Today's M.D. Has been so mis informed, dumbed down, and indoctrinated into a false system of so called medicine that it may be the most dangerous thing a person could do is to approach an MD for any type of advice on how to care for your health. Todays medical doctors are so far off the mark, they are unable to heal any body, they don't have the knowledge or the tools, all they have is a prescription pad for useless pharmaceutical poison that do not have the power to heal anything, there only effect is to poison the body, and to reduce symptoms according to there highly flawed made to order studies. If the true goal for the modern MD is to poison as many patients as they are able, they are a run away success, I real feel sorry for this dark profession and the blind patients that continue to go back time after failed time for so called medical intervention.

Yes AHH. The European Medicines Agency estimates that 197,000 people die each year from adverse effects in Europe. In U.S.A. adverse effects are the fourth leading cause of death, behind myocardial infarction, stroke and cancer; and above diabetes, lung diseases and traffic accidents. If this says the European Agency, what is the reality ?. For the venom of the most poisonous snake, kills in a short time, the poison prescribed by the doctors in the protection of corruption, is slowly killing living beings and polluting the ecosystem. **DOUBLE PUNISHMENT FOR HUMANITY AND DEGENERATION OF THE HUMAN RACE.**

In ancient Greek mythology, the snake was related to medicine, and healing. The god of medicine was Asclepius, whose daughter Higea, was in charge of preparing the remedies. This goddess was represented as a young woman, surrounded by a serpent, who poured poison into a vessel. Subsequently, the representation was simplified, leaving only the snake and a cup. The cup of Higea, with the serpent coiled, symbolizes the power of the poison, which either can kill or heal. **ANCIENT REMEDIES HEALED PEOPLE, CURRENT DRUGS KILL LIVING BEINGS, POISONING, LIKE THE WORST SNAKE.** www.andalan.es/.../2.SERPIENTE-Y-farmacia.jpg

[vaccineimpact.com/2017/dr-brownstein-on-cdc-corruption-i-am-tired-of-w/]

I can supply a TON more if anyone wants them. I spend a lot of time/money advocating for "informed consent" and "opt out with NO penalties" in any mandatory vaccine "proposals" at the local and - especially - state level. TAKE this advice straight to the "think tank" and get it in gear - from the article - " So PLEASE, as your first step, sign up for the NVIC Advocacy Portal." I put the PLEASE in caps because - know this - ALEC - on behalf of Big Pharma paid support - is working EVERY State legislative body to pass mandatory vaccine programs for ALL ages. Be aware - get involved in your area because the vaccine SCOURGE already is! Be well! Love, blessings and peace!

While watching one of the many 'get your flu vaccine' commercials on tv, my 13 yo son spoke up. "My friends all get flu vaccines and they all get the flu every year. I never get them and I've never had the flu." I'm so proud of him for putting this together. Little by little, people are learning.

RESEARCHER IAM, a spectacular information, fully updated. YOU ARE A GENIUS. YOUR IQ AND YOUR RESEARCHING SPIRIT IS EXCELLENT. The Danish Peter Gotzsche, in his book defines the pharmacy multinationals as "organized crime". Gotzsche has worked in the pharmaceutical industry and declares that he has degenerated into marketing Big Pharma to sell ineffective and deadly drugs. In a dense and hyperdocumented book, the Danish is revealing the irregularities of the main companies and their consequences for the health of the people and the sanitary systems.

Peter's presentation was shocking: - In the United States and Europe, prescription drugs are the third leading cause of death, following heart disease and cancer. - In the USA alone, 200,000 die every year because of drug damage. - In USA. pharmaceutical companies are the main federal fraudster, and in the world are leaders in bribery and corruption. Some phrases of the author: "The fear of patients to pain and suffering, to illness, is what makes us accept all this kind of things." "Big Pharma forces you to believe in it because it has enormous power to interpret the results of your trials, and it does so primarily with clinical guidelines. Evidence-based Medicine is now a corrupt industry transmission belt."

Posted On 09/26/2017

Thanks all, Good comments and links! Have posted this before, but women of a certain generation were told by their doctors not to even take an aspirin while pregnant, so today, these shots appear like "the death of common sense". But inch by inch, step by step...unfortunately Target Marketing is the game, and well-crafted, fear-based education comes first on tv, then in pharmacies, then discounted or free in supermarket pharmacies, then plastering signs and banners outside to entice customers to come get their flu shots. Everybody wins this game except unsuspecting patients? Jeeze, hate to walk through supermarkets if people are shedding live virus in fall and winter months. What radical departure is needed to turn big bucks currently being tossed into vaccines in some other way more positive direction?

Granny on the warpath

My husband was being treated for a back injury at work, he was going to an osteopath for treatment for months. Several times when we were there, reps from drug companies dropped in with a lot of free samples and pizza for the office staff. Luckily, the doctor doesn't fall for the scam, he refrains from prescribing drugs if there is a safe alternative. I was really shocked when I found out how often the reps call and irritate by their fake friendliness to the staff. They just pop in with pizza and a box of samples....and it's hard to resist pizza at lunchtime. Con artists...

I agree 100%. Vaccines don't even create immunity, in fact they only introduce toxins into the body, bypassing most of the body's normal protections.

SuzieC0

Thanks AGAIN Dr Mercola for alerting us to the truth. I'll never take a flu vaccination, but when I was expecting our first baby I did take an anti-tetanus shot. Very soon I came down with a cold accompanied by the worst asthma attack I've ever had. I could scarcely get enough oxygen myself, and the baby was jumping around inside me, obviously in distress. On that basis alone I would never recommend any pregnant lady to be vaccinated.

It is evident that the medical professions, face their responsibilities of finding treatments for the disease, or passing and leaving, that other forms of HOLISTIC MEDICINE take over. conventional physicians rely so heavily on drug industry marketing strategies that do not have effective treatments for basic diseases. vaccines can not function in poorly maintained immune systems. As in the case of the tobacco industry, pharmaceutical companies pay for the science that is being published. the revolving door of government officials moving in highly paid positions in the pharmaceutical industry is also problematic. the government seems to have an interest in not publishing information that would show vaccines in a bad light.

Aluminum is placed in the vaccines to selectively target the upregulation of the humoral arm (TH2 cells) of children's immune systems, to boost antibody production. The medical community leads us to believe that this production of antibodies is what gives children a protective nature against diseases preventable by vaccination. However, in many of these dominant chronic diseases TH2, TH1, TH17 and TH3 have also been shown to have an altered immune response to the environment. A healthy and mature immune system in children is demonstrated by a TH1, TH2, TH17 and TH3 immune response balanced. They require a very important synergistic relationship to function properly in our bodies. As soon as one or more of these four arms decompresses with respect to the others, the chronic disease begins to be expressed.

Posted On 09/26/2017

Guillermou

Th1 type cytokines tend to produce the proinflammatory responses responsible for killing intracellular parasites, and to perpetuate autoimmune responses. Gamma interferon is the main Th1 cytokine. Excessive proinflammatory responses, can lead to uncontrolled tissue damage. Th2-type cytokines include interleukins 4, 5 and 13, which are associated with the promotion of IgE and eosinophilic responses, and also interleukin-10, which has more than one anti-inflammatory response. In excess, Th2 responses will neutralize the Th1 mediated microbicidal action. Optimal scenario would appear to be that humans must produce a balanced Th1 and Th2 response, suitable for immune challenge

But the reality is that the amount of heavy metals is a concern. For example, mercury linked to autism. Mercury tests conducted on vaccines at the Natural Forensic Food Lab have revealed a surprisingly high level of toxic mercury in an influenza vaccine. Tests conducted through the ICP-MS document mercury in the Flulaval vaccine at a shocking 51 parts per million, or more than 25,000 times higher than the maximum level of inorganic mercury contaminants in drinking water set by the EPA .

http://www.***//045418_flu_shots_influenza_vaccines_mercury.html

We must stimulate the immunological system of the mother and the child in the pregnancy and from the breast milk. Colostrum of milk secreted by the mother first 4 to 6 days, has a composition and similar qualities to the blood plasma contains globulins and albumin, both easily absorbed for the newborn. Vitamin A, vitamin E, vitamin C and carotene. Minerals: phosphorus, zinc, iodine and copper.

Colostrum also has hormones involved in the child's endocrine balance, enzymes that help digest fat, antibodies that protect children against gastrointestinal infection, and elements that stimulate blood clotting. **ESPECIALLY: INFORMATION "DECONTAMINATED" TO MEDICINE AND PARENTS' DECISION TO VACCINATE THEIR CHILDREN, ASSESSING RISKS**

Posted On 09/26/2017

injecting pregnant woman with various toxic adjuvants like mercury and aluminum is once again PREDATORY and counterproductive - it is not supportive - Bill Gates Junior's father was Chief Abortionist at Planned Parenthood [as a factotum of the Rockefellers] - Planned Parenthood flooded South America Planned Parenthood clinics with Depo Provera extended birth control injections [banned in the States but still allowed for export - moral if outside the USA] - this alleged birth fertility restriction substance has a MAJOR side effect - instead of "birth control" it STERILIZES -

this is the home environment that Bill Gates Junior grew up in - believing that lying to woman and causing their sterilization was a morally praiseworthy act from a eugenicist perspective - Bill Gates Junior has single handedly since the 1990s pushed forward the vaccination program [Gates is heavily invested in Merck] - this is a Business Agenda that advocates VOLUME turnover for maximum profit - Eugenicists are pathologically reassuring themselves that abortion and chronic autism treatment is GOOD for Business on Planet Earth in the Milky Way Galaxy - vaccination of pregnant woman is a type of physical abuse to mother and severely vulnerable child - but from an ABORTIONISTS perspective collateral damage [such as autism/ allergy/ cancer are positive for business and positive for Population Control - mothers are being hoodwinked into believing that what is good for Bill Gates's bottom line is good for them even if the fetus dies or is made humanly unproductive by autism - it is also good for business to deny any link between autism and vaccination

Yes, Stan, Corruption. Obtaining independent scientific evidence for vaccines is not always easy. As was the case with the tobacco industry, pharmaceutical companies, pay for the science being published. The revolving door of government officials, from moving to better paid positions in the pharmaceutical industry, also contributes to corruption. The government seems to have a personal interest, not to publish information that would show the vaccines a danger to pregnant women and children.

According to the Food and Drug Administration, safety assessments for vaccines have not often included toxicity studies because vaccines have not been seen as inherently toxic. However, vaccines are legally defined as inevitably unsafe. It is not only childhood vaccines have considerable risks. Influenza vaccines, vaccines for sexually transmitted diseases, and others contain similar risks for adverse events. It is also worried that vaccination is now recommended for pregnant women, even though it comes with the vaccine insert clearly stated that they have not been tested in pregnant women, so the effects on the fetus may not be known.

For example, Dr. Thompson published an article in the journal Pediatrics claiming that there was no connection between vaccines and autism. Ten years later, he admitted his fraud, after talks he had with another scientist, recorded without his knowledge. Although Thompson still believes that the risk of disease is greater than the risk of vaccines, it is doubtful that many families whose children have autism would agree with him. Thompson has not lost his job, or been indicted for his admitted fraud. Sometimes the scientific journals contradict other research studies, the danger of vaccines, promoted by clear financial interests. INVESTIGATIVE JOURNALISM PROMOTES ITS OWN PERSONAL INTERESTS, OR COMPANY, WINNING PRESTIGIOUS PRIZES FOR ITS CONTRIBICION TO THE CORRUPTION, hiding the judicial processes, that had been denounced.

The adaptive immune system of a child stimulated daily by antigens caused by any foreign substance such as pollens, viruses and bacteria. So what should we do to maintain the immune system? KEEPING THE MICROBIOTA AT BIRTH (BREAST MILK). PREVENTION OF INTESTINAL DYSBIOSIS WITH A HEALTHY DIET (without grains), loaded with nutrients and phytochemicals. 80% of the immune system in the intestine. In this web of Dr. Sarah Ballantyne, describes the DIET OF PALEO for the children in a pleasant walk, treated with rigor. A walk of appropriate diets according to age: paleo for children, pregnancy, for babies, for younger children and older children.(www.thepaleomom.com/paleo-for-kids)

In each group, the meals are treated: appetizers, breakfasts. It also describes the most suitable paleo, for the most frequent disorders, in children's food. There is a chapter on carbohydrate (gluten-free) suitability depending on age. It relates to the carbohydrate content of breast milk. Not eat fish rich in mercury. These varieties include shark, swordfish, mackerel and tilefish.

First, the child needs to develop a varied diet rich in minerals, calcium, iron and zinc, healthy proteins and oils. For this, we have vegetables, wild fruits, apples, wheat, kiwi, (banana, sweet potato, apples, very suitable for small children), grazing cheese, nuts and some vegetables. Fish, meat and egg (of course, kept in pasture). Avoid excess vitamin A as it can be toxic to young children (livers of animals in moderation). Too excess fiber, can drag the minerals. HELP THE INTESTINAL MICROBIOTA, IN THE ABANDONMENT OF BREAST MILK, SO THE IMMUNE SYSTEM AND PROMOTES GROWTH. The milkshakes and vegetable shakes, mentioned fruits, avocado, olives and walnuts are remineralizing and can occur for both lunch and breakfast. THE RESPONSIBILITY OF THE MEDICAL PROFESSION IS TAKING CARE OF THE IMMUNE SYSTEM, AND IT DOES NOT BURDEN THE BODY, CHEMICALS, DRUGS, VACCINES THAT INTERFERE WITH ITS NATURAL DEVELOPMENT.

Hi Prof. G. -- Recall yesterday I referenced that KITCHARI recipe - kitchari is an Ayurvedic "traditional meal" used for a baby's first solid food - after cooking it's pureed and given to the child. If you research every ingredient - each one has positive impacts on gut health. Research now confirms that "ghee" is the "favored" food - energy source - for the epithelial cells in the gut lining. I make a big batch once a month and eat a "portion" of that batch at least once a week - I like it so much sometimes I'll eat it three times a week - especially during the colder months - during those colder months I'll add my HOT pepper ferment "stuff" to the dish - MERCY - warm and fuzzy time, indeed;-)))! Be well my friend! LBP!

Just a month ago I had two first time parents in my shop and on my inquiry about if they are going to vaccinate or not, both replied that they were going to, both are doctors themselves ! What can one say. They were rather defensive about the decision, saying that they had read all the literature and admitted that there are pro's and cons. But they were still going to vaccinate. I have often noticed that pregnant woman seem to "glow" with health. Something seems to carry thru their skin. Far as I know such woman's immune systems peak close to delivering the babies and a child is never as safe from infections, as when on mothers milk. There is no better nutrition than mothers milk on this planet. This must be the most ridiculous action by the medical industry ever. But then again, some people are even pro abortion ! One really just cannot believe these acts are promoted by humans. That should rather be "humans".

Catryna

Giving Hep B shot to a newborn, follows the same flawed principle of Silver Nitrate or antibiotic ointment in newborn's eyes. They do it because of a possible few cases of mothers who have Chlamydia and Gonorrhea. When you have a baby in the hospital it all becomes a mindless "one size fits all." Back in the day, no woman would have been injected with anything because the doctors knew that it could possibly be dangerous for the growing infant. Think Thalidomide, in Germany, in the 1960's. Do the doctors of today not know their own history? Or, do they just push it aside for the sake of the almighty dollar. I have come to know in the past 35 years that most doctors cannot be trusted and most doctors have become pimps for the pharmaceutical Cartel. They have become criminals who get away with murder every single day.

Posted On 09/26/2017

Guillermou

You say it very well, the doctors dance, how far the multinationals. The pharmaceutical industry has hijacked clinical trials and succeeded in approving drugs, which could not be otherwise admitted. The clinical guidelines are manipulated, based on clinical studies manipulated and written by doctors with conflicts of interest with laboratories

The poisons found in vaccines are terrible: Viruses or bacteria from animal cell cultures. Mercury of great organic toxicity. Aluminum, poison that can cause bone marrow pathologies, bone and brain degeneration. Animal cells: monkeys, dog kidneys, chickens, cows and humans. Formaldehyde is known as a carcinogen. Gelatin from pigs and cows, known to cause anaphylactic reactions, is found in large quantities in the MMR vaccine and in the vaccines against varicella and shingles. Monosodium glutamate in inhaled influenza vaccines is known to cause metabolic disorders, seizures, and neurological disorders.

Posted On 09/26/2017

Almond

Why is this still news to anyone? It has long been known in veterinary science that vaccinating pregnant cows results in higher miscarriage rates--"and screws up the calves". Vaccination alters the immune system in ways that can damage a developing fetus. Pregnancy itself is a state of altered immunity that allows for the implantation of the fertilized egg. Why would you want to interfere with that natural process by playing God with the woman's immune system?

Posted On 09/26/2017

Randyfast

Injecting oneself with toxins, isn't very smart. I wouldn't be surprised at all to see a "smart" vaccine, in the future. It's worked well for the globalists so far. Injecting a newborn with toxins, is the epitome of INSANITY...or, perhaps just part of the depopulation agenda!

Posted On 09/26/2017

seg

Well i'm not going to argue with you Randy...Everything these days revolves around the word "smart." It is the new marketing cash word, smart phones, smart watches, smart cars, smart spouses; heard they are coming out with smart foods prepared by smart companies and spouses, or wait is that one out already - smarty pants out LOL..

Guillermou

Drugs are maintained throughout our planet, because many of those who are in power promote it, and participate in it, making us believe that they are against, and fight against them, however, let us not be fooled, a population drugged by vaccines and drugs, is much more manageable and manipulable and the TV and the media have done a lot of damage to the human being, showing to the satiety a need to be medicated, to maintain health, or to cure themselves of their chronic diseases. The only way, not to be a victim of them, is to stay away, having the wisdom, through the knowledge, of how the drugs destroy the human being.

Well-known paleontologist Peter Ward describes the future. Ward is the author of the book Future Evolution, besides being professor of science of the University of Washington. In his work, he assures that there will be overpopulation on the earth, with massive extinction of species. Most of the land will be occupied with crops (I think transgenic), because of the great demand for food that will be, and people will have to be crowded, in small spaces destined for housing. The only animals with the potential to survive extinctions will be: raccoons, owls, cattle, rats, snakes, pigs and crows. But these will undergo major changes to adapt to the new ecosystem, dominated by human waste. IT MAY BE THAT WILD ANIMALS ARE NOT MEDICATED WITH DRUGS OR VACCINATED.

Posted On 09/26/2017

Almond

Guillermo... so, maybe that helps explain why the number of people "squatting" in wilderness areas has been increasing? Not wanting to be crowded into small spaces and fed altered foods. The poor who are independent-minded seek options where they can live freely. The next issue will be keeping the forests free of GMO trees. Think of how our forests could be decimated by that (loss of trees to fire, disease, failure to reproduce from seed)... and how altering the forests would effect the wildlife that lives in forests.

Many areas are no longer forest ecosystems, but tree plantations where the same species of tree is planted in rows like row crops. The understory is eradicated with herbicides so that there is no weed competition. The elk have no weeds to eat that keep their bones healthy (esp. mullein) and suffer hoof rot disease--a terrible way to die, their feet and legs rotting off. The soil becomes contaminated. The best time to plant a tree is 20+ years ago, so get started. Recognize your own power. You don't need govt to plant a tree. Apple, plum/prune, sugar maples are terrific for homesteads--whatever thrives in your geographic area.

One more thing, if you understand the healing properties of trees and their essential oils, you will know what kind of forest to seek out when you are ill. Not only the aromatic oils given off in the vapors from trees. Also, understanding why certain food crops that grow in close proximity to certain trees may be incredibly potent medicines.

Guillermou

Almond, totally correct what you say. An example of what you say, is that sometimes, the need to eat, when there are no monetary resources, helps healthy survival. In Spain, the economic crisis has led to the transfer of land by the town councils, which have usually been cultivated, to obtain ecological products. Also many people have returned to their home villages, cultivating their lands in a sustainable way, fleeing from devastating tillage, and fertilizing with composite styecol.

In Spain, ecovillage is also being promoted. Living away from the hustle and bustle, stress and harmony, with the natural environment, is an option that arouses more and more interest, among those people, who want to break with the ties of the big city. We look for a lifestyle in community, alternative and sustainable. These three elements are the common denominator of ecovillages, a phenomenon that although it is not new, is gaining adepts in Spain. In this case, the merit is not only the economic context, but the ecological crisis, or energy dependency, which mortgages future generations, and against which many have already remedied, building new realities.

They also have space, diverse community settlements, alternative educational projects, or permaculture. They are usually small, self-managed communities that finance what they produce, and source what they grow. Its members share tasks and decisions. His interest has recently exploded in the heat of the increasingly widespread idea that another society is possible. Examples of eco-villages in Spain include Lakabe (Navarra) and Los Portales, in Sevilla. Yes, Almond, Eco-villages are able to spread, they could persuade the villagers of the whole world, live more ecologically, and thus be in harmony with ourselves, and with the planet.

It really is amazing humans have made it this far...How could something so good turn out so bad in such a short space of time, considering the gazillion of years we have been on this planet..Sometimes it feels good to just get out of this whole experience/experiment, just sit on the edge of the globe and dangle my feeties...Thank goodness for good food, wine, music and a few good people left, there's hope, we still might make it...Now not to stray from the topic of vaccines, well all's i got to say if anyone comes close to my family and i with that needle, i'll be sticking it right up, up, where the Sun never shone before...Smile and have a wonderful day, www.youtube.com/watch

I help you SEG, prevent the poison from being introduced to pregnant women and children. "If US children received all recommended doses of all vaccines, they would receive up to 35 vaccines that contain: 113 different types of particle germs, 59 different chemicals, 4 types of animal cells, and human albumin, coming from tissues of aborted human fetuses " "If you think you do not have to worry about vaccines, because your children are older you are wrong. There are about 20 vaccines, currently under development for launch in the coming years. All of them, aimed at children, adolescents and adults "

International Medical Council on Vaccination An example of this is the document entitled "Vaccines: get the full story" published by the International Medical Council on Vaccination in which 80 doctors from different specialties and teachers of Medicine in the USA alert about the risks of the vaccines and reject the official recommendations to the respect. http://***Vaccines_Get_the_Full_Story.html

Gui yes thanks for your input and help... There's no shortage of these poisons and they are developing more and more deadly ones.. Humans cannot outsmart bacteria, heck we are bacteria, trying to kill bacteria is surely committing suicide and that is what these weasels in charge don't seem to and likely will never understand..Bacteria outnumber us what more than 10 to 1 they will morph, re-group, re-cupe and hit us with the likes we've never seen - constantly ...We have been witnessing this now for a while, all of these antibiotic resistant bacteria where are they coming from...Bacteria are a very viable part of the Ecosystem, ALL types, they are there for a SPECIFIC purpose, so instead of trying to kill them we need to learn how they work, get to know them and work WITH them, not against as we have been doing...This is a loose, loose situation...And what is even more troubling to me is what else are they putting or HIDING in those vaccines....And why the very aggressive rate they are pushing them...Look at how many vaccines are being dished out to INFANTS, this is insanity beyond belief.. Humans are bringing on their own demise and it's being done in a very grand style...

Very well expressed SEG. The business of vaccines, can be described by these aspects:

- Pharmaceutical companies make billions of dollars in vaccines. It also creates a vicious circle, with the treatment of side effects and diseases caused by vaccines. These side effects of vaccines can cause illness for the rest of your life. Actually, there are many medications to treat side effects caused by vaccines
- Vaccines are the backbone of the medical system. Without vaccines, health costs would fall, because we would have a very healthy society overall. Pharmaceutical companies, insurance companies, and the medical system are enriched when people and animals get sick
- Vaccines do not give immunity for life, so there are the booster shots they recommend to their children. Each booster dose increases the risk of side effects

Gui yes this is big business for big pharma and if you think we have seen enough of this insanity this might come as a shock to you.. Just when we thought Statins drugs were bad and war on cholesterol was over, well it ain't... It turns out Big Pharma is doubling down on cholesterol drugs. They have found a new multi-billion dollar scam that would knock the sh!t outta us. As you know Statins have been a cash cow for the drug companies. Worldwide sales hit \$34 billion in one year. But most of these drugs have come to the end of their patents. Profits are starting to dip. Big Pharma needs another patent to replace them. So instead of statin PILLS they're developing VACCINES TO LOWER CHOLESTEROL- READ THAT AGAIN. And a brand new mouse study shows that one of these new vaccines can drastically lower cholesterol.

The study was published in the European Heart Journal. Researchers took mice that were bred to develop heart and vascular disease. They gave half of them shots of the experimental vaccine. The other half got a placebo. Then they fed them all a high-fat diet for 18 weeks. At the end of the trial, the vaccinated mice had 53% lower total cholesterol compared to the controls. Here's how it works... The vaccine targets an enzyme called PCSK9. It's naturally produced in your liver. PCSK9 keeps cholesterol in the blood. By blocking the enzyme, the vaccine allows cholesterol to be cleared from the blood. Madness indeed, have a read good people

Hi ALL -- This is where GREED Science shows itself - "Researchers took mice that were bred to develop heart and vascular disease." - that research trial was RIGGED right off jump street by manipulating "cause/effect" to establish a corollary thus "validating" the drug - at least in my book. I used to design epidemiology data mining tools [apps] and I know how "results" can be manipulated to produce any outcome. Anymore one has to employ levels of systems critical thinking to cut through the manipulated manufactured research results. I cut to the chase real fast - I track the money - generally speaking - every major university system in the world is receiving GREED Science money. I make it a habit to pay attention to Cochrane - very little gets by that outfit: [<http://www.cochrane.org/>]. Stay vigilant - be well my friends! LBP!

Yam there's no end to the crookery and madness..That is why i have decided long ago to be my own guinea pig, conduct my own clinical trials..If something works, fantastic, check mark, if it doesn't , a big X marks the spot and carry on,...Always keep moving, up, up, up...it is much harder to hit a moving target :) www.youtube.com/watch

Dr. Mercola, Thank you for bringing attention to this topic. Those of us on the front lines have been seeing happen with our own eyes for years. One practitioner I work with just says to wait until the second trimester to give the flu shot. What if it does more subtle damage later in pregnancy, which may be the likely scenario.

grulla

Besides miscarriages, one should also be concerned about birth defects from vaccines:
onlinelibrary.wiley.com/.../full

Posted On 09/26/2017

gtriber

grulla: those birth defects represent LIFELONG profit\$ for BIG PHARMA & BIG MED (can't 'bill' a dead fetus) ... from their p.o.v., whats not to like?

Informative article, and very upsetting. You don't know what's worse ignorance or greed? Unfortunately, most people have no idea what's been done to them, and blindly embrace what "scientists" and government recommend, even force them into. I commend dr Mercola and his staff for their work of educating the masses! One observation though: if these article would be more concise, shorter, and highlighting the main points, I'm convinced that more people would read them, would get educated, would get outraged, and would fight. I confess that quite often I just browse these articles, or skip them altogether, reading maybe only one in ten, and it's too bad.

Had a normal healthy pregnancy, a baby with a strong heartbeat, moving arms and all &, then I was given the flu shot, I was so apprehensive about it and trusted my Dr who's supposed to be the one of the best obgyn in the country. I felt horrible the two days after but thought nothing of it, a week later I went in for genetic screening I was finally on the "safe zone, second trimester" & the baby no longer had a heartbeat. Had every test under the sun ran, & all came back "inconclusive". I then came across several articles about the flu shot & miscarriage, & I am so regretting that I didn't fight against it more, I will not ever get a flu shot ever again.

This is what we already knew way back in 2006, this is from the venerable Dr. Yazbak and Dr. Ayoub:

Influenza Vaccination During Pregnancy: A Critical Assessment of the Recommendations of the Advisory Committee on Immunization Practices (ACIP)

Ayoub and Yazbak

www.jpands.org/.../ayoub.pdf

Regarding this latest study about H1N1 flu vaccines being associated with miscarriages, this response from JB Handley is very helpful:

medium.com/@jbhandley/devastating-flu-vaccine-miscarriage-study-sparks..

Posted On 09/27/2017

Den6328

The United States counts all miss carriages from the 3rd month on, countries listed ahead of us count no miscarriages or only from the 9th month on. Country #1 counts no miscarriages or still births until after 24 hours.

Posted On 09/26/2017

The annual flu vaccine sales pitch not only in the US but around the world is not working. Estimates of flu vaccine coverage in American adults show that Americans are becoming more, rather than less, skeptical. Vaccine injuries are not rare and are the most commonly reported and compensated. Everyone should retain the right to say NO to what goes into their body. A surprising scientific study published in the Proceedings of the National Academy of Sciences (PNAS) finds that people who receive the flu vaccine emit 630% more flu virus particles into the air, compared to unvaccinated people.

In effect, this finding documents evidence that flu vaccines spread the flu and that so-called "herd immunity" is a medical hoax because "the herd" actually becomes carriers and spreaders of the flu. "Anti-vaxxers" are responsible citizens because they do not eliminate viruses or spread diseases. While the CDC hired a marketing firm to write what looked like news articles but were actually ads created to persuade parents of young children and older people to get the flu vaccine, according to documents obtained by the CDC. The FOIA-requested contract specifies that the advertising agency will develop a wide variety of media strategies to convey the CDC/NCIRD message about flu vaccines (but not always on its behalf), including writing articles without branding for media distribution, spokesperson training, outreach to celebrities, social media.

media blitzes, social listening and monitoring, podcasting and more. Now that the Covid-19 "pandemic" is over, the pharmaceutical industry and its partners at the National Institutes of Health (NIH) are hard at work on a universal mRNA flu "vaccine" that they intend to push to the public. taking annually once completed.

Posted On 04/03/2024

Guillermou

To replace lost profits from out-of-fashion Covid shots, the corporate pharmaceutical machine hopes a new annual flu mRNA injection ritual will do the job, providing billions of dollars in new, steady profits. in the foreseeable future. The drugs are based on the mRNA technology used in Pfizer and Moderna's Covid shots. We have a bigger evil the combination vaccine targeting COVID and flu will move into a final stage trial in adults 50 and older this year after showing positive results in an early to mid-stage study. The biotech company hopes its vaccine, mRNA-1083, can gain regulatory approval in 2025. The mRNA-1083 shot generated a similar or greater immune response than two flu vaccines currently available from GlaxoSmithKline in the clinical trial from initial to intermediate stage.

Moderna's combination shot also produced an immune response similar to its bivalent COVID vaccine, which targets the Omicron BA.4 and BA.5 variants and the original strain of the virus.
