

[laura.c](#)

I am super confused how this doctor or any could fall for the absurd idea that "this stays in the arm". It's Basic pharmacology, you inject into the muscle (IM) to gain indirect access to the bloodstream so that whatever you just injected (pain medicine, antibiotic, vaccine, etc) can travel to the place it's needed. The immune system does not live in the deltoid, no vaccine stay put in the arm or leg into which it is injected.. Where did this come from? Also, now hear me out on this one, vaccines are the only product that directly target the immune system, so is it just possible that doing so creates cancers.

Vaccine theory is so moronic and barbaric. Vaccines are the biggest lie ever told, they are 100% not beneficial and 100% unnecessary therefore they cannot be made safe or safer. They go directly against our design and in fact, deprived the immune system of developing properly and staying strong through regular contact with its environment through the mucous membranes, as God/nature designed it.

Indeed, biological weapons against C-19 will likely kill 1 to 2 billion humans over the next decade as the damage from the spike protein takes its toll. But even this is not enough for the demonic entities that control our planet, as they seek something closer to a total reduction of 90% of the human population. Suddenly, your strategy is very clear. Injections of spike protein mRNA cause a 90% suppression of the DNA repair mechanism known as NHEJ (non-homologous end joining). This is a cellular mechanism that exists within the cells of humans, animals, and plants to maintain genetic integrity, a necessary condition for life.

www.brighteon.com/787e2691-1c08-486c-835d-d5de871e782c .---- MRNA IS A CLASS ONE CARCINOGEN The process of carcinogenicity, also known as carcinogenesis or tumor genesis, involves multiple stages where normal cells undergo a series of changes at the cellular, genetic, and epigenetic levels, resulting in abnormal cell division and the formation of cancer[16]. This process is characterized by: -----1. Initiation: The first stage involves direct damage to the DNA inside a cell by the carcinogen, leading to abnormal DNA that does not function properly. This damage can be caused by chemical substances, viruses, or radiation.

-----2. Promotion: Following DNA damage, the body attempts to repair the damaged DNA. However, sometimes the damage caused by the carcinogen interferes with the repair processes, leading to further abnormalities. -----3. Progression: Over time, the accumulation of genetic and epigenetic alterations disrupts the normal balance between cell proliferation and programmed cell death (apoptosis), resulting in uncontrolled cell division and the evolution of cancerous cells. ianbrighthope.substack.com/p/mrna-is-a-class-one-carcinogen?utm_source.. The WHO wants to bury a major cause of turbo cancers in young people and cancers in the general population caused by "vaccines" against C-19 in the short and long term. A Croatian pathologist named Ivana Pavic recently spoke with researcher Steve Kirsch about a disturbing phenomenon she is seeing in people who have been "vaccinated" against COVID-19. According to Pavic, 65 percent of all carcinoma cases among people aged 15 to 59 received one or more injections against the Chinese virus, which is an overall vaccination rate of 55 percent in the same age group. Calculated, this means that getting a COVID shot increases your risk of getting this particular form of cancer by 52 percent, something that was not revealed when the shots were pushed through Operation Warp Speed.

She also claimed the same and claimed that she is also seeing an increase in cancer cases among her unvaccinated friends, although these friends reportedly tested "positive" at one point for the Delta or Omicron variants of the so-called "virus." . Kirsch interviewed Pavic about the matter and you can watch that interview below:

REPORTS FROM THE FRONT LINES OF THE VACCINE CATASTROPHE. By PIERRE KORY, MD, MPA INFORMA TAMBIEN CON RIGOR Troubling reports describing the plight of patients, doctors and hospitals over the last 9 months. Docs and nurses are "waking up." Oncologists are seeing tons of "turbo" cancers. It's real. "As a heme/onc doc, it's been alarming to see so many COVID vaccinated young patients with very aggressive, widely metastatic cancers. These cancers metastasize to unusual places and are refractory to therapy that usually works, and the outcome is often heartbreaking. I've also seen an uptick in patients newly diagnosed with several different types of cancers simultaneously, which was previously a pretty rare phenomenon.

Not to mention the unusual clots, myeloproliferative neoplasms, HLH, and other strange hematologic complications post vaccine. Occasionally I'll get a referral for a post COVID vaccine patient with typical long haul symptoms who happens to have an abnormal CBC, and it's heartbreaking to hear how they have been suffering without any clear diagnosis or solution for months/years. So glad that your clinic can help these folks, and I will send them your way." pierrekorymedicalmusings.com/p/reports-from-the-front-lines-of-the-ef4.. (09/26/2023)

Professor, just the Gut speaking. As the Dr is pointing out if the first defense Innate Immune Systems early warning, surveillance system is not triggered than doesn't it stand to reason this is the reason people are not feeling anything wrong until far too late. If the proper defense is not working, the normal tools involved would not be producing effects to alert someone something problematic is occurring. Just as concerning this may well also be absent when the conventional cancer treatments are used. Yet the River Denial just keeps rapidly raising over the banks and while admitting one thing in Congressional Hearings behind closed doors and attacking anyone who are asking for Updated Properly Done Safety Studies Science for not just the Jab, but the whole line up of Vaxxx's hiding behind a foundation of very Old Science not looking for what they didn't know existed, or worse.

Hiding behind a No-Liability, a Kangaroo Vaccine Court, and a reporting system clumsy, time consuming, hard to use. Also when the Doctor mentions how possibly the Spike can also travel into the Microbes of the Gut points too the concerns of shedding may be all too real.

Guillermou

Just you define it perfectly "If the proper defense is not working, the normal tools involved would not be producing effects to alert someone something problematic is occurring." Indeed One of the ways in which COVID-19 vaccines destroy human immune function is through the intestinal microbiota. In one study, both the CoronaVac and Pfizer vaccines decreased several species of commensal bacteria. The vaccines not only do not confer sufficient neutralizing antibodies, but they also target several species of beneficial bacteria that are necessary for long-term human immune function. The substantial loss of biodiversity in the human gut increases the opportunity for various pathogens to thrive in the intestines, making the vaccinated individual more prone to various infections, whether coronavirus variants, influenza strains, or other infections.

The human microbiome measures approximately 400 square meters and includes more than 2,000 species of protozoa, fungi, bacteria and viruses. These commensal species communicate with the endogenous immune system and help immune cells respond to pathogenic threats. They also aid in digestion, synthesize carbohydrates and amino acids, and help cells absorb nutrients from food.

In another study, Covid injections destroy levels of bifidobacteria many months after the injection, putting those vaccinated at greater risk of severe Covid-19. These research studies show that the human microbiome was designed to provide important protective immune functions. Those innate functions are damaged by COVID-19 vaccines, making people more susceptible to getting sick in the long term. www.theepochtimes.com/health/covid-19-mrna-vaccines-reduce-a-major-ben.. Well defined Paul. The "vaccines" against the Wuhan coronavirus (Covid-19) are called mRNA, short for messenger RNA. It turns out that these deadly injections actually contain what is known as modified RNA or modRNA, which according to Dr. Klaus Steger, PhD, genetically manipulates healthy cells. Since mRNA is fragile and easily destroyed by the human immune system within minutes, Big Pharma is using modRNA instead. And as many warned, modRNA genetically alters the human genome, turning it into a gene editing technology that ultimately turns the human body into a hybridized transhuman GMO.

"To protect against destruction by the immune system, modified RNA (modRNA) is packaged into lipid nanoparticles (LNPs) that, due to their small size and synthetic optimization, can easily overcome biological barriers and even reach vital cells in the heart and the brain. "Steger writes for The Epoch Times. "Proteins, or mRNA in healthy cells, can be compared to musicians in an orchestra: harmony depends on several musicians taking breaks, not on all musicians playing non-stop," explains Steger. "Likewise, the absence of a specific protein/mRNA plays an essential role in metabolism." "As mRNAs are developed for longevity and maximum efficiency and (through lipid nanoparticles acting as natural exosomes) have access to all cells, they contradict the nature of mRNAs, which are cell-specific and short-lived.

In our orchestra analogy, it would be like giving a musician a bass drum and asking him to hit it from start to finish, completely ignoring the piece of music being played." www.theepochtimes.com/health/rna-based-vaccine-technology-the-trojan-h.. (04/21/2023)

Interesting links Rose. In a review published April 5, researchers argue that mRNA modification causes immune suppression that may contribute to cancer development. In a review published on April 5, researchers argue that the modification (specifically, N1-methyl-pseudouridine modification) of the mRNA causes immune suppression that may contribute to the development of cancer. Uridine is a key component of mRNA. However, when mRNA is injected into the body, it is broken down by cells and also triggers a broad immune response, leading to its rapid degradation.

www.theepochtimes.com/health/modified-rna-in-covid-vaccines-may-contri.. 04-

17&utm_medium=email&est=AAAAAAAAAAAAAAAAAZvc5ZxIWyJCav5MJs2RQB%2Fp5xE4iNpMohY3crZKzXA1NC7ep (05/04/2025).— The p53 gatekeeper is critical in suppressing cancerous tumors and research shows that the spike protein (from viruses or mRNA vaccine) suppresses p53New research!.

This innovative preprint gives us more evidence that the synthetic cellular spike protein spike glycoprotein (translated from the mRNA-LNP complex platform injected into the deltoid) after vaccination with mRNA technology inhibits a tumor suppressor protein critical, for example, P53, which can lead to a higher incidence of cancer.

This is more than likely one of the key pathways involved in the explosion of cancers since the rollout of mRNA vaccines in January and February 2021, especially in highly vaccinated countries. In other words, there is confirmation that what we were, have and are injecting through this vaccine with mRNA technology is causing CANCER. Promotion of CANCER. palexander.substack.com/p/the-p53-protein-guardian-of-the-genome?utm_s.. email (04/17/2024).--

COVID VACCINES HAVE CAUSED AT LEAST 14,000% INCREASE IN CANCER CASES IN THE USA ACCORDING TO CDC. The numbers have been calculated by comparing cancer cases caused by COVID-19 vaccines with influenza vaccines due to a lack of data published by the CDC that would allow us to estimate the number of cancer cases using other methods. According to the CDC's Vaccine Adverse Event Reporting System (VAERS), only 8 cases of cancer were linked to the numerous flu vaccines offered between January 1, 2021 and March 29, 2024. While 497 cancer cases were linked to the few COVID-19 vaccines on offer. during the same period of time. This is equivalent to a 6,113% increase in cancer cases due to COVID-19 vaccination. Teens and people ages 18 to 29 in their 20s also suffered just one case of cancer from the flu vaccine, compared to 61 cases linked to the COVID-19 vaccine.

This is equivalent to an increase of 6,000%. People in their 30s reported only 1 case of cancer due to the flu vaccine between January 1 and March 29, while 141 cases of cancer were reported among people in their 30s due to the COVID vaccine. 19. This amounts to a staggering 14,000% increase in cancer cases due to COVID-19 vaccination. Finally, people in their 40s reported 5 cases of cancer due to the flu vaccine, compared to 283 cases of cancer due to the COVID-19 vaccine. This is equivalent to an increase of 5,560%. expose-news.com/2024/04/14/covid-vaccines-cause-141x-increase-cancer-c.. (04/14/2024

Alan845

I January, my unjabbed wife died of cancer in kidneys, liver, ovaries, lymph nodes and lungs, taking just 3 weeks from diagnosis to death. She had ANCA vasculitis since 2018, which required her to take immune suppressants medications (azathioprine and prednisone) which reduced her lymphocytes blood count to around 0.8 (normal range 1-4). She also drove minibuses for cruise ship passengers, who were almost invariably jabbed, during the S hemisphere summer. During the past 3 seasons her lymphocyte count dropped to 0.2 for the few months she was driving. I believe it is this drop in her immune system that allowed her cancers to develop, grow and then kill her in 3 successive seasons. So it appears that shedding may be as dangerous to the unjabbed as the jabs are to the jabbed. Has this been investigated, what is actually shed and what steps can be taken to minimize these dangers to unjabbed?

Posted On 04/17/2024

Guillermou

Hi Alan, we are sorry to hear about the death of your beloved wife. Immune-mediated inflammatory diseases (IMIDs) are a group of chronic and highly disabling diseases that involve inappropriate or excessive immune responses caused or accompanied by cytokine dysregulation and acute or chronic inflammation. Treatment of IMIDs focuses on rapid control of inflammation, prevention of tissue damage and, when possible, long-term remission of the disease. This is achieved using corticosteroids, immunosuppressants, and "biologics," especially those targeting tumor necrosis factor (TNF). We know the activation of inflammatory cells as part of an immune response to eliminate mutant cells, a process called immunosurveillance.

Transformed or malignant cells are recognized and directed to be eliminated by the immune system. The incidence of cancer increases in transplant patients treated with immunosuppressants; cancer patients develop immune responses to tumors; immune responses in tumors correlate with a better prognosis in colorectal cancer; Survival is positively correlated with the presence of tumor-infiltrating lymphocytes, CD8+ T cells, and natural killer cells in various cancers; Increased natural cytotoxic activity of peripheral blood lymphocytes correlates with reduced cancer risk.

Efficient inhibition of tumor growth has been shown to involve not only defined mechanisms of cell death and killing by CD8+ cytotoxic T lymphocytes and natural killer cells, but also the induction of tumor cell senescence by interferon- and TNF. The evidence provided in this article leads to the conclusion that some IMIDs are associated with an increased risk of cancer and that the cancer risk associated with immunotherapy should be discussed in relation to each individual conventional drug or biologic. This article discusses some immunosuppressants.

So very sorry to hear about the loss of your wife!!! Did your wife get "tested" for covid? Could the millions of swabs tested on people around the world explain how the unvaccinated are getting sick? Swab vaccines are already being used on animals. www.rossdales.com/.../vaccination-for-ehv-1-and-ehv-4

Posted On 04/17/2024

coffeecup

Alan. I would also like to hear the potential correlation between these cancers and shedding. Right now three of my friends in their 60s are suddenly terminal or dealing with cancer. One is days from death, who had multiple cv vaxs because she had cancer. The other friend is not vxd but is suddenly terminal with melanoma all over inside her body. And the third friend I don't know her vxd state, but suddenly she has a four inch cancerous growth in her breast. And my husband (not vxd) suddenly developed in his surgeon's words "nasty, fast growing prostate cancer which if not caught when they did, he'd likely have maybe a few years left." Both my hubby and I are not vxd, but had Covid twice each in 2022. We are both left with various side effects from cv, but we're attempting to follow the FLCCC protocol. I would love more info on the correlation of shedding with cancer.

On the balance of probabilities, shedding is a regrettable but real phenomenon. The unvaxxed cannot separate themselves easily from the unvaxxed, even if that was the globalist intention all along by creating a separate category of our species with much the same kind of ideology as the fascists tried to designate Jews and others as "unclean". How far can the "co-incidence" excuse be stretched when both husband and wife in one family are now suffering from two of the most common turbo cancers - lung and prostate. Even after quoting eminent oncologists such as Professor Angus Dagleish, the captured brain remains aloof to the truth. www.midwesterndoctor.com/p/unraveling-the-mystery-of-mrna-vaccine?

ipmcewanprotonmail.com

I don't believe in coincidences. In June 2022, I was healthy, energetic, working 50-60 hours a week on the farm(I was 70 y/o). Outworking people 30-40 years younger. In August 2022, I contracted COVID(I am not vaccinated/jabbed). Prior to this I had not been ill with the flu or even a cold in over 20 years. The virus hit me hard, particularly in my lungs. Took about two weeks to recover. Another 2-3 weeks to recover my lung capacity. In October 2022, I started to have some pain in my right rib cage. Thought maybe I had pulled/strained the intercostal muscles.

Rest did not relieve the pain and it increased. Doctor started with x-ray, followed by ultrasound, then MRI, which showed something of interest. In February 2023 Cat Scan and PET scan revealed tumor in right lung, with metastases in the abdominal area lymph nodes and apparent tumors in the colon. Diagnosed as STAGE 4 metastatic adenocarcinoma of the right lung. Lost over 50 pounds. Never smoked and was a distance runner in college. Prior to contracting covid I was around someone who had been vaxxed and boosted numerous times.

No one wants to talk about the shedding effect of the spike protein on unvaccinated healthy people. If there is an advantage to being Stage 4, the medical establishment didn't want to do radiation or surgery. I rejected IV chemotherapy. Since then, using the Tippens protocol, my tumor has shrunk by over 50%, no sign of metastases in my lymph nodes and no tumors in my colon. In addition, I take a targeted chemotherapy, Tagrisso, orally once a day. I am still about 30 pounds under my normal weight and have a ways to go. Coincidence??

Nasal swabbing was not about testing for infection but was collecting DNA samples. The PCR test is not a diagnostic (as confirmed by its inventor). There was no pandemic. The German Government has admitted as much www.globalresearch.ca/german-government-admits-there-was-no-pandemic/5.. . The main bioweapon in the "pandemic" was the injection - vaxxed individuals may unknowingly transmit its effects to non-vaxxed people. As early as 2022, oncologists and cancer specialists were warning of the dangers of the "vaccines". Co-incidences appear to be ten-a-penny these days. Comparing this with previous medical scandals (such as thalidomide) on humanity and our children, then covering it up for years proves the untrustworthiness of the pharmaceutical-medical-industrial complex.

live.childrenshealthdefense.org/.../playing-god We still have a long way to go before the truth about autism, ADHD, Aspergers and other disorders is finally released. As for Andrew Bridgen, lone voices against political crimes are usually ridiculed and ignored for decades. Let's hope his unleashing of the truth tomorrow will encourage more MPs to take action.

'The Island of Dr Moreau' is upon us. This is tragic, terrifying and shameful! I am thankful I was not forced to take the 'jab' but I know of those who were.

Beware of the realities in shedding if you were around all these friends who took injections

"what they're ignoring is the concerning trend of turbo cancers that occur shortly after COVID-19 shots." This is called shaping the narrative. The WHO is getting ahead of the curve by bringing up the subject itself, using a plausible explanation like age and other factors, while purposely ignoring two key points: the number of young people involved and the eye-popping increase in cases. The agency can do this safely as we live in a time of very short attention spans. The people who were fooled before are likely to be fooled again, in part because nothing ever happened to those who perpetrated the madness of lockdowns, masking, and insisting on jabbing every arm, and in part because critical thinking has been pretty much eliminated from the human condition.

Information consumers may understand that the media, the political establishment, and govt bureaucracies are filled with people who are less than honest, but they only apply that skepticism toward media, politicians, and agencies they don't like. It's a curious phenomenon that the author Michael Crichton touched on years ago while describing newspaper reading habits.

His theory held that people would spot the errors in stories on topics that readers knew a great deal about, but they would abandon all skepticism on matters where they knew less. We saw it with Covid: "are you an epidemiologist/virologist/other subject matter expert?" and we see it with the ongoing admonition against doing one's own research. I'm not sure how to overcome it. Skepticism does not always come easy, but it is a necessary part of decision-making.

Great article; great comments. Many thanks. We are all blessed by this community. If we haven't been vaxxed, we are definitely in a better place than the vaxxed. However, shedding means none of us is safe from feeling the physical impact. And the emotional impact is pretty darned devastating as well. I looked at I-recover and am totally overwhelmed about a protocol for vax remission. Hopefully, continuing to follow the health steps I've learned on this site - vitamins D, C, K, Bs, etc.; quercetin; ubiquinol; exercise; limiting exposure to EMFs - will be enough for me. But for my vaxxed loved ones, it's going to take more than I can figure out and probably requires specific remedies tailored to each individual's issues. Just a thought, but shouldn't ivermectin be cheaper now that it's legally OK to use it? As always, only our Creator can truly heal us, but we who are thinking and questioning must continue to fight the good fight.

I am curious and this is meant in all sincerity - have your vaxxed loved ones come around from their original belief? The remedies you describe as being beneficial to us should be beneficial to all, but there is the matter of convincing those who once believed Ivermectin was "horse paste."

Some vaxxed loved ones have admitted their mistake; most, sadly, haven't. Even those who have are dubious about using natural remedies rather than more pharmaceuticals. Still, I would like to be able to suggest alternatives (ideally, we would have easier access to holistic doctors, but they are hard to find in South Carolina). One family member recently died of brain cancer despite every possible "medical" intervention. The psychology of mind control was, and is, very effective. Sheeple syndrome is the deadliest.

Forget the WHO. They are the same liars and idiots that want us to believe that the massive increase in heart attacks in young athletes is caused by referee whistles startling the athletes and also these young fit athletes taking cold showers. Pathetic liars that think we are all stupid.

I'm highly introverted and don't know a lot of people, but I know of three turbo cancer victims with in the past year. A second cousin of my husband, aged about 23, a friend of my son and his wife, aged 39 and the lady who lived across the street, aged 65.. I'd just spoke to her about a month before her death and it was before her diagnosis, where she was contemplating what to do in her retirement, but dead within two weeks of diagnosis.

WHO is responsible for cancer attacks of under 30's as far as I see it, Why would they now take care of it if all goes according to their plan?

My mother was an extremely health conscious 79 year old, vigorous and unvaxxed. Met a man who was jabbed, had a whirlwind romance and married him 2 months later. He got a second jab a few days before their marriage and a booster 6 mos later. Not long after my mother becomes short of breath and tests reveal new onset heart and kidney failure and an extremely virulent myeloma with amyloidosis. We went to see the hemeoncologist and first question out of her mouth is "did you get the Covid vax?" When my mother said no, the oncologist said "yes but your husband did." Told us her office is full of people she believes are victims of the vax and shedding. My Mom is getting treatment but will probably not be here in another year. I will go to my grave believing it was shedding from the vaxx.

Toxicity. What is ingested--food, water, meds, inhalants. Environmental exposures. Endo-toxins and byproducts of disease. The body heals when it can detox faster than the cancer is growing. Special help may be needed to release tightly-bound toxins.

I can not imagine a more sinister entity than the WHO. The WHO is no exposed as a complete failure at the specific expertise they claim. It is abundantly clear the WHO expertise is world control and it is the anthesis of health. Drop the "H" from their anacronym and you've got it.

Turbo cancers. Yes. This is true. I've just lost my beautiful husband, larger then life, joyful healthy man. In remission and living with CLL. Two shots in 2021. Stopped after 2 shots but that was still two too many. A year later, 3 skin cancers cut out of head. 2022, SCC removed from face then radiation. 2023 salivary gland on same side with SCC. Grew to 10cm. Cut out April 2023 with plastic surgery on face. Cancer was more aggressive after radiation, just made it stronger. Greg died in October 2023. Left us devastated, shocked and helpless against this vaccine crime. 6 months from diagnosis. Never thought it would happen to us. I begged him not to get the vx. I didn't and neither did my son. How are we going to get through this? How are we going to stop this murderous and outrageous rollout that just keeps going. When will people wake up?

I am so sorry for your loss - may God bless you. I don't know how the people pushing these shots can justify the lives they have destroyed. Lord help us all.

If risks for Turbo Cancer are high with recent or multiple Covid vaccines, I wonder if living within 1/4 mile of a cell phone tower would multiply the risk after a Covid vaccine. Or any exposure to excessive EMF would multiply the risk. I have measured EMF from a cell phone tower is ultra high within 1/4 mile of a tower. It is also ultra high within 10 feet of a wi-fi router in your house or within several inches from a cell phone during a phone call. An immune system struggling to fight a highly resistant vaccine would be overwhelmed if it also has never ending exposure to strong EMF radiation. Then add minor cancer mutations and the immune system could do nothing but ignore the cancer, so the cancer explodes and multiplies.

WHO should be disbanded. Tedros Adhanom Ghebreyesus is jail material for his intentional and conscious crimes against humanity..

Posted On 04/17/2024

MoMac46

Tedros and the WHO are exempt from prosecution no court will prosecute, so the WHO Pandemic Treaty mustn't go ahead, but unfortunately the UK politicians will pass this horrific treaty.

No surprise there. These int'l "authorities having jurisdiction" serve one purpose; giving control over mankind to our Ashkenazim owners.

Very early in my pre med studies I happened upon a cancer research meta-study concluding that 90% were caused by environmental toxicity. The conclusion was that more funds needed to be dedicated to vaccine research to keep us from getting cancer due to the toxins. Heavily indoctrinated in the medical model, I thought this a viable endeavor. Fast forward 20 or so years in conversation with Candice Pert PhD (of NIH at the time and author of Molecules of Emotion) she cited a current meta-study concluding that 90% of cancers are caused by environmental toxicity. The only difference is that in the early 70s there were about 5000 substances the FDA allows in the food, air and water. Now it numbers 80,000. Needless to say I have strayed from the vaccine solution.

Joy6604

I'm starting to realize that you are a FEAR MONGER like the horrible, evil people who are trying to destroy humanity. Plus I find your information way too indepth, way too detailed and with so much medical jargon that it is confusing to me. After a few paragraphs I just stop reading! Seriously, you do not need to try and impress us with your medical knowledge. We need facts and we need encouragement, not negative doom and gloom and certainly not all the medical mumbo jombo. It's just too much!
