New research out of Turkey has found that injecting mammals with Covid-19 "vaccines" causes autism and reduces neuronal count in the brain. The peer-reviewed research, published in the journal *Neurochemical Research*, looked at links between COVID injections of mRNA (modRNA) and neurodevelopmental disorders. They focused specifically on autism, a common side effect of childhood vaccinations. Using pregnant rats as subjects, the researchers injected Pfizer's mRNA shot during gestation, which had a "profound impact on key neurodevelopmental pathways." The male offspring of the female rats exhibited "pronounced autism-like behaviors, characterized by a marked reduction in social interaction and repetitive patterns of behavior." "In addition, there was a substantial decrease in neuronal count in critical regions of the brain, indicating possible neurodegeneration or impaired neurodevelopment. Male rats also demonstrated poor motor performance, evidenced by reduced coordination and agility. ". www.theepochtimes.com/health/covid-19-shots-linked-to-autism-in-vaccin.. (2024).---

Yes and doctors from other countries now living in the USA can't get licensed so they sign off of pharmacy company studies as though they did the study themselves. How do I know? I met a doc years ago from the mid-East. That was how he is making money. Never steps foot in the door. Gets a completed study from Pharmacy company in the mail. Edits it a little, signs his name and get\$ paid. That is why I have ZERO TRUST in the drug industry and avoid drugs and interventions. So tired of trying to educate every doc, nurse and assistants I meet. Now I am avoiding all docs if I can. They are corporate slaves and cannot speak freely. I feel sorry for them and I am so glad not to be working anymore (retired). The pressure put on patients to accept what ever they want to do to you is insane.

Dr Royal Lee developed an understanding of the autoimmune condition as well as effective therapeutic strategies. Physicians and sufferers may consider investigation into Protomorphogen therapy. I have many happy patients. Should probably write another book.

How frustrating that the report lies about adjuvants. They are NOT necessary to manufacture vaccines. But they ARE a significant cost cutting method to make antigen proteins, which are often expensive and difficult to manufacture in large quantity, far more inflammatory at much lower concentration in the shot, so vaccines can be made more cheaply, which is great for the wallets of CEOs and shareholders who cannot be held accountable in any way for the destructive health effects of adjuvants.

One of my friends got the jab because at the time it was required to go on a cruise. The next day she woke up and couldn't walk. She was in extreme pain. Her husband took her to the hospital, where she remained for over a month. She was unable to walk at all for over two months and now can walk a few feet with a cane but has to constantly sit. She is permanently disabled and had to leave her job. Her son moved back in to help take care of her. Two doctors diagnosed her with an autoimmune disease brought on by the COVID vaccine. Prior to this she was very vibrant and healthy and had a great job as a postmaster.

How many more such stories must surface before the light bulb comes on en masse?

No longer steady drips countering the Official Narratives, the dams built to hold back the increasing steady streams are cracking ever wider while the We are Top Dog Authorities are in progress of trying to have their cake and eat it too, is crumbling faster and harder. As floodwaters exposing the Jabs and the after affects are the real Pandemic. A Pandemic they are increasingly finding it hard to rewrite history on so as to claim, the third stage of - Oh well, that's nothing, everybody knew this all along and we didn't have a thing to do with it.

Very clearly Just, the United States has built a health system with incentives that inexorably generate terrible and perverse results. Incentives that do not emphasize health and well-being. Nutrition, exercise, education, emotional safety, our natural environment, and public safety may now be more important than care in producing greater gains in longevity and quality of life The FDA approved 37 drugs and medical products in 2022. Surprisingly, 24 of the new drugs (65 percent) were approved based on a single study. When the 21st Century Cures Act was signed into law in December 2016, the federal government made it easier to accelerate the development of medical products.

The law quickly became a portal for corruption, allowing the industry to bypass the once rigorous, evidence-based standards for approving new drugs. By short-circuiting the scientific method, industry and government work hand in hand to flood the market with new drugs that lack adequate safety data. www.theepochtimes.com/health/fda-approved-65-percent-of-new-drugs-in-2..
