Serious Lupron damage caused by BigPharma and FDA corruption. Dr. David Redwine is a world-renowned endometriosis excision surgeon and has dedicated his career to endometriosis research. Dr. Redwine had access to Lupron's raw data when he was an expert medical witness in one of the lawsuits against Lupron in 2011. Dr. Redwine, while sifting through thousands of pages of raw data, produced a 300-page report for the FDA called Lupreulide, the D is Silent. Lupreulide is the name of the drug Lupron, and if you take away the D from Lueprolide, says Lureulie, it is in "lie," a play on words due to some of its findings listed below: The published data on Lupron did not always match the raw data: the published data hid important negative findings about Lupron, downplayed risks, and used misleading and deceptive graphs to make the data look more favorable.

Dr. Redwine's conclusion was that the potential benefits did not outweigh the potential risks and he asked the FDA to remove Lupron from the market immediately. In addition to the side effects one may have when taking Lupron, it can also cause long-term irreversible side effects even after stopping the medication. Andrew Friedman, who was a researcher who conducted clinical studies on Lupron, admitted to falsifying data in two Lupron studies, one of which was on the effectiveness and safety of Lupron with add-on therapy for endometriosis.

He admitted it in court, at trial. Some people report having permanent side effects from Lupron, some of which have reduced their quality of life or even left them disabled. In fact, there are groups on Facebook called "Lupron Victims" and "Lupron Survivors" because these people's health was severely affected by Lupron. insixteenyears.com/lupron .----- THE NATIONAL LUPRON VICTIMS NETWORK

Gui, this is the crust of the biscuit: A - child psychologist, said children don't understand the ramifications of the hormone treatment and surgeries, stating: "[It is] out of their developmental range to understand the extent to which some of these medical interventions are impacting them." Young children, to a lesser degree adolescents Are in Development. Very emersed in the Now with little life experiences to judge or reflect on. The imaginary, pretend can be all too real in their mental or emotional ranges. There can be no Informed Consent for the youngsters who are being heavily influenced by Pop Culture and messaging sourced by those with powerful influence, and agendas. As we are seeing their protectors, parents, caregivers are being shut out of the loop in some places, so there is no Informed Consent, there is heavy handed policies based once again on slick messaging muddying the true nature and cost of such things.

Should a person be of age and fully able to understand just what they are choosing, then that is their business. With so many health offenders throughout our current environment, many being gender benders, reproductive blockers in and of their own, to foist puberty blockers on those most unable to defend themselves is icing on a Dis-Eased Cake focused on all the wrong things yet having the ability to promote it all as being anything other than what it is.

Yes Just and everything under the tutelage of the corruption of the large corporate elites is destroying our societies. Excessive wealth is a symptom of an economic system that drains wealth from everyone else, because the largest companies have enough power to exploit employees, suppliers, customers, governments and the environment. These people have not "earned" their wealth. They got rich because they understand how the system is rigged. www.globalresearch.ca/excessive-wealth-disorder-destroying-societies/5.. .-----Most Americans barely know the true 110-year history of the FDA, and for good reason, they don't want you to know it. Regulate everything from food and tobacco to supplements and prescription drugs; From over-the-counter medications and veterinary products to electromagnetic radiation devices and blood transfusions, the FDA has its hands full, not to mention regulating vaccines and biopharmaceuticals.

The FDA in 2008 began sending employees to foreign countries, including India, China, and the United Kingdom, to name a few. This is all thanks to Congress. Over the decades, the FDA has attempted to destroy all forms of comprehensive care in the United States that compete with drug treatments and vaccines. This link exposes FDA data and the chronology of corruption. www.truthwiki.org/fda-food-and-drug-administration

This is the drug that multiple doctors recommended to me for decades as a "cure" for endometriosis pain. I'm glad I did some research on it first and REFUSED to take it When I would tell doctors about the horrible side effects that I found, they either acted surprised (because they did no research at all before subscribing it), or they did not care at all.

Can we also talk about the side effects of transgender surgery and skin flaps that don't heal , even in the best meticulously trained surgeons . And yes Lupron has lots of issues , used short term , may have limited benefits. .
