family, these people are eugenicists. Okay. That's a matter of public record. We also know that when Kissinger worked for Nixon, Kissinger put out that infamous national security directive that population control and reduction is part of the national security policy of the United States of America. I haven't read anywhere that NSD or NSM call it what you want has been revoked. That is really going on here with Klaus Schwab, the Davos forum, the Davos crowd, in my estimation, doctor, based on my experience, Yes.

**Dr. Joseph Mercola:**

Okay. Even behind the Rockefellers would be the Rothschilds. You know that long preceded the Rockefellers by centuries.

**Francis A. Boyle:**

That is correct, doctor. You are correct. I haven't dealt personally with Rothschilds. I've dealt, Kissinger, Brzezinski, Harvard. The Harvard Government Department where I got my AM and Ph.D., its chairman had been McGeorge Bundy who President Kennedy later tapped for National Security Advisor and gave us the Vietnam War. Right?

**Dr. Joseph Mercola:**

I still don't understand how you went rogue. How did you escape the brainwashing from Harvard that produced the leaders of the global cabal? Brzezinski is past, but certainly Kissinger, Klaus Schwab. How did you escape?

**Francis A. Boyle:**

I didn't escape and I didn't go rogue. What happened-

**Dr. Joseph Mercola:**

So what did you do?

**Francis A. Boyle:**

Well, what happened doctor. At the end of May 1967, I had just turned 17 and I was so appalled by the Vietnam War that I resolved to myself that I would get the most elite education I possibly could and turn it against the people running United States empire. That's what happened.

**Dr. Joseph Mercola:**

You were an insider at 17.

**Francis A. Boyle:**

I was 17, right. That was 1967.

**Dr. Joseph Mercola:**

Wow. That is amazing. Hardly anyone that young has enough principles and commitment and discipline to go through with it. Congratulations. That's amazing.

**Francis A. Boyle:**

Well, it's just what I decided to do with my life, Doctor.

**Dr. Joseph Mercola:**

Well, you're a testimony. Five decades of implementation, successful, and warning the entire world. The first to warn that this was an inside job, that this was not a zoonotically derived pandemic. It was a bioweapon that was engineered.

**Francis A. Boyle:**

Yeah. If you really believe the standard propaganda, I have a bridge that-

**Dr. Joseph Mercola:**

You want to sell us.

**Francis A. Boyle:**

Well, it was Michigan Avenue in Chicago. I'm a native Chicagoan. I can sell you that bridge. Sure.

**Dr. Joseph Mercola:**

We're both native Chicagoans. I didn't realize you're a native Chicagoan.

**Francis A. Boyle:**

Oh, right. Well I-

**Dr. Joseph Mercola:**

Yeah, that's great. All right. Can you help navigate us back to the monkeypox and which was the original reason for this interview as to how that fits into this whole picture?

**Francis A. Boyle:**

As I said, doctor, they are going to continue to release bioengineered pandemics on us when it suits their interest like they did Amerithrax in October 2001 to ram through Congress, the U.S.A Patriot Act, that set up a police state here in the United States of America that we are still grappling with an opposing, like COVID-19, the Monkeypox too. There'll be no end to this process.

My estimation in looking at the timing of the monkeypox, it clearly came out of someone's biological warfare laboratory. It was released at a time just as they were trying to get past these regulations through the World Health Assembly. It was deliberately designed to scaremonger governments of the world to go along with those WHA regulations. It's still continuing today to get this WHO treaty pass, though, as you correctly pointed out, it hasn't been as successful, I think, as they had originally believed to scaremonger everyone.

As we know from the Biden administration executive order here, there'll be some other biowarfare pandemic or epidemic-

**Dr. Joseph Mercola:**

Sure.

**Francis A. Boyle:**

-coming down the line whenever they think they have to scaremonger people into following their agenda, which is clearly set forth in the Great Reset by Schwab. Just read his book. It's all in there, including transhumanism and the rest of it.

**Dr. Joseph Mercola:**

Are you aware of any paper trail that identifies the country of origin of the manufacturer of this monkeypox bioweapon? Is it United States, China, Ukraine?

**Francis A. Boyle:**

I haven't been able to determine, but clearly it has 30 genetic mutations beyond wild type monkeypox there in Africa. The only way it could have gotten 30 genetic mutations beyond monkeypox is it was done in someone's lab. Sure.

**Dr. Joseph Mercola:**

Okay. All right. What's your perception of the fear factor success? From my view of view, it looks like it was a miserable failure. That they were clearly successful with SARS-CoV-2 and COVID, wildly successful, maybe even beyond their wildest dreams. People starting to wake up. Large numbers of the population understand what happened and they're not going to be fooled again. That's my perception. I'm wondering what your take on it is and how successful this is [inaudible 00:47:30] – even the mainstream media isn't touting that much.

**Francis A. Boyle:**

I don't think they have succeeded with the monkeypox to scaremonger people enough to go along with this WHO treaty that will give dictatorial powers in the hands of Tedros [Adhanom Ghebreyesus], WHO, Bill Gates, CDC, and the Chinese communist government. All that indicates is that we'll probably have some other scaremongering biowarfare event. That's pretty clear from the Biden administration biotech order. They're planning it and preparing it right now. It's in someone's lab. We just don't know what it is going to be, doctor.

**Dr. Joseph Mercola:**

Yeah. Clearly we don't, and it may not even be a bioweapon, clearly that worked, but they have a tendency to cycle the emergencies and the fear-producing factors. There's other strategies they could implement and they have been implementing like supply chain disruption, like food shortages, fuel shortages. We've got large segments of Europe not having fuel and winter is fast approaching or significant fuel to warm their homes. People are going to be dying from the cold exposure. Then World War III, this threat with Russia and the Ukraine. There's a lot of different things they can do to activate the fear factor and implement global controls. I know your prejudice because bioweapons are your lifelong passion. I'm just wondering what your best guess is with respect to will it be a bioweapon or is it bioweapon – I know you have no way of knowing, but just from your best guess, is it-

**Francis A. Boyle:**

Well, you're right. Also, another area I specialize in is nuclear weapons, nuclear deterrence. I have a book called the "Criminality of Nuclear Deterrents." You can have a look at that if you want. I've spent my whole career dealing against nuclear weapons as well. The Carter administration adopted Presidential Directive 58, that said that in the event of a nuclear emergency, I discussed this in my book, that is undefined. They can put the entire country under martial law. You are correct. We are now seeing threats of nuclear weapons coming out of Russia responses by the United States. Jake Sullivan, yesterday, basically saying we have catastrophic consequences. Yes, as we move closer to a nuclear war or direct hostilities between the United States and Russia, we could see them invoke PD 58 and try to put the entire country under martial law. Those plans are on the books.

We know from Rex 84 that Oliver North drew up martial law plans in the event Reagan invaded Nicaragua and the pledge of resistance. A hundred thousand people took to the streets to repulse it. I know because I was council for Pledge of Resistance at the time and was contemplating ending up going off to a detention camp. You're right, this could happen. The Bidenites appear at this point, doctor, we are engaging in acts of hostility, belligerent acts, acts of war, the United States against Russia without authorization by the United States Congress in violation of the War Powers Resolution in violation of the War Powers Clause of the U.S. Constitution. We are in a de facto, I would not say yet de jure, but a de facto state of war with Russia. Foreign Minister [Sergey] Lavrov has just said, "Well, we're on the verge of a de jure war with the United States." If it threatens to go nuclear, sure. The Bidenites could invoke PD 58 or its successor and put us all under martial law. Yes.

**Dr. Joseph Mercola:**

The best of my knowledge, since I've been alive, there has not been martial law. I think it may have gone back to World War II. Can you help us understand the differences between martial law being implemented and what just happened to the COVID-19 with these Emergency Powers Acts being implemented? What's the difference between the two? Is there significant difference?

**Francis A. Boyle:**

Yeah, martial law is controlled by the military. The country would basically be controlled by the military. That's why we have U.S. Northern Command that was set up after 9/11, 2001. We

never before had a military command assigned to the continental United States of America. Now we do. They are fully prepared to put us under military-

**Dr. Joseph Mercola:**

Practically. What would that look like if they implemented Martial Law and how would that compare to what we've seen in the COVID pandemic, where we had the lockdown-

**Francis A. Boyle:**

Soldiers in the street.

**Dr. Joseph Mercola:**

Soldiers in the street.

**Francis A. Boyle:**

I was in Chicago in 1968 for the Democratic National Committee.

**Dr. Joseph Mercola:**

Sure. That was the classic. Sure. Democratic National Party.

**Francis A. Boyle:**

They basically had de facto martial law covering downtown Chicago.

**Dr. Joseph Mercola:**

You can declare martial law locally. Is that correct?

**Francis A. Boyle:**

Well, they call out the National Guard for sure. I cannot recall if there was a formal proclamation. There was in Los Angeles after the Rodney King uprising. There was a formal invocation of the Insurrection Act and President Bush, Sr., sent in the U.S. Seventh Army that had just invaded Panama, even though the Mayor of Los Angeles said, "We didn't need these people." You had armed combat troops policing the streets. Yes. That's what martial law would be.

**Dr. Joseph Mercola:**

The primary thing is you've got the military involved?

**Francis A. Boyle:**

Right.

**Dr. Joseph Mercola:**

It was just interesting.

**Francis A. Boyle:**

The military are in control. Yes.

**Dr. Joseph Mercola:**

The military are still U.S. citizens. It's just hard to envision that they would be completely compliant with the global tyrannical implementation. They might be, but to me, it could almost devolve into a civil war of some sort.

**Francis A. Boyle:**

It could remember how close we came under the Trump administration where Trump wanted to invoke the Insurrection Act and apparently the Secretary Defense Esper said, "No." He wasn't going to go along with it. We came very close, sure. We could come close again under the Bidenites. I don't put it past them.

**Dr. Joseph Mercola:**

Yes, indeed. Well, I can speak for my audience and I suspect it's valid that we're all grateful for your lifelong efforts to educate the public and warn them of these threats to our personal freedoms and liberties. Actually, our existential existence might be just wiped out with some of these strategies that they have contemplated. I think the big issue on the plate is to corral our U.S. senators to rally and prevent the World Health Organization from implementing their strategies for global tyranny by having total control of any public health threat.

**Francis A. Boyle:**

Right. I think that's in addition to dealing with COVID-19. Right now, we have to stop this WHO treaty. It will be-

**Dr. Joseph Mercola:**

Devastating.

**Francis A. Boyle:**

Authoritarian control of the world, but especially here in the United States this is designed to do an inrun around the Tenth Amendment of the United States Constitution and the state and local control of our public health. Yes.

**Dr. Joseph Mercola:**

Is there anything else you'd like to add before you leave?

**Francis A. Boyle:**

No, just that if you are interested in my book-

**Dr. Joseph Mercola:**

Oh yeah, of course.

**Francis A. Boyle:**

“Resisting Medical Tyranny.” I have several legal strategies in there that common, ordinary people can conduct, including trying to get state and local prosecutors to indict Fauci and the rest of them for murder and conspiracy to commit murder. Also for the chief executive officers, scientific officers of the drug companies manufacturing these Frankenshots to get them indicted for murder and conspiracy to commit murder and try to stop what they are doing. Yes. We had a previous interview on that, I believe, doctor.

**Dr. Joseph Mercola:**

Yeah, we did. Yeah. I want you to know that I've been corralling or acting pretty aggressively in implementing that recommendation and have recently sought to connect the U.S. Right to Know, which is an amazing group that have compiled through FOIA (Freedom of Information Act) requests, really irrefutable evidence of the conspiracy to this lab leak theory and in the process now of connecting the U.S. Right to Know to the Florida State Attorney General and hoping that we can get them to file a suit against Fauci and the other criminals.

**Francis A. Boyle:**

Well, we want them to indict Fauci, not just file a lawsuit civilly. We want them to indict. Indeed. I had a 45-minute meeting by Zoom with the Attorney General of Louisiana, and I went through the Louisiana homicide statute with respect to Fauci and [Francis] Collins and those people, and also with the pharma people. He agreed with my theory of the case under the Louisiana homicide statute. There it sits. We'll have to see what he does with it.

Then I had a 35-minute meeting with the Deputy Attorney General of South Carolina. I went through the South Carolina homicide statute with him, and he did agree with my theory of the case. Basically it's a political issue. People need to demand that these two categories of people who develop COVID-19, Fauci and Collins, and then the executives of the drug companies making the Frankenshots be indicted for murder and conspiracy to commit murder. Those are explained in great detail in my book, “Resisting Medical Tyranny.”

**Dr. Joseph Mercola:**

Okay, great. Well, thanks so much. Really appreciate all your efforts, and hopefully we can have some positive action as a result of your insights and helping us protect against this global medical tyranny.

**Francis A. Boyle:**

Well, I appreciate the support you have given me in the past. Thank you.

**Dr. Joseph Mercola:**

You're welcome.
