

Guillermou

Gates is a completely evil person who has dedicated a substantial portion of his life to making other people's lives hell. He tells his fraudulent partners during the pandemic that they are going to do this whole charade again. Mass murderers feel obligated to warn their victims about their intentions like "Event 201" and the long list of military, academics, NGOs and philanthropists who contribute to the numerous pandemic simulations in the US. Will never go back to the old normal The WHO has warned that H5N1, a particular strain of the bird flu virus, remains a major pandemic threat. Former CDC Director Robert Redfield said I think the great pandemic will be a bird flu pandemic for man.

It will have a significant mortality in the range of 10 to 50%. I consider Covid a minor pandemic, the great pandemic is already coming. winepressnews.com/2023/05/19/former-cdc-director-robert-redfield-says-pandemic/ (2023).-- But what is behind these statements? Two main objectives of this new pandemic: vaccines and stopping eating meat. Sen. Joni Ernst (R-Iowa) sent a letter to USDA Secretary Tom Vilsack last week demanding information about his spending on "dangerous bird flu experiments," which she says involve a "dangerous flu virus." highly pathogenic avian influenza.

One of the researchers who is part of the project through the Chinese Academy of Sciences is Wenjun Liu, who, according to Ernst, is affiliated with a pathogen laboratory at the Wuhan Institute of Virology, where the pandemic is believed to have originated. of COVID-19. These experiments were a violation of federal policies related to gain-of-function research. [100percentfedup.com/usda-spends-1-million-taxpayer-dollars-on-dangerous.](https://100percentfedup.com/usda-spends-1-million-taxpayer-dollars-on-dangerous/) (2024).--

This “next pandemic” will be used to get the masses to stop eating meat, initiating mass slaughter on farms across Western nations; clamp down on small independent farmers who do not pasteurize milk, for example; remove meat and dairy products from store shelves; and all kinds of taxes and stipulations in its acquisition. South Africa has had to cull around 7.5 million chickens to contain dozens of outbreaks caused by two different strains of avian influenza Dr. Lee Merritt explains to Brannon Howse that the H5N1 bird flu outbreak is actually an attack on the food supply.

Spot on Gui! Seems a very safe bet there will be attempts at another Planned Panic. A different article in Legacy Media no less expressed the thought the lethal Japanese bug was very likely sourced by the disastrous C-19 isolation dictates, as this removed people from their day-to-day exposure to the vast amounts, types of microbes. Just as a body builder stresses the body to increase muscle mass, what was once just normal life activities, social activities exposing us to a full menu of microbe life forms most likely enhances, strengthens the Immune system. The first defense, the Innate, is kept up to date with exposures to keep its memory fresh and alert to any necessary changes.

If changes are needed is then when the Adaptive Side of the Immune System kicks in. Long known and once even expressed in Legacy Media, official health authorities, those who constantly use anti-bacterial soaps, sprays and whatnot are actually more susceptible to becoming sick. Also, as the article points out Joel Salatin's observations as how to maintain a healthy farm with proper management in smaller, diffused operations with a close eye on the healthiest animals, plants for that matter have been tested by millennia of experience, Bill Gates need not apply, he is only there to steal what the little guy knows, and squirrel it away under lock and key for himself.

Test balloons are being released in one state after another with schemes and Bull Spit narratives to shut down proper, healthy, environmentally friendly farming methods. Much better direction than to purposely produce Franken Viruses not existing in Nature with the excuse we will have a cure should they actually occur. How about do not make them in the first place? Or when it has been expressed we are unnecessary, useless do we really have to ask what is this really all about?

Posted On 04/09/2024

Thanks Gui for your leading quote from once CDC director Robert Redfield. I notice that besides warning of how bad the next pandemic will be, he emphasized several times that what we need is "investment" in health and safety measures: Even advising that our politicians need a "budgetary perspective measured in multiple aircraft carriers, not in the 5, 8,10 million dollar budget we spend on public health on this nation." He was pushing for big-time expansion for the CDC budget. Really, I think we can consider this "political speak", more than "science" talking.

But what else can we expect. Organizations feasting on disease and death and pretended "avoidance" tactics are not ever going to suggest real, economical prevention measures. To them, the only "avoidance" that is worth while is items like worthless injections that allow billing the Federal government for billions of dollars annually and thus fleecing the taxpayers for the funds, no matter that the net result is actually worse immunity in each individual who receives the highly valued shots.

Thank you Just and stoneharbor, yes, very important targets destruction of life in all possible ways. More pandemics are needed, more fear is needed for people already hypnotized by Covid-19 propaganda. What at first was just fear can become another pandemic that helps the Great Reset in its diabolical program against humanity. The evil manipulators need to manufacture a new crisis to sell the fake meat, previously slaughtering the cattle by vaccinating them to death. "What this means is that we are really playing with that complete corporate takeover of protein production, where only a licensed poultry producer, who has the latest Pfizer avian flu vaccine, in all of their birds, can produce chickens." .

Atlas said Fauci was deliberately and habitually creating fear on purpose, stating that he felt he was "immoral." Redfield corroborated with Atlas regarding Fauci's scaremongering. Bill Gates, as early as 2008, was giving grants to a Wisconsin doctor, Dr. Yoshihiro Kawaoka, to examine 'mutations in avian influenza viruses that could lead to a global pandemic.' flu outbreak. This same researcher later published a study explaining that he mixed and combined those strains with the Spanish flu, creating a very deadly disease. The following year, Gates provided exponentially more millions of dollars to this research group.

All signs point to the fact that human bird flu was created in a laboratory funded by Fauci and Bill Gates. Some of this research, in fact, has been carried out in biological laboratories in Ukraine with funding from the Pentagon. [winepressnews.com/2022/12/16/former-cdc-director-redfield-warns-the-gr.. mass-culling-scenario/](https://winepressnews.com/2022/12/16/former-cdc-director-redfield-warns-the-gr..-mass-culling-scenario/) (12/16/2022) .-----[en-volve.com/2022/05/20/gates-and-fauci-caught-funding-gain-of-functio.. to-the-next-deadly-pandemic/](https://en-volve.com/2022/05/20/gates-and-fauci-caught-funding-gain-of-functio..-to-the-next-deadly-pandemic/) (2022)

More pandemics are needed to enrich BigPharma and continue depopulation. The vaccine industry, along with the powers that be, is currently planning for the next pandemic, which some argue is already fully planned and waiting to be unleashed when the appointed time arrives. Some of the largest vaccine corporations on the planet are reportedly preparing their new human avian flu H5N1 shots in preparation for what Dr. Paul Cottrell says will be the launch of some kind of chimeric bioweapon composed of SARS, HIV and bird flu. Vaccine giants GlaxoSmithKline (GSK), Moderna and CSL Seqirus recently told Reuters they have already started or are about to start testing the new shots, which are designed to address a hypothetical "mutated" version of H5N1 that is transmitted to the humans.

Sanofi, another pharmaceutical competitor, says it already has H5N1 vaccines in stock and that they are "ready," meaning they are ready to be released at any time once the government is ready to announce the upcoming Pandemic 2.0. Moderna has indicated that its H5N1 shots will be made using the same messenger RNA (mRNA) technology found in its Covid shots, meaning even more spike proteins inside people's bodies. www.theepochtimes.com/health/vaccine-companies-say-they-stand-ready-fo.. (03/21/2023)

It is important to note that there is still no evidence to suggest that bird flu, also known as H5N1, poses a pandemic threat to humans. The government has simply decided that a "positive" PCR test from a single bird justifies the culling of all nearby birds, leading to further shortages of eggs and chicken meat. Those PCR tests are the same fraudulent ones that were administered to humans during the Wuhan coronavirus (Covid-19) "scam": tests that, according to their original creator, were never intended to detect viruses. According to the latest reports, Kristin Peck, CEO of Zoetis, a subsidiary of Pfizer, is pressuring the Biden regime to mass-inject all birds across the country with her company's experimental bird flu vaccines.

Once this is achieved, she says, chicken meat and eggs will once again be plentiful, just in time for fake President Joe Biden's "re-election" in 2024. "For President Biden," the sympathetic New York Times reported, "there are also political considerations at play. Egg prices, which skyrocketed in 2022, were 70 percent higher in January than a year earlier. Those high prices have given Republicans another chance to attack Mr. Biden over inflation just as he prepares to run for re-election in 2024. www.thegatewaypundit.com/2023/03/update-blackrock-board-member-and-for.. an-offshoot-of-pfizer/ (2023)

"The WHO has warned that H5N1, a particular strain of the bird flu virus, " They can warn as much as they want but it doesn't matter because there is no such thing as a virus that causes disease/illness. So called COVID 'pandemic' was an example of this. No one during that time ever fell ill because of a so called Covid-19 'virus'. There is no science that supports such a notion. One doesn't even have to look at the science that claims other wise. "I consider Covid a minor pandemic," There was no pandemic at all, not even 'minor'.

If one looks at deaths due to all causes for the year 2020(In Canada through Stats Can), adjusted for population size; There was only 0.003% increase from 2018 (an arbitrarily picked year, but similar results for any other choses). However, the years 2022 and 2023 had a higher percentage of deaths due to all causes than the years 2020 and 2021 - Yet there was no 'declaration' of a health emergency for 2022/23. As a side not on the 0.003% - Such a percentage is actually less of a difference then typical variations that happen year to year.

The same/similar results can be found in other countries. Some people say well that's because of the measures put in place. Yet for the months leading up to the initial measures like lockdowns - there is Zero uprising trend compared to the same periods of time in previous years. In other words there was no actual indicators that something was amiss and that people were becoming sick. That's why the narrative of Wuhan is also a myth the same as the myth of 'viruses' that cause disease/illness.

Looks like they are trying to push another pandemic on us. Yes, lets cull all the domestic animals in case they are spreading the dreaded bird flu. Then they can feed us pretend meat and other junk and insects. It never seems to stop, one pandemic after another, ratcheting up the fear porn. I see that the media piece thinks that long covid is causing all these immune issues that are popping up, like shingles, neurological problems, heart problems, strokes etc. No mention of the fact that this could all be caused by the vaccine itself. So they are going to try and attribute the excess deaths and other health issues since 2021 to covid and long covid, but apparently vaccines have no part to play in all this. Are they just ignorant or completely taken in by their own corrupt propaganda?

Posted On 04/09/2024

goldenreynolds

I wonder if this novel new bird flu will prove to be more deadly for those who have been fooled into getting the experimental shots?

Vitamin D is a great suggestion for protection from many things. Getting it from sunlight can provide a high dose rather quickly. Remember that taking vitamin D3 through your digestive system requires it to be delivered to circulation through your lymph system as it is a long chain fat that does not absorb and get delivery through the portal vein to the liver. It must be put on a chylomicron for transport through the lymph system, and after about 4 days it is delivered into the blood circulation in the subclavian vein that takes it to the liver, to finally be converted to the circulating form of the D vitamin, 25(OH)D3 or Calcifediol. Meanwhile, you could be getting 4 days of sunlight on your skin which delivers the same D3 within 1 day to the liver.

Further, fresh air that you breathe outdoors is bathed daily by the sun with UV radiation that ruptures the fragile membrane around all viruses. UV radiation from the sun kills almost every virus known, so just being outside is a key to safety from all viruses. www.bbc.com/.../explainers-55680305 A Chinese contact tracing study in 2020 revealed that in almost every case the contact made that delivered that COVID virus from one person to another was made in a household, not outside. Being indoors and worse, indoors with lots of other individuals is what compounds the viral load.

www.nature.com/.../s41467-021-21710-6 So notice the bird and mammal cases are showing bird flu to be contracted usually inside buildings. Many house cats spend most of their time indoors. Dairy cattle are indoors a lot in close proximity to other animals, and obviously chicken ranches keep the chickens out of direct sunlight almost constantly. So an important method of avoiding all viruses is to spend time outdoors, breathing fresh air. The more fresh air you breathe the less chance you have to breathe air in a congested space where there's poor air circulation and no UV destruction of viral membranes.

Important remedies for major threats. The food crisis is a great threat to the population. This new pandemic boosts food inflation. Cal-Maine Foods, Inc., the largest producer of fresh eggs in the U.S., said it had temporarily halted production at a Texas plant after bird flu was found in chickens. Avian flu was also detected at the company's poultry facility in Michigan. In a statement, Mississippi-based Cal-Maine Foods said an estimated 1.6 million laying hens and 337,000 pullets, or about 3.6 percent of its total flock, were destroyed after it was found. avian influenza (also known as bird flu) at facilities in Parmer County, Texas. Cal-Maine Foods says there is no known risk of bird flu associated with eggs. According to the company statement, Cal-Maine Foods is cooperating with federal, state and local government officials and focused industry groups to "mitigate the risk of future outbreaks and effectively manage the response." The company also said it is working to "secure production from other facilities to minimize disruptions to its customers." Additionally, Cal-Maine Foods has stated that there is no known risk of bird flu associated with eggs currently on the market.

The company also did not remove any eggs. According to the US Department of Agriculture, eggs that are properly handled and cooked are safe to eat. www.cbsnews.com/news/fresh-egg-producer-us-bird-flu-chickens-texas-mic.. (2024).--

Yes, Gui, the troops are out to seriously raise our cost of chicken meat and eggs. These foods may be slated for serious restriction to only the elite classes of consumers. But, as suggested elsewhere, the Joel Salatin "mobile cage" method for farming pasture raised chicken should totally avoid all threat of a virus invading a flock. I'd go with this the next time I keep chickens and would recommend all of us to look for a local egg producer that uses some outdoor method focused on pasture feeding:

www.youtube.com/watch

Posted On 04/09/2024

Guillermou

Also. This review brings together updated information on effective herbal plants to strengthen the future. Research on the treatment of influenza in chickens. It was observed that most plant extracts exhibit their action by interacting with the viral hemagglutinin or neuraminidase and inhibit viral entry or release from the host cell. Some plants also interacted with viral RNA replication or reducing proinflammatory cytokines. Among all the plants *Theobroma cacao*, *Capparis Sinaica* Veil, *Andrographis paniculata*, *Thallasodendron cillatum*, *Sinularia candidula*, *Larcifomes officinalis*, *Lenzites betulina*, *Datronia molis*, *Trametes gibbose* exhibited their activity at the lowest concentration (below 10 g/ ml).

The docking results showed that some natural compounds (5,7-dimethoxyflavone, Aloe Emodin, anthocyanins, quercetin, hemantamine, lyocrine and terpenoid showed satisfactory binding affinity and binding specificity with viral neuraminidase compared to synthetic drugs . Conclusion: A SYSTEMIC REVIEW ON MEDICINAL PLANTS AND THEIR BIOACTIVE CONSTITUENTS AGAINST AVIAN INFLUENZA AND FURTHER CONFIRMATION THROUGH IN-SILICO ANALYSIS [www.cell.com/.../S2405-8440\(23\)01593-1.pdf](http://www.cell.com/.../S2405-8440(23)01593-1.pdf) (2023).

MPeary1947

Here's a thought...how about replacing FEAR with FAITH?

Posted On 04/09/2024

Krofter

Good thought MPeary. And we can reinforce that faith with some critical thinking. For instance, I followed a number of the citations in this article and none showed any proof for the existence of bird flu virus, let alone any proof that it's transmissible to humans. In fact, there is no recorded case of bird flu being spread to humans. drsambailey.substack.com/p/viruses-dont-exist-and-why-it-matters?utm_s.. One of the links I followed said authorities "believe it came from birds". No proof. All this hype is based on supposition, not science. We are told to believe fear mongering authorities. Covidcon provides the perfect example. We were told it came from bats. Then we were told it came from pangolians. Now we know that it came from neither.

And just how was the testing done the purports to support the evidence that bird flu exists and is being spread? PCR? Kary Mullis PhD, who won the Nobel prize in chemistry in 1993 for inventing the PCR test, said it should never be used to test for viral infection because it was not invented for that - that it would show far too many false positives. But that's what they want. They want false positives to induce fear. That's exactly how the PCR test was used during covidcon. We don't know about testing because the article nor any of the links I looked at said anything about how he testing was done. So yes, my faith is strong because I've done the research and know were being bamboozled. God gave us brains for good reasons.

I, and literally hundreds of friends and family, used Colloidal silver @ 30ppm nebulized during COVID. My neighbors 100 year old sickly mother was symptom free in 1 day from very bad. Just a share but thoughts and constructive dialog on it would be appreciate.

Posted On 04/09/2024

Rosebud10000

Excellent advice. I am convinced they have tampered with many animal viruses over the decades. I have many questions such as what happened to the songbirds in UK? The past two years I saw hardly any birds like robins and blackbirds. I am close to them, so unlike the vast majority who are sleepwalking, I miss them dreadfully when they are not around. People I spoke to were oblivious, but one chap did say that now that I mentioned it, pigeons had fallen out of the sky in 2022. Now this could be as a result of multiple factors. As a veterinarian I notice and increasingly question things I previously just accepted. Such as from where where did FIP (feline infectious peritonitis) (a corona virus) actually appear? These people truly are playing God.

Posted On 04/09/2024

Stephen12

I'm also in the UK. I wonder if the lack of small birds is due to the fact that there's very few flying insects around for them to eat. A few years ago during the summer the front of your car would be covered in squashed insects now there's hardly any.

Posted On 04/09/2024

willos

I noticed that too. I moved back after 4 years and while it's been a cold Spring, I'm not seeing or hearing the birds I usually did here, and the trees are flourishing. I didn't stop to make any connection to this... I was blaming the new noisier elements added to the area in the back of my mind.

Posted On 04/09/2024

DebbyW

We have fewer birds in the US too. I'm always happy when I can hear them sing. I'm sure geoengineering plays a big role in killing them as well as insects, and making us sick. We all lose when the "elites" try to play God. It seems like there's not enough we can do to stop them.

Posted On 04/09/2024

NewlandsWanderer

A few years ago when the sparrow population in England nearly died out, (only six were recorded in St James Park in London) my wife and I visited two places where there was no mobile phone signal. Dartington and Hawkshead. In both places there were hundreds of happy sparrows. I wrote to the British Trust for Ornithology at the time and suggested a particular mobile signal might be making the sparrow species sterile. Apparently every organ has its own frequency and an alien signal might interfere with normal functioning. They rejected my idea, and since then sparrows have thankfully made a comeback.

But nowadays the host of signals are passing through our bodies and bird/animal bodies could have a deleterious effect on internal organs and lead to injury or sterility. And of course birds are incredibly sensitive creatures. I always wonder if they "think" in song, as we think in words. An interesting quote from P.D. Ouspensky is that "Birds don't sing to procreate. They procreate to sing. " They certainly bring something harmonic and ethereal into the world. Unlike the Gates Foundation.

I'm wondering, given the human skin penetration of 5G, whether small creatures and insects are being adversely affected as the mindless roll-out continues. We know that already, people near the masts are moving away to other areas if not building Faraday cages in their homes. It only needs one part of the food chain to be damaged to cause untold problems in nature.

Posted On 04/09/2024

bee70578

Hi Rosebud: I've been looking out for a couple of local pigeon flocks and city herring gulls on the UK SW coast after rescuing a few over the years, with the support of local veterinary centre staff. (who no longer do so due to a transmission threat to domestic pets) Aside from a weird neurological disorder in 5 gulls 3 years ago (they could not peck accurately enough to feed, and one I fed by hand survived, I couldn't help the others) I've not noticed any illness issue with my current flocks. I had about 20 fledgling gulls and a dozen mildly injured pigeons in the house/yard since 2016 and all are ok except for some attrition from careless roadkills.

I go to a nearby park mornings to give out some fish or meat, and seed as an alternative to the bread that people insist on putting down. Most birds are great characters, very smart and treat me with some care (especially parents of rescued fledglings) knowing they don't have to struggle for a bite of something. Two of the gulls recently drove off a greater black-backed gull that tried to grab a pigeon recently so they are more or less one group. I assume all of this will go out of the window when the bird flu scare kicks in. People have already physically attacked me (nothing serious) for 'feeding vermin.' I've not had much attention to spare for smaller birds but haven't seen finches or sparrows around for quite a while.

Our local city council has not helped nature by cutting down more than 100 wonderful mature trees (in the middle of the night) that formed a popular narrow parkland right across our city centre, in pursuance, I believe, of a destructive 'smart city' project that includes tiny trees, (to facilitate 5G?) dozens of surveillance cam poles, and very extreme lighting at night. God knows what funding and incentives have been applied behind the scenes but our future's bright and pretty damn unpleasant. So, another pandemic approaching...

Posted On 04/09/2024

It could be the jet streams that are spewing millions of lbs. of poisons at us and the animals that share this world with us. Also, I read that mRNA jabs will be used to keep livestock and companion animals healthy????? I think it was Robert Malone who wrote about this. They may also be using mRNA technology on chickens turkeys, etc. How can we trust our food sources? Someone has to take care of these murderers once and for all or we will be living in fear until we are all annihilated. Why is there not a worldwide organization established to STOP these murderers and charge them or better still annihilate them. Are we going to wait until all of mankind is annihilated by these lunatics. I can't believe we are just sitting back waiting for the next PLANDEMIC and not doing anything to stop these murderers. Get rid of all of them.....NOW. We can't wait any longer.

Posted On 04/10/2024

rplende

How can anyone know that there will be a Bird Flu Pandemic? How can anyone know that it will be 100 times greater than Covid 19? There is only one way, and that is by being involved in a conspiratorial act to create and release it. Nobody and I mean nobody has a crystal ball up their wazoo by which they could know these specifics. But being a 100 times worse than Covid 19 means nothing in terms of ailment, as many of us know, the whole thing was a fraud. The bullshit from the Media, Government and the Big Pharma bought and paid for CDC and the Medical Establishment will be 100 times greater.

Posted On 04/09/2024

what blows my mind is why isn't there an organization formed to stop these people? Lock up the Wuhan lab.....gain-of-function research and development is illegal. Put them all behind bars and throw out the keys. SOMething critical had to be done in these most critical times. And here the WHO wants to control all our medical decisions from now on. THEY did a piss poor job of handling COVID and they want us to trust them for the next PLANDEMIC. I say close ALL every single three letter organization out there. KILL THE WEF, WHO, CDC FDA.....all of them....and close all gain-of-function labs world wide. No more plandemics would be released then. And put all the lunitics in jail and throw away the keys. Once and for all lets get rid of them all. THEY have to be made accountable for the destruction of mankind.

JGW1950

Dr. Zelenko's protocol fixed us right up when we all had Covid: (vitamin D, vitamin C, Zinc, and quercetin). Because of how it works, it is effective on many viruses. We also followed his advice to live without fear. Fortunately, we all got it at the same time, so we took the opportunity to be together as a family. It was one of the nicest family times that I remember. I understand what Dr. Mercola says about Covid being a rehearsal and an experiment to see how obedient the population will be. Personally, I think it backfired. Whenever I bring up the subject of another lockdown, I and the person I'm speaking with shake our heads and say, "Never again." Sorry, but we're not going to stay home and live in fear...especially since the last lockdown did tremendous damage for little in return.

JGW1950 I take those four along with others as standard practice and that was long before the COVID CHARADE. The last time I was sick was in 2012, and lasted only a day or two. But, I have been poisoned numerous times by the outgassing of those I'm around who are on pharmaceuticals or recently vaccinated. That occurred several times when people were receiving these clot shots and the boosters. It has been one hell of a ride. I was one who did not remain home and if I was asked to wear a mask, I wore what is called an "unmask" or walked away. In one instance I was confronted by the medical establishment because they did not like the mask I was wearing and wanted me to wear their blue fluoride mask, I immediately told them to cancel my appointment as well as the future one and walked away. I later changed my doctor and all associated with him.

Don't kid yourselves, there is very little bird flu. Birds are dying from exposure to cell tower radiation and microwave radiation including the roll out of 5G. It happens quickly and the symptoms are similar to what we call respiratory issues. It happens to humans as well. Large dairy farms are known to experience the impact of dirty electricity in the milking barns and coming from electricity propagated through the ground. See books by Firstenberg and also Sam Milham MD.

I see a societal change. People not only extrapolate from ignorance, but also extrapolate from the extrapolations of others as amplified by mainstream media with anything sensible censored by social media. Then the people extrapolate further to be picked up again and amplified by mainstream media in a feedback loop of fear. Case in point, when I was a child, we had fun with a lampshade off casting giant shadows of monsters against the wall by using our hands. But, even children knew it was fake monsters and just for play. When I grew up, I would entertain myself by having cats chase a laser dot. But now, to my surprise, full grown adults, by hundreds of thousands, are paying double or more for hotel rooms, etcetera and airline travel to chase after a few minutes of a shadow! (Eclipse mania!)

I worked on a farm until just recently - we produced our own beef, pork, chicken and eggs. All the animals were pastured. While we were very careful during various bird flu scares (farmers that raised chickens stopped visiting each others' properties in case they might spread something), no one had chickens die of bird flu. Just lucky? These were all independent farmers with pastured flocks. One told me that the most common vectors for spreading bird flu were not wild birds, but flies, and the fleas and mites that lived on mice and rats. So all the talk about bird flu vaccines for chickens is really about enabling corporate agriculture to continue business as usual without cleaning up its act.

Somehow I missed the Great Bird Flu Hoax book. Instead started following reports of a recent highly pathogenic bird flu that traveled worldwide known as H7N9, and recently ended in 2022 in the US: "The bird flu outbreak is the deadliest in U.S. history. Here's what we know : NPR" - -

www.npr.org/2022/12/02/1140076426/what-we-know-about-the-deadliest-u-s.. - - This seems to have missed recognition of most people, as it coincided with the covid era. However, emergency response ran an exercise for 8-months in 2019, called Crimson Contagion. VP at the time Mike Pence called this an exercise run in real time.

What some may remember during the 2019-2022 timeframe is a lot of US chicken houses along the east coast and mid-west, burned down, the price of eggs skyrocketed, and chicken became scarce for a time. From 2020 and 2023 reports, the Chinese first detected this virus in 2013, and experienced (9) nine!! waves across various parts of the country, until finally ending in 2021. Nearly everything they tried, including vaxxing their chickens, failed to halt the spread. And in 2019, they also experienced a deadly swine flu.

One quick history was written by Alexis Baden-Meyer from Organic Consumers Assocn in September, 2023, outlining the timeline of Dr Kawaoka's work at the Univ of Wisconsin, "tinkering" with different virus since 1990, with funding support from Dr Fauci and The Gates Foundation: "Yoshihiro Kawaoka: Weaponizing Bird Flu Since 1990, Funded By Fauci & Gates" - - organicconsumers.org/yoshihiro-kawaoka-weaponizing-bird-flu-since-1990.. - - One project Dr Kawaoka worked on was so dangerous, it prompted 300 scientists to write to President Obama. This led to "the pause" in GoF research. With so many projects to choose from, it seems Dr Fauci only "paused" a number of projects not already funded and underway. And yes, The Gates Foundation has been backing this animal to human pathogen work from the beginning. H5N1 may be a false alarm for humans.

As we all know for those fully awake, we can't believe anything coming out. I feel saddened watching this unfold for my children and grandchildren. The peroxide solution has helped a few times when our Doc recommended it a few years back. Another tool in the toolbox. For those more technical I wanted to put this out there. I'm about to convert my pool disinfectant from chlorine to 35% food grade. I have had a few extra gallons in storage so I reached out to the manufacturer about losing strength over time. Reply was 35% will lose approximately 6% strength per year. Just saying.

Posted On 04/09/2024

stoneharbor

Good to hear. I don't have a pool, but I certainly would rather swim in properly diluted peroxide than chlorine. It seems the much slower degradation or evaporation of peroxide could be a nice savings in maintenance effort and product costs. Does improper mixture of the peroxide cause similar irritation symptoms to those caused by excess chlorine? It seems care is still needed to keep the dilution proper: www.housedigest.com/1446230/using-hydrogen-peroxide-to-clean-pool/

Posted On 04/09/2024

kno1762

You can use colloidal silver as well in a pool

Posted On 04/09/2024

meehan2661

Thanks Stone harbor--since my wife skin cancer we are really trying to be proactive on anything that maybe toxic. There are a ton of uses for it. I am going to use it without the UV light--depending on the SWFL sun to replace it. I have a structural unit on my pool jet which should help. I see the damage chlorine can do first hand--commercial pool operator for many years as part of my duties. Lots of info on hydrogen peroxide here. <https://www.dfwx.com/pool.htm>

gardenmad

I think that is their agenda isn't it. Apparently farming animals and food is bad for the planet. Seems they think all carbon is bad. I wonder if that includes themselves? I say this planet, or should I say the people on it are proving to be completely insane. Welcome to clown world.

Posted On 04/09/2024

zrog2000

Why jump right to this point instead of questioning all of it? These chickens are barely living on top of each other in 100,000 chickens' worth of urine and feces. You think it has to be a virus killing them? Or could it be the living conditions? Where is the science proving any of this? How much is big pharma going to make off the coming vaccines? Of course it's in their financial interests to state there is a new variant. So why believe the liars? Why ever believe the liars about anything? Why ever believe the liars about anything when they stand to make many billion dollars based on the lie?

Posted On 04/09/2024

sue2613

It's scary to think that 1.6 million egg laying hens were killed. It's sad that they had to be killed, but it's even scarier to think they were only 3.6% of the total flock of this specific company. I can't imagine where they would keep their flocks and the conditions in which they are raised. It seems that governments all over the world are now thinking about weaponizing flu. However, it will not stay in one area as we saw with covid. It's even more ironic to think that some of the 3rd world countries will survive, more so than industrialized countries, since they can't afford vaccines.

"While we don't know for sure, as no studies have been done, it is highly likely that many of the same protocols used in early outpatient treatment of COVID will also work for bird flu, since they are both viral respiratory pathogens." Yet there is no scientific studies that has ever actually demonstrated such a thing as a 'virus' that causes disease/illness etc. It's simply a myth.

Posted On 04/09/2024

HilltopJPJ

If the plan is indeed to spring avian flu upon us as the next "panicdemic", it is obvious that they're stepping up the fear, panic, obey paradigm. This time they will also be attacking the food supply (which they've already been experimenting with, ie; mysterious fires) which will ramp up the panic and control mechanism. A few years back (before covid) the main university in our state (which is also completely intertwined with almost the entire hospital system here) was sending me surveys via email. How I got on their list I don't know, but the survey was to purportedly "learn" more about backyard chicken flocks.

The red flags (for me) were immediately raised and I deleted every email inquiry I received (and there were several). I'm sure that they actually wanted to build a database of every little homestead chicken flock in the event they needed to be "culled". If they launch a bird flu "plandemic" the MSM will have everyone trained to rat on their neighbors who keep chickens or perhaps other farm animals, thus effectively shutting down the ability of the more prepared among the populace to withstand the attack of the cabal upon the serfs. Kind of a disturbing prospect to say the least.

Two highly successful therapies for combating ANY viral infection are H2O2 as Dr. Mercola describes and CDS chlorine dioxide solution. They both destroy pathogens thru OXIDATION. So simple, so effective and so cheap. NASA has labeled CDS the Universal Antidote for a reason.

Posted On 04/09/2024

helpothers

This is great news. I've been reading all the fearmongering and my question never answered was - how do you prevent it in the first place? Much like covid - no way to treat! destroy your flock etc. So how to keep your flock healthy. No one is talking about that. Anyone that tries to get me to do something out of fear is ignored. I'd read about using H2O2 for keeping chickens healthy so glad this article came along. Not super religious but put this on my car during covid: 2Timothy 1:7 For God hath not given us the spirit of fear; but of power, and of love, and of a sound mind. I figure anyone trying to manipulate us with fear is working for "you know who".

Posted On 04/12/2024

pattope

It seems to me that the bird flu will just be an excuse to label people who have been jabbed, which now have resultant lowered immune systems, as having an illness secondary to bird flu, rather than the result of an inoperative or lowered immune system. In other words, people that have already been jabbed will have lowered immune systems and will be dying of many different opportunistic pathogens. Bird flu will be a good excuse to jab more ignorant people, causing even more deaths.

Thank You Dr. Mercola for reposting and updating your recipe for nebulizing H2O2! Remember, the great state of TN made Ivermectin available OTC! You just have to ask for it at the pharmacist counter: www.thedesertreview.com/news/ivermectin-available-over-the-counter-in-.. "NASHVILLE, TN Governor Bill Lee has signed SB 2188 that allows Ivermectin, an award-winning antiviral drug, to be available for the treatment of COVID-19 without a prescription in Tennessee. The state's Senate overwhelmingly voted 66-20, and the House voted 22-6 in favor of the bill." However, since then I have found it on Amazon and I purchased it through disbelief: www.amazon.com/Energysk-Intestinal-Bots-12mg-Supports-Response/dp/BOCX.. My guess is that some Pharmacist in TN is selling this on Amazon.

Posted On 04/09/2024

billstri

This Ivermectin is horribly expensive and horribly overpriced. It is very cheap to make and everyone should stock it in their medicine cabinet like they do aspirin and everyone should know how and when to use it like they do for aspirin. I have heard it is readily available in poor countries that can't afford US made vaccines. I believe in the US, vaccines and prescription drugs are the only official ways to boost a person's immune system. Anything else is ignored, except to wash your hands constantly with harsh soaps and constantly treat the skin with anti-biotic chemicals.

Posted On 04/09/2024

VickyD.

Please, Dr. Mercola: include in your valuable H2O2 recommendations the proven fact that people with Down Syndrome should NOT inhale it. It will harm them.

Posted On 04/15/2024

zumbacjg

I guess I get the thrill being a virologist and experimenting to see if you can outdo your competition by creating the most deadly (to humans) pathogen. It's like little boys playing war to see who can destroy the most toy soldiers. Except these little boys (and girls with Dr. Shi Zhengli) are paid big bucks for their GOF research. Let's see who's playing in the GOF sandbox: Dr. Ralph Baric, Dr. Shi, Anthony Fauci, Peter Drusak, Dr. Kawaoka and Dr. Fouchier. Others? My recommendation is to build a giant geodome & sponsor a prize to whoever engineers the deadliest pathogen inside the well-equipped geodome.

Then lock the doors & never open them. Since these scientists are smart, they can figure out how to grow food. Or not. I have had the flu two times in my life & both were miserable experiences: fever, chills, sweats, sore throat, exhaustion, having to change the bed sheets because they were wet from sweating. I lived, but it was miserable and way worse than a cold or my experience with COVID-19. That Dr. Kawaoka is experimenting with the Spanish flu is horrifying.

For those looking for the saline content for the H2O2 solution, here is what I copied from Dr. Mercola a long time ago: If you don't have access to saline, you could make your own by mixing one teaspoon of unprocessed salt (such as Himalayan salt, Celtic salt or Redmond's real salt) into a pint of water. This will give you a 0.9% saline solution, which is about the concentration found in body fluids. Using that saline, you will then dilute the hydrogen peroxide as described in this chart.

The same manipulators of the cvscam are running this one. They already began setting the stage over a year ago, with small alleged outbreaks of bird flu in various places. Then claims it spread to mammals. I warned that it is likely the next scandemic.

Posted On 04/09/2024

Ellesse

Hi all, this is unrelated to the present article, but I wanted to share it. I found out that when I take niacinamide (50 mgs each time, up to 3 or 4x per day) I am able to absorb more magnesium, therefore, preventing loose stools. When I get stomach aches like in diarrhea, I run to take the niacinamide and it goes away pretty soon. This way I am able to take more than 1200 mgs of magnesium daily (I would say even 2000 mgs). Another thing I take with it is D3 with K2, plus full fat sour cream, which by the way is helping me lose midsection fat fast. The reason I need much magnesium is that I was given ciproflaxin, which depletes magnesium big time, precipitates diabetes type 2, and creates massive mitochondrial dysfunction. I hope this helps. Take care.

CandaceRemington

I want to thank you for all the things that you have shown throughout the years that are legitimate treatments or prevention or just good health things/natural medicines/food itself You have always given good advice and it works. What's being talked about now is pretty scary. I hope and pray that we can just make them stop through writing articles sending letters to the editor asking the newspapers to investigate asking TV news to investigate and let it be people that are not really known well like myself I'm known somewhat well, but not like you are. I think a lot of us should pray for you that you will not get no harm from the evil people trying to do these things and that you will also be in good health and prosper and that your wife will also be in good health and prosper.

I love her dearly and I'm sure she's a strong person. I think all of us that have read your important comments and books regularly over the decades way back when you're up here up in a state just an few away from New York State and Canada. We need to take this country back, but we don't know how except for praying and telling other people the truth, which most people don't listen to the truth. They listen to what makes them feel better or terrifies them ..

They need to listen that's how we can help. By being kind by giving the truth. I think you're probably the man God would love to use as the best doctor in the United States because you always always come up with the correct solution and you warn us ahead of time and encourage us to also reach out to others. Let them see what you've written and explain to them why they should listen. God bless you and I hope your life in good health and that you're both enjoying your time together in a nice warm state. God bless you both! Candace

It's way past time that the pseudoscience of virology be disregarded, since its (virus) existence is unproven. That, and the PCR test should never have been considered a scientifically valid test for anything, since it is non-specific and with 90+% false positive results . Terrain Theory not only better explains disease, it frees humanity from the fear-driven push for harmful vaccines and lockdowns. Please, for the sake of humanity, it's time to wake up!

Posted On 04/09/2024

wareagle82

Great; more fear porn on the way, with the expectation of millions having been forgotten how they were lied to during Covid and the public health ministry having done nothing to salvage its self-mutilated reputation. In the end, we all suffer. No one will be able to take whatever the narrative is at face value, partly because they'll see it as a narrative instead of facts as they are known. This will be exacerbated by the demonstrated capacity of those disseminating the information to refuse to acknowledge or adjust to changes in what is known. No doubt, a vaccine will be trotted out and its use will be demanded. Good luck with that part.

I would also add Manuka Honey to the nebulizer. I had a stubborn lung infection that antibiotics wouldn't heal. Between the peroxide, iodine and honey I am finally kicking this cough.

Posted On 04/09/2024

HeySeuss

My observation is that authorities only lab test for a disease when it first appears. After that, once they've decided that the disease is in the community, testing is fairly rare. Doctors diagnose only off symptoms. But flu symptoms are pretty much the same, no matter the strain. No one is diagnosing with any degree of certainty absent a lab test. It gets better. As we learned during covid, there aren't enough labs in the US to test every patient. Somehow, in all of that, actual flu disappeared during the covid pandemic. Hmm... No matter. Just take the vaccine du jour and shut up.

Posted On 04/09/2024

zrog2000

And they have never even verified scientifically that the tests work at all. They're testing for computer generated DNA fragments that have not been proven to be in any virus that has never been isolated or proven to cause disease. But for some reason, tons of people believe everything the government and Scientists say until a certain point about viruses, tests and variants and then they believe nothing.

Posted On 04/09/2024

jdrose199

They will play and manipulate bird flu until it becomes a deadly plague just like they did with Covid I agree with Guillermou this is Gates at his finest again. You will eat bugs and be happy. People like Gates are evil and have the devil living inside them. The question is how to stop them.

Posted On 04/09/2024
