Cancers and heart attacks are destroying health and killing young people who have minimal risk of disorders from Covid. REPORTS FROM THE FRONT LINES OF THE VACCINE CATASTROPHE. By PIERRE KORY, MD, MPA Troubling reports describing the plight of patients, doctors and hospitals over the last 9 months. Docs and nurses are "waking up." Oncologists are seeing tons of "turbo" cancers. It's real. "As a heme/onc doc, it's been alarming to see so many COVID vaccinated young patients with very aggressive, widely metastatic cancers. These cancers metastasize to unusual places and are refractory to therapy that usually works, and the outcome is often heartbreaking. I've also seen an uptick in patients newly diagnosed with several different types of cancers simultaneously, which was previously a pretty rare phenomenon.

Not to mention the unusual clots, myeloproliferative neoplasms, HLH, and other strange hematologic complications post vaccine. Occasionally I'll get a referral for a post COVID vaccine patient with typical long haul symptoms who happens to have an abnormal CBC, and it's heartbreaking to hear how they have been suffering without any clear diagnosis or solution for months/years. So glad that your clinic can help these folks, and I will send them your way." pierrekorymedicalmusings.com/p/reports-from-the-front-lines-of-the-ef4.. (2023).----

Following the rollout of COVID-19 mRNA vaccines, many young men developed heart disease, particularly myocarditis, inflammation of the heart muscle. "It's a large study and it showed that about half of the young men who got myocarditis had permanent heart damage. That means... we don't know what percentage will be disabled by this as they age, develop heart failure or need transplants." heart problems," he said. www.ahajournals.org/.../CIRCULATIONAHA.123.064772 (2023).--

My God Gui! WTF! Just seen a clip featuring Collins no less where he was expressing oh gee, we didn't know, we don't do those kinds of Risk vs. Rewards analysis, we focus on if this med helps individual with this one thing, then we use it. (Not a direct quote, but close.) Once upon a time, any med, new med's were viewed as potentially having harmful side effects. If testing to seem somewhat safe, released where the doctors viewed on the ground, in the trench's real world in time effects. When information gathered it would be determined based on the Risk vs.

Reward Ratio if the product may be removed from the market or restricted in certain patients. The whole bogus quarantine the world as opposed to the long known, time-tested working model, keep those most venerable quarantined and let the world go about it's business. If Top Dogs' like Fauci or Collins and too many others have no clue about what Risk vs. Rewards are, what are they doing in such top positions? After seeing close to four years of what the Risk vs. Rewards have been and who was expecting to be rewarded, no need to answer that question.

Now we are being pumped up with another plague is on the march. When most likely the last actual real plague was the Black Plague, hundreds of years ago, and the Spanish Flu death toll may well have more likely attributed to the newly discovered and overdosed aspirin - pretty suspicious to be running treadmill plagues back-to-back. Outrageous to have those who should have the most life to live to be saddled with Dis-ease at best. Death as Mercy. Lots of Rewards though for those who don't want Unnecessary People hanging around the golf courses.

You just passionately express great truths, yes, genetic weapons that kill and sicken people for life, that have caused a great economic crisis that will last a long time. The "official" clinical trials for COVID shots before they were released to the public in the United States and elsewhere did not tell the truth, they were illicit. These trials were mired in serious problems, one of which was the fact that That the researchers allowed members of the control group to receive the experimental injection of mRNA well before the study periods ended. This premature and astonishingly unscientific decision essentially made the studies illegitimate.

Then propaganda was launched, that is, an aggressive agenda to vaccinate as much of the world's population as possible was little more than a continuation of Big Pharma's pharmacological experiments with the approval of the CEC and FDA. These progressively ineffective poisons were sold to the public as a moral obligation, or imposed on the public under the threat of financial hardship, job loss, and social ostracism. But the truth, critics have argued, is that millions upon millions of members of the global public were deceived

And waters are breaching dams in the U.K. and Pfizer is deeply sorry. Now the Eyes of the World are turning onto the States. www.youtube.com/watch

I bet the vax pushers are the same people behind the Georgia Guidestones.

JGW1950

Dr. Mayer Eisenstein, a family doctor who required the mothers of his infant patients to breastfeed but did not require vaccines, said that of his 35,000 unvaccinated patients, not a single one developed autism.

This a long one but well worth listening to in its entirety: youtu.be/nNNFj-demy4 And finally some official figures from the Office of National Statistics:

Almond

I suspect that the vaxed group had many other advantages that accompany access to medical care. In theory, they should have done better than the unvaxed group.

There are teens that got 4 covid shots? That's shocking, as I thought it was only people like the elderly or immune compromised that went along with the narrative of, get lots of boosters. Who are these teens getting all these shots? How many shots were required by universities and sporting bodies?

..... I was waiting in the back waiting room of my local medical center in Australia, where nurses came out to call patients in. A young mother had 2 very small children and said to the nurse, I'm here for their flu shots, they're update with all their other shots. I found that disturbing and thought, there's 2 more kids probably on their way to ADHD or autism.

50 years ago only the over 65s were advised to get flu shots. Why would little kids need flu shots? Just as crazy as giving them covid shots. I did a bit of research and govt's here list all the shots that are free for children, and the ages to get them, but nothing is said that they're compulsory, so looks like there's no enforced vax schedule here.

"Of course" they needed a fourth; the first three didn't help! :)
