

## Guillermou

Excellent report that shows the serious damage that vaccines cause to our beloved children and by extension constitute true crimes against humanity while providing great benefits to the pharmaceutical mafia with the approval of government institutions. Recognition also to Dr. Suzanne Humphries for proving the truth about vaccines. She says "Vaccines did not save humanity and they never will." Like most doctors, I carried a blind belief for many years that vaccines were necessary, safe and effective. Vaccines are dangerous and should never be injected into anyone for any reason.

There are many more sustainable and benevolent solutions than vaccines -----1) Why vaccines are often contaminated with unknown viral strains and why the vaccine industry has covered up known vaccine contamination -----2) Why parents should be concerned about serious vaccine harms -----3) Why the "vaccines eradicated polio" fairy tale is a false mythology - here's what really happened. -----4) Why the smallpox vaccine has never been proven to be effective. -----5) Why the vaccine industry's research is extremely weak and ignores rigorous standards of scientific evidence.

The vaccine industry's outlandish and unscientific behavior is causing an erosion of credibility in all of "science." -----6) Why the vaccine industry doesn't test vaccines on unvaccinated children (they're terrified of the results). -----7) Why children caught in measles outbreaks are often the same children who were vaccinated against measles! ---8) Why vaccines can actually suppress the immune system and cause greater vulnerability to future infections.

## Guillermou

---9) Why many childhood infections like chickenpox are perfectly natural, normal, and even HEALTHY.

---10) Why many of the people pushing vaccines have financial ties to vaccine companies.

DR. PAUL THOMAS There is a reason why in 100 years of vaccinating children there have NEVER been any retrospective studies. They would PROVE 100% beyond a doubt that vaccines not only DO NOT prevent infections and transmission, but they also seriously harm children, especially in the case of allergies, middle ear infections, autism, respiratory problems, sinusitis, respiratory infections, eye infections, gastroenteritis, eczema, and behavioral problems.

Vaccines transform the immune system into allergy and autoimmunity, and there are more and more infections of other kinds. In short, what does this mean? It means that vaccines DESTROY a child's immune system, every vaccine is different with different live viruses and toxins and will really affect a child with a weaker immune system first. Rarely mentioned but critical is that every manufacturer of a vaccine, or any drug, **MUST** include adverse effects that can/do occur from the drug. Reading this section of a vaccine insert included with every dose of a vaccine is an encyclopedia of dozens of adverse effects including death, which this article does not mention. In fact, SIDS (Sudden Infant Death Syndrome) has been attributed to vaccination often occurring very shortly after injection. A few other facts: Vaccines are about 50% fillers, adjuvants and preservatives which are never studied. The more vaccines the greater chance of noticeable reactions as these drugs combinations have cumulative toxic effects, especially in the developing brain of infants.

In Japan they don't begin these drugs till a child is older, age 3 or 4 when their immune system has had some years to develop and the result is much lower neurological damage; ie, ADHD/ADD or autism! The pushing for drugging newborns in the US with increasing drug assaults over the first 2 yrs has been done for medical convenience as new parents are more likely to attend 'well baby' visits than when they are older and parents have developed confidence in their own judgement as well as time to do their own research on vaccine safety and efficacy. In fact the very idea of vaccination was a boon to employers who did not want women with children to have to lose work time if their child was sick.

That was part of the public marketing of vaccines--convenience for economic reasons, not health! The list of additional facts about vaccines and the culture that has been developed around their acceptance akin to a religious belief is long. The two doctors cited here, Paul Thomas and Suzanne Humphries have sacrificed their licenses and practices in order to speak out to inform the public and need to be heard along with numerous other medical practitioners and scientists like Michael Yeadon (ex-Pfizer VP), Andrew Wakefield, Peter McCullough (cardiologist).

And they want TAXPAYERS MONEY to fund this? What about the \$100 Billion that Pfizer got for selling that TOXIC PRODUCT?

## BookGal11

Notice there are NO APOLOGIES. EVER. I used to tell our kids that when they make a mistake, 1) own it. 2) Say you're sorry. 3) take steps to do better/correct it. Reagan was hesitant to sign away liability for vaccines. But when he was pressured, he made it dependent on the companies submitting all their research to Congress every two years. Guess what? Pharmaceutical companies ignored that requirement, and to date have never honored it.

Critical - Time to Crank Up the Street Heat! Just the Gut Speaking, but it appears the Panic-demic, the Jab, Fauci's & compadre's, chronic, psychopathic lying causing massive disastrous results for individuals health, but also the health of Humanity Worldwide Not stopping there but also, economic health and stability, our shared Social Needs, and the obscene use of the Jabs on those who should have been facing a future with far better health. With so much exposed to be seen with our own eyes seems to have backed the whole wolf pack up against the wall. As the article exposes, no time to rest on our laurels, time to crank up the street heat to back them further into a corner so they cannot use this admission and to recapture the narrative.

## Guillermou

Yes, Fauci and all the powers that have made vaccines a punishment for humanity. A humanity is ruled by globalist elites who mark a fascist state that classifies the good and trustworthy (vaccinated) and rejects the bad (unvaccinated), deserving of punishment. It is the world turned upside down to achieve the purposes of the WEF with the Great Reset. It is the passport of punishment for those who do not comply with the mandates of the deep state, of the Great Reset In his book, Orwell wrote about an all-powerful "surveillance state" of Big Brother that tracked everyone in real time.

Even at home, the government was always watching and manipulating. The technology that Orwell is established by authoritarian governments that obey the orders of the globalist elites are steps already taken by China and now emerging with force in the US and in the world. Lockdowns, vaccines and boosters failed miserably to fulfill their promise, this implies that the added punishment of passports is a fraud. [www.theepochtimes.com/the-holy-covid-trinity-unravels\\_4319725.html?utm..](http://www.theepochtimes.com/the-holy-covid-trinity-unravels_4319725.html?utm..)

(06/03/2022) But power continues to dictate its rules based on tyranny and in accordance with the idea of oligarchic psychopaths.

Governments around the world have promoted passports, a measure that represents an even greater risk to freedom, privacy and civil liberties. Now the World Health Organization will meet with member states and representatives of vaccine certification credential groups to discuss a global vaccine certification system. ## montie

This is no surprise, after having studied human vaccines for decades. My attention has been turned to pet vaccines, currently rabies, and taking a course on that one, now. Most states mandate a shot every 3 years; however, one shot lasts a lifetime and titers should be done after 5-7 years to be sure. The commercial vaccine is the same for 10 lbs as for 80 lb dog..Mercury's the adjuvant! Adverse affects happen in the brain, as well as organs. My dog got her one-year vaccine, then a year later, took her 3-year shot. The vet admitted that it was the SAME SHOT!!! \$omething i\$ going on with animal vaccines, and vet\$ are ignoring it!

## **bowgirl**

Thank you for revealing this. I suspected as much. The info about the rabies vax lasting for years to good to know. In Pa, house cats are required to get a rabies vax every 3 years. Technically I can not foster any more injured TNR cats until my personal outside cats are vaxxed again. The young ones had shots 1year ago the other has no intention of going near the intruders in the garage. The TNR cats come to me AFTER they have been fixed and given shots.... Having chickens we actively remove threats from predators, several species in the Rabies vector..

## **Antisandman**

It should be no surprise to anyone that corporate controlled capitalistic research and development is not focused on benefits to the 99%. Corporate controlled government is designed to benefit the 1% and to shield the criminals from suffering the consequences of their actions. We have at our disposal a very easy epidemiological way to determine the safety and efficacy of vaccines. Every school district has a record of attendance and a record of vaccinations. Take all the vaccinated children and their attendance records and compare them to the attendance records of those unvaccinated children.

A comparison will show the safety and effectiveness. No investment needed and it could be done on a very large scale involving 10s of millions or 10s of thousands over decades of records, depending on how deep one wants the study. Using statistical analysis the comparative safety and effectiveness of different vaccines could be revealed. We could do it ourselves without any outside help and on a school district by district basis.
