

**caws**

Did the study reveal which bandage brands did not have PFAS? Also are there blood tests available to detect a person's contamination level? If contact lenses contain this toxin ; what about cataract surgery lenses?

Patch Natural Bamboo Bandages are safe. They don't stay on as long & are not as waterproof, but they're safe anyway. Vitacost has them.

## Smudge2

Mamavation tests all kinds of products, but you have to scroll way down in her articles to see the outcomes of the products they test. Do a search, mamavation and band aids. Here's a list of the Best Bandages, stay away from the rest or look at the complete list of bad, better, and these are the best: 3M Micropore Surgical/Medical Tape – non-detect organic fluorine All Terrain Neon Kids Bandages – non-detect organic fluorine in the absorbent pad and sticky flaps of bandage. Band-Aid Hello Kitty Assorted Adhesive Bandages – non-detect organic fluorine in the absorbent pad and sticky flaps of bandage. CVS Sterile Manuka Honey Sports Bandages – non-detect organic fluorine in the absorbent pad and sticky flaps of bandage.

FEBU Organic Bamboo Strip Bandages – non-detect organic fluorine on both absorbent pad and sticky flaps of bandages. Patch Bamboo Bandages for Kids with Coconut Oil – non-detect organic fluorine on both absorbent pad and sticky flaps of bandages. (Use discount code “mamavation” for 10% off products!) \*TRU COLOUR Skin Tone Bandages Diversity in Healing (olive) – non-detect organic fluorine in the absorbent pad, non-detect organic fluorine in sticky flaps of bandage. \*TRU COLOUR Skin Tone Bandages Diversity in Healing (dark brown) – non-detect organic fluorine in the absorbent pad, non-detect organic fluorine in sticky flaps of bandage.

\*TRU COLOUR Skin Tone Bandages Diversity in Healing (brown black) – non-detect organic fluorine in the absorbent pad, non-detect organic fluorine in sticky flaps of bandage. \*Trutone Skin Tone Adhesive Bandages Dark Brown – non-detect organic fluorine in the absorbent pad, non-detect organic fluorine in sticky flaps of bandage. \*Trutone Skin Tone Adhesive Bandages Brown – non-detect organic fluorine in the absorbent pad, non-detect organic fluorine in sticky flaps of bandage. \*Trutone Skin Tone Adhesive Bandages Olive – non-detect organic fluorine in the absorbent pad, non-detect organic fluorin

Seriously? Why would there be non-stick product on the sticky part of the Band-Aid? Is it just part of the plastic? Also, just one more product killing fertility, healthy reproductive maturing and development. Insult to injury how some states are using the excuse the offenses of the huge CAFO's, Industrial Factory Farm Practices are polluting not only the rainwater but infiltrating the ground water and using that as an excuse to shutdown Healthier Proper Farms and even backyard Gardens. Lennon, (John, not the other one,) had it right - 'The World is Run By a Bunch of Maniacs.'

Yes Just, instead of purifying the blood with clean spring water as our ancestors drank, we are drinking real poison, due to industrial pollution, industrial agriculture and the pharmaceutical industry. The excessive consumption of clothing, as reported by Dr. Mercola, is a great source of pollution. Industrial agriculture Phosphate compounds found in wastewater or discharged directly into surface waters come from fertilizers removed from the soil by water or wind, human and animal excretions, and detergents and cleaning products. Increased algae growth, which in the worst case can lead to eutrophication of surface waters, is a consequence of high phosphate concentrations.

When these algae die, the decomposition processes result in toxins that demand oxygen from the surrounding environment and harm the aquatic ecosystem. A report by Dr. Mercola "Water Treatment Contaminants: Toxic Waste in Drinking Water" was sparked by concerns about water contamination in the wake of Superstorm Sandy, which spilled tens of millions of gallons of sewage into roads rivers along the east coast. [www.lewrockwell.com/2013/08/joseph-mercola/is-your-tap-water-killing-y..](http://www.lewrockwell.com/2013/08/joseph-mercola/is-your-tap-water-killing-y..)

Correct Gui and there are more than one Dead Zone than the Gulf of Mexico. Yet the Globalist insist on pushing all on their Climate Change and this has taken the eyes off the Toxic Run Offs. Follow their solutions and it's actually the same old, same old and real solutions are attacked. Real solutions We, the People have at hand if enough can realize it is all right under our feet and in our hands. Globalist can retreat back into their mountain hideaways and islands. We can create, regenerate Living Space and Heal the many kinds of deserts created by Globalist abuses.
