Unfortunately we do not live in an ideal world. The mother like many other people probably thought the drug company was beneficial, and that their intent was benign. Many people are not well informed. I had the impression that all three children signed up for the money \$114. Am sure the mother bitterly regrets her ignorance, and will live forever with her decision. Poor lady, poor child.

True Lyra. The family must be suffering awful regret and I am sorry for that. We all do dumb things but I just wonder whether there was a bit of virtue signalling on the part of the mother. An experiment is an experiment.

There have been many initiatives based on deception and misinformation. Also included rewards. A New Jersey initiative that rewards public school students with gift cards and cash prizes for creating posters and videos promoting vaccines has drawn criticism from critics. They say it's just a thinly veiled attempt to convince young students to create "promotional material on behalf of pharmaceutical interests." Brian Hooker, senior director of science and research at CHD, said teachers are incentivized to lie while students "are incentivized to create a misinformation campaign," with the ultimate goal of marketing the campaign to a demographic. younger and innocent.

How many parents agreed to vaccinate their babies and young children? How many adults lined up to get their shots and then their booster again and again? In the beginning of the plandemic millions of people fell for the fear propaganda, including countless parents. This mother might have given in to peer pressure but she's been fighting for her daughter ever since and has gone very public, despite all the criticism that has been directed at her. She deserves our support not criticism, they've already gotten that from the medical industrial complex. In my book she's very courageous. I don't know if I could do what she's been doing and been through and continue to fight an overwhelming opposition.

Nothing like trading your child's health for \$119. My bosses son is 27 and has CP and uses a walker. Fine until the jibby! Ex wife decided to get his son the Pfizer for his protection even though my boss said no. Now has a non functioning bladder as well as transverse myelitis! He has a permanent bag strapped to his leg now and can't feel his legs! Keeps getting UTI's so they are getting tests done tomorrow. May just be removing the bladder permanently! All this fun while still using a walker!

A person who has been led to believe that the government can be trusted. Which is the majority of people four years ago. In my case I signed our son up for an asthma drug trial going on 30 years ago upon the offer from his doctor, hoping he would be helped, and never assumed it would hurt him. It didn't hurt him or help him. Children get so many vaccines that the Covid one just seemed like one more. I've seen the Senator Johnson meeting with this family and her mom seemed caring and wise. As she said, she believed the worse thing that could happen was anaphylactic shock. That can happen anytime a child tries a new food. The vaccine injured have been duped and abused and it's the evil overlords who did it. Luckily for me, I learned not to trust my government or the pharmaceutical industry 25 years ago due to a journey that only happened to me. I am grateful I didn't have to learn it watching my child suffer. I have only compassion for this woman.

I guess it would be the kind of person who heard how fast this "virus" can spread and how DEADLY it was! My husband and I were scared of it too, and I let him talk me into getting the first Pfizer shot. 2 years later, I have gone through everything from loss of my hair, to a very bad case of psoriasis and eczema for 2 years now!!!! I am 78 years old, (75 when I got that 1st shot). 12 years ago, I cured myself of "Autoimmune" disease, using diet and exercise. I was extremely healthy for a 75 year old, but that shot almost killed me! They can take their shot and stuff it!

@Darwina, THANK YOU for posting this. Your post cuts to the dirty little secret behind much mental illness. My personal experience has led me to conclude that more than a few primary caregivers actually HATE and RESENT one or more of their children. Such caregivers, "doth protest too much, methinks", often going out of their way to demonstrate how much they pretend to care about the hated/resented child or children.

@Sminkly, in response to your comment that, "Some people do anything for money it is unbelievable, a mother would do that for a lousy bit of money ". ----- I have a friend who told me that, when their mother was a child, their grandmother would "give my mother to a man for a week. After that, she (the grandmother) would get a good deal on a house.". ----- It's been said, "We live in unprecedented times." No. The evil being exposed has always been there. What *might* be unprecedented, however, is the fact that so many trusted institutions are finally being exposed. Until we realize that EVERYTHING* might be a lie, including "motherly love", until we learn to think critically about everything on a case by case basis, we will not have learned anything. ----- The ONLY thing we can trust is pure mathematics, because the bulk of it is focused on proving/disproving itself.

Since this was before the covid vax catastrophe, which was the most dangerous and deadly vaccine in all of history, very few people knew that they were both unsafe and ineffective, especially since pharma had control/ownership of the media monopoly for decades leading up to it. The medical, media, government, and academic institutions combined probably wield the most powerful global propaganda machine of all time. Similarly, very few have awareness of the fraudulent Western medical system and holistic health - that sadly goes for reporters too. It's specialized knowledge that's difficult to learn and is deliberately concealed from the public, which in most cases takes a very proactive approach, and a non-conformist, skeptical mentality.

rrealrose, like the link subtly points out, where is the ticker tape Death Rate for not only children, but previously healthy young people in particular? We got a ticker tape, scoreboard showing cases. Cases 'found' by a test it wasn't meant for, picking up pieces of possible junk, yet the spectacle for much of the general public confused the cases were deaths. When very likely they weren't even actual full-blown cases of snotty noses, let alone a death. Now, real deaths, real severe damage to people's health with the Jabs the most common denominator being ignored.

Yes, JUST AND ROSE, depopulation. Recent reports from the Governments of the USA, Canada, Australia, New Zealand, the UK, and various European countries have brought forth troubling revelations, among which is confirmation of a staggering number of excess deaths, reaching over two million since the mass roll- out of Covid-19 injections. A troubling 120,000 excess deaths have also been recorded among the USA's infants, children and young adults as of week 40 of 2022, and a curious rise in excess deaths among children across Europe has been recorded ever since the European Medicines Agency (EMA) extended the Emergency Use Authorization (EUA) of the Pfizer Covid-19 injection to children in the middle of 2021.

With further Government figures confirming mortality rates are highest among the vaccinated in every single age group per 100,000 population, serious questions are now being raised about the accuracy and potential truth behind Deagel's apocalyptic depopulation predictions. expose-news.com/2023/11/19/pfizer-reports-covid-vaccinated-death-rates.. Yes dear, crimes against children, adolescents and pregnant women is another of the maneuvers of the Pharmaceutical Mafia with its insufficient and manipulated trials, its alliance with the CDC and FDA and with the approval of the "great" Doctor Fauci. In June, the New England Journal of Medicine (NEJM) published a bogus study claiming that Wuhan coronavirus (Covid-19) "vaccines" are perfectly "safe and effective" for pregnant women to take. A few months later, the NEJM was forced to issue a correction. The goal, of course, was to convince as many people as possible to read it to accept its false claims without even thinking twice, simply because it was published in the "reputable" NEJM.

Steve Kirsch, founder of the Covid-19 Early Treatment Fund (CETF). "In summary, the CDC has no basis to recommend the vaccine to pregnant women. Will the lack of evidence make a difference to the CDC recommendation? Of course, no. "We will experiment with the public," Kirsh added. The report by Shimabukuro et al. includes safety results for 35,691 v-safe participants 16 to 54 years of age who identified as pregnant and the first 3958 participants who were enrolled in the v-safe pregnancy registry.

"Among 827 registry participants who reported a completed pregnancy, 104 experienced spontaneous abortions and 1 had a stillbirth. A total of 712 pregnancies (86.1%) resulted in a live birth, mostly among participants who received their first vaccination dose in the third trimester. Among live-born infants, the incidences of preterm birth (9.4%), small size for gestational age (3.2%), and congenital anomalies (2.2%) were consistent with those expected on the basis of published literature.. On October 22, 2020, the FDA and 'vaccine' manufacturers (i.e. Pfizer) established that the COVID-19 injections would cause an unprecedented incidence of disease, permanent disabilities, and death. 1) reproductive and pregnancy disorders (miscarriages, spontaneous abortions, irregular and heavy menstruation, infertility and erectile dysfunction in men). 178,353 female and male reproductive system disorders (erectile dysfunction, infertility, heavy menstrual bleeding) 2) nervous system disease (convulsions, seizures, Guillain-Barre syndrome myelitis encephalitis, encephalopathy, encephalomyelitis, narcolepsy, cataplexy, meningitis, meningoencephalitis acute demyelinating diseases) 3) cardiac disease (acute myocardial infarction myocarditis, pericarditis, stroke) 4) blood clotting and circulatory disease (disseminated intravascular coagulation, thrombocytopenia, venous thromboembolism) 5) musculoskeletal disease (arthritis, joint pain) 6) 7) autoimmune disease (Vaccine Associated Immune-Deficiency Syndrome (V-AIDS), Vaccine Associated Enhanced Disease (VAED), HIV, multi-system inflammatory syndrome 8) and death.

It is time to no longer tolerate this "mRNA vaccine experiment." We were promised that COVID-19 injections would stop the spread of the "virus" and end the pandemic

And the future will be worse: WHO'S LATEST POWER GRAB IS ESPECIALLY DANGEROUS FOR CHILDREN Nothing in the documents for the World Health Organization's (WHO) proposed new treaties oblige the WHO to differentiate its binding directions for their impact on children, thus allowing for mass testing, isolation, travel restrictions and mandated vaccination – potentially with experimental products – for healthy pediatric populations. A global system for digital “health certificates” for verification of vaccine status or test results would be routinized, and a bio-surveillance network whose purpose would be to identify viruses and variants of concern – and to monitor national compliance with WHO policy directives in the event of them—would be embedded and expanded.

For any of these sweeping powers to be invoked, there would be no requirement for an “actual” health emergency in which people are suffering measurable harm; instead, it would be sufficient for the director-general, acting at his or her discretion, to have identified the mere “potential” for such an event. It is hard to overstate the impact of these proposals on member states’ sovereignty, individual human rights, foundational principles of medical ethics and child welfare.

Yeah I fully agree with youso my question is - why trust Ivermectin? Why trust HCQ...these items are made by the same scumbag big pharma companies. Since they obviously wanted to cull the human race, why on earth would we believe that one drug they make is evil....but their other drugs they make are 'still good'? Basic logic here...not rocket science. Case and point - Friend of mine went in for dental work, received a novocaine shot and had severe reaction to the shot site for several months (turns out they put mRNA poisons in novocaine shots now)....also in the numbing creams...Goes back to my original point - Why trust ANY big pharma product????????????????

Dentists are clueless and they are all getting their supplies from the same evil companies that make the novocaine only now it's tainted with poison. One local medical director of a LARGE hospital system here in Atlanta told me that if I get into a car accident, drag myself away from the scene of the accident and don't let the EMTs 911 take you to the hospital...she said the hospitals have turned into 'killing machines'. She has a 'front row' seat and she has access to all the hospital pt charts and data...it's a blood bath.

What to trust? One reason the Rockefeller Model for Medicine dominated beyond the use of its power plays, control is there having to be a certain level of products, practices actually working, doing some good. Early use of antibiotics, now misused by loading up CAFO livestock with it, is one example of once giving a foundation to stand on for pushing other products or practices. One general rule of thumb is those products to have become off label use, have a given fairly safe, good track record, and often inexpensive are generally trustworthy. Those products where the Risk/Rewards or Risk/Benefits ratio is good or even exceptional. If things are to be cleaned up, we shouldn't throw the baby out with the bath water.

A big tell in the Ivermectin is until C-19 it has been used as one of, it not the safest product for a host of Dis-eases, yet now it has been demonized with Horse Paste Bull Spit propaganda. Data from the African nations where it is used on the regular, Tuesday pill, with very low Jabs uptake so no side effects very strongly suggest it has many applications Big Pharma Sharks needing constant feeding would like it out of the picture. Big Pharma's and all the other Monopoly Too Big to Fail's never-ending hunger for profit\$ are only part of the picture. There is also a never-ending cannibalizing others to promote we have an expanding market.

This destroys creativity, innovation, an ability to adapt and then push all into their one lane claiming ownership. Like many lifestyle choices, diet, supplements have such positive impacts are also demonized. It is hard but still not impossible for watchdogs like Doc to find good, accurate research studies to provide many of the answers we seek. Most of all, if your body is screaming not to trust something, listen to it. It wants to be healthy, its drive is to be healthy and even if it is actually one of the most Safe and Effective products in the world, if your body says no, just say no.

Just, in an interview Vandana Shiva says: The Green Revolution for Africa, the Alliance for the Green Revolution in Africa, is a joint project of Rockefeller and Gates. Of course, since globalization, Gates has become super rich, as all tech billionaires have. Both my book "Unity vs. the 1%," as well as books collected through philanthrocapitalism movements, are really showing how there is not a single field that does not directly affect human freedom and human well-being where Gates is not trying to take control right now. So if you want to see that everything we knew was wrong with agriculture, if it has been given a fast forward, it is because of Gates' philanthrocapitalism.

At the time of the Green Revolution, the tools of destruction were chemical fertilizers. It is the highest level of violence they can do. Now, when Mr. Gates plays that role, we have tools not only of genetic engineering, which, as you know, have already been a total failure in terms of delivering on promises: promises of weed control, promises of pest control. The first is: billionaires want our land and they want our food, because they are two things that humanity cannot live without. He is trying to make it seem like farming is not for the future. It is the motto of his minions (I call them "his minions"), people to whom he gives power.

Growing without farmers, food without farms, that is the dystopia. Farming without farmers means more chemicals, more machines. As Kissinger said, when I wrote my book on the violence of the Green Revolution, I looked at all the literature and Kissinger's statement that "if you control guns, you control governments. "When you control food, you control people." And that's why I say that when you control the seeds, you control the planet. That's your dystopia: total control.

No child has the capacity to sign up for a Medical Trial. The Parents signed her up. Mum says that it was an "important" trial to determine if the jab was "safe" and "effective". I get the "effective" bit - but what kind of Parent signs up their child to determine if an experimental drug is "safe"?! The Parents either do not understand the English language and therefore lack capacity themselves, or they are reckless, or they like the idea of taking part in something "important". A lot of people took the jab because they did not want to be denied any of life's "pleasures" - even on a "wait and see" basis. The Filth have gr00med us into treating any self-denial as undesirable.

This story is so sad! I'm a 73 year old with grown children, and grandchildren. I was a young mom, and thought the doctors were there for us in helping us to have healthy babies , and children. We didn't question them, unfortunately. Also, there wasn't anywhere to do research. If I was a new mom now, I would question everything! Had I known then what I know now, I would not have vaccinated my kids. Thank God my kids did ok, but, they did not get as many shots as they are now giving babies! The list is unbelievable! Prayers for Maddie, hoping they can find someone who will help them!

It's the ever increasing volume of them that is scary. My kids were vaccinated in the 80s and had a lot more than I did. In comparison to now they were lucky to only have gotten those. HepB for babies here before they leave the hospital. What the heck is that about??

I don't even trust HCQ nor Ivermectin anymore. Here's why: If Big Pharma can launch a 'killer vax without any repercussions as part of world wide human culling initiative, why wouldn't they taint HCQ and Ivermectin with poisons as well? In fact, why on earth would any of us trust Western Medicine/Big Pharma...ever again? Basic logic here folks...not rocket science (sort of like all the folks who want to vote their fav. president in when the last election was obviously manipulated.) Why would you vote when it's obviously not an election but a cabal 'selection' process. Is it time to wake up yet?

When you don't vote for who you want, then that is a vote for who you don't want. I agree elections can and are manipulated, so the way to beat that is to have such an explosion of votes in for your candidate, that cheating will not work. Therefore, vote.

He didn't seem to know what was going on with the bioweapon covid. He still got covid and now has cancer.

There used to be a crime in these United States known as felony child abuse this mother needs to be charged for subjecting her children to this experimental gene therapy -- for \$119 a pop which, obviously, the value she placed on each of her children's lives.

Sad about all these repercussions, but these people should have covered their own backsides instead of jumping on the sheep bandwagon. I don't feel sorry for people who give control of their own health, and especially their children's health to the medical profession or the government's bogus mandates. There is no common sense displayed here. Don't you people read, study, research what comes barreling down the pike when it concerns your own health? I guess you don't think you are your own responsibility. Now deal with it.

It's all about money. Pfizer has a long history of corruption. It is basically a criminal organization operating under the guise of a do-good medical research establishment. When will people realize that for-profit health "care" can't work for anything but profit?

This is another story that breaks my heart even though there is not much left to break. My wife (separated) was told to roll up her sleeve and take the plunge by her doctor. As soon as the needle was removed from her arm she fell to the floor and started to flop like a fish out of water. Stupidly a month later she took jab #2 and was ill for a week afterwards. Unbelievably her doctor persuaded her to take the booster a few months later, and within a month she was diagnosed with Parkinson's and Liver disease. She passed away approximately 2 months after that third shot.... at the age of 49. These monsters need to answer for their crimes but it appears they are above the law.

It goes two ways. Yes, these monsters should answer for their crimes, but they will never do so. First and foremost, people have a responsibility to themselves to know what they're getting into, no matter what their quack doctors tell them. Take a lesson from the wise ones who said, no f*%cking way. I am one of those people. No vaccines whatsoever and no sign of illness through the whole scam.

Big pharma is in business to make money. Sometimes they create a product that helps people and sell it to make lots of money. Other times their products hurt people and the harmful effects are glossed over. But profit, not the public good, is always the primary goal - that is why we have cancer treatments but are nowhere near a cure.

Everyone should visit StopWorldControl.com and learn the facts. Test kits for Covid were being ordered by the hundreds of millions in 2018. John Hopkins Hospital, World Economic Forum and Bill Gates Foundation conduct Event 201 before the virus was released just a few months after. Cannot forget that Fauci said with 100% certainty there would be a surprise outbreak during the Trump Administration and Bill Gates saying if we did a really good job with reproductive health care and vaccines that we could lower the worlds population by 15% in 10 years which based on when this clip was uploaded but since deleted from You Tube would put us around UN Agenda 2030.

We need to demand our Government leave the UN/WHO/WEF as they are dictating what the elected/selected do. I remember Trump being interviewed by Candace Owens and him saying not a single person had been harmed by the Covid vaccines. This is partially true because it wasn't a single person and it's estimated some 14 million have died worldwide from getting this.

This is really sad. The vaccines are safe for the manufacturers as they have zero liability and effective in maiming or killing the recipient. Money being made from multiple sources from cradle to grave.

I did not get the impression that Maddie's parents enrolled the children in the trial for the measly \$119. They trusted what the drug companies & the CDC were saying about the benefits of the new MNRA "vaccine" (i.e., gene editing shot). It was only after Maddie suffered debilitating consequences of the vaccine that her parents realized what could go wrong. Denial, blaming the effects on Maddie's anxiety and a stomach ache were doctors' answers to Maddie's condition. Pfizer didn't even acknowledge her condition. Maddie and her family paid a huge price for misplacing their trust and received zero support from Pfizer. Maddie is young and hopefully will recover.

Who in their right mind would hand over their children for \$119.00 to a multi-billion drug company to use for a vaccine experiment? This is where our main-stream media (funded by Pfizer) has failed its audience - truly the enemy of the people because if you are not on social media reading the whistleblower's reports on vaccines and etc. and you 'trust your doctor' - this is what happens. Vaccine genocide worldwide. Period. Nuremberg 2.0 cannot happen soon enough for these sociopaths. And the FDA was captured decades ago by Big Pharm.

Others in military left, now being begged to come back without the vax. Praying son doesn't die from jab. All for approx \$5,000 a month in pension. Retiring in 3 months. If these shots go into a vein upon administration, that is when the most problems arise. During trials I sure sure they had professionals giving the shots. Upon approval when given to the public they hired people off the street to give these shots.

....."Indeed, if anything, Maddie's story should serve as a warning to all. It shows just how callous the vaccine industry and its protectors are. You are the guinea pig, and if something goes wrong, you're on your own. You won't even get an apology, let alone any actual aid"..... They may not give you HELPFULL advice, apologies, or actual aid, but they will take your money and/or your life. They only make money if you are sick. After all, it is a profit driven system. It is sickening, but it is what it is. It's almost a form of mental illness. They prey upon the very people who are most vulnerable and easily manipulated (the elderly and the children).

But, what's more concerning to me is, why does anyone expect anything different? Have you ever really been satisfied with any purchase you've made in your life? Where is the value? Most 3rd world countries have life expectancies longer than the US's. How id that possible? I'm almost 60 and I can barely think of a single thing I'm proud of that I paid CASH FOR! However, when you make or create something it is life changing. You can change your life and save a lot of money by walking away from the medical system!

Thank-you Dr. Mercola for highlighting the plight of this young girl. She has been in my thoughts every so often since it happened. The smug ones can call her parents stupid all they want. But I say there but for the grace of God.....If I had not had the parents I had, and if I had not happened upon Joe Mercola and others years ago, who knows what I might have done when the shots rolled out? As it is in 2020 I took one PCR swab up the nostril in order to fly home, still trusting that "the average doctor" would not do me any harm and that a swab was just a swab. I know better now. Things are easy in the rear view mirror, but most of us have at one stage or another been too trusting.

But for the harms to Maddie alone, a good God-damn many pharmaco-medico industry types need to be jailed for one hell of a long period of time. And their worldly goods confiscated to compensate this victim (and many others) for the destruction of her life.

Posted On 02/19/2024

boxerdogofmine

None of this was an accident. It was intentional. We're supposed to believe they don't know what is in the shots? If they claim they don't know, then they all need to be shut down. And "if" that were true, how is it that the good doctors and researchers have seen what is in the shots and we're supposed to be ok with, "Well, we didn't know the shots were contaminated" I call BS on that. They can also look in a high powered microscope, they are supposed to be scientists. And yet people seem to have no common sense anymore or the ability to think things through.

I'm sorry, but Maddie's mom never should have signed her kids up to be "guinea pigs" with drugs. Just like my husband, who was told he should get the shot from his workplace, he almost did it thinking it would protect me. I told him absolutely not. Praise God he didn't. I was in my late 60's. No jab, no mask, we just kept on living our normal life, went shopping, visited our grandkids (who never got the jab either), and we have all done really well. There comes a time to tell these people no, and now is that time more than ever.

Most people are aware that Drs pledge to "first, do no harm." If people have been fortunate to have a good relationship with their dr, they tend to trust drs. We now have to understand that the drs who rise to the top of their organizations are more interested in power and money. Most other drs do not have the time to do their own research. Covid has been a wake-up call!

You can't place all the blame on the mother who probably meant well and wasn't informed or warned about all the possible dangers. Surely, it was a terrible decision that she will regret all her life what happened to her daughter. But the real blame and consequences are on Pfizer and the health institutions who are all guilty by deed. What's even more disturbing is Pfizer still persists with pushing the dangerous shots. That they deny her any help or compensation or even an apology is inhumane. They all should conduct the vaccine experiments on themselves first, before they say it's safe and effective. They need to know how it really feels to be damaged and crippled by their own greed and experiments.

Even in a country this size, I cannot wrap my head around that many parents willingly signing up their children to take a shot for a virus that posed almost zero threat to kids. From the start, the one thing that never wavered was who was at greatest risk: older people with other health issues, the obese, and those with compromised immune systems. That was when this first broke out in Washington state and that's been the case for the entirety of this sorry episode in American history. How many other kids were harmed because their parents bought into the fear being peddled by Fauci, politicians, and Big Jab. There may not be enough prison space to accommodate people whose actions are worthy of public stoning, a barbaric response to their equally barbaric approach.

Yesterday starting around 1:15:45 in Doc & Del's conversation, Doc makes a bold statement that "only 2% of people have parents who truly love them". Does anyone, especially Doc, know what is the source of this comment? I believe Doc has the right idea about parental love and ability to thrive but only 2% is incomprehensible. Also, their optimistic outlook is concurred here by Jeff Prather's conversation Callendar that start's around 26:00. jeffreyprather.com/ukrainig-usa-cia-runs-dod-fbi-cops

Thanks for weighing in on this pronouncement that seems to have slipped under Del's and most readers radar. Bromance comes with it's own set of unspoken rules so Del can be forgiven :-) The 2% that Dr. M. alleges is not the world I know however when I read your list criteria I'll admit that to check all the boxes one would be in rarefied company. Are parents of best intent to be downgraded to less than loving because the mistakes they made with their kids were out of ignorance? Maybe they could be held to a higher standard if they knew in advance where all the minefields lay before starting a family.

Most adults I know still exhibit some vestiges of self defeating behavior from the nest in which they were raised. In order to love fully one has to be aware of the shadow self and that by itself would probably exclude 98% of adults, especially those of child rearing years. Perhaps that's where that number originates. I arbitrarily contend that there must be at least 20% of parents whose best effort in the presence of their albeit less than perfect parenting still qualifies them as loving parents.

Posted On 02/19/2024

hoplitex made similar comments here also. Shocking to read at first, but with a little pondering I thought, it does sound absolutely possible the mother had sinister intentions, didn't really care about her kids, and even maybe to get possible attention for herself, and some parents don't love their children, but 98% IS incomprehensibly. Also, there's Munchausen syndrome by proxy. We're all thinking here that the mother was just reckless and stupid, but there could be more going on in her head that us "normal" people can't comprehend.
