Gui, this is unfolding like the most terrifying horror movie ever made, followed by sequels each more terrifying than the last. Bad enough all the damage caused or possibly caused by the Spike, but shedding prions and one doesn't even have to have had the Jab. Depopulation accomplished? Serial Killers doesn't cover it. Crimes against Humanity falls short. What the N*** Party did seems like rank amateurs, the Gang that Couldn't Shoot Straight. Is this going to be the Perfect Crime Nat has expressed, because at the end there will be no one left who remembers who they were, or what happened? No need for coverups - there will be no one left. I told you so is lame compensation.

Thanks, Gui for the many links to early warnings of vaxed-caused prion diseases. Now we know it's also a shedding-caused disease. So, being unvaxed is no absolute protection. Prion diseases are airborne, so carriers are more dangerous than leprosy carriers. Leprosy is a bacteria that takes hold in our bodies very slowly, and progresses very slowly, and is curable. And is difficult to contract, as our bodies can combat it fairly well if we have a strong immune system. I'm not sure we have any of these advantages when exposed to prion disease via shedding. Until we have more data on how strong the contagion is, I think staying away from close contact with others may be a good rule. How close is "close"? That is the question. Certainly, breathing "common air" is what exponentially magnifies the threat here. Maybe we will all develop "elevator paranoia" for a while until we know more. Alan845's case notes are worth reading a few times.

Renowned molecular geneticist Dr. Michael Nehls has a theory. He has extensively studied the effects of COVID-19 mRNA vaccines on the brain and believes it is the way these vaccines affect our minds that made governments so eager to apply them to their populations. He recently sat down with Tucker Carlson to talk about his book, *The Indoctrinated Brain*, and how these vaccines are affecting people's minds. He explained how both the vaccines and the virus itself (which was engineered in a lab, funded by the Chinese government, and funded in part by the US government) are vital components of a widespread attack on the human brain that seeks to crush the individuality associated with Minds.

clear and healthy. Dr. Nehls stated that thanks to the brain alterations this causes, "we can be conquered, and we would even accept it." He also believes that "it is not about health, not even about money, but about conquering the human mind." expose-news.com/2024/04/04/mrna-covid-injections-is-about-the-human-mi.. (04/04/2024).-----

Dr. Sherri Tenpenny joined Health Ranger Mike Adams on the "Health Ranger Report" to explain vaccine damage mechanisms for COVID-19 shots; in other words, how dangerous injections harm the body. Tenpenny and her associates held an educational webinar in May 2021 sharing these first 20 mechanisms, which was attended by thousands of people. A second webinar followed in July 2021, in which she addressed 20 more mechanisms of injury caused by COVID-19 injections. According to the host of "The Tenpenny Files: On Your Health" on Brighteon.TV, these vaccine damage mechanisms alter human cells. They also affect the cardiovascular, central nervous and neurological systems, among others.

He also said: "We saw personality changes in people who received two vaccines and a booster." These people, she added, were no longer the same after being injected. "Some of them became unable to relate to others, while others lacked empathy." Tenpenny also told the Health Ranger that all the recent studies and news addressing injuries caused by the COVID-19 vaccine were not new, as what authorities did was simply bury them and ignore the reality of what was happening during the last three years. . "They were just buried, you just had to investigate to find them," she continued.

The largest global study of COVID-19 vaccine safety to date, conducted by the Global Vaccine Data Network and published in the journal Vaccine, analyzed data from 99 million vaccinated people in eight countries, looking for 13 medical conditions considered "events." adverse events of special interest. " According to the study, people who received the first to third doses of mRNA vaccines, including those from Pfizer Inc., BioNTech SE and Moderna Inc., had an increased risk of myocarditis, an inflammation of the heart muscle. The largest increase was seen after a second dose of the Moderna vaccine. Additionally, the first and fourth doses of the same vaccine were linked to an increase in pericarditis, or inflammation of the thin sac that covers the heart.

Gui, I can personally attest to what you laid out in the last paragraph. I was diagnosed with Multiple Sclerosis in 2019. My lesions were in my brain. I changed my diet (Wahl's Protocol) and exercised. Over time, I could feel my body and brain heal itself. I worked in a major hospital when COVID struck a year later. In order to keep our jobs we were required to obtain all three jabs or be terminated from employment. (Before anyone throws stones, I needed my job as it helped with bills and food.) I was tremendously sick with each jab. Finally, I said "No more and no thank you." Word and memory retrieval has become a huge issue for me. I am constantly exhausted. I do try to exercise, but I am wiped afterwards. I also have a cardiac arrhythmia. All of this started after the vaccines. I often wondered if there were prion-causing agents in this vaccine. Now I know. I just wonder if it is too late to institute any of the protocols Dr. Mercola has listed.

Yes Sue and with more profitability for the chronic patients caused by the “vaccines” and the creation of the C-19 virus. In an interview with Dr. Ghislaine Lanctt, author of the book “The Medical Mafia”. Asked who is part of the medical mafia, she said: “At different scales and with different implications, the pharmaceutical industry, the political authorities, the large laboratories, the hospitals, the insurance companies, the Drug Agencies, the medical associations, the doctors themselves. , the World Health Organization, the UN Ministry of Health and, of course, the world government are in the shadow of money.” The pharmaco-medical industry, gigantic and all-powerful unscrupulous companies, enriched at the expense of people's illnesses, not health, associate with public organizations by introducing blackmail, bribery and bribery in their techniques.

Although the law expressly prohibits giving any type of gift to doctors, medical sales representatives, pharmaceutical salespeople, buy from doctors in exchange for benefits, in order to sell their medications, which the doctors dispense to their patients. The strategy consists, in short, of having chronic patients, who have to consume all types of palliative products, that is, to treat only symptoms, medications to relieve pain, lower fever, reduce inflammation... but never drugs that can heal. to the person

Yes, prion diseases are invariably fatal neurodegenerative diseases of humans and animals that attracted global attention after the detection of an outbreak of bovine spongiform encephalopathy and its transmission to humans causing a variant of Creutzfeldt-Jakob disease. The agent that causes prion diseases, called a prion, is an abnormal conformer of a host-encoded cellular protein known as a prion protein. The fundamental event in the appearance of prion diseases appears to be the conversion of the cellular prion protein into a pathogenic prion.

Transmission of prion diseases within the same species has been widely documented in sheep, cows, deer, and humans. Modes of such transmissions include consumption of contaminated food, accidental inoculation through medical or veterinary interventions, close animal-to-animal contact, and transmission through environmental contamination. Depending on the host species, these transmissions result from exposure to secretions or tissues known to harbor the infectious agent, including the brain, spinal cord, lymphatic tissues, saliva, and blood.

link.springer.com/referenceworkentry/10.1007/978-1-4939-9544-8_47-1 (2024).----- With nearly 2.5 billion worldwide already injected with spike protein bioweapons, and with nearly 200 million Americans in a global medical experiment that puts the survival of humanity at risk, hospitals may be overwhelmed by multiple diseases including long-term, slow-acting neurological damage with a prion-induced protein folding disorder that irreversibly destroys brain tissue. www.brighteon.com/c5c1cbfc-0b83-4231-8c46-9f586b407be5

Prion disorders exhibit, in part, incubation periods, neuronal loss, and induce abnormal folding of specific normal cellular proteins due to increased reactive oxygen species associated with mitochondrial energy metabolism. These agents can also induce memory, personality, and movement abnormalities, as well as depression, confusion, and disorientation. Interestingly, some of these behavioral changes also occur in COVID-19 and mechanistically include mitochondrial damage caused by SARS-CoV-2 (or as reported in other reports by C-19 “vaccines”). and the subsequent production of reactive oxygen species.

Taken together, we hypothesize that, in part, long COVID may involve the induction of spontaneous prion emergence, especially in susceptible individuals whose origin may explain some of its manifestations following an acute viral infection. link.springer.com/.../s10571-023-01342-8 (2024).---
-----The short-term vascular effects of blood clotting from the Covid “vaccine” progress, damaging the blood supply to organs and tissues. All of this can be enhanced with toxic environmental pollutants, those that enter the diet, as well as manipulations to biology, vaccines, 5G, pesticides such as glyphosate and persistent organic pollutants.

and prions, cardiovascular and neurological diseases and cancer will be the true pandemic of the future. Dr. Chris Shaw, an expert in neurology and elemental toxicity, warned that accelerated and widespread neurological damage is now a very real possibility as the spike protein and mRNA particles cross the brain barrier. thehighwire.com/videos/neuroscientists-concerns-about-covid-vaccines/

Dr. Bhakdi was one of the first top global doctors to warn about the deadly and debilitating effects of the CV19 vax. He was right. Dr. Bhakdi says there is proof that if the injections reach the heart or the brain, they will be damaged beyond repair. Dr. Bhakdi brings up one autopsy that found this and explains, "In multiple parts of the brain in this deceased man, the doctor found the same thing. . . . He found the damned spike proteins in the smallest capillaries of the brain. . . There is no repair because what the doctor found was these small vessels were attacked by the immune system and destroyed. The doctor found irrefutable evidence of brain cell damage of cells that are dead and dying. This poor fellow died because his brain cells were dying.

. . . The same patient that died had this multifocal, meaning at many different locations, necrotizing, meaning dying, encephalitis. . . . He had typical things being seen now in people post vax. They lose their personality. They lose their minds. They lose their capacity to think. They become demented. They can't hear. They can't speak. They can't see. They are no longer the humans that they were. They are destroyed human beings. Their brains are destroyed. The doctor found something so terrible he had to publish right away COVID-19 VAX DESTROYS HEARTS & BRAINS OF BILLIONS OF PEOPLE DR. SUCHARIT BHAKDI www.globalresearch.ca/covid-19-vax-destroys-hearts-brains-billions-peo.. (2023)

A review article, recently published in the journal *Phytotherapy Research*, definitively shows that curcumin is, in fact, a potentially (and mostly proven) very powerful therapeutic in the treatment of both COVID and prion disease. Vitamin D and Curcumin are perhaps the two “desert island” supplements that I would definitely select. Additionally, curcumin has strong antiprion properties. Since we are not only attacked by the prionopathic properties of the Spike protein, there are other threats, such as the now confirmed transmission of chronic wasting disease from deer to human in a hunter who consumed an infected deer. This makes curcumin even more critical. Studies conducted on the antiprion properties of curcumin are well documented.

The considerable body of existing literature has shown that curcumin prevented PrPsc aggregation, decreased amyloid fibril formation, disaggregated alpha- and beta-amyloid structures, delayed the onset of fibril formation, and slowed fibril growth. An experimental study in the animal model illustrated that mice treated with low, but not high, doses survived longer than untreated controls. Compaction studies targeting abdominal fibrils by curcumin also revealed acceptable coupling scores. CURCUMIN AS A NATURAL POTENTIAL DRUG CANDIDATE AGAINST IMPORTANT ZOOONOTIC VIRUSES AND PRIONS: A NARRATIVE REVIEW [onlinelibrary.wiley.com/.../ptr.8119](https://onlinelibrary.wiley.com/doi/10.1002/ptr.8119) (04/12/2024).--

In an article by Dr. Mihalcea she reports that she is now detecting these structures in the blood of unvaccinated people, as well as in those who received the injections. She believes this is due to "shedding", the diffusion of nanoscale components from injected people to non-injected people. Dr. Ana explains that these abnormal clots appear to consist of amyloid or prion proteins: ----1) Various proteins can form amyloids, which are ordered aggregates of protein fibrils. Some amyloid proteins are associated with diseases such as Alzheimer's, Parkinson's, and Creutzfeldt-Jacob disease (CJD).

----2) Prions are infectious proteins. The protein molecule can misfold, creating a template that allows self-replication. CJD is an example of a prion disease caused by an amyloid protein. A serious concern with gummy clots that develop in people's blood vessels is that they cannot be dissolved by conventional blood thinners. Interestingly, however, the hydrogels appear to bind very strongly to the methylene blue (MB) molecule, and MB can be excreted through the kidneys.

The discussion of prions, their ability to be transmitted from vaxxed to unvaxxed, and their effects on the body are particularly interesting due to my unvaxxed wife dying of multi-organ abdominal cancer in January 2024. During summer, she enjoyed driving cruise ship passengers to local tourist venues close to Tauranga, New Zealand, in a small minibus, spending several consecutive days over a 5 month period in close proximity to vaxxed passengers. She also had vasculiitis, an autoimmune disease for which she was prescribed immune suppressant medication. Looking at her blood test results for the last 4 years, her lymphocyte count was normally 0.8, lower than the expected 1-4 range, due to her medication.

In the summer of 2020-21, when there were no cruise ships, this level remained at 0.8. However, during the following two summers of 2021-22 and 2022-23, when cruise ships returned, her lymphocyte count dropped by 75% to 0.25, returning to 0.8 once the season ended. In the most recent summer, 2023-24, her count dropped again to 0.25. I strongly suspect that the first summer she was infected by prions or some other shed particle from the passengers, which caused her cancer to begin to develop.

It was then held in check by her more robust immune response during winter or 2022 but grew again the following summer until it finally killed her in January this year. I am fully aware that this is circumstantial evidence and that correlation does not constitute causation, but I believe that it could very well have caused her death. I have found one other reference to a death with similar causes, and I would be very interested in any comments relating to other examples of shedding being temporally or spatially related to death by cancer or any other means.

I am sorry for your loss,

Posted On 04/29/2024

stoneharbor

Thanks for your detailed story Alan. I am a total believer in the "viral load" effect on contracting any virus. While at the beginning of Covid, there was undue concern with contraction from "surfaces", it soon became obvious that the real threat to contamination was from airborne virions, and the more dense the occurrence of the particles in the air, the more likely one would breath enough to have a detrimental infection and not just an asymptomatic case. I think your theory that the same thing happens with prions is believable. That is, the "load" in the air determines the threat. I also believe your evidence that the immune system is critical in protecting us, somewhat.

I'm sure our immune systems are what kept many people asymptomatic from Covid before the vax ever further weakened all immune systems subjected to the vax's threats. Once 2/3 of the world's population was given some number of jabs, that part of the world was weakened forever as far as immunity goes. And this means, all those people are more subject to lasting infections of all types, not just a prion-related disease. Thanks so much for your effort to inform others: closeness to contaminated individual should be considered a continual threat until we get credible evidence that this whole situation is finally blown away from us.

Yes, may not be easy to overcome your wife's experience. This does not make anything easier, Atty Tom Renz said his wife has cancer (unrelated to the shots) in this discussion with Sasha Latypova on a recent Dr Drew show - (you will want to pay attention to several cancer bombs Sasha dropped, one on FDA guidance written in 2013 and again in 2015 on the use of mRNA): "Is mRNA a Vaccine or Gene Therapy? Why Does Dr. Drew Still Vaccinate Elderly Patients? w/ Tom Renz & Ex-Pharma Executive Sasha Latypova Ask Dr. Drew" - - [rumble.com/v4rdqv5-is-mrna-a-vaccine-or-gene-therapy-w-tom-renz-and-ex..](https://www.rumble.com/v4rdqv5-is-mrna-a-vaccine-or-gene-therapy-w-tom-renz-and-ex..) - - about 1.5 hr. long.

Posted On 04/29/2024

Guillermou

All as a consequence of generic therapy. "MRNA is a gene therapy product and the only reason anyone is questioning this is because big pharma paid off enough scientists to lie about this being a question. Pfizer, Moderna, and many other big pharma gangsters have acknowledged this in the past but Google has done everything possible to scrub it from the internet. While I have an immense amount of documentation on this from various sources I'm going to focus this article on a single Moderna document that I think provides enough evidence, on it's own, to end this "dispute" which would not even exist if the corrupt media and fact checkers were not bought off by the same money as the corrupt scientists." "The risk factors to Moderna discussed throughout this document are shocking and most of the biggest come down to the risk of developing and getting approval for a new category of drug that has the potential to permanently alter your DNA and is already considered a gene therapy.

The actual development cycle for this type of drug would be in the vicinity of 10-20 years and that is for good reason.

The idea of putting something in your body that could permanently change the building blocks of your humanity (your DNA) is a very big deal and exceedingly complex but but let's not overlook the fact that Fauci and others were involved with Moderna and likely receiving royalty payments. This was the key to what occurred." tomrenz.substack.com/p/mrna-its-a-gene-therapy-and-they?utm_source=pos..

OK, brace yourselves. I'm about to say something within this atmosphere of prejudice that almost everyone here will want to push "out of sight" and to the bottom of the stack of comments. To set the stage, we've all noticed that those who got the jab, especially more than one jab, tend to avoid all conversations on the subject of side effects. They protect themselves by just turning a deaf ear to this type discussion. Well, we now have the "contagion" factor when we talk about shedding, so we are now all back in the boiling pot. So I am going to just state the obvious, but uncomfortable fact that the best solution to avoiding shed prions is to stay away from other carriers, including all people, but also all other breathing shedders such as pets.

Short of being able to do this, yes, we better all look at the FLCCC information on how to treat ourselves for possible contamination from shedded prions. That's here: covid19criticalcare.com/reviews-and-monographs/covid-mrna-vaccine-shed.. But I just want to mention that there has been, (now being revealed), a "more safe" way to have lived through this threat of shedding, and some of us have managed that, through no brilliant thinking on our part, but just by chance: That is, some of us may happened to have lived separately from all other people, since the shots were first given in 2021.

Some of us have lucked out and had a very minimal exposure to shedding. Let's face it. Those are very lucky people. If you are one of these people, you can thank your lucky stars. I think we need to acknowledge that these people exist, and have a very strong right to avoid contact with shedders, and I want to encourage people in this lucky situation to continue to protect their health. For the rest of us, I think it's good to realize that a plan of "avoidance" of close contacts with others should not be stigmatized. If we have to be close to shedders as part of our life, we should not try to force others to do the same.

Posted On 04/29/2024

stoneharbor

As of this Dr. Mercola article, I think it is well advised to not start acting like those who were vaxed and who tried to get all other people to be vaxed. We should allow people who find they have been spared exposure to other people to keep their exposures as low as they wish. We have no idea at present how many years a "shedder", whether vaxed or not, will continue to be a vector for this prion-causing disability. I think we should be careful ourselves, but allow others to be even more careful if they wish and are able. My personal case is a relatively lucky one.

Though I lived with an unvaxed person during 2020, and contracted 2 different cases of Covid, including the Delta variant that year, I moved and lived alone from the very beginning of 2021 until the present, with very rare occasions of closeness to other humans since that time. I consider myself relatively lucky. But I have always enjoyed dancing, and did contract the Delta variant from a dance I attended late in 2020, and feel I may have picked up some shed material in 2021 from a group dance lesson I attended, as I had recurring head aches for a few weeks after that event, when my history with head aches before that was, they were very rare, and never lasted longer than 1 or 2 minutes.

Since that time, I don't have any other symptoms of having been exposed to shedding, but from what we know now, the proof of being infected can be delayed for years, and possibly the best preventative is to just treat ourselves with Ivermectin, regardless of our supposed risk. I really look forward to more information on prevention in the future.

Just find out what the evil perpetrators are taking. They surely wouldn't have released such a contagion on the world without a guaranteed protection for themselves.

Posted On 04/29/2024

Glastian

There seems to me an obvious angle that is never discussed. The perpetrators of this evil, and their unjabbed corporate collaborators, don't appear to be too concerned about shedding and participating in life alongside the jabbed. Confident that they won't suffer the effects of their own poison? It has ways been my contention that whatever they unleash on Joe Public, they already have an antidote; surely this has to be the case, surely they can't be so stupid that they will take themselves down with the unfortunates? And if these antidotes do exist, the culprits need to be made to reveal them. Then hung, big time, no question.

One would think they would have an antidote for such a thing. Especially when more than a few had more than enough information based on past history of the tech, those behind it would Cover Their Own A***. But then again, there is plenty of evidence they appear to be NUTS!

Posted On 04/29/2024

Yes. Early in C-19, scientists discovered that antibodies that attack the organism rather than the pathogen—called autoantibodies—are important in the presence of Covid. Those people who had autoantibodies that fight interferons, a key component of the body's immediate response system to pathogens, before encountering the coronavirus were more likely to suffer complications or die from COVID-19. About 10 percent of patients with severe cases of Covid, most of them men over 55, had these antibodies, compared to just 0.3 percent of the general population. Since then, dozens of studies have found autoantibodies in people who have had COVID-19.

Up to half of people who have had the disease carry antibodies that can alter the immune system and create autoimmune reactions. Reactions that can also be caused by vaccines.

www.nytimes.com/es/2023/11/27/espanol/virus-autoimmune-covid.html (11/2023).---- Long COVID (LC) encompasses various symptoms that last months after the initial SARS-CoV-2 infection. Although the symptoms of LC are well described, the etiology of LC remains unclear and, consequently, patients may be underdiagnosed. This scoping review describes the molecular and cellular biomarkers that have been identified to date with potential use for the diagnosis or prediction of LC.

[www.thelancet.com/.../PIIS2352-3964\(23\)00117-2/fulltext](http://www.thelancet.com/.../PIIS2352-3964(23)00117-2/fulltext) (2023).---- Inconsistent and variable differences in viral load, viral shedding, and secondary attack rates between vaccinated and unvaccinated individuals, especially during omicron predominance, suggest that COVID-19 vaccination is unlikely to prevent a relevant proportion of transmissions to contact persons, taking into account the relevance of the immunological status of the contact population.

Glastian, I think you give too much credit to the elite. This "vaccine" was no way investigated carefully enough. That is obvious. There have been so many diseases now that cropped up after the "real test" was conducted on the world population. I'm sure that many if not most of these are truly unintended consequences. I don't mind hanging some people for releasing a drug that was not properly tested, but to think that each and every illness that we can now trace back to this vax was known from the inception of releasing the injections? That is giving far too much credit to evil minds. No, the evil was the carelessness, not the fact that someone designed a vaccine that had all these hundreds of side effects. That's too difficult to put together. Why go to the trouble? Just develop something that hurts the immune system, and you already have an (evil) successful vaccine that does nothing, but enriches the pharma industry. That's my take on this.

Posted On 04/29/2024

Seriously, is the solution avoidance? That is a medical tactic. Not all exposed get sick. What is the difference in those unaffected? That is where the healing power lies. This is witnessed in every epidemic. Not all sicken. The mainstream medical approach is to go to war with the dis-ease. The alternate perspective is called Salutogenesis, the focus on those factors promoting and restoring health. This is where the miraculous happens.

Posted On 04/29/2024

HeySeuss

Just wanted to comment that I searched for articles re your comment that prions are airborne. Couldn't find any info on that occurring outside of a lab. A study where aerosolized prions were sprayed around mice was 100% lethal. As a bioweapon, I don't see a future for it yet. It needs tweaking in terms of speeding up the desired result, which is death. Mad scientists are probably working on this and on other bioweapons. The flaw I see in all bioweapons is they get out of control with variations and mutations. Reliable remedies haven't been developed for the original version of the weaponized disease and variations/mutations occur too quickly to keep up. IMO, the Bill Gates' of the world will circle back to executions via guns as more efficient and less deadly to them.....that is, if we all survive their science experiments using diseases for population reduction

Personally watched a healthy vibrant woman of mid 70's go from one who had some memory issues to being put in a home within three months after the jab. Now she's been transferred to full memory care home. It has broken so many hearts to see this. But there were clues on the jab causing (developing) dementia over two years ago. Every single day it seems like I am so thankful that I did not get jab, did not lockdown, that I lived in a state that didn't lose its mind totally (a little lost but totally). Church family where hardly anyone got the jab. I a, also thankful for the comments and care here and from Children's Health Defense.

I learned about prion disease from my wife who refuses to have anything to do with consuming any wild game related to rodents (squirrels). Her knowledge of this is hands on (tribal knowledge) from working with rodents in the lab for decades. Her specialty is Immunology, but she doesn't work with vaccines. She studies autoimmune diseases. Rheumatoid Arthritis is her #1 area of study. She uses viruses like the Adenovirus to transport mRNA instructions to the areas of the body that have the autoimmune symptoms (gene therapy).

Mysteriously, she has lost a lot of lab mice/rats from Prion Disease. I don't think she ever made the connection between mRNA and Prion Disease. I think she thought rodents were just inherent to having this disease. I told her I've never witnessed a squirrel or any other rodents behaving like they had a neurological problem. I would be seeing a lot of squirrels falling out of the trees! Somewhere in between lies the truth and I believe the blame falls on Big Pharma! Leave programming our cells to GOD!

Posted On 04/29/2024

grulla

Say "jim", thanks for posting about squirrels possibly shedding prions, as I just suggested the other day to hunt them for food and pelts. Where I live, I must have the worst squirrel strain of all, ground squirrels, which can also climb trees under duress, as my dog once proved a few years ago. Most ground rodents are well known for various ticks, lice, and whatever, and some people have been known to pour tick powder down rodent holes in hopes to curtail that, something I don't believe will cure any prions directly, but maybe prevent???. Thankfully, my 16 Y.O old female wirehaired Griffon pointer has gotten too old to chase critters anymore. That appears to be the same hunting breed that S.D. Gov. Kristy Noem is defending herself on this morning's news for shooting a wild and unruly 14 month old wirehaired pointer puppy, which is a breed not well suited for being house pets as seen on a few TV ads, and needs to run outdoors where today they could possibly attract prions.

The list of neurological diseases linked to the injections is a long one and includes Motor Neurone Disease. I have read that there has been a 16.5% increase in MND, although I don't know how that figure could be established. A friend was diagnosed in February and given three years but the progression of the symptoms is alarming and I doubt that he will survive that long. He is 56 and has a wife and teenage son. The number of friends and acquaintances in my age group who have succumbed to dementia in the past two years is horrifying and, even more alarming, is that no-one makes a connection. So far it's been the perfect crime.

Posted On 04/29/2024

Dr. Bhakdi says there is proof that if the injections reach the heart or the brain, they will be damaged beyond repair. Dr. Bhakdi brings up one autopsy that found this and explains, "In multiple parts of the brain in this deceased man, the doctor found the same thing. . . . He found the damned spike proteins in the smallest capillaries of the brain. . . . There is no repair because what the doctor found was these small vessels were attacked by the immune system and destroyed. The doctor found irrefutable evidence of brain cell damage of cells that are dead and dying. This poor fellow died because his brain cells were dying.

. . . The same patient that died had this multifocal, meaning at many different locations, necrotizing, meaning dying, encephalitis. . . . He had typical things being seen now in people post vax. They lose their personality. They lose their minds. They lose their capacity to think. They become demented. They can't hear. They can't speak. They can't see. They are no longer the humans that they were. They are destroyed human beings. Their brains are destroyed. The doctor found something so terrible he had to publish right away www.globalresearch.ca/covid-19-vax-destroys-hearts-brains-billions-peo.. (11/01/2022)

A serious consideration is Protomorphogen therapy. Also, some more current research has been suggesting that the trace mineral Lithium (deficient in the food chain), may be helpful in clearing brain debris. See The Promise of Lithium, Dr Guttoso MD. www.promiseoflithium.com I have been using for a few months and there seems to be some improvement in my symptoms of a microvascular brain ischemia. The use of Lithium nutrient is not new. If I recall I was first introduced to it by Jonathan Wright MD about 50 years ago.

Yes, Jonathan Wright recommended low dose Lithium for cognitive maintenance years ago. Dr. Michael Nehls also enthusiastically recommended the same in his Tucker interview based on his many years in alzheimer research. I've been meaning to order the book. Great you're seeing results. I'm back to using it again after a decades long hiatus. The work and dedication it takes to try to stay current with research drives me, maybe most here, as much to beat the diabolical ones at this game, as health maintenance. That's to say, just don't let the whatever species of evil they are win - or better yet, prevail and thrive against all odds.

So much happened when my husband was in the hospital including he got a staph infection and personality changes he never had before. I tried to get up with Renz Law but they never did reply to my emails or phone calls. I guess they have more cases than they can handle? He didn't have any of the covid vaccines but I am sure some of the hospital staff did AND I need to get the records because I THINK they gave him a flu shot after he said to them "no vaccines". I even have a witness to some of their neglect. I didn't find the witness, they found me.

You've brought up a very important point. Between those in the Medical Profession who got fired or those already dead can not answer questions for sure. As this has progressed as badly as it already has so far. How bad is it going to get when basically the vast majority of not only the Medical Profession was coerced into taking multiple Jobs, but Academia, Military Personal, Law Enforcement, our Youngsters and Young Adults continue dropping like flies sprayed with DDT? A hostile enemy would have a hard time finding anything to compare to this hollowing what has been left of what has already been dismantled in Industry, Farming, and so on.

Yes, Dr.Ginge, good doctors and scientists are persecuted by the globalist elite, the Pharmaceutical Mafia and their government allies. Also, an Assembly (AB) bill introduced in the California State Legislature seeks to penalize doctors who promote "misinformation" about the Wuhan coronavirus. The proposal also calls on the state medical board to go after such doctors and expedite complaints filed against them. Vaccine injury and epidemiology expert Dr. Meryl Nass, a member of CHD's scientific advisory committee, denounced the proposal as "an attempt to legislate...what is true and what is misinformation," and medical providers have to " follow that definition to the letter." She compared the intent of AB 2098 to that of the Ministry of Truth in George Orwell's novel "1984," adding that it seeks to "enforce a single truth." www.globalresearch.ca/california-bill-would-punish-doctors-who-promote.. Also. Researchers in Japan have found that cancer mortality is especially high after a person is "vaccinated" against the Wuhan coronavirus (COVID-19), and especially after receiving a third "booster" dose. John Campbell, PhD, recently discussed the peer-reviewed study on his podcast; watch it below. He discussed what he reveals with Angus Dalgleish, professor of oncology at St. George's, University of London. Campbell noted from the study findings that increases in all-cause mortality increased in Japan from 2021 to the present. The study was conducted in Japan, so it focused only on that country, but the findings can almost certainly be extrapolated to the United States and other "fully vaccinated" countries as well. childrenshealthdefense.org/defender/john-campbell-japan-data-covid-mrn.. And there it is. My spouse took both Pfizer shots at work, under pressure. Two days after the second shot he couldn't recall his work hours, his duties. He was evaluated twice that same day, Occ health and his PCP, both found him suffering from moderate dementia. A neurologist sent him for brain scans, which showed no evidence of strokes, dementia. That was three years ago. His dementia is progressing. Nice to see an acknowledgment of what caused it, as none of the physicians could figure out what happened to him. (insert rolling eyes here) So, as an unvaxxed spouse, what can I do to avoid getting it?

Posted On 04/29/2024

abe5680

Well, I DID read the phrase "doctors are baffled" many times throughout these past years. This, sadly, does not surprise me at all. Many suffer such terrible cognitive dissonance also, which prevents them from LEARNING. You cannot fill a cup that is already full. I'm sorry to hear about your spouse. It's very tricky to deal with at times, so hopefully you are taking some time for YOU. Best wishes. I feel that the jabs aren't necessary the ONLY culprit, but there most certainly appears to be a massive epidemic, or possibly PANDEMIC of dementia starting at the moment. It's very sad and a particularly cruel disease.

A high school friend took 2 shots of Moderna in 2020 and last year developed a very rapid heartbeat of 170. At 62 years old, he had cardiac ablation to correct the problem. One month ago he lifted a heavy tool box and injured his shoulder. It was then discovered that he had Stage 4 Cancer in his lungs, spine, and throat. He was seeing a doctor regularly, getting blood work done every 6 months. The cancer was undetected or grew within his body as a Turbo Cancer. The hospital is not giving him any hope of survival and has sent him home after 10 days. He is fed through a direct tube to the stomach, has a Fentanyl patch and takes a cocktail of drugs every 4 hours. From my understanding, if/when he chooses to do chemo at this point, Ivermectin would be necessary to give it any real chance at working to slow down the cancer. I will pass this article on to him, and I thank you Dr. Mercola.

Posted On 04/29/2024

abe5680

Getting straight on the Ivermectin would be a great idea, imo. A slightly different drug is Fenbendazole, I think it was called, which is a dog dewormer! There was an interview with a man who had basically been sent home by doctors and advised to book straight into a hospice. Instead, he was talking to a vet etc. Anyway, he ended up taking this dog-dewormer drug - I checked and he was also taking vitamin E and CBD oil. Anyway, end result is he's still with us several years later and all his tumours disappeared - he had it everywhere. I'd be starting off with a parasite cleans and then there are a LOT of excellent natural treatments that people have made videos about to credit them with their own survival. I wish your friend well.

I'm still not on board with the whole shedding thing. Mad cow disease was caused by cows being fed cows. The second that stopped, mad cow disease stopped. Despite never locking down, working at a grocery store unmasked all during BS-19 and working feet from a vaccination site I still haven't gotten sick, no dementia, hearts just fine. Personally I think the shedding thing is BS. You inject something that's one thing. But getting prions from breathing someone's air I don't buy into for a second.

The best way to preserve overall health is to keep your blood running like water! Good circulation is upstream from good health. So it should come as no surprise that a vaccination that clots blood also would be implicated in dementia. Your brain especially is a vascular system and needs good circulation! Keep your circulatory system healthy with a heart-healthy diet, exercise (get out of breath 1 x a day), and all the other stuff Dr Mercola recommends.

Posted On 04/30/2024

kbamfield

this reads like we're all screwed. I posted many times on many forums over the past 4 years that the jabs promote a mitigation response from the virus that's purpose is to survive and thrive. the more jabs the more issues until now where there is contagion. What next? we all turn into queens

Posted On 04/30/2024

samwoo

Fascinating listening to Dr. Kevin McCairn and so nice to see someone treat a child's intrusion in a kindly manner. I also appreciate the inclusion of even the small amount of data on Astrazenica as millions of us had that too but all research seems to be on mRNA. My mum had the British cocktail' of two AZ plus Pf boosters, her cognitive function is dropping rapidly

Posted On 04/30/2024

Darwina

I wonder if AZ is quick to injure or kill so you dropped or something bad happened or it didn't and that's why it got removed. Maybe Pfiz is the slow one which takes a few years and has many many side effects. Most over 65 here in Aus had two AZ and then a Pfiz booster. All the young ones had 2 or 3 Pfiz.

Posted On 04/30/2024

GoldCoaster

From what I've read here, the spike protein damage and prion shedding will result in our brains becoming mush and then an early death. (Plus increasing 5G will exacerbate this. Elon doesn't seem to realized this with continuing to put G5 satellites in space beaming down on the earth, and into his brain as well). This is genocide.With it becoming apparent that the planned future of humans is to be eventually implanted with devices to connect us to AI, becoming slaves to the New World Order, how are we going to be of use as sick and damaged life forms?

AI won't enable us to function in any manner that would serve the masters once we're irreversibly damaged. These global elites, once they've syphoned all the wealth from the feeders and killed and/or maimed them, will still need manufacturing, builders, technicians, farmers, and health care workers etc., to survive in the modern life style on earth. They're delighting in the genocide, but I can't see how they think their future world is going to function to their benefit.

I have been thinking about brain function and inflammation. Why are people going hungry in our area, where there is so much free food available? (I realize it is not like this everywhere.) So much food goes to waste--there is no virtue in wastefulness. This is a mindset--as an elderly friend used to call it, "a lack of righteous thinking". => People believing that food comes from the govt or the grocer. People do not take advantage of opportunities to help themselves because they are waiting to be taken care of.

Like a toddler at a banquet, sitting under the table and crying instead of standing up and helping himself to what is within reach. This is the result of dependency-training. People do not plan ahead and put food up in-season when food is free and abundant. I have a dear friend who is very concerned about food shortages, so she bought a 10# sack of rice. That is the extent of her prepping! Like it might be a good idea to have some seed and plant food during times like these. She tells me her concerns and then gets a deer-in-the-headlights stare if I suggest she might want to buy a few extra cans of food or water each week.

Many people find a false sense of security in denial and convince themselves nothing bad will ever happen to them. Perhaps people have been coddled in a world of 'safe spaces' for too long? It is a very scary situation when I consider how many people have an entitlement mentality and expect to be taken care of. How poorly they regulate their emotions and strike out when they do not get what they want.

Not sure if we will have a black swan event before the next election. Whether there will even be an election. The economy will crash? -Or another plandemic with our liberties revoked. I am a realist, not a fear-monger. Special interests that will do anything to disrupt the election. The means they choose could create widespread chaos. Are we also ready for a younger generation with premature dementia due to on-the-job vaccine mandates?

How long before doctors connect enough dots to realize that the Plandemic was designed by the puppet masters from the start as a tool to depopulate the planet? Not soon enough...

Posted On 04/29/2024

Darwina

Well if we could work it out from almost day one why couldn't they?

Posted On 04/30/2024

drgradio

Yup depopulation and they took those Georgia Guide-stones down because they knew their population number was already achieved

OK, now I'm concerned about the possibility of a reaction from the one J & J jab that I got just before they suspended it. I see where the Astra Zeneca can or has some neurological effects such as the Guillain-Barre syndrome that starts with tingling and weakness in the feet and legs. I've had these strange symptoms, not with weakness really, but with tingling in my feet and legs that I thought might just be nerves (for whatever reason), but after reading this news, am very concerned about what is causing this, and sometimes it's not noticable even. My GP didn't have any ideas what this might be, unless it's the start of neuropathy, I'm 79 yrs old, when I mentioned it about 3 months ago when all of my blood work was fine. I know the J & J and Astra Z are similar, except the J & J was one jab, the other 2. Since that time, I have not had any of the follow up jabs and never will. Any suggestions from anyone on what I can possibly do that might help this?

bpm4539

Parasite cleanse probably.

Posted On 04/29/2024

samwoo

I found relief from tingling in arms and legs and feet pain with synthetic (absorbable) B1 Benfotiamine. I was actually taking it for something else and found this as a bonus. A lot of jab injuries to me look like low B1 too.

I suggest joining the Project Avalon forum where there is a plethora of information about vaccines, what's in them, and how to detox. It's free to join, (supported by donations) though you have to be "vetted" at first to make sure you aren't a shill or troll. Members have access to much more info and options. I don't think mainstream doctors are testing for the more insidious things that we are being infested with now, such as self-replicating nanobots. Our reality is becoming very dystopian.

Is it the Jab only? If you got Covid but did not receive any shots. Is there still a risk. Dr. Mercola writes allot about the Jab. I do not read much about Covid alone. I read it was a different SaRs Covid in itself. I would like to read more about it. Most especially, I believe the majority of people that are members of this site did not take any Covid shot, yet still contracted the virus. Speaking for myself. It was the strangest flu, I have ever encountered in my 65 years.

I believe Dr Nehls is correct that it's not just the vaccine but also the virus causing cognitive decline. I never got the vaccine but had the virus Jan 2021 (mild but strangest flu ever) and have experienced memory loss ever since. I am relatively healthy (no meds, have psoriasis) 61 yo trying supplements/diet to fight it. I was fortunate to have a Dr willing to write an exemption because I had Guillian Barre' Syndrome in 1984 and haven't had a vaccine since.

Lots of info about all that on the Project Avalon forum. Free to join, though you have to be "vetted" to make sure you aren't a troll or shill. It's not just the jabs!

My mother, an active, extremely healthy 94 year old passed from CJ syndrome. She was the only member of my family to get the vax. She was an avid MSM watcher and despite our assurances, she got scared. I will never forgive.

These jabs just keep on giving, and our govt STILL has them on the recommended childhood vaccination schedule.

Posted On 04/29/2024

drgradio

The jabs are banned in other countries!

I am very concerned about the shedding properties of prions and other contagious elements of vaccines. How dangerous is close contact and what is considered close contact?? Can prions be transmitted by sitting next to someone, handshake, hugging, kissing, intercourse, sneezing, coughing, spitting, sharing food or drinking glasses? Is avoidance of certain people we are in close contact with at work, school, friends (or even strangers) who we know have been taking the shots being overly cautious and extremely paranoid? pixels.com/.../nate-anthony

2Bt7374

I read labels and always have. How people lined up to get this shot without knowing what was in it is one of the greatest tragedies. That these prions can be shed to the unvaxxed is a nightmare. I want to know HOW they are shed and what can we do to protect ourselves. Or can we ?

Unfortunately I know this to be true. A PA in their forties, an acquaintance, was dx'd with CDJ a couple months ago. Luckily they only lived for about 6 weeks afterwards. Left behind family with young children. So sad.

Anyone remember "operation warp speed"? And who was behind it? Everyone is blaming JB when really for decades all of our own political figures have sold us out. We are the lab rats.

Dates back to sometime after SARS-CoV-1, and came from a DoD/DARPA program. Bill Gates has written text from 2009, showing lockdowns and masking already intended. Not an easy topic to research, pawing through govt records; was not focused on trapping any of this. You may want to look at the draft of Crimson Contagion, an 8-month exercise run in real time in 2019. The draft is posted on the Brownstone Institute website, shows how many Federal and state agencies were involved.

So many were warning, and yet is was just allowed unabated to execute as an agenda, and the reality is it still IS
