## Guillermou

Good target Just. Red blood cells moving in circulation are continually exposed to reactive oxygen species (ROS) circulating within the body's vascular system. The zeta potential of erythrocytes and their morphological changes caused by oxidative stress are decreased in hypertensive patients in relation to the risk of developing cardiovascular disease (myocardial infarction). In this study, the morphological and electrochemical characteristics of the patients' red blood cells were analyzed by scanning electron microscopy and zeta potential study. Statistical analyzes of the data showed that red blood cells from hypertensive (ZP-16.06 mV) and cardiac (ZP-9.94 mV) patients possessed a significantly reduced zeta potential relative to that of red blood cells from healthy individuals ( ZP-23.39 mV).

Microscopic images of hypertensive red blood cells revealed increased anisocytes and poikilocytes. These parameters were found to be exacerbated in patients suffering from myocardial infarction. Therefore, it can be concluded that ZP can be used as an effective diagnostic tool for the detection of the risk of cardiovascular disorder associated with hypertension. ## Guillermou

Multiple clinical research indicates that grounding the body generates broad, beneficial and significant physiological changes. The source of these effects is believed to be the ubiquitous mobile electrons on the Earth's surface, which are responsible for the planet's negative charge. Lifestyle changes have disconnected most humans from this primary health and healing resource, creating what may be an unrecognized electron deficiency in the body, an overlooked cause or contributor to inflammation. chronic and common chronic and degenerative diseases.

High blood pressure, altered HRV, and hyperviscosity are potentially destructive cardiovascular conditions that can be improved with grounding. When grounding is restored through grounding, electrons flood throughout the body, reducing inflammation and oxidative stress while bolstering the body's own defense mechanisms. Electron transfers are the basis of virtually all antioxidant and anti-inflammatory activity. And Earth may very well be the main supplier! When supply is restored, humans will have the potential to thrive. Touching the earth to our skin is perhaps the perfect natural anti-inflammatory that supports biochemical and physiological effects that enhance healing.

Diabetes and autoimmune diseases in general, cardiovascular diseases and communicable diseases are the most invasive inflammatory diseases affecting our current civilization. Grounding could soon become one of the main preventive and therapeutic antidotes!

## rjsvan54

I know that Big Pharma makes a lot of money from vaXXXcines and the experimental mRNA gene altering therapy that causes death, auto-immune diseases, chronic illnesses, SIDS, autism, and the list goes on. But for the life of me I don't understand why Big Pharma promotes the spread of these jabs when they don't offer any protection whatsoever. What is the real purpose of Big Pharma's plan for humanity?

Posted On 06/14/2024

---

## Guillermou

BigPharma corruption with institutions to obtain benefits. For example, the CDC has been manipulating ICD codes to hide the fact that covid vaccines are a cause of death on the original death certificates. The CDC uses algorithms to match causes of death to corresponding ICD codes. The International Classification of Diseases (ICD) is a medical classification list provided by the World Health Organization (WHO). The ICD has existed since the 19th century and serves a wide range of uses globally, providing critical insights into the extent, causes and consequences of human illness and death around the world. The ICD standardizes data collection and enables large-scale research. Supports payment systems, service planning, quality and safety management, and health services research.

During this time the ICD-10 was used. When the Covid-19 vaccine was rolled out through Operation Warp Speed, the CDC maintained that the shot was safe. Government agencies considered any potential side effects as rare or mild. This led the entire medical establishment to turn a blind eye to any serious or lethal adverse events of the vaccine, in a medical environment that was financially incentivized to deceive, in a culture that intimidated those who made honest observations and drew objective conclusions regarding to the side effects of the vaccine. In the link all cases of fraud. [brownstone.org/.../cdc-altered-death-certificates](https://brownstone.org/.../cdc-altered-death-certificates) (03/07/2023)

## **mlinehan**

I was diagnosed with Celiac Disease about 7 years ago. Looking back I know I've had it since grade school. Wonder if it could be linked to childhood vaccines. I also have Fibromyalgia. I was diagnosed with that in the mid 90s. I thought they were making it up. At that point the only help was pain medication. I choose to read the 6 books in print about it at that time changed my diet, exercised and got my stress under control. Stress is my trigger. I'm staunchly anti Vax now.

## **ros11356**

Not to mention, the toxic mix that is bring prayed in the sky, as well as on our food. And injected into animals that we eat. In personal care products, medications. On and on.It appears to be getting worse. We need to detox. More information on this would be helpful. Pretty much everyone no longer feels well. God help us.

Posted On 06/14/2024

---

## **billstri**

I agree. All cattle and most farm animals are regularly injected with vaccines and other drugs. I don't know if certified organic meats come from animals that are routinely vaccinated. Organic raised animals avoid certain injections, but probably not all injectable drugs and vitamins. Even the 500+ head of Bison on Antelope Island are round up and vaccinated every year in October. They use helicopters and ranchers on horses to round them up into pens where they are feed through a system of fences to insure they are all vaccinated before they are let back out to roam the Island. Unless you do your own hunting and fishing every year, most of the meat you eat will likely come from vaccinated animals. It is something to be concerned about. I am thinking the only way to bring disease to the bison on Antelope Island would be humans and their dogs that visit the Island to hike the trails and see the taxpayer's Buffalo.

## chk2000

In 2013 I had the 2nd flu shot of my life, age 51. My then PCP: "We advise it when you turn 50. It's safe. You may have brief flu-ish symptoms but that is rare". Within 10-14 days I was paralyzed by an idiopathic syndrome where the immune system attacks the brachial plexus, a bundle of nerves in the shoulder. The sudden onset of intense burning pain at night (classic presentation) down my arm was incapacitating, to the end of my right index fingernail. My nerves were basically fried. I could not lift my right arm over my head for 14 months due to a winged scapula, from denervation of the long thoracic nerve.

I lost my brachioradialis reflex, my triceps muscle was flaccid. I regained range of motion in my shoulder but lost strength, sensation & dexterity permanently in my right dominant arm/hand. The neuropathy/paresthesia affects my hand/fingers/thumb but my entire right limb/hand is weak. My symptoms are 24/7 for 11 years, they have never ceased. I received a small settlement from the VICP but would give every cent back to have my healthy, active athletic body prior to 2013.

A long strange trip, living with constant dysfunction, having to explain it to people who don't want to hear about it. I can do things but it's arduous, exhausting. I'm also a musician, my true passion ruined. I was asked: "Why don't you just fix it?" People don't understand nerve damage, until THEY have it. As my retired neurologist said, "The first thing you need to know: Nerves do NOT heal like bone, muscle or tissue." Another specialist told me I'd be very lucky if I regained 70% function.

My guess is 50-60% but the damage is weird and diffuse, difficult to describe or quantify. Life-altering, for sure. People forget, think I'm fine though M.D's see the atrophy in my shoulder/arm and hand. Having heard recently of a 49 y.o. woman who lost her leg, may lose her hands due to sepsis (had mRNA shots!), I try to count my blessings. But all because I agreed to an UTTERLY USELESS flu shot.

Does anyone know if methylene blue would be helpful for restoring zeta potential?

Posted On 06/14/2024

---

## Guillermou

In my publication and in this link you have recommendations to increase zeta potential.  
[www.researchgate.net/.../304523722\\_Zeta\\_Potential](http://www.researchgate.net/.../304523722_Zeta_Potential) .----- Dr. Mercola "Methylene blue can also be helpful in instances where you have impaired blood flow that prevents the delivery of oxygenated hemoglobin to the tissues. In this case, methylene blue helps counteract the reduced blood flow by optimizing the efficiency of mitochondrial respiration. Healthy blood flow is particularly important for brain function, and many older people have chronic hypoperfusion that contributes to neurodegeneration and memory problems. These issues, Gonzalez-Lima says, can be prevented by methylene blue." [articles.mercola.com/sites/articles/archive/2022/05/01/methylene-blue-..](http://articles.mercola.com/sites/articles/archive/2022/05/01/methylene-blue-..)

## michaelrbuley

I came across this book in my research on healing cancer: 'The Ultimate Guide to Methylene Blue,' by Mark Sloan. I've been taking it the past two or three months now. Fascinating book. I'd not heard of methylene blue. I don't know about zeta potential, but this book recounts the fascinating history and vast research that has been done on methylene blue. I'm taking it in higher than normal amounts as part of my self care for healing cancer, along with ivermectin, phenbendazol, and a host of other things.

Posted On 06/14/2024

---

## MissRodeo

I have been using Methylene blue for 2 years. Daily, I mix 15-20 drops into a Mercola's C-pak. When the cup is placed in the sun, the mixture turns clear within seconds. I am 70 and have noticed I don't need a grocery list anymore. Misplaced keys are a thing of the past. We have a summer home at 7,000 ft. elevation. My husband and I used to notice shortness of breath on arrival- no more. Our oxygen saturation is 95% now on arrival. I have mixed 3 drops in my face cream and notice a reduction in wrinkles. A smarty- pants doctor sells a product named Bluelyne for \$70 a jar (smile). I have used it so long I buy the pharmaceutical grade powder and mix my own. Must be careful because it can stain, but ascorbic acid takes it right out. I highly recommend it.

Great link Just, two main objectives that this new pandemic "created": vaccines and stopping eating meat. Sen. Joni Ernst (R-Iowa) sent a letter to USDA Secretary Tom Vilsack demanding information about his spending on "dangerous avian flu experiments," which she says involve a "highly pathogen". One of the researchers who is part of the project through the Chinese Academy of Sciences is Wenjun Liu, who, according to Ernst, is affiliated with a pathogen laboratory at the Wuhan Institute of Virology, where the pandemic is believed to have originated.

of COVID-19. These experiments were a violation of federal policies related to gain-of-function research. [100percentfedup.com/usda-spends-1-million-taxpayer-dollars-on-dangerou..](https://100percentfedup.com/usda-spends-1-million-taxpayer-dollars-on-dangerou..) (2024).-----  
----- This "next pandemic" will be used to get the masses to stop eating meat, initiating mass slaughter on farms across Western nations; clamp down on small independent farmers who do not pasteurize milk, for example; remove meat and dairy products from store shelves; and all kinds of taxes and stipulations in its acquisition.

South Africa has had to cull around 7.5 million chickens to contain dozens of outbreaks caused by two different strains of avian influenza Dr. Lee Merritt explains to Brannon Howse that the H5N1 bird flu outbreak is actually an attack on the food supply. ## Jud8611

I told my doctor today the gadolinium I have retained screwed up my body. I have been battling Lyme. I'm going to beat it and get into remission. I truly believe gadolinium screwed up my zeta potential. Chelation and sauna are the only things that has turned my 23 year nightmare around. Slowly but surely, IV Disodium EDTA has helped me to continue to improve. IV ozone helps also. My gad levels have stayed the same but my aluminum levels have come down. I switched out so much in my house to avoid lead, aluminum, tin. Many years ago my retired PCP would send me to ambulatory outpatient IV to get 1-2 liters of normal saline to stop acute POTS episodes.

I now consume a lot of salt and take potassium supplements. I can say it helps me without a doubt. As hard as I try, I can't get enough potassium DAILY through my diet. Thank you for posting this Dr. Mercola and thank you for writing this MWD. It was to the point. Dr. Moulden was a hero. His presentations shocked me a few years back. My kids eye turned in after a scheduled shot. We stopped. Other health issues ensued but we were lucky and pulled him out of the pit. We were very lucky and he is wiser than most adults.

## Allaglow

Over 50 years ago I took the rubella vax which was pushed on TV since I did not get this as a child. Subsequently I developed an autoimmune disease. Never connected the two until recently. Since then I'm much wiser and have refused all vax for over 20 years. I almost succumbed to the initial pressure during Covid in 2021 but was fortunate to learn about and purchase ivermectin as a result of an online webinar with a DNP. So much of what big pharma recommends is toxic or has serious side effects. Learned to avoid most over the years and find natural alternatives. I even refused chemo and it's 12 years with no recurrence.

## Guillermou

Aluminum adjuvants, used in vaccines for more than 70 years, have been associated with adverse events ranging from injection site pain and post-immunization headache to autoimmune and inflammatory syndromes. In contemporary scientific literature, aluminum adjuvants are still referred to by some as the “dirty little secret” of immunologists, the authors wrote, because their mechanisms of efficacy and toxicity are still not well understood. One of the reasons human papillomavirus (HPV) vaccines like Gardasil (Merck & Co.) are so dangerous and deadly has to do with an "improved" version of a toxin they contain, the harms of which have been covered up by unethical studies.

for the last 90 years. That "enhanced" ingredient is aluminum, and its serious toxicity really came to light in August 2006, when an outbreak of bluetongue disease, caused by bluetongue virus (BTV), began appearing in sheep and spread throughout Europe. It turns out that this outbreak gave rise to a European mandatory vaccination campaign that ran between 2007 and 2010. During that time a "new and improved" BTV vaccine containing aluminum (Al) in doses of 2.08 milligrams was introduced ( mg) per millimeter of injection liquid, which worked as an adjuvant. While the forced vaccination campaign triggered a "mysterious" increase in serious illnesses across Europe, characterized by body weakness and a host of severe neurological symptoms, the same ones associated with Gardasil and other HPV injections that also contain aluminum as an adjuvant.

Dr. Llus Lujn determined that the increase in the disease was caused by aluminum, which is also called Alhydrogel in patented form. Gardasil trial caused patients injected with aluminum to develop severe fatigue and cancer [www.theepochtimes.com/health/undeniable-toxic-ingredients-in-hpv-vacci..](http://www.theepochtimes.com/health/undeniable-toxic-ingredients-in-hpv-vacci..) (2023).--- [childrenshealthdefense.org/defender/merck-gardasil-hpv-vaccine-trials-..](http://childrenshealthdefense.org/defender/merck-gardasil-hpv-vaccine-trials-..) (2024).--

## chk2000

It's sad. My newly minted young PCP refused my valid request for a medical exemption from experimental mandated mRNA injections in 2021. My employer where I work as an R.N. part time making phone calls to injured workers sent an email: "We realized we are unaware of your vaccination status". Well gee, I wasn't aware I needed experimental so-called mRNA "vaccines" to make phone calls and it was still lockdown in September 2021. No one was allowed anywhere, anyway and a couple months later, the un-injected were banned from restaurants, gyms and other local establishments. The psychological psyop of that period was truly intense and I doubt I will ever fully recover from the way I was treated.

So in September 2021, I was still recovering from a bad case of Bell's palsy in January 2021 (and left with permanent facial nerve damage called synkinesis) and I had a well-documented flu "vaccine" adverse reaction with permanent injury for which I received a VICP settlement in 2015. I submitted a copiously researched medical exemption request with literature references, even citing recent discussions with a vaccinologist who sympathized with me. At first my PCP wanted to assist but he confessed "Its a strange time.

The state medical boards are breathing down our necks." He consulted with a neurologist (who never met me) who told my PCP he could "virtually guarantee no adverse reactions would happen to your patient from the new mRNA "vaccines". Wow, how did that guy get through medical school? My PCP buckled, as he'd been threatened with loss of license, shaming and maybe job loss from the FSMB. I received a terse email reply "Sorry, we cannot help you. YOU do NOT meet CDC guidelines. Maybe you'd feel more comfortable with the J&J". You do NOT meet CDC guidelines! Never in almost 40 years of working in healthcare had I heard something so ridiculous!

## shirleykate

What were the 'suspicious circumstances' of Dr Andrew Moulden's death? I can find nothing on google.

Posted On 06/14/2024

---

## Guillermou

A colleague of Dr. Moulden who wishes to remain anonymous reported to Health Impact News that he/she had contact with him two weeks before he died in 2013. Dr. Moulden told our source and a small number of trusted colleagues in October of 2013 that he was about to break his silence and would be releasing new information which could have destroyed the vaccine model of disease management, destroyed a major source of funding for the pharmaceutical industry, and at the same time seriously damaged the foundation of the germ theory of disease. He was ready to come back. Even though he had been silenced, he had never stopped his research. Then, two weeks later, Dr. Moulden suddenly died...

He wrote: As many know, I officially quit my medical career in 2007. I did this in order to travel around North America to do research into vaccine safety and to present my research on vaccine safety across Canada and the United States. I only spoke the truth. I was not well received. I only tried to help you save yourselves from where you are right now...Harm's way, you ARE in it. It IS in ALL of you. Like a ticking bomb, it is about to go off..... ## Guillermou

Yes, destructive mRNA technology will destroy humanity. . Now, suddenly, despite evidence of serious danger, several mRNA "vaccines" are being prepared. These include a combination RNA COVID flu vaccine, which is currently being tested in ferrets, and several different mRNA seasonal flu vaccines, which have already entered human trials. As The Verge reported on July 7: Moderna CEO Stephanie Bancel said the company hopes to be able to create combination vaccines to protect against several different infections at the same time, such as influenza, COVID-19 and other respiratory infections: What we know is that conventional flu vaccines have the potential to cause viral interference with COVID mRNA shots, essentially making you more likely to get severe COVID-19 if you've received a conventional flu vaccine. . cindyloo, My son had shingles about 10 years ago. He went to get IV oxidative treatments. The shingles resolved in a week. The physician has helped our whole family through medical crises over the years with IV treatments.

## **cindyloo64**

I have not received the vaccine for shingles but I am a concerned about getting the virus. It can cause blindness. The side effects can be brutal. Can anyone advise me how they feel about the vaccine versus the virus??

## **YETISMOM**

As a former student of Chinese Traditional Medicine over 40 yeats ago I learned that cold, raw foods were very chilling to the body and can cause blood stagnation. A lot of over zealous vegans will ruin their health in a couple of years. In general, including ginger, garlic and various peppers in your diet will keep your blood flowing a lot better. I keep a bottle of Dr Christopher 's cayenne pepper extract handy to add to my doses of oregano oil or horse Aspirin I buy at the feed store. Another nifty product for breaking up your sticky blood is DMSO -- great for pain as well. i also like turpentine. I am not a medical doctor, just your average quack.

"Safe and Effective," (as we've been told) but what are the results of long-term studies? Of course there are no long-term studies because this is "novel." What will happen generations later? I refuse to speculate on that with my future children, so with all of the long-shot odds being against the special one for me finding each other, I add to a long list that she must be untainted by this experiment for which we are yet to see generational effects. But I'll venture to guess that they won't be part of future populations. For what's coming, we will need our immune systems to function as our Creator designed.

## nat3939

The American Dental Assoc; has slowly gotten away from amalgam (mercury 47% to 53%) fillings, and has gone to composite fillings. According to Hulda Clark in her book the "Cure for all Cancers", she notes that aluminum has been added to composite mixtures at the rate to make up the equal of tooth hardness. Composite (alone) fillings like pure gold is too soft to be used for chewing. Note: Gold crowns are a base metal of lead and not pure gold, far from it. ....As Laurel and Hardy would say, "another fine mess you gotten us in to."

Back in Adele Davis's day "Let's get Well", (1950's to the 1970's) potassium supplements were around 2500mg per day. Today supplements are stuck at 99mg thanks to the FDA. Recently I read an article by a pharmacist, who is also a ND that believes that potassium intake should be around 4800mg per day. .... It is well known today that the cottage cheese look, on the backs of some women's legs is called cellulite. It can be easily corrected with potassium intake from supplements and/or foods such as bananas, potatoes, and other potassium rich foods. .... The reason that women may seem to get cellulite and not men is that women are born with an extra layer of fat to keep warm while protecting her young during extreme cold conditions.

## Jud8611

Yup, I don't make recommendations to anyone. I have Rx K+ supplements and push those foods in my diet except bananas. I grow and freeze a lot of my own potatoes. I have no issues with my garden grown Yukons or sweets. I feel great when I eat organic non sprayed backyard potatoes!

**nat3939**

Let it not be forgotten that all service men and women receive vaccines when entering the service and get many more when they go overseas for one reason or another. And then given many vaccines to all our children from kindergarten to K12. After reading this article can you imagine all the damage that is being done to our American future, just to support the pharmaceuticals industry?

My sibling showed me a copy of her vax record from year 65-70 and it was OUTRAGEOUS then. I was taken to same pediatrician from 70' to 82 and boy, do I wish I had my vax record. At least I have an idea of what I got as a child. It was not one or two. And why the heck are Tb test done on 5 year olds back then?!?

## tappat4me

Thanks for all the insightful information regarding the mRNA vaccines and Covid-19. Correct me if I'm wrong, but currently there are no diagnostic test that can detect vaccine injury. Recently my partner's neurologist told us that the CDC doesn't offer any advice regarding treatment or diagnosis of vaccine injury. Doesn't surprise me, but is there any independent organizations that are working on a way to diagnose and treat the vaccine injured? I've seen several protocols for treatment online, however, they are untested and lack any significant supportive data regarding the effectiveness of treatment.

## Chaddio

This goes back to basic things like healthy eating and clean liquids, exercise to get things moving, and self lymphatic drainage like the recent Perry Nickelston's video. And self acupressure like Liver 3, Kidney 1, Stomach 36, and a host of others. Stagnant energy (blood, etc.) I've realized is a common theme in disease.

## TruthST8up

I developed juvenile rheumaty arthritis (and fibromyalgia) at the age of 5...! and I noticed sleep apnea as early as 15, but did not know what it was; and later in teens Osgood Slaughter. My older brother developed noninfectious mumps about 150 times in a few years, Osgood Slaughter, and apnea. My younger brother developed encephalitis. Vaccines INCUBATE disease, the ideal being for them to pop out 30 years later so the crime cannot be tied to the criminal (or even recognized as a crime, but merely "oh, everybody gets cancer, diabetes, arthritis, autism"); but according to the Bell Curve, some small % may die or be rendered a vegetable immediately, another small percentage may develop disease earlier; and another small percentage in late life or never. Vaccines are child abuse and crimes against humanity, in addition to being a global trillion dollar scam; and in the case of covid mass murder.

## billstri

I am glad to read this article! I regularly get text messages from my pharmacy that say their records indicate I am "unprotected" from whatever vaccine they are currently promoting. We need more studies done on vaccines by countries who do not have significant investments in the vaccine producing companies. In the US, vaccine companies are major contributors to re-election money to a certain party and candidates and those candidates will insure and protect vaccine companies from law suits. The idea of being "unprotected" seems to be the main message that promotes vaccines, a message of "fear".

But the message of consequences or risks of any medical procedure is hidden and replaced by the message of faith, hope, and positive assumptions. Doctor opinions get in the way because medical procedures benefit them financially and any consequences and many of the risks of a procedure often leads to a new future income stream to that doctor or their colleges. Our country was founded on Christian beliefs of faith and hope, but that is now being replaced by finding other sources of faith and hope, by false gods of medicine and materialism.

## Eevee

Can eating more fresh fruit and veg also help this zeta potential.. because of the water inside them ?  
Would adding a small amount of vegetable juice to filtered water (if one does not have a reverse osmosis) be of any benefit..?

**bfr27915**

IMO the lack of "objective truthful awareness" by the general populous is the central issue. Why do we have war and debt, not peace and prosperity? Well, are there powerful entities that benefit from war and debt? Powerful entities that benefit from vaccines and sickness? Awareness buys time, time buys options - until it doesn't. Stay aware and prepared.

Posted On 06/14/2024

**rw12341**

In the past I took flu vaccines twice. "Surprisingly", they did not have "serial control numbers" ;-). Both times I got sick and then decided: never again. :-)

I'm so glad to see the work of Andrew Mouldon being talked about finally.....he was such a brilliant, courageous and driven man. Just before he "died suddenly", he was in the process of launching an autism recovery clinic on the southeast coast.

Posted On 06/14/2024

---

**juststeve**

Are you aware if any of his work, therapy was saved for others to pick up and used for at the very least some hope for those families living with the once unknown levels of Autism?
